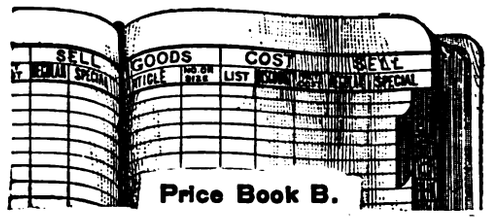
HARDWARE PRICE BOOKS.

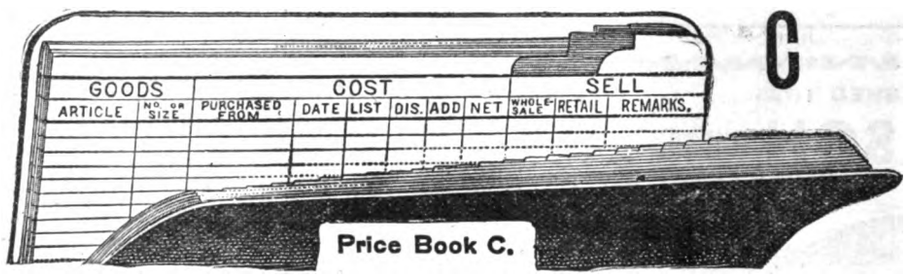
Arranged by R. R. WILLIAMS, Hardware Editor of The Iron Age.



These Price Books are made in a variety of sizes and styles adapted to pocket, store or desk use, and are specially arranged to meet the requirements of the Hardware and Metal trades. They are printed on paper of superior quality and bound in grain seal leather.

Columns are provided for the name and number or size of goods, for noting from whom purchased, date of quotation or purchase, list and discount, and for entering freight expenses. Under the heading of selling prices, the regular and any special price or remarks in regard to the goods are given place. ***Size of page, 4 x 7 inches.***

FOUR EDITIONS:



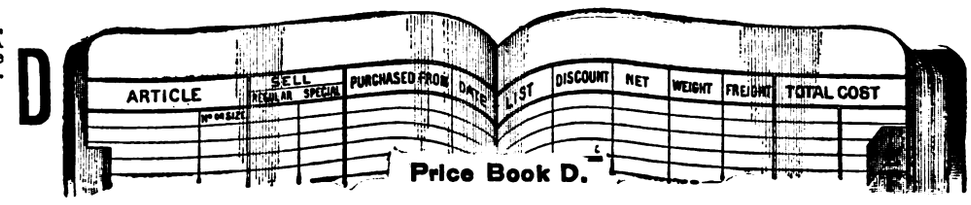
A, 200 pages, - - $1.00 **A 2**, 400 pages, - - $1.50
A F, 200 pages with flap, 1.25 **A F 2**, 400 pages with flap, 1.75

In this book each page is complete in itself, and the record of prices does not, as in Book A, run across two pages. Thus it accommodates a larger range of goods with much less detail in the record. By the use of familiar abbreviations is sufficiently large for the convenient and concise record of prices. ***Page, 4 x 7 inches.***

FOUR EDITIONS:

B, 200 pages, - - $1.00 **B 2**, 400 pages, - - $1.50
B F, 200 pages with flap, 1.25 **B F 2**, 400 pages with flap, 1.75

The headings in Book C run across the top, in a line parallel with the hinge. The details of weight and freight contained in Book A are omitted, and a single column headed "Add" given for the insertion of freight or other expenses. Under the selling prices space is left for the wholesale price, the retail price, and for remarks. ***Page, 4¼ x 7¾ inches.***



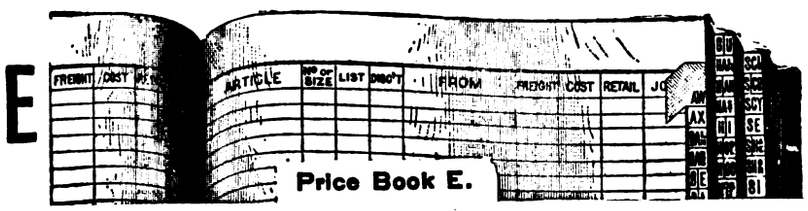
FOUR EDITIONS:

C, 200 pages, - - - $1.00
C F, 200 pages with flap, - 1.25
C 2, 400 pages, - - - 1.50
C F 2, 400 pages with flap, - 1.75

Suitable for desk and store use, and for salesmen on the road. A number of pages at the back of the book are arranged for memoranda. ***Page, 5¼ x 8 inches.***

FOUR EDITIONS:

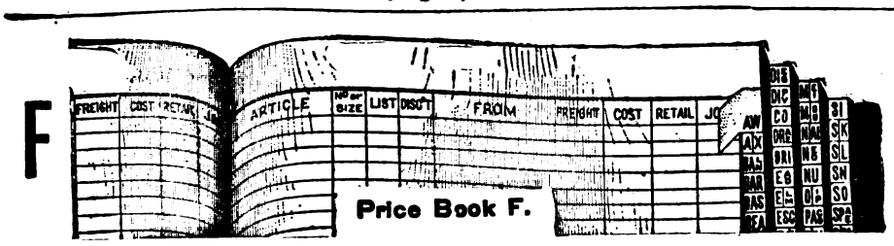
D, 200 pages, - - - $2.00
D F, 200 pages with flap, - 2.50
D 2, 400 pages, - - - 3.00
D F 2, 400 pages with flap, 3.50



MULTIPLE INDEX PRICE BOOKS.

A special feature of these books is the index, which is arranged with special reference to the classification of Hardware Goods, each index character giving the first two or three letters of the names of Hardware articles. There is an index character to every page, enabling immediate reference to any of the contents of the book. The ease and convenience with which the books can be used is indicated in the following examples, taken from Book F:

For Augers, turn to AU For Chisels, turn to CHI For Iron, turn to IRO
" Parers, Apple " PAR " Cutlery, " CUT " Irons, " IR'S



Both E and F are made of Heavy Ledger Paper and strongly bound in grain seal leather.

ESTABLISHED 1818.

THE OLDEST AND LEADING MANUFACTURERS OF GALVANIZED WIRE GOODS IN AMERICA.

PECK'S AXES AND EDGE TOOLS.

PECK'S CELEBRATED CHAMPION BRAND

AXES, ADZES AND HATCHETS

Manufactured from highest grades of materials under the favorite and well-known brands of

"PECK'S CHAMPION BLADE," "MANHATTAN," "EMPIRE" AND "MACY CLIPPER."

Manufactured by FRED. W. PECK, Successor to A. G. PECK & CO., Cohoes, N. Y., U. S. A.

Send for New Catalogue. Mention HARDWARE.

"Pennsylvania" Fruit Picker

This Cut almost speaks for itself—the device being so much like the human hand, shows at once the utility of the article.

AS A FRUIT PICKER IT HAS NO SUPERIOR.

It is made of Heavy Galvanized Wire, and Easily Adjusted to a Pole. It has been sold for several years, and the demand (as it is becoming known) is steadily increasing. The difficulty of detaching fruit and securing it unbruised is apparent to everyone so engaged. This overcomes the difficulty, and saves the finest fruit, which commands the highest prices. It will gather Apples, Peaches, Pears, Etc.

THE LOW PRICE AT WHICH IT IS SOLD

brings it within the reach of those who have but little fruit to gather as well as those who have large quantities.

Price per dozen, $3.50. ***Liberal discount to the trade.***

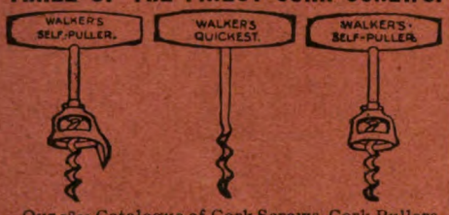
WHY IS C. E. JENNINGS' NEW AUGER BIT No. 1½

THE BEST BIT FOR WOOD BORING IN THE WORLD?



Because: There are good bits made for **hard wood.** The L'Hommedieu Ship Bit is an excellent tool for this purpose, but it is not designed for fine cabinet work or soft wood. There are good Bits for Soft Wood, but fail when used in **hard wood** We have combined two **principles in one,** and think we have solved the problem of putting a bit on the market that is suitable for all around use. Prices furnished the Trade on application.

HARDWARE

The wide awake buyer is the one who believes the only friendship in business should be mutual advantage; because the welcome salesman does his best to talk to your inside pocket.

With a firm conviction that long-winded accounts are the "hoodoos" of enterprise, the wise salesman is this year prepared to meet the "10 day" man in the cyclone cellar of his close quotations.

Henry R. Towne, president of Yale & Towne Mfg. Co., sailed for Europe on the steamer *Angusta Victoria*. Being greatly in need of a resting spell that will last six weeks or more, he knew that a trip abroad could not help but prove beneficial.

The Iowa Retail Hardware Dealers' Association will meet at Des Moines on the 28th inst. Although the meeting is primarily intended as an executive one, there will be an open session lasting several days, and it is expected that the members from all over the State will be largely represented.

When Mr. Nunan wanted to climb up the family tree, and engaged a gentleman whose front name was undoubtedly "Dennis"—for he is suing for his pay—to plant it for him, he should have mentioned that he was already "up to snuff," and that that part of the family history was "not to be sneezed at."

On an advancing market the temptation with a few buyers is to risk the purchase of some "off quality" article, believing the price will sell it. It's questionable policy, however, for in the quality of the goods the consumer soon forgets the quality of the price, and is spoiled for the future.

F. J. Mattison, No. 127 Duane Street, New York, has again been appointed the representative in New York City and vicinity of the Fred J. Meyers Mfg. Co., Hamilton, Ohio, he having relinquished the same a short time ago on account of ill health. Let us hope he will repeat his former successful management of this important line of specialties.

If James Gordon Bennett, the elder, could "revisit the glimpses of the moon," and get a chance to see a copy of the Sunday *Herald*, he would find so many of its prevailing features stolen bodily from the so-called yellow journals, that he would cry: "Hoot, mon, I canna bide wi' ye," and would return to his crypt in the family mausoleum and turn over on his face for very shame.

John J. Tower, of Tower & Lyon, is away enjoying a well-earned vacation in company with W. H. Tower, wife and son. They left New York on August 14th, intending to go to Quebec and through the St. Lawrence and Saguenay rivers to the British provinces as far as Halifax. May they thoroughly enjoy themselves, and the whole party return more capable of appreciating the good things in life.

Edward Darby, of Edward Darby & Sons, Philadelphia, and his daughter have just returned from a vacation trip abroad. He is on his way to Canada, being a delegate to the St. George's Society, now holding a session at Hamilton, Ont. Considering his age, which will be seventy nine next birthday, Mr. Darby shows wondrous vitality, and gives every appearance of many remaining years of usefulness.

The managers of the Buffalo, N. Y., Pan-American Exhibition have announced that after the big show opens, all peanuts must be hulled before sold. Now the question arises whether they will actually shut out all shell games. If this is actuated by some of the peanut politicians of this State, let us hope that the rights of the gum chewers will not be abridged, and that this limiting of peanut pleasures will not prevent these Southern kernals from being properly welcomed.

The Japanese Government has established an Imperial Commercial Museum, which will be run on the lines of the Commercial Museum at Philadelphia. They may well be called the "Yankees of the Orient," for they show the same enterprising spirit which is considered more essentially an American characteristic. This is an opportunity among others which our manufacturers should use to the fullest extent, and have at the same time an intelligent representative within reach, capable of increasing our commercial relations on the slightest provocation in the interest of our export advantages.

Let us hope that "Guam Cocktails" will not be added to our Metropolitan assortment, after the following unique description given by "Gunner Shea," just arrived from that province of ours: "As to the liquor," said Gunner Shea, after the manner of a man who had caught himself on the point of overlooking the main features of his story. "It's a combination of mescal and aguadiente and something else. If you take one drink you think you like it, and when you get the second one you don't care, but wait till you've shipped about four. Then you'd better batten down your hatches, because there'll be rough weather."

The sight which one would suppose was singularly calculated to make a well-dispcsed angel shed real tears is to see a callow youth of the "$3 per" variety, tripping gracefully along with a two-inch reef taken in the bottom rim of a pair of 98-cent crash trousers, beneath which are noticed, in all their pristine elegance, a pair of low-cut yellow shoes, of the "marked down from $2.50" degree of excellence. The self-satisfied air with which this would-be up-to-date young man informs his paternal parent that "made up red neckties are no longer the vogue," should make the Angel Gabriel end the game of life by playing his last trump.

James L. Pollitt, London Manager of the Bissell Carpet Sweeper Co. has been diverting himself by taking snapshots of the big stores and other places of interest in and about Chicago. His friends say "Jim" has snapped everything he saw in the "Windy City," from a prairie farmer riding a load of hay, to the Masonic Temple, and it is also said of Mr, Pollitt that he greatly appreciates this country, expressing wonderment why so many Americans go abroad in search of scenery when they have such wealth of it at home. Mr. Pollitt, after visiting Toledo, Cleveland, Pittsburgh, Philadelphia, Baltimore, Washington, Boston and New York during the present month, will depart for London about September 1st.

HARDWARE

VOL. XIX. AUGUST 25, 1899. NO. 10.

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade. Published the 10th and 25th of each month, by the HARDWARE PUBLISHING CO., No. 143 CHAMBERS ST., NEW YORK.

Subscription, $1.00 per year. Subscription, Foreign, $1.50 per year.

L. E. MITCHELL, - - President.
E. N. ROOT, - - - - Treasurer.
W. C. BRUNDAGE, - - Business Manager.
HENRY HOPKINS, - - Editor.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

Vacations have been appreciated this summer by those able to take advantage of them, more than ever before; the strain of the past season having affected the managers and partners, equally with those to whom physical exertion is the prominent characteristic.

It was a season long to be remembered by the entire trade, commencing in doubt and uncertainty as to a possible future of high prices; and ending with an acknowledgement that prices have surpassed all anticipations, and with the problem facing the dealer whether enough goods can be obtained to make up the season's full trade, under the unprecedented demand springing into existence so universally upon every hand, and bidding defiance to every established precedent in the ethics of business by which past seasons of prosperity —few and far between—have been gauged and brought to a successful issue.

Scarcely a man connected with the industry but must see at the present moment, that the opportunity of his life for a profitable ending to his business plans, is right in front of him. The country is full of vital forces all working in harmony for grand results. The ambitious manufacturer is straining every nerve to achieve results, which nothing but inability to obtain what may be classed as his raw material, will prevent. With order books filled to the verge of repletion, doubts are being entertained whether they can do more than keep their customers from loud complaining by partial deliveries.

Higher prices are easily obtainable on every hand, with only the sureness of being able to furnish the goods, standing between the gratifying demand and the certain profits. If it were only certain that no pig iron famine shall prevail; no inability to get the stuff from which the country's wealth, at present in embryo, will be brought into existence and distributed to a welcoming constituency, there would be a certainty of a division of a high tide of profits to shower sunshine in 1900, and bring forth still greater aggregations of product.

The smaller towns all over the State have already felt the impetus, which the large cities have stimulated by their greater example. Stocks at the close of 1898 were by no means large in the hands of the retailers, who had been cautious buyers for many years. The jobbers even, were halting between two opinions in many cases, to order stocks offered so near old prices as to create the hesitancy it was intended to obliterate. But with the retailers, having back of their customers the wealth-giving crops that made consumers willing to make purchases freely, in order to supply those lessened facilities which enforced economy had made extremely meager, purchases were soon stimulated and a vigorous demand ensued even at advancing prices; and to-day, the jobber himself is converted to the belief that he must get a stock of goods if possible, as low in price as possible, but get the goods he must, or else he becomes a "has been" and can no longer be counted as "in the swim."

The nail trust like others have avoided antagonizing the larger purchasers, by so arranging their prices that with each successive advance there were still left differences between the price to the wholesaler and the retailer, which took away from transactions the usual latent fear of selling at cost or at a loss by competition with the makers. Jobbers who had stocks to sell found that manufacturers maintained these differential prices, and could do so safely through inability to deliver promptly orders already booked by customers who were clamoring for even earlier shipments than specifications had nominated.

Every element entering into the branch of the Hardware business classed as builders' Hardware is in the most progressive state imaginable; from the lowest possible ebb, prices have risen by gradual changes, until in many lines the advance since January represents fifty per cent. difference. A portion of this apparently abnormal advance has been already discounted by the trade, whose selling rates have changed with every ten per cent. added to a manufacturer's discount sheet. The jobbers have the finest year to figure on, which the trade has seen since the early sixties, and if the inventory doesn't show up well in the way of ascertained net profits the buyer should be interviewed by the head of the firm.

Inability to Stand Prosperity.

The prevailing epidemic of strikes seems to provoke philosophic discussion. It is only a year ago since the plodding wayfarer was met on every highway by the idle mechanic who had been hunting everywhere for employment, and unable to find it, desired assistance. To-day, when no able-bodied man willing to work need be idle, the improved conditions surrounding the field of labor are such, that the price paid the iron workers especially seems fabulous considering the class of work in which they are engaged.

And yet in almost every section of the country where organized labor finds speedy employment, with prospects of long continuance, the wage-earner is becoming restless, fearful that he is not getting his full share of the prosperity which these changed conditions produces.

Strikes become the order of the day. The restless energies of the busy worker find new and unproductive employment. He cannot stand prosperity and he is not prepared to enjoy the present high grade of rapidly increasing wages. He finds new reasons for striking down the hand that feeds him, and he doesnt have far to seek for a disturbing influence. A few non-union workman in a shop will create a rebellion in 500 men, and set a productive industry in industrial confusion. The discharge of a favored leader in shop economy,

Digitized by Google

creates a demand for his instant reinstatement, or anarchy ensues and a sympathetic strike intensifies the antagonism which plenty of work should make impossible.

Now it seems as though these things should not break in on the harmony of prosperous industrial advancement, but they do; and the anxious manufacturer endeavoring to avoid the worries that too frequently afflict industrial activity, hunts sedulously for a remedy and fails to find it.

Sewing Machines and the Hardware Trade.

The article recently published by us under this caption having elicited numerous commendations from our readers, we invite a careful perusal of another article upon the same subject which will be found on one of our pages of this issue.

The communication is written by a gentleman who has made the introduction of sewing machines into the Hardware trade the subject of much close study and ambitious effort, and we feel we have been extremely fortunate in being able to secure from him the fruit of his experience upon the subject, especially in such a condensed form and couched in such pithy and convincing language.

Although the writer is actively engaged in the sewing machine business, being connected with a company which at the present time is selling the Hardware trade one hundred and fifty thousand machines annually, the article is written with a view to its proving of interest and benefit to the trade in general, by bringing to the attention of those not already identified with this profitable side line, some ideas which should have earnest consideration.

Death of Charles L. Mead.

Charles Levi Mead, the President and Treasurer of Stanley Rule & Level Co., Co., New Britain, Conn., died of dilatation of the heart Saturday, August 19th, at his Summer cottage in Norfolk, Conn. He was attending a housewarming given by Professor M. I. Pupin of Columbia University, who living nearby had invited a number of his neighbors and their visitors, Mr. Mead being one of the guests, and although Mr. Mead was apparently in good health, except a slight cold, he was stricken while at the table and died almost instantly.

Mr. Mead was born in Chesterfield, New Hampshire, a small town opposite Brattleboro, Vermont, January 21, 1833, removing to the latter place when six years old.

Mr. Mead has been an active business man all his life, having commenced the manufacture of rules and plumbs and levels at an early date by purchasing the business established by E. A. Stearns & Co., at Brattleboro, Vt. Having accepted a position on the staff of the Adjutant General of Vermont at the breaking out of the Civil War, this business was sold to the Stanley Rule & Level Co., New Britain, Conn., with which company he became identified as director and treasurer. When the war closed, he assumed, about 1871, the direction of the New York business of that company in this city. On the death of the former president, Henry Stanley, fifteen years ago, Mr. Mead was elected president, the duties of which office he performed until his death, in addition to those of the treasurership.

Mr. Mead was very quiet and unassuming in his outward characteristics, was capable of forming the warmest friendships which long continued. Never showing anything that could be called an ebullition of temper, he was noted for a high order of business capacity, great diplomacy and quiet tact, with an abiding faith in that perfect honesty of purpose of which he was a fitting example. He was noted for a wonderful memory which enabled him to recall those readily whose intimacy was not of the closest character, he always had a good word and cordial greeting for all with whom he came in contact.

Mr. Mead was on the executive committee of the American Missionary Association over twenty-five years, having only last fall resigned the position of chairman of the committee. He was also a trustee of the Hampton Normal and Industrial Institute, Hampton, Va., long a deacon and trustee of the Broadway Tabernacle Church, New York, and a member of the Hardware Club.

Funeral services were held at the cottage in Norfolk, the interment being at Brattleboro on Tuesday. The honorary pallbearers were prominent business and social friends of Mr. Mead, among them being Charles B. Stanley and H. S. Walter, of the company at New Britain, and Frank H. Thompson, manager of the New York warehouse, who has been connected with the company for thirty years.

Pencillings by the Way.

George N. Lusson, the traveling representative abroad of Greene, Tweed & Co., No. 17 Murray Street, New York, sends us the following "Pencillings by the Way" from Paris, which will prove of interest to our readers

In France the car wheels greatly resemble the common cast iron wheels that are used on our harvesting machines. Many of them are flattened and slightly misshapen, having the effect of making the car ride roughly in spite of splendid road beds and tracks.

In introducing a line of manufactures in Paris manufacturers must establish a depot or sole agency where reatilers can pick up the goods as they sell them. Large orders to start with are out of the question, the French jobber being a very careful and conservative buyer and the retailer prefers to buy even the most staple goods from day to day, instead of stocking up in order to get quantity prices.

The builders' Hardware usually carried in stock in Paris, is as a rule, of a very cheap grade. The Hardware for the fine residences for which the residential section of Paris is noted, is frequently made to order with the coat of arms and crest or initials of the owners ornamenting its surface. In London the builders' Hardware is of a very good serviceable quality, but I notice that brass is much more frequently used than bronze metal. Door knobs in both Paris and London are placed in the middle of the door and can only be worked from the inside. The key opening the door from the outside by means of a latch bolt. Cupboard turns are not used at all in Paris, the cupboards being built in the walls, incased and papered over, being opened and shut by a wardrobe lock and usual key.

In France hand saws are not much used, French carpenters preferring an appliance working in a manner similar to our buck saws. I find that American patent kitchen utensils are much in demand and sell readily.

French custom house duties are based largely on the weight of, and the space occupied, by the goods imported.

I experienced no difficulty in getting the necessary interviews and opportunity of speaking to the larger dealers. The wholesale dealers in France nearly all speak and read English.

Messrs. Roux, Freres and Cie., No. 54 Boulevard du Temple, Paris, are jobbers and agents for a large number of American and English lines of Hardware. Mr. Albert Roux spent some time in connection with The Orr & Lockett Hardware Co., of Chicago.

Mr. Paul C. Bornemann, American Novelty Co., No. 39 Passage Jouffroy, Paris., is looking for lines of bicycle supplies and novelties in American Hardware. He would be pleased to receive catalogues with a view of opening up correspondence.

Copper Coin to Be Melted.

The Oxford Copper Co., of this city, has received an interesting consignment from India in the shape of 9999 bags, or 250 tons, of copper coins, which arrived by the steamship *Cevic* recently. The coins were imported as copper scraps, and will be melted up and refined. With the price of copper standing as at present, at 18½ cents a pound for lake, they are worth more as copper than as coins. The copper coins of China, it is said, can also now be profitably imported and melted up for the copper that is in them. There was a profit in coining for the Oriental countries when copper ruled at 10 cents a pound.—*N. Y. Commercial.*

Ploesch Schwab & Co., of Bozingen and Biel the largest engineering establishment in Switzerland, has been represented in this country for sometime by A. Lenenberger, who sailed for home recently on the Cunard steamer *Lucania.* While in this country he inspected the various wire nail and screw factories, to ascertain what processes were needed, and what machinery was essential, to enable the home manufacturer to hope to equal the American product, which was already rapidly superceding in China and Japan and other countries, the foreign makes that previously controlled those large markets. Mr. Lenenberger stated previous to his departure for home, that he was greatly impressed by the perfect facilities within reach of the American producer; and would feel justified in strongly recommending the adoption of our methods in the manufacture of wire nails and wood screws. He had every reason to believe that his visit would result in a number of important orders being given at an early date for the necessary automatic machinery to improve the industrial conditions which of late have retarded their progress.

It is stated that the executive committee of the New York Credit Men's Association discussed at its August meeting the consideration of the subject of forming a subscription fund of $10,000 for the purpose of strengthening their investigation and prosecution committee. It was proposed that with this fund in hand fraudulent debtors will be prosecuted to the full extent of the law, will be prevented going through the bankruptcy courts, and that it will be a great machine for making dishonesty in business much more difficult than it is at present. A committee has been appointed to take it into consideration and formulate the best plans possible for making this fund a powerful and successful weapon.

The American Tool Works, of Cincinnati, have been crowded with orders of late, and it is reported that their foreign business is assuming such hugh proportions that they are contemplating an extensive addition to their already large plant. Recent reports of this concern embrace important shipments of machine tools to the British Projectile Co., of London, Eng., and De Fries & Co., of Dusseldorf, Germany. Numerous consignments, averaging a dozen cases each, were recently made to Berlin, Germany, and St. Petersburg and Rostop-on-Don, Russia. An important shipment of drill presses is soon to be sent to Yokohama, Japan.

The F. & N. Lawn Mower Co., of Richmond, Ind., are building a warehouse on the lot they own in connection with their factory. This warehouse will hold, when completed, 40,000 to 50,000 mowers. They also announce they will commence operating their factory about August 25th, and hope to have a good stock of goods on hand to meet the requirements of the trade. Their general sales manager, Mr. George B. Main, now in New York enjoying a vacation, informs us that it is the purpose of the company to ship out on date specified every order for lawn mowers for 1900 and will be prepared to furnish 100,000.

How the World Carries Its Money.

To the initiated, a man's nationality is betrayed by the way he carries his money. The Englishman carries his loose in his right-hand trousers' pocket—gold, silver and copper all mixed up together. He pulls a handful of the mixture out of his pocket in a large, opulent way and selects the coins he has need of.

The American carries his wad of bills in a peculiar long, narrow pocketbook, in which the greenbacks lie flat. The Frenchman makes use of a leather purse, with no distinguishing characteristics, while the Germans use one gayly embroidered in silks by the fair hands of some Lottchen or Mina.

The half-civilized capitalist from some torrid South American city carries his dollars in a belt, with cunningly devised pockets to baffle the gentlemen with the light fingers. Some of these belts are very expensive.

The Italian of the poorer classes ties up his little fortune in a gayly colored handkerchief secured with many knots, which he secretes in some mysterious manner about his clothes.

A similar course has charms for the Spaniard, while the lower class Russian exhibits a preference for his boots or the lining of his clothes as a hiding place for his savings. —*Exchange.*

It is worth noting in regard to the famous hemp produced exclusively in the Philippines that the plant yields, in fact, two qualities, with important industrial or commercial adaptations in each case. From the best, or fibrous outer leaf comes the coarse, strong fiber, which is the best material for sailcloths and cordage, it being particularly recommended by the fact that it is not easily rotted by salt water. The fiber yielded by the inner stalks is fine and weak, and from it are woven textile fabrics superior in softness and lightness to those made of the best Russian hemp. These fabrics, however, are seldom exported, as they are bought by Chinese merchants at Manila for local consumption. It is found that under the best conditions the manila hemp produces the very large quantity of 3000 pounds of fiber to the acre, and, though between 5,000,000 and 6,000,000 bales have been exported in the last 10 years, the industry is admitted to be still in its infancy.—*Bangor Commercial.*

Having reference to a paragraph in another column concerning Indian copper coins sent here for melting into ingots, Robert M. Thompson, who is prominent in copper interests has this to say: "An erroneous impression had arisen that these coins were withdrawn from circulation because the market price of the metal was so high that the coins were worth more as metal than they were worth in circulation. The fact is said to be that the coins in question have a circulating value equal to about 34 cents a pound of copper; whereas, they were sold at less than 14 cents a pound." Mr. Thompson says the coins were sold by one of the Indian States, which had withdrawn them from circulation, replacing them by a small silver coin, and the move is part of the general change taking place in the standard in India.

A dealer will keep in stock what the people want if he is a shrewd storekeeper. The thing for the manufacturer of any commodity to do is to make his consumers want his goods, by advertising. I believe in all kinds of advertising that will get or keep the people's attention.—H. L. KRAMER.

Aguadilla, in the northwestern part of Puerto Rico, has 5000 people. The climate is hot, but healthy.—*Exchange.*

Puerto Rico is thirty-five miles broad and ninety-five miles long, with an area of 3668 square miles.—*Exchange.*

SEWING MACHINES AND THE HARDWARE TRADE.--II.

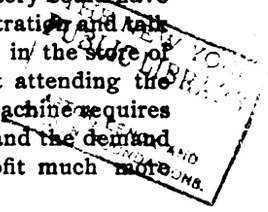
In building up and establishing a popular trade in sewing machines with the Hardware dealer, one of the greatest drawbacks with which we are forced to contend, is the fact that heretofore in the majority of instances where the sale of sewing machines has been undertaken, the dealer has dealt only in a low or medium grade machine, until the public have almost concluded that when they want a first-class machine it is necessary for them to be imposed upon by the specious arguments of the omnipresent peddler.

It is a well-known fact that these so-called "sewing-machine agents" distribute annually in this country alone nearly ten hundred thousand machines. Moreover, these one million machines are sold to the consumer at an average price of at least $45 each. Now, in what other line of household goods are the conditions such as to allow two-thirds of the entire trade in that particular line, to be marketed at a price which all manufacturers and most of the thinking public know to be a price nearly double what it should be.

What a field is here presented for the Hardware trade if they can divert this enormous output to the legitimate lines of trade?

The time has been reached when the sewing machine is as much a household necessity as the cook stove. No housewife will cook without a stove, nor will she do her sewing by hand when it is possible, as it is now, to secure through reputable Hardware dealers a first-class machine for twenty-five to thirty dollars. Every home does or must have one, hence the demand is a staple and constant one.

All makers realize the great expense which springs from distributing sewing machines by the old agency plan which includes the salaries of peddlers, district managers and others, office expenses and cost of maintaining the teams, wagons, etc. The time has been reached when this expense can be saved the consumer in the reduction of its cost.



When the peddler first entered the field he was compelled to create the demand, as well as instruct the operator in all the details connected with its use. Now, in most instances where a sewing machine is to be bought, the woman who is to use it was born in a home where a sewing machine was used, and she has grown up with it, and is as familiar with its general care and handling as with the stove and other household utensils. This being the fact, there is no longer need of special instructions being given by a machine peddler, in fact, they have come into disrepute, and should be declared a nuisance.

One of the principal reasons why catalogue and supply houses always place great stress on their line of sewing machines, is because they are the best sellers on their list. Why is this so? Largely because the consumer is anxious to escape the sewing machine man and his inflated price. It is not at all essential that a dealer in machines should be expert in their use, all prevailing notions to the contrary come from practices adopted years ago for forcing sales.

It is no more of a necessity for the merchant to be an expert cook in order to sell a stove than that he should be an expert operator in order to succeed as a salesman of sewing machines. The entire plan of distributing this line, like others, is changing and the most economical methods consistent with good business are being adopted.

There are now manufacturers who make a specialty of building first-class sewing machines for the jobbing trade. By placing them with the jobber at a close manufacturer's profit and for cash f. o. b. the factory, they save the expense of a corps of travelers, numerous branch offices, etc., and this puts the jobber in a position where he can sell them to the retail dealer cheaper than the maker could do it himself, and the factory has an indirect representative calling on the dealer every three or four weeks who endeavors to keep the dealer enthused in their sale and supplies him with his needs more quickly than if the goods had to come from the factory.

The advantage to the dealer of this mode of distribution is not only, as has been mentioned, a lower price than if he dealt direct with the maker, but he is enabled to increase his profit by the amount saved in freight, the jobber giving him the advantage of the carload rate, from the factory to the jobbing centre. Not only this, but the dealer comes in contact with someone who can help him over little difficulties or hard places more often than any factory could have a representative call on him. The demonstration and talk leading up to the sale of a sewing machine in the store of a retailer is no more unpleasant than that attending the sale of a washing machine. The sewing machine requires no more room on the floor or in the stock, and the demand is greater in many localities and the profit much more satisfactory.

Considering the low price of all material used in their construction and equipment, as compared say with ten to twelve years ago, and not forgetting the wonderful improvements in machinery and methods, it is easy to see that the sewing machine can be, and is produced to-day at a price very much less than the amount constituting its cost in the early eighties. The cost of distributing the goods through peddlers has increased rather than diminished during this period. Attention is called to this to counteract any impression which might arise in the mind of any reader that the manufacturers of machines using the peddler method might be able to reduce their price sufficiently to compete with them should they undertake the sale of the line. The manufacturer who is ignoring the reputable dealer is not in a position to discard his present methods and adopt new ones.

It is possible, because of the decrease in the cost of materials and the saving in this new plan of distribution, to place in the hands of the retail dealer and the consumer a machine equal in finish, adjustment and capacity to any sewing machine on the market to-day.

Sewing machines have been before the public so long the important patents are all common property; therefore, like bicycles, they are very much alike in all important features. The up-to-date manufacturer of these goods is the one who uses the principles which have survived the test of experience and has incorporated into his patterns from time to time improvements of merit, among which might be especially mentioned ball-bearings, which have added so greatly to the popularity of the bicycle. It is universally admitted by every one in a position to judge, that ball-bearings are immensely superior to any other style of bearings for delicate and light running machinery. Sewing machines are now made with stands which have three distinct ball-bearings, containing, all told, forty accurately ground and hardened steel balls. The time is rapidly approaching, if it has not already been reached, when no sewing machine will be considered strictly first-class unless it contains this great improvement.

A sewing machine to work well and always be ready to do good work under any and all circumstances, without the intervention of an expert, should be non-sensitive, or

Digitized by Google

for a better term we will say, as near "fool-proof" as possible. A machine which will combine this quality with others is the machine desired by the dealer who lacks in experience in the sale of these goods, and in fact by all dealers, because all of them are ambitious to sell goods which will make friends, and, as a consequence, induce sales in any neighborhood where they have been introduced. A dealer derives great satisfaction from having a stranger come into his place of business, and say: "My wife insists upon having a sewing machine like Mrs. Smith's, and I understand it was bought here." You will find sewing machines a quick and easy trade-builder; the demand constant and increasing, selling at all seasons of the year; not depreciating in value while in stock, nor going out of date if you buy the right goods.

St. Joseph, Mo. Henry W. Darling.

Recent Trade Publications.

The Meriden Britannia Co., Meriden, Conn. A handsomely illustrated catalogue called the "Trophy Book," in which are given artistic illustrations of everything manufactured by them that will answer as a trophy for tennis, golf, whist and other tournaments to which the offering of prizes and challenge trophies have proved a very attractive feature. Hotels throughout the country have added a tournament of some description to their many other valuable features, and the Meriden Britannia Co. seek to supply the article for which they make the contest with the certainty of appreciation. The pamphlet is very handsomely gotten up, the engraving is first class, and the mechanical excellence as perfect as is possible to obtain. It is a catalogue that should be in the hands of every hardware man, whose opportunity for supplying something of this sort would be more apt, had he the means of displaying, in the way this book furnishes him the opportunity for.

Wm. H. Horstmann Co., Philadelphia, Pa. A Catalogue of Flags. This is a pamphlet catalogue of fifty pages, in which every description of flag is listed, and every other ornamental spear, etc., suitable for flag poles, together with carriers for flag belts and cords, as well as banners for Sunday schools and societies, the illustrations being in the regulation colors of the standard, making it a very desirable publication from which to select. It is a catalogue which very rarely reaches the Hardwareman, yet his opportunities for supplying this want are as good as any other dealer in town. The assortment also covers a variety of flag brackets, flag and banner stands, and flag holders, as well as the usual flag staffs with their customary ornaments, making the catalogue a very attractive and desirable one, and well worth adding to the catalogues considered indispensible to the Hardware dealer.

The Wabash Screen Door Co., Rhinelander, Wis. This is a pamphlet catalogue of a line of crystalized and antique stove boards made by this concern, illustrated in a very unique manner. The method of showing the style of stove boards made by them is a very attractive one, being on silvered paper, which shows a very attractive background throughout the illustrations; as these are shown in various colors in addition to the silver background, it presents a very handsome feature worthy to be imitated by other manufacturers.

The Goodell-Pratt Co., Greenfield, Mass. Catalogue of Tools No. 4. An attractive catalogue of seventy-two pages printed on coated paper, profusely illustrated, and with a full description of the goods throughout, making it an up-to-date catalogue in every sense of the word, and a desirable one for Hardwaremen to have. The line of goods covers automatic screw drivers, automatic drills, hand drills, hand and bench drills, bench drills, drill chucks, and hack-saw frames. Also illustrates a power hack-saw and bench hack-saw. This company manufactures tool or tap holders, pin vices, and a variety of polishing heads and ratchet braces. They also make a variety of tool sets, and screw driver sets worthy of the attention of those who sell this class of goods.

The Coleman Hardware Co., No. 59 Dearborn Street, Chicago, Ill. This is a pamphlet catalogue of forty pages, printed on excellent paper, and fully illustrated, covering a line of builders' and cabinet hardware manufactured by the above concern, consisting of Philadelphia casters, common plate casters, bracket, bed and globe casters, and the Perfection iron bed caster. In addition to which they manufacture chest handles, barn-door handles, Nickle No. 5, Roller-bearing No. 10, and J. G. C. hangers, and the Nickle barn door hanger, together with suitable rail for the same. Included with these they manufacture the Schumard sash balance and the Nickel stamped steel ball-bearing stove casters.

The Standard Welding Co., Cleveland, Ohio. A pamphlet catalogue of sixteen pages, illustrating the welded bicycle parts manufactured by this company, which includes L and T seat posts, D and oval rear forks and stays, new round chain adjusters, mud-guard braces, fork sides, stationary handle bars, as well as a line of bicycle tubing, all of which are electrically welded, and guaranteed by this company to be equal if not superior to any goods on the market.

Acme Ball-Bearing & Caster Co., No. 220 Broadway, New York City. A pamphlet catalogue of twenty pages, in which are illustrated the Acme Ball Bearing Caster in all its varieties, from ¾-inch, Surface ball suitable for chairs and all furniture, to 2-inch Surface ball for heavy desks and chairs, either round or square socket, up to the suitable sizes for heavy furniture, which includes 1 inch, 1⅛ and 1¼-inch, which can be used for upright pianos, brass beds, etc. They also make a line of smaller casters of the same style suitable for iron-frame sewing machines, trunks, sliding doors, etc.

T. McAvity & Sons. St. Johns, N. B. Canada. Illustrated catalogue of 100 pages, with price list of engineers' and steam-fitters' brass goods and supplies. It is called "Catalogue No. 27," consisting of 100 pages, fully illustrated, with a great variety of goods coming under this special designation. It is a very desirable and handy pamphlet, issued in pocket size, so as to make it convenient for the working mechanic to carry in his pocket. They make a very large line of these goods for globe and angle valves up to locomotive cylinder lubricators, together with all the original appliances suitable in connection with the same.

Bissell Carpet Sweeper Co.'s Annual Election.

The annual meeting of the stockholders of the Bissell Carpet Sweeper Co. was held at the office of the company on Thursday, August 3d, and the following persons were chosen as board of directors for the coming year: Mrs. M. R. Bissell, M. Shanahan, Chas. B. Judd, W. J Drew, T. W. Williams, W. S. McKay, and Robert E. Shanahan.

The officers elected were: Mrs. M. R. Bissell, president and general manager; Chas. B. Judd, vice-president; T. W. Williams, second vice-president and Eastern manager; M. Shanahan, treasurer, and Robert E. Shanahan, secretary. Fred McR. Dean was appointed cashier.

As Mr. Judd's health is not yet fully restored, Mrs. Bissell retains the management for another year.

The company have just closed a very successful year's business, and confidently expect the largest fall and holiday trade in their history.

Hardware's "Prices Current" are reliable.

HARDWARE TOPICS BY THE WAY.

Strikes, nothing but strikes! It's epidemical. The workmen have already forgotten the lessons of the hard times. Prosperity has "turned their heads." The inflated cranium of the strike agitator bobs up in all directions. "Give us work," they cried from '93 to '97, "or we and our families will starve." The tide turned, and work came on a plenty, and with it nominally better wages all around. Dynamite the plutocrats! Down with the rich! The employer be d—! is the cry now. Meanwhile, the employers find ways and means by which to protect their interests. They form trusts, combinations and corporations, and buy all the labor-saving machinery that offers, and give the incentive to still more radical improvements. Then conditions shape themselves for another depression. Employment grows scarce, and wages fall. The cry of starvation again rends the air. But it will be too late. Labor in its own efforts to outwing capital, has forever ruined its opportunities. The results of another panic will be laid at the door of the labor disturbers who wax fat upon the credulity and nonentity of the constituency they presume to represent. Not the employer is the subjugator of labor, but the labor agitator.

The Cleveland railway strike has fizzled out into imported buncombe—a boycott, and the Hardware dealers have countermanded rush orders for firearms and ammunition. The strike has only taught one valuable lesson, viz: The labor despot is infinitely more nervic that the capital despot. The former does not want peace at any price, the latter refuses to arbitrate in matters of honor and pride.

Charley.—I am now able to buy that long-promised bicycle. I have saved for you for six months, and to-day selected a $50 '99 model at Bargainwell's, and it cost me—you know I'm a privileged character—only $17.77.

Maud.—Sorry, Charlie, but bicycles have become too plebeian. Keep on saving till next season, and buy me a voiturette. They push themselves, and I shall need my leg power for golfing, anyway.

A Western Hardware merchant will visit the Paris exposition next year, and incidentally do provincial France. He has learned so much of the antique porcelain stoves of the French, he intends to introduce the feature in America, after improved models, thus imparting a certain Yankee type.

Don't put any stock in scare crows. The crops are all right and bounteous. A few hail stones, and a little more or less rain do not alter materially the primary aspect of conditions.

"We are in the saddle!" announces a Western Hardware dealer. In passing his store I noticed a saddle "trapezed" over the entrance, with the person of the merchant as occupant. He simply looked pleasant and distributed dodgers to the gaping multitude.

The strikers in Europe have created an unprecedented demand for American labor-saving machinery and devices. American manufacturers and agents are in regular receipt of inquiries and orders. So, the foreign employer has come to feel the heel and teeth of the laborcrat! Send on your orders.

Here's an enterprise bespeaking the millennial accumen: In order to introduce his wheel, a Western cycle manufacturer has collected a museum of cyclist freaks whom he will place on exhibition. Each is labeled with the competitive wheel he has ridden to his freakdom.

There is no let up in any industrial branch of the iron industry. And this is mid-summer. What will it be in autumn and during the winter months, when both body and soul are more laboriously inclined!

The question of what to do with the old ditch, historically known as the Erie canal, is again on the tapis. Engineers deem it impracticable to reconstruct the old waterway, and the ship canal project is practically dead. Yet the Empire State regrets to part with the once golden artery of trade and commerce, and it is likely that it will be abandoned to petty local trade. Maybe the steel canal boat system will be extended so as to prolong the usefulness of the dear old ditch.

The fire which visited the plant of the Cleveland Stone Co., at Berea, O., left nothing but the possibility of a grindstone fire sale.

I just perused a German catalogue and found this passage: "Galion, the capital of Ohio, has the greatest carriage industry in the world. Hundreds of complete sets and parts are turned out there every day, and the railroad shipping platforms are always scenes of activity." Thank you, my German friend. Your conception of American magnitude is sounder than the average, even though you are geographically at sea. Galion, the capital of the Ohio carriage world, would just about hit the nail on the head.

A Western specialist of the perforated metal trade exhibits an automaton in the window that occupies his time playing cards with itself, the deck being composed of perforated metal samples cut to the size of regulation playing cards.

The steam laundering business is growing to such extent that many wholesalers have found it profitable to carry laundry machinery in stock.

A Western Hardware dealer specializes but one article at a time, and he continues pushing it until everybody knows what it is. His latest exploitation is a riveter for mending harness and belting. Since pushing it the sales are about 100 a week to shops, and 200 to farmers and country dealers. It's a handy tool, but the people didn't know it. They do now, and appreciate the discovery.

Next to the Philippine cat-and-dog fight and devil's war dance, let's try something more practicable—the creation of a merchant marine. Our fighting navy is big enough for years to come.

In a Western "M. Quad" town two cross roads merchants are at competitive logerheads, and they have come to their wits' ends in catching trade by fair means or foul. As a last resort, one of the contestants had a trap door built in the rear of his storeroom, and woe to the visitor who, "guessed he was going across the way to save a few cents." He was simply confidentially buttonholed, escorted upon the trap door and presto! down he was in the cyclone cellar howling for mercy and offering to pay any price and mortgage his mule to get out. The scheme worked until a customer "squealed" to the sheriff, and the merchant is now revising his trap-door salesmanship in the County lock-up

Strangely enough, he stands charged with highway robbery.

Yankee ingenuity is now making waterproofing out of the once despised maize plant. Who will materialize the next equitable substitute for rubber? This invention is the third in the trinity of up-to-date scientific climaxes—the other two being German artificial coal and cotton.

Cleveland, O., Aug., 1899. JOHN B. RINDFLEISCH.

Export Notes.

The Eastwood Wire Co. is about to ship a big lot of valves to Berlin.

Some 5000 cases of enameline stove polish were recently shipped to Liverpool.

The White Mountain Freezer Co. are shipping refrigerators to Adelaide, Australia.

The Lozier Mfg. Co., of Toledo, O., will ship some heavy bicycle machinery to London.

The National Saw Co. last week forwarded several cases of its various specialties to Paris.

The Hart Mfg. Co., of Cleveland, Ohio, shipped sixty screw-cutting machines to Germany.

The Whitman & Barnes Mfg. Co., of this city, shipped 40 cases of its various Hardware specialties to Hamburg.

Dreses, Mueller & Co., of Cincinnati, will ship some of their machine tool specialties to Gothenburg, Sweden.

The J. A. Fay & Egan Co., of Cincinnati, recently shipped $8000 worth of woodworking machinery to Riga, Russia.

The Goodell-Pratt Co., of Greenfield, Mass., is shipping automatic screw drivers, drills and other specialties to Paris.

The Newton Machine Tool Co., of Philadelphia, Pa., recently exported two cases of tools to Schuchardt & Schutte, of Berlin.

The L. S. Starrett Co., of Athol, Mass., will soon ship a large lot of hack saws and other specialties to F. W. Horne, Yokohama.

The Sebastian Lathe Co., of Cincinnati, have exported five cases of machine tools to Tragarth & Co., of Gothenburg, Sweden.

Smith & Mills, of Cincinnati, Ohio, manufacturers of machine tools, intend this week to make an important shipment to Bremen.

McCormick & Co., Limited, of Chicago, last week shipped five carloads of mowers and other agricultural machinery, to Odessa, Russia.

The Pratt & Whitney Co., of Hartford, Conn., will soon ship nine cases of machine tools, including cutting-off lathes, to Antwerp.

The Springfield Machine Tool Co., of Springfield, Ohio, recently shipped seven cases containing lathes to Schuchardt & Schutte, of Berlin.

The Howe Scale Co., of this city, recently shipped two carloads of their scales for use on the Chinese section of the Trans Siberian railroad.

The Van Wagoner & Williams Hardware Co., of Cleveland, Ohio, recently shipped several hundred horseshoers' vices and other specialties to Hamburg.

The Niles Tool Works, of Hamilton, O., recently shipped 40 cases containing various machine tools to the Russian Hartman Engineering Co., of Longavask, South Russia.

The General Electric Co., of Schenectady, N. Y., recently shipped 36 large cases containing dynamos, wire and other electrical appliances to the Compagnie Francaise Thomson-Houston, Orleans, France.

The Armstrong Mfg. Co., of Bridgeport, Conn., expect to ship to Hamburg an important lot of pipe threading and cutting-off machines, also a quantity of stocks and dies and other tools requisite for water, steam and gas fitters.

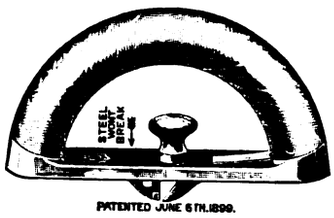
W. C. Heller & Co., of Montclair, N. J., recently exported to London 2600 steel shelf boxes, which are used in bank vaults. The shipment also included six bank cabinets for filing checks. The English demand for American goods of this description is reported to be increasing daily.

The National Tube Co., of McKeesport, Pa., recently exported 650 tons of iron pipe to England, and about the same quantity to Scotland. Two hundred and fifteen tons went to Palembang, Sumatra; 130 tons to Sydney, Australia; 120 tons to Antwerp, Belgium; 115 tons to Rotterdam, Holland; 90 tons to Tampico, Mexico, and 60 tons to South African ports.

The Brown & Sharpe Mfg. Co., of Providence, has just shipped No. 2 surface grinding machines to I. H. Bachmann, of Bremen, through Knauth, Nachod & Kuhne, of this city. Some No. 3 Universal grinding machines were forwarded to Vanders & Co., of Antwerp. Four gear-cutting machines went to Malicet & Blum, of Paris, and two milling machines were dispatched to the Societe Auto-Cote, of the same city.

Within the last ten days the shipments of wire and wire nails to Australian and Chinese ports have been exceedingly heavy. The American Steel & Wire Co. exported 1350 tons of wire and 250 tons of nails to Sydney. Nearly 1000 tons of wire nails went to Hong Kong. Other recent shipments of the company embrace 880 tons of wire to Brazil, 300 tons to South Africa. 200 tons to Germany and 180 tons to England. One hundred and fifty tons of wire nails were last week forwarded to Scotch and English ports.

Luke Murphy, an old Irishman, approaching 79, claims to be the inventor of the long-handled shears used in trimming trees, and in cutting away moths and other sap destroyers in the spring. Mr. Murphy, in his early days, was a gardener's apprentice in Dublin; later on in London, and when he arrived in America he took up the task of aiding in the care of Greystone, the late Samuel J. Tilden's famous estate. Murphy says that up to fifteen years ago it was the custom for trimmers of trees and vines to climb up in order to do their work. About that time he hit upon the idea of attaching a heavy pair of shears to the end of a long pole, with a stiff wire running from one shear handle to the other end, where it was worked by a projecting lever or arm. With this instrument the ordinary tree can be trimmed from the ground or with the aid of a stepladder in exceptionally high trees. Mr. Murphy, who lives on Seventeenth Street, South Brooklyn, near the Park, may be seen in the proper season, directing the movements of men who handle his lengthy twig cutter. He claims that he uses the original pole and shears fashioned at Greystone, and gives as a reason for not securing a patent on the device, the truthful enough statement that "Patents in this country are not worth the paper they're written on unless you have plenty of money to protect them."—*Brooklyn (N. Y.) Times.*



China drew the largest check on the Bank of England of which the bank has any record, in settlement of the Japanese indemnity. It was for £11,008,857, 16s. and 9d.

NEW GOODS AND SPECIALTIES.

Improved Sad Iron Handle.

The Colebrookdale Iron Co., Pottstown, Pa., are placing upon the market a new sad iron handle which has a special feature which it is thought by the manufacturer will assist

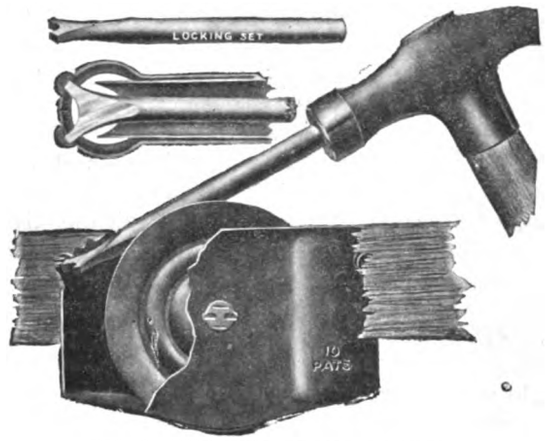
in making the handle extremely popular. We illustrate the handle herewith, with the improvement indicated in the cut. The stretcher and catch of the handle are made of steel and nicely tinned, and guaranteed against breakage even with ordinary rough usage. They are claimed to be made of the best of material, are perfect in every way and of standard size. With the Mrs. Potts' Irons, now made by this company, these handles will hereafter form part of the equipment.

The Fox All Steel Sash Pulleys.

The Fox Machine Co., Grand Rapids, Mich., are marketing through the Hardware trade the Fox All Steel Sash Pulleys, which are illustrated herewith: The prospective view of the Pulley, Fig. 1, shows that it is made from one piece of steel drawn in shape, having the ends round so that they will fit a hole bored by a 13-16 inch bit. This pulley will fit into an oblong mortise made by a pulley mortising with a 13-16-inch bit, and it has a flange all around the top which gives it a very fine appearance, the same in either mortise, and prevents it from passing through the mortise. The pulley being drawn in a die and the flange drawn at right angles on the top, makes the construction all the more rigid, making it impossible to spring the metal against the wheel and make it bind. In this respect the No. 7 pulley is claimed to be different from anything else in this line that was ever made. All other pulleys have been bent the reverse way, that is, bent over the top and a hole cut out for the wheel; in this pulley it is bent up from the bottom, and a hole is cut in the bottom for a cord to pass through. The cut, Fig. 2, showing the pulley inserted in a block, gives a clear idea of the neat appearance of the pulley as it is shown in a window frame. The small cut is from the No. 9 Pulley which is made with a 1¼ inch wheel, entering an oblong slot or fitting into three holes bored ⅝ inch centers with a 13-16-inch bit. The pulley or wheel is the well known form used in all the Fox

FIG. 1.—FOX STEEL SASH PULLEY NO. 7.

FIG. 2.—NO. 9 PULLEY I FRAME.



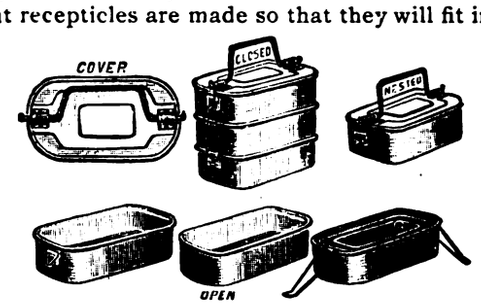


FIG. 3.—THE TWO PRONG LOCKER.

Pulleys, having the double shouldered steel bushing, which in connection with the steel rivet makes a pulley which runs perfectly smooth, without noise, and as near frictionless as possible. The No. 7 may be used in either a straight side or four-holed mortise, while the shell of the shorter pulley, No. 9, may be used in either straight or three-holed mortise. In inserting the Fox Pulleys it is not necessary to use nails or screws. The shell is small and is driven down flush with the top of the jamb; the lock set, which is shown is shown in connection with the sectional view Fig. 3, forces the ears at the end of the shell out into the wood, not only preventing the pulley from being with drawn, but also securing the wood so as to prevent any possibility of its splitting, one stroke of the hammer on each end of the shell securely locking it in place.

Ehle's Nestable Dinner Pail.

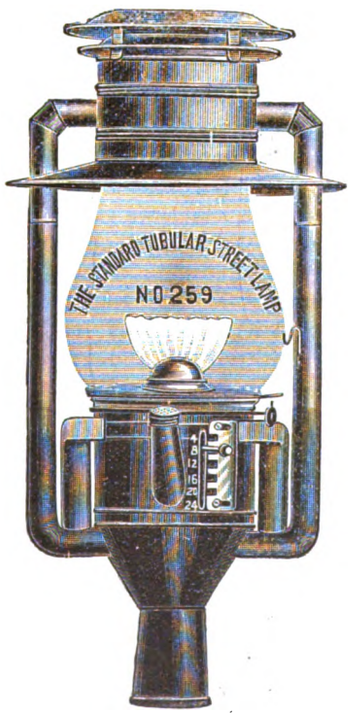
F. G. O. Ehle & Co., Buffalo, N. Y., are the manufacturers of the Ehle's Nestable Dinner Pail, shown in its various parts in the illustration which we give in this article. This novelty in the way of a dinner pail is a very complete article and possesses selling merits of a high order. It is made in compartments, in order that each part of the midday meal can be carried separately, free from fermentation and kept in a healthy, fresh and clean condition. The different recepticles are made so that they will fit into each

other from the smallest up, when forming the pail; and when emptied, they nest into each other so as to form the comparatively smaller package shown in the cut, which can be carried in the coat pocket. They can all be locked when filled, so that even if overturned nothing can be disturbed or spilled, the flange of each dish fitting perfectly the dish beneath. All parts can be readily cleaned and kept sweet, as there is no seam to secrete milk or other

Digitized by Google

matter that would sour. It is a very serviceable and useful article for the purpose designed, and the manufacturers will send sample anywhere free of charges on receipt of 60 cents.

Patent Seamless Tea Pot.



The Lalance & Grosjean Mfg. Co., No. 19 Cliff Street, New York, are offering the trade as an addition to their

extensive line of enameled utensils for household use, a new Seamless Teapot for which they have taken out letters patent. This article, an illustration of which we give herewith, is made entirely of one piece of metal by a new and ingenious process. It will be noticed by reference to the cut they are smaller in diameter at the top than at the bottom; they are finished in agate nickel steel, pearl agate, blue and white and all white enameled ware, and are made in eight sizes including ½, ¾, 1, 1½, 2, 3, 4 and 5 quarts. The covers are furnished either enameled or retinned, as preferred. A coffee pot of corresponding sizes, styles and finishes is also manufactured by this company, under the same patent.

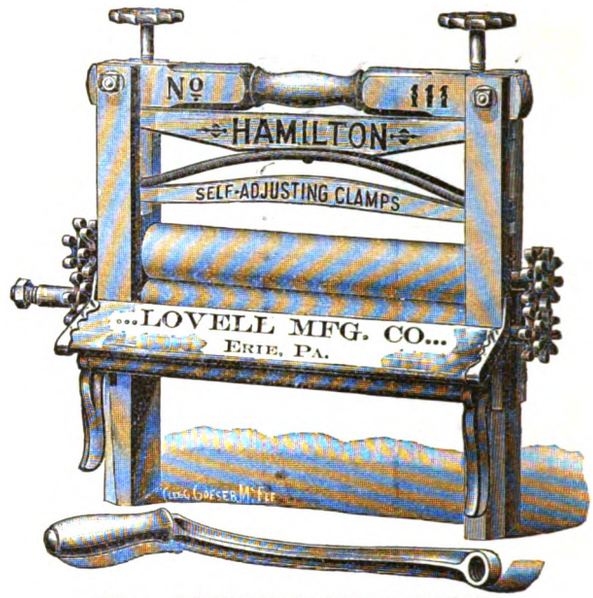
Outside Extinguishing Street Lamps.

The Rochester Lamp Co., No. 38 Park Place are distributing through the trade a new style of Outside Extinguishing Street Lamps having a time regulating burner. They are made of best quality of tin, in two styles, having tops lined with asbestos, and numbered 259 and 260. The No. 259 being provided with a post socket, and the No. 260 having a bail for carrying or hanging, they are both provided with an outside Time Regulator which permits of the flame

being regulated to burn 4, 8, 12, 16 20 or 24 hours, having the indicator on the outside (which is plainly stamped showing the hours it will burn) a feature entirely new and desirable. It is very simple to operate, doing away entirely with any lifting of globe in order to set the indicator. They take a regular flat wick and a No. 3 or 9 globe and burner, globe is held up while trimming by hook on side. The top is lined with asbestos, lessening all danger from fire. The burner supplied with hot air thrown directly on the flame from the top increases the area of illumination and is claimed keeps the oil cool in any weather. The lamps are furnished in green, but may be had if so ordered in maroon or gold. The height of the lamp is 27 inches, and packed one complete lamp in a box.

The Hamilton Clothes Wringer.

The Lovell Mfg. Co., Erie, Pa., are manufacturing the Hamilton Clothes Wringer, which we illustrate herewith,



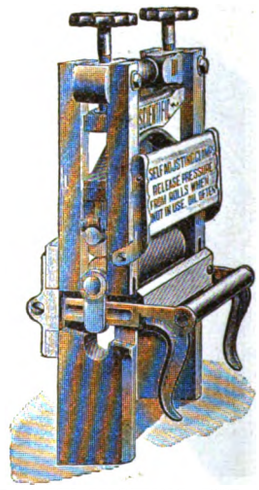


FIG. 1.—HAMILTON CLOTHES WRINGER.

and which possesses patented improvements which will no doubt make its introduction to the trade an easier matter than if it followed only the accepted models usually in stock. Among these features, the method by which the wringer is fastened to the tub is specially noted, as when the wringer is removed from the tub after having been in use the pressure is immediately released. The wringer being fastened in its place by spring pressure much more readily than by the usual thumb screws, it adjusts itself to any thickness upon application. As the rolls are tightened by the same springs, when taken from the tub, relaxation

F.G. 2.—SIDE VIEW SHOWING TUB FASTENINGS.

of strain follows the dropping of the spring. This manner of construction makes the passing of larger articles between the rolls more easily accomplished, and the larger the articles, the more tightly is the grip maintained.

Acme Ball Bearing Casters.

The Acme Ball Bearing Caster Co., No. 463 Greenwich Street, New York, are the manufacturers of the Acme Ball Bearing Casters, the prevailing excellences of which are amply demonstrated in the illustrations which accompany this article, In the Acme Caster there is one large steel

Digitized by Google

surface ball, which is held in the cup socket, and comes in contact with the floor. In Fig. 1 the principle is shown

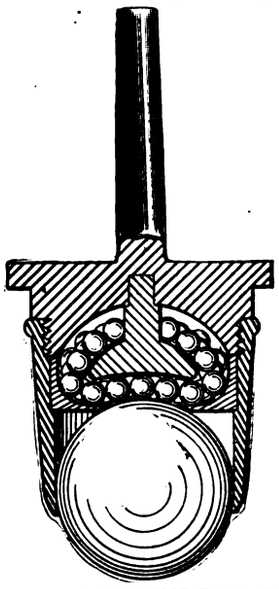

FIG. 1.—SECTIONAL VIEW OF ACME BALL BEARING CASTER.

where the surface ball revolves upon a large number of small anti-friction steel balls that move and are retained within this cup-shaped disc holder. There are sixty of

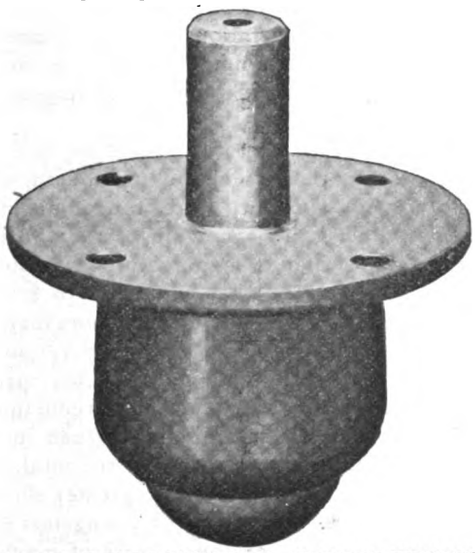

FIG. 2.—CASTER WITH 1-INCH BALL, WITH OR WITHOUT PLATE.

these balls in a one-inch caster, and they automatically interchange with each other, as the large central ball revolves when in contact with the floor. This principle is

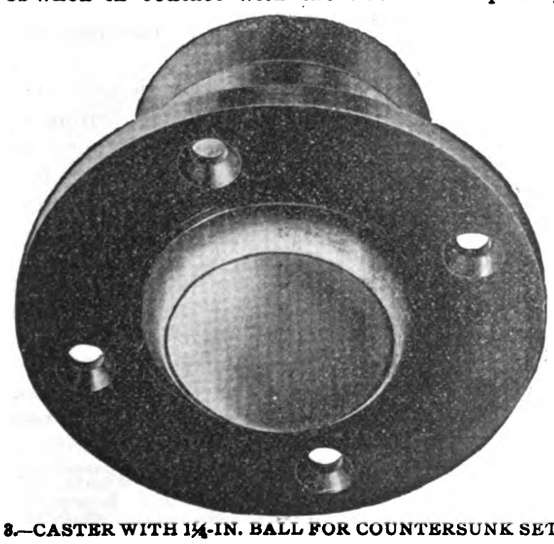

FIG. 3.—CASTER WITH 1¼-IN. BALL FOR COUNTERSUNK SETTING

retained in each size of caster made by this company, and they move freely without clogging or appreciable friction. Regular sizes are made, see Fig. 2, for chairs, bedsteads, bureaus, wardrobes, dining tables, pianos, etc. They also manufacture casters to meet special requirements, such as folding beds, brass bedsteads, sewing machines, etc. Among the important advantages referred to are avoidance of any lateral strain of the furniture using them, the avoidance of all cracking or splitting of chair legs, etc., as heavy objects can easily be moved even by women or children, when they are provided with these appliances, as the weight of the furniture is always upon the center of gravity in the center of the caster. It will be noticed as in Fig. 3 how little is shown of some of the casters when in use, and they can be made with sockets, posts, plates, or central screw, being made in several sizes from a ¾-inch surface ball to a size having a 3 inch surface ball, large enough for a safe.

Some Notable Firsts.

In 1865 Lallemont added cranks and pedals to the dandy horse, converting it into the boneshaker.

The Coventry Machinists Co., of Coventry, is the oldest cycle-making concern in the world, having started about 1867.

In 1868 the rubber tire and the suspension or wire wheel made their appearance. E. A. Cowper was responsible for these.

James Starley, of Coventry, England, added the step to the bicycle. He also made a foot rest for coasting, this taking the place of the leg rest. This was in the late sixties.

In June, 1876, a safety bicycle, driven by levers attached to the back wheel, was brought out. It had but a limited sale and soon dropped out of sight.

Singer's 'Xtraordinary Challenge was invented in 1878. In this machine the front forks sloped backward and had two rocking levers, one on each side of the forks, to which were attached two pedal levers, in turn attached to the cranks, which were fitted to the center of the driving wheel. The pedal levers were extended back to the rear of the front wheel axle, so that the pedals were carried well under the rider. It had a large sale in this country, and was popular as late as 1886.

In 1879 a patent was taken out for the "Bicyclette" by H. J. Lawson. This machine was driven from the back wheel by a chain, and the rider sat low to avoid headers. It was geared up level to the ordinary bicycle, and ordinary bicycle cranks were fitted. Although placed upon the market, it never had a sale, the ordinary and the "'Xtraordinary" still holding the field.

Harrington's cradle spring, once beloved by every cyclist, dates from 1879. All spring saddles were based upon it.

A saddle in which the leather was suspended above the saddle plate was brought out by Lamplugh & Brown, an English firm, in 1878. It was termed the suspension or long distance saddle.

In 1883 the Kangaroo was launched upon the market by Hillman, Herbert & Cooper. It possessed the small wheels of the Facile, with the advantage of being geared, and scored heavily at once. It swept the boards in road races, and at one time looked like a world beater.—*Bicycle World.*

Fajardo, on the east coast of Puerto Rico, has 8779 population, a handsome port, a lighthouse and a custom house. The climate is temperate and healthy.—*Exchange.*

Newark, N. J., contains 32,207 buildings, in which are 55,748 families, 7,991 stores and 1,793 manufacturing concerns.

Advertisers' Corner.

A properly constructed advertisement frequently creates a want of which the reader was not previously conscious. How many times does it happen that people in reading advertisements suddenly conclude they want something which they see described, but which they had not previously thought they stood in need of.—*Business Magazine.*

If the copy is right it will do some good, no matter how injudiciously or how expensively it is placed before the public. If the copy is poor and doesn't tell the advertiser's story, it will do practically no good, no matter how extensively or with how much judgment space is bought. I would rather have the cheapest dodgers that told my story thoroughly and well than to have the best space in the best newspapers filled with unattractive, unintelligent and unconvincing talk.—*Bates.*

Advertising that is not backed up with good business management is worse than useless. There is no use getting people into a store unless they can be satisfactorily treated after they get there. Incompetent clerks can spoil the effect of the best advertising in the world. Advertising is a part of the salesmanship of the store. The best salesman behind the counter can do nothing unless advertising of some kind brings buyers to him. Advertising is the "accessory before the fact."—*National Printer Journalist.*

The narrow chasm between success and failure is bridged by effort. Many an advertised article has been on the verge of success only to be dropped at the moment when, by a little more hustling, it could have been made profitable to its exploiter.—*The Advertising Man.*

The first essential in the preparation of good copy is to dig out the advertisable points and state them clearly, honestly and convincingly.—*Printers Ink.*

Display is emphasis. The effect of black type upon the reader is the same as the raising of the voice would be upon a listener. The effective speaker is the one who places emphasis at the proper points. The effective advertiser is the one who places display lines and black type only where they are necessary. What would you think of a speaker who broke into a shout every three or four words? —*Gillam.*

One of the reasons the large stores are patronized so much is that one has perfect liberty of ingress and egress. You can go in and go all over the place looking for what you want, and no one will tag you or burden you with attention. It is their perfect independence that brings their trade. In many places one cannot leave without buying, as from the moment you enter the door you are persecuted with politeness or engulfed with sweetness. People learn to shun a store where they feel they cannot leave without buying. Have your store as free as the outside air to customers. Let them go in and out at pleasure, but be sure they have attention when they want it.—*Merchant's Review.*

A few years ago the trade paper was an innovation. Today, it is a necessity. New conditions create new needs, and the trade paper is one. The merchant requires to know what others are doing, what goods are selling and what are the latest ideas which are being put into practice by his live competitors. Even the town or village store, when conducted on the right lines, is unable to get along without the trade journal, because the day of the catalogues has arrived, and the local merchant is forced to face competition in his own town from big city stores hundreds of miles away. To meet this successfully, he wants to know the newest things, and the cheapest and quickest way is to read a trade paper.—*Dry Goods Review.*

Many persons question whether the enormous advertisements put forth by the big department stores in large cities really pay their cost. If returns are to be measured by actual sales of goods advertised, it may safely be stated that such advertisements rarely pay. Their purpose is to bring people into the store, where other goods displayed and skillful salesmen will do the rest. The item which brought the customer to the store may be only a spool of thread or a cake of soap at half price, but the chances are against the customer leaving the store without making other purchases. The same principle applies to mail-order advertising. The profits from the direct sales of the goods advertised in any advertisement seldom pay its cost. The profit must come from subsequent sales, and this depends upon the skillful following up of the inquiry the advertisement brings.—*Advertising Experience.*

Our Best Export Record of Manufactures.

American manufacturers made their best export record in the fiscal year just ended. Not only were their exportations larger than in any previous year, but for the second time in the history of our foreign commerce they exceeded the value of the imports of manufactures. In the fiscal year 1898, for the first time in the history of the manufactuing export trade, the exportation of manufactures exceeded the importation of manufactures, the total value of exports of manufactures being about 25 per cent. in excess of that of imports of manufactures. In the fiscal year 1899, however, despite the increase in imports of manufactures, the total exportation of manufactures was 30 per cent. greater than the importation of manufactures, being $338,667,794 against $259,570,293 of imports of manufactures.

Prior to the fiscal year 1898, imports of manufactures were always greater than exports of manufactures. From 1888 to 1897 imports of manufactures ranged about $1,000,000 a day, with the single exception of 1894. During all that time the exportation of manufactures was steadily increasing, so that in 1897 they amounted to $277,000,000 against $130,000,000 in 1888, having thus more than doubled in that period. In 1898 they were $290,697,354 and in the year just ended, as already indicated, $338,667,794. It was not until 1898 that through the combined reduction of imports and increase of exports the tide turned in favor of American manfactures and in that year the total exports of manufactures were, for the first time, greater than the imports of manufactures, being $280,897,354, against $230,897,676. In the fiscal year 1898 the exports of manufactures exceeded the imports by $59,799,678, and in 1899 the exports of manufactures exceeded imports of manufactures by $79,097,501.

Imports of manufactures in 1899 were nearly $100,000,000 less than in 1890, while exports of manufactures were nearly $200,000,000 more than in 1890.

Manufactures in 1899 formed a larger percentage of our total exports than in any preceding year. During the last half of the year this was especially true, in some months the exports of manufactures being more than 33 per cent. of the total exports, while for the entire year they were 28 13 per cent. of the total exports, against 26.87 per cent. in 1897, 23 14 per cent. in 1895, 21.14 per cent. in 1894, 19.37 per cent. in 1891, 18.99 per cent. in 1889, 16.69 per cent. in 1883, and 12 48 per cent. in 1880. During the last half of the fiscal year 1899, exports of manufactures averaged fully $30,000,000 per month and during the entire year averaged more than $1,000,000 for each business day.

The following table shows the imports and exports of manufactures in each year from 1890 to 1899:

Year.	Imports of Manufactures.	Exports of Manufactures.
1890	$356,651,040	$151,102,376
1891	303,454,080	168,927,315
1892	329,149,538	158,510,937
1893	368,102,040	158,023,118
1894	237,418,320	183,728,808
1895	305,109,526	183,505,743
1896	333,330,412	228,571,118
1897	304,647,608	277,285,391
1898	230,897,676	290,697,354
1899	259,570,293	338,667,794

SOUTH AMERICAN TRADE.

A map of America showing the transportation routes of North, Central, and South America, just issued by the Treasury Bureau of Statistics, gives some interesting data on the relative distance between the commercial centers of the United States and those of other parts of the world via the various exisiting and proposed water routes. It shows especially the routes followed by steamships in the commerce between the eastern and southern ports of the United States and of Central and South America and the western coast of the United States. The contrast between the distances now traversed in commerce of eastern United States with western coasts of America and those which would be made practicable by an isthmian canal is interesting. The fact that the Isthmus of Panama lies almost directly south of the Atlantic Coast ports and that all commerce for the western coasts of South America must now travel eastwardly a distance of over 2,500 miles and again back to the west a like distance before reaching the western coast of South America indicates in some degree the loss of distance and steam power which must be utilized in reaching the western coast of South America, contrasted with that which will be practicable should a water route be opened across the Isthmus. From New York to Valparaiso on the western coast of South America via the Straits of Magellan is shown to be 8,460 miles, while via Colon and Panama it is but 4,572 miles; while from New York to San Francisco via the Straits of Magellan is 13,090 miles, while via Nicaragua it is 4,867. The commerce of the west coast of South America, as shown by the publication of the Bureau of Statistics which this map accompanies, now amounts to over $100,000,000 annually, and of this sum but $15,000,000 is with the United States. The imports of Chili, Peru, Ecuador, and Bolivia amounted in 1897 to over $50,000,000 and of this amount less than $5,000,000 was from the United States. Thus in that part of the commerce in which the United States producers and manufacturers are most interested, the export trade, the United States now obtains less than ten per cent. of the trade of the Pacific Coast of South America.

Regarding the details of the trade of the western coast of South America, the special publication of the Bureau of Statistics relative to the commerce of Central and South America has the following: "Chile, which occupies the Southern half of the western coast of South America, about equals in size the States of California, Oregon, and Washington, the area being 290,829 square miles and the population 3,049,352, or about two-thirds that of New England. Lying largely within the temperate zone, it has developed a greater variety of industries and with greater success than its neighbors lying nearer to the equator. About one half of its population is engaged in agriculture, the wheat product alone being about 28,000,000 bushels, other cereals amounting to about 8,500,000 bushels, besides fruits and vegetables. Sheep and cattle are largely grown, and wool, hides, and leather form the important features of her exports. The most important of the exports, however, is nitrate, the exportation of which is rapidly increasing. The imports in 1897 are given at $23,908,524, of which $10,614,775 was from the United Kingdom, $6,013,230 from Germany, $1,624,485 from the United States, $184,428 from Spain, and $4,474,606 from other countries, thus indicating that the United States has less than seven per cent. of the imports of Chile. The Statesman's Year-Book gives the value of the imports into Chile in 1896 at 30,249,002 pesos, from Great Britain, 20,080,983 from Germany, 6,807,165 from United States (value of peso, 36½ cents). The imports of 1897 included sugar, valued at 5,983,659 pesos; coal, 4,122,918; illuminating oil, 1,458,090; cashmeres, 1,221,918; tea, 1,049,256, and galvanized iron, 1,292,176 pesos. Chile was the first State of South America in the construction of railways. In 1897 the total length of her lines open for traffic was 2,661 miles, of which 1,233 belong to the State. The trans-Andine line, which is expected to connect the Pacific with the Atlantic from Valparaiso, Chile, to Buenos Ayros, Argentina, lacks but forty-six miles of completion. Recent appropriations for completing the tunnels required for this purpose encourage the belief that it will soon be completed and through land transportation thus given between the Pacific and Atlantic at this point.

Peru, which stretches northwardly from Chile, has also an area equivalent to that of California, Oregon, and Washington combined, being 463,747 square miles, and a population slightly greater than that of Texas, being 2,621,000. The imports of Peru in 1897 are given at $8,065,792, of which amount $737,858, or 9.15 per cent. was from the United States, while $3,060,736 was from the United Kingdom, $1,370,880 from Germany, and $585,536 from France. The chief productions are cotton, coffee, and sugar. Cinchona, india rubber, dyes and medicinal plants are also features of the products. The foreign commerce, which is chiefly with Great Britain and Germany, is carried on from several ports, of which the principal are Callao and Mollendo. The 1897 imports are given at 18,004,048 sols (value of sol, 43 4 cents); the chief exports are sugar, silver ore, copper ore, coffee, wool, rubber, cocaine, and coca leaves. Over one-third of the imports into Peru is from Great Britain, one-sixth from Germany, and one-ninth from France. The chief exports from Great Britain to Peru in 1897 were woolens, cottons, iron, wrought and unwrought, and machinery.

Ecuador, which lies directly north of Peru, has an area of 120,000 square miles, about equal to that of Ohio, Indiana, and Illinois combined, and a population of 1,272,000. Although lying directly under the equator, the great elevation of its table-lands gives very considerable variety to its products. Coffee, cacao, rice, sugar, rubber, cabinet woods, chemicals and minerals are its chief products and exports. Its chief imports are cottons and other tissues, provisions, manufactures of iron and steel, clothing, and mineral oil. Fronting as it does only on the Pacific, its distance by water from the eastern part of the United States is very great, and as a consequence its purchases are largely from European countries. The exports from the United States to Ecuador have never reached $1,000,000 annually, the nearest approach being in 1891, when the total was $903,159, though that of 1898 was $855,193. According to the message of the President of Ecuador, delivered in 1898, the imports of 1897 amountud to 18,004,048 sucres (value of sucre in 1897, 47 4 cents; present value, 43 4 cents). British exports to Ecuador in 1897 amounted to $2,000,000, the chief articles being cotton goods, $1,350,000; woolens, $200,000, and iron, wrought and unwrought, $130,000.

Bolivia being entirely an interior country and having no seaport, the official statistics are fragmentary and largely estimates. Imports and exports pass chiefly through Autofagasta, Arica and Mollendo on the Pacific coast, and in smaller quantities through the eastern river ports, Porto

Digitized by Google

Suraz and Villa Bella. The total imports in 1897 are estimated at 24,467,100 bolivianos (value of boliviano, 43 4 cents). The chief imports are provisions, Hardware, spirits; cottons, woolens, silks and clothing, and the chief exports silver, tin, copper, coffee, and rubber. Bolivia has an area of 567,360 square miles, or considerably greater than that of the entire group of Southern States east of the Mississippi River, with a population of 2,019,549, or considerably less than that of North and South Carolina combined.

Current Comment From Our Contemporaries.

The *Age of Steel* has no doubt of the progressive spirit now enlightening the world of commerce and industry and believes that "the fact that iron and steel are entering into the new and rapidly multiplying forms of uses, and that new countries of gigantic areas, such as China, Africa, India and Russian Siberia, are among the added chutes of iron and steel consumption, would seem to plainly pencil the lines of the reasons why iron and steel are potent factors in the progress of the modern man. The larger part of the two hemispheres has yet to be gridironed with iron tracks, while the heavier rail and the larger locomotive, the steel car, and prospectively the iron cross tie, are all in evidence of what is and is yet to be done with iron and steel. Gas and water pipes, telegraph and cable wires, the replacing of the snake fence by thorny wire, the more abundant uses of tin plate, and the wide and rapid adoption of iron and steel in modern structures, from the towering sky scraper to the less pretentious building, all these are among the causes why the consumption of iron and steel is going on apace; and the end is not yet."

The *American Artisan*, referring to the orders already given for the construction of sea-going craft is pleased. "At last it looks as though a much needed national want was to be supplied in the rapid growth of our American merchant marine. Nothing could be more encouraging than this activity of the merchant marine industry. Our manufacturers are exporting their products to every country of the world. All classes of American made goods are in demand. With more ships to carry them to customers, the home industries will derive great benefit and American labor will be fully employed."

The *Bicycling World*, feeling there will be a glut of bicycle lamps on the market, says: "Competition is the life of trade, so the old saw says, but there are two kinds of competition. One is legitimate, governed by common sense rules, and having a balance wheel in the shape of a determination never to step over the danger line. The other is competition run riot, thinking only to sell goods, no matter how or at what price; or, in other words, it is competition that does not deserve the name. It is the kind to steer clear of, to ignore entirely."

Iron & Steel never felt a greater degree of optimism than when they state their belief that "there has scarcely been a time in the history of the West when money for all legitimate purposes was so plentiful as now, and enterprises are expanding and new ones are starting up daily. The entire West is surpassing itself and it is noticeable that business expansion is on a firmer footing than ever before."

The Bulletin of the National Export Association, while dilating upon the importance of the Philadelphia Exposition so near an opening, says: "It is astonishing the number of exhibitions held yearly throughout the world, and it would seem almost impossible that all could succeed financially. Nevertheless, one after the other opens its doors, irrespective of the proximity of any approaching or past exhibition, and manages to come out ahead of expenditures. There has never been an exhibition that has not been promoted by the desire of men in that particular locality, or manufacturing concerns to better their own individual conditions. This does not except even the Columbian Exposition or the coming Paris Exposition of 1900. While both receive universal support, those principally recompensed are the promoters."

Michigan Tradesman, pleased at the fact that our locomotives are in great demand abroad, argues that "It has developed by this discussion as to relative merits that foreign makers of engines make no two locomotives exactly alike, or upon a fixed system or pattern; whereas the American builders are constantly making the separate parts of the engines upon models, so that they can supply any missing or damaged part, and, by keeping supplies of the various component parts of the machine in stock, are able to fill orders promptly, as it is only necessary for machinists to assemble the parts, instead of having to construct each separate engine after it is ordered.

Stoves & Hardware Reporter, having in view some loud talk about the manufacturers, heard recentiy in Detroit, says: "Where the rise in prices is legitimate, the jobber should not object to it, because such objection soon reacts detrimentally upon the jobbers who practice it, for by selling an inferior grade of merchandise they destroy their own business and reputation. Where jobbers have pursued such a line of conduct they have been the means of compelling the manufacturers in self-defense to sell direct to the customer. In this way the jobber cuts off his nose to spite his face and thwarts himself in the object he was striving to attain. It is never a good plan to go against the laws of reason and common sense, for if you do, the chances are that you will come out the loser."

The Wheel, in arguing the desirability of deciding to handle only high-grade wheels, says: "A season's wear often tells the tale that should decide every dealer in favor of selling the very best quality that the financial condition of the customer will warrant. A first-class machine with apparently everlasting life may hurt the repair-shop end of the business somewhat. There are many times when none but a medium-priced machine should be sold. But use care. Remember that a machine that reposes in the wood-shed after a season or season and a half is no good to anybody—not even to its manufacturer."

Forty Horseshoes in an Hour.

The recent publication in the Victorian papers that a blacksmith named John Kirk, of Colac, had established a record by making thirty-six horseshoes, with one assistant, within an hour, aroused one Jack Lancaster, a sturdy shoeing smith residing at Singleton, in New South Wales, to make an attempt to beat the record so established. Accordingly, the other morning, he and a striker named E. Winsor set about the task, and they not only lowered the Victorian record, but turned out forty shoes in fifty-eight and three-quarter minutes. The sizes were 12½x½x7-16—the usual size. The quickest time for a single set was five and one-half minutes. A committee of townsmen superintended the trial. Mr. Lancaster now claims the colonial championship, which he appears to have fairly earned.—*Exchange.*

The city of Mexico is to have a department store. A number of Mexican capitalists have formed a syndicate with a capital of $1,000,000, with the intention of conducting a modern department store, carrying every conceivable article of merchandise of the highest quality. The enterprise, which is to be known as the Centro-Mercantile, will have its home in a magnificent structure erected at a cost of $2,000,000 by an American architect. The building is equipped with three electric elevators and an electric-light plant.

The Illinois Retail Hardware Dealers' Association.

The Illinois Retail Hardware dealers have at last been able to organize a State Association, the opening session for the purpose being held at Schoenhofen's Hall, at Milwaukee and Ashland Avenues, Chicago, on the afternoon of the 16th inst. with a representation of about sixty present.

The meeting was called to order by President D. McLaughlin of the Chicago Retail Hardware Dealers' Association, who made the address of welcome.

The committee appointed to take the necessary measures to form an association, consisting of E. Goettsche and Fred. Kurtz, of Chicago, were called on for a report of the steps taken to awaken an interest among the dealers throughout the State. Mr. Goettsche made an interesting statement, showing the great amount of work which the committee had accomplished and the extensive correspondence they had conducted.

On motion of N. B Costello, of Chicago, the following were elected temporary officers of the convention: D. McLaughlin, of Chicago, chairman, and Otto L. Schulte, of Freeport, secretary.

After some discussion, on motion of E. A. Lott, of Chicago, the convention proceeded to elect a committee to draft a constitution and by-laws, the following list being chosen: L. M. Reeves, of Peoria, F. E. Bonney, of Paxton, Otto L. Schulte, of Freeport, and Geo. A. Engelhardt and E. R. Schlick, of Chicago.

A Committee on Entertainment, consisting of Theodor Krueger and Anthony J. Engelhardt of Chicago, had been appointed previously by the Chicago association, but the three following names were added by the convention: A. E. Lott, L. Rosenberg ann W. B. Costello, all of Chicago.

On Thursday, Chairman Reeves, of the Committee on Constitution and By-Laws, presented the committee's report, in which but few alterations were made by the convention.

The Committee on Nominations subsequently reported the following list: For President, Z. T. Miller, of Bloomington; vice-president, Dennis McLaughlin, of Chicago; secretary, Lewis M. Reeves, of Peoria; treasurer, Theodor Krueger, of Chicago; other members of the Executive Committee, D. D. Velde, of Pekin; Geo. Engelhardt, of Chicago; O. L. Schulte, of Freeport, S. A. Crissey, of Marengo, and Ehler Goettsche, of Chicago.

The Convention unanimously elected the entire list named.

An address was made by F. E. Bonney, of Paxton, on the subject of systematic organization, which was well received. He was followed by Mr. Bittel, of Peoria, with a few remarks. Daniel Stern, of the *American Artisan*, then read an able and interesting paper entitled the "Present Opportunity."

A letter was read from F. S. Kretsinger, president of the Iowa Farming Tool Co., Fort Madison, Iowa, calling attention to the fact that catalogue houses are of two kinds, one furnishing catalogues with prices to consumers and the other soliciting the trade exclusively of retail merchants who are seeking the cheaper class of goods. He asked for an expression of opinion upon the propriety of manufacturers selling to the latter class of catalogue houses. A committee composed of W. J. Krueger and E. A. Lott, of Chicago, and Wm, Bittel, of Peoria, was appointed to consider this question and report to the convention.

This was replied to by the committee on Friday in which they stated that:

"Catalogue houses who solicit the retail trade are no advertisement for the manufacturer, for the reason that the retail merchant buying from their class looks for bargains only, as unless he can buy for less money from them than from his regular jobber he will certainly give the legitimate dealer the preference."

Peoria was selected as the place for the next convention. The sentiment of the convention was largely in favor of the organization of a National Retail Hardware Dealers Convention.

After several resolutions of thanks were passed on all who had aided in the efforts towards organization—the convention adjourned.

REVIEW OF THE MARKETS.

Hardware: Reports are being received from all the business centres indicating a very decided impetus being given to fall trade, the fear being prevalent among a great many dealers, that unless orders are given quite early, some difficulty may arise to prevent their receiving the goods in time. The salesmen already on the road, are meeting with ample success, and the constantly changing prices with an upward movement, does not lessen the demand for Hardware to any extent. There is every indication of a very large trade being done this fall, and it is the natural desire on the part of dealers to see that they are able to get their fair proportion.

Wire Nails: The trade in wire nails has not been of a character to make necessary any change in the prices that have been ruling in the wire nail market for the last month, the market being still held at the same rate named in our previous issue.

To jobbers in carload lots	$2.50
" in less than carload lots	2.52½
To retailers in carload lots	2.65
" in less than carload lots	2.75

Terms: 30 days from date of invoice, net cash, f. o. b. Pittsburg.

New York prices are represented by the following:

To retailers, carloads on dock	$2.80
" less than carloads on dock	2.95
Small lots from store	3 05

Cut Nails: There has only been a fair business done in cut nails since our last report, and the market is still held at the advanced prices made a month ago, which we quote as follows, f. o. b. Pittsburg, 30 days, net, freight being added to make a net price delivered at destination:

To jobbers in carload lots	$2.15
To " in less than carload lots	2 20
To retailers in carload lots	2 25
To " in less than carload lots	2.40

New York business is moving under the prices, named as follows:

Carload lots on dock	$2 30
Small lots from store	$2.55

Barb Wire: The market for barbed wire is by no means brisk for domestic requirements, although the export trade is still fairly active. Prices noted in our previous issue still hold the market and are well sustained. We quote as follows, f. o. b. Pittsburg, net cash, 30 days:

To jobbers in carload lots, Painted	$2.60
" " Galvanized	3.10
" in less than carload lots, Painted	2.62½
" " " " " Galvanized	3.12½
To retailers in carload lots, Painted	2 75
" " Galvanized	3.25
" in less than carload lots, Painted	2 85
" " " " " Galvanized	3.35

Smooth Wire: Smooth wire prices remain as previously quoted, the demand being unusually large, and difficulty in obtaining a full supply is commented upon by many manufacturers to whom this article is a raw material. We quote as follows, f. o. b. Pittsburg, 30 days net:

To jobbers in carload lots	$2 35
To " in less than carload lots	2.37½
To retailers in carload lots	2 50
To " in less than carload lots	2.60

The charge for galvanizing is 50 cents on sizes from 6 to 14 inclusive; on Nos. 15 and 16 it is 85 cents and on Nos. 17 and 18 is $1.10.

Russell & Erwin Mfg. Co.: Russell & Erwin Mfg. Co., New Britain, Conn., and New York, have issued price list No. 2, consisting of ninety-seven pages, to apply to catalogue No. 9, 1899. It contains a number of new lists.

Lane Bros. Co.: In our recent issue, in giving the latest quotations on the products of Lane Bros. Co., we inadvertently stated that John H. Graham & Co. were their agents, As this arrangement ended over a year ago, it was a very careless statement to make, and we hereby make amends.

Blake & Johnson, Waterbury, Conn. Under date of August 15th, announce that on account of the continued increase in the cost of labor and materials used in the con-

Digitized by Google

struction of their machinery, they withdraw all quotations, but are prepared to submit new figures on request.

John Chatillon & Sons, No. 85 to 93 Cliff Street, New York, announce under date of August 1st the following changes in discounts on goods of their manufacture shown in their regular catalogue.

	Discount.

Steel Goods, Forks, Hoes, Etc.: The associated manufacturers of steel goods, under which head are classed the farm and garden tools sold to the Hardware trade, have under date of August 1st, issued entirely new price lists, in which under special groups all their different lines of goods are classified, each in a special grouping of its own, which they have numbered from group No. 1 to group No. 26, each group having a scale of discounts applying to that division. The heavy goods such as coal, coke, beet and other heavy forks, have a special list, in which the different divisions have special discounts also. It would seem as though it would be an extremely difficult matter for the average retail dealer to to find any particular discount, as they number about 50 in all, covering this one line of manufactures. For lack of space we are unable to give the matter in full as it would take several pages of our paper, and would advise the dealer sending for the same, to the manufacturer whose goods he sells, if he would keep up to date.

Files: At a meeting of the File Manufacturers' Association of the United States held this day at the Astor House, New York, it was voted that an advance of ten (10) per cent. in all prices of files and rasps, be adopted to take effect at once.

The continued scarcity of raw material and great increase in cost of same and the unsatisfactory prospect of improvement in this respect, should impress the trade with the fact that a wise business policy calls for the realization of this advance on stocks in their hands, rather than to part with them at concessions in price, when the ability to replace them is uncertain.

THE FILE MANUFACTURERS' ASSOCIATION OF THE UNITED STATES,

August 23, 1899. ELIAS G. HELLER, President.

Linseed Oil: Dean Linseed Oil Co., under date of August 21st, quote as follows:

In lots of less than 5 barrels..... 41 cents per gallon.
In lots of 5 barrels or more ..... 40 cents per gallon.
The five-barrel price only applies to deliveries of that quantity at one time.
Boiled Linseed Oil, 2 cents per gallon higher than Raw.
Calcutta Oil, 60 cents per gallon.

THE BOSTON TRADE.

The volume of trade during the past two months certainly indicates that we shall have a Fall business that will exceed anything we have known within the past decade.

Although there is some fear expressed by a few members of the trade that the recent advances will curtail purchases, yet there are many others who have sufficient confidence in the present condition of business and are placing orders for such goods as their legitimate trade may demand for the next two months. We believe this is a wise move as everything points to a scarcity of all lines of Hardware and it will not be so much the price of an article as it will be whether it can be had.

The manufacturers are daily writing that orders placed early in the season will be delayed and in explanation say, that this is due entirely to the crowded condition of the factories, coupled with the fact that there is much difficulty in obtaining raw material from the producer.

Orders for seasonable goods are being placed with more willingness than usual and such goods as axes, handles, snow shovels, etc., are meeting with ready sales notwithstanding the advanced prices.

Collections are not what they should be, but with the close of vacation season we believe that this department will receive more attention. FRYE, PHIPPS & CO.

THE ALBANY TRADE.

A general observation of the Hardware markets at the present time would show that many of the leading products which are prominent in our industry are 100 per cent. higher than they were a year ago. But the changes in price have been so gradual, and stocks have been so favorable, as early orders were readily obtainable, the retail prices do not in many instances indicate the state of the trade. This will be more forcibly shown as the year advances, as it is a hard proposition to change everything in a large hardware stock and bring it up to date. The great advance in price of raw materials, particularly pig-iron, pig-tin, ingot-copper and other base metals that enter into the manufacture of Hardware, show more noticably on

Digitized by Google

goods that are nearest to the raw material, and in which labor is only a small percentage of the cost. Prices will evidently trend upward for some time to come: as by comparison they are not as high as they were ten years ago, but doubtless the record may yet be reached if changes keep on the upward trend under prevailing demand.

Orders are coming in in a very encouraging manner. Sales compared with those of a year ago show remarkable increase in volume. The travelers looking for early specifications find greater freedom in ordering among the retailers, the fear prevailing that the predicted famine in raw material will make leading goods scarce, and possibly difficult to obtain if order is deferred until the usual dating of previous seasons. We anticipate the largest fall business in the history of the house, and are making preparations to supply the demand and give prompt shipments.

ALBANY HARDWARE & IRON CO.

THE PHILADELPHIA TRADE.

Mid-summer has now passed, and trade is entering upon its Fall season on a much higher plane of prices than has been seen for some years. With very few exceptions, however, these high values do not seem to limit the consumption—on the contrary, it is difficult in some lines to furnish goods to meet the demand.

The new prices meet with very little objection, as jobbers and dealers alike recognize the fact that they are necessary, and the advanced figures are cheerfully paid. The rise in values does not seem, by any means, to be at an end, and change sheets of prices are being sent out almost daily, until there are very few articles in the hardware line which have not felt the advance in value.

Dealers, wholesale and retail, alike, who, for years past, have been complaining of a decline in their stocks, now have an opportunity of regaining some of their losses and it is hoped that the end of this year will see many houses in much better financial shape than ever before. Of course, to accomplish this, prudent management is necessary, and it must be constantly borne in mind that goods must be sold at present prices in order to give the dealer an opportunity of replacing the stock. As has been well said, a dealer who sells out his stock below market prices, and then attempts to replace his stock (as he must, if he wishes to continue in business), will find he has netted a loss unless he has gotten full value for his goods.

Collections are somewhat better and all indications point to a healthful trade during the Fall with the prospect of still further advances on many of the lines which, so far, have advanced but moderately. BIDDLE HARDWARE CO.

THE BIRMINGHAM TRADE.

We are glad to report that business continues good and the prospects are that the demand for all supplies in our line will be active. We have many new people coming into this community and the demand for residences is more than the supply and in consequence the holders of property are increasing the rents, but this does not check the influx. The architects and contractors have had all they can do, and notwithstanding the fact that many new houses have been built, there is not enough to supply the demand, and the result will doubtless be that many will have to seek residences in the adjacent suburbs which are reached by the car lines. The mines are running full time, also the furnaces. From what we can learn, the demand for pig iron continues active and orders are being placed for deliveries for the latter half of 1900, which indicates that we need not look for any decline in prices in the near future. Some old contracts are not yet completed and while these last, we need not expect to see the limit of prices reached for the manufactured articles and we expect that in many lines there will be still further advances.

MOORE & HANDLEY HARDWARE CO.

THE PITTSBURG TRADE.

Since travelers started out for the Fall campaign, business has been very active; orders come in in larger quantities than usual and are much easier to get.

Prosperity which for months has been so noticeable in the cities, has now reached back into the small country towns, and these people are more ready to buy than they were during the Spring months.

The amount of business done this month exceeds the same month last year by fifty to seventy-five per cent., part of which, of course, is due to the increased prices, but the tonnage of goods moved is also much larger.

The policy of the Nail & Wire Company to handle their goods through jobbers throws a good deal more tonnage into their hands, but at the same time increases the expense of handling and shipping to a considerable extent.

The building interests in Pittsburg are very active, and real estate, which usually is among the last things to improve, is already feeling the effects of prosperity, and many homes are being built of the better class.

Although it is true that no man around Pittsburg need be idle under present conditions, there is one class of employes who have felt the change in business arrangements to their disadvantage. These are the higher class of office men and travelers, who have been displaced by the consolidations lately effected, and find it difficult to secure places fitted for their capacity, but in all readjustments ofbusiness such as are now going on, something of this kind must be expected, which is hard on individual cases.

LOGAN-GREGG HARDWARE CO.

THE CLEVELAND TRADE.

Perhaps never were vacations more necessary for our busy managers than this year. They have had a hustling time of it so far, and a rest will be better appreciated than usual, for prosperity brings contentment at such times.

TRAMMEL POINTS.

These new Trammel Points are so constructed that they can be attached to one side of any straight stick, without exact regard to its size, and are thus quickly adjusted for use.

The peculiar form of the socket makes it possible to use an ordinary-sized pencil, or a full-sized oval-shaped Carpenters' pencil.

No. 4. Nickel-plated, with Steel Points..per pair, $0 75

Our letter will be very short this time owing to the absence of your regular correspondent.

The scarcity of goods in some lines during the spring had its effect on the dealers. and they have been hurrying forward their Fall goods for some time. That many shipments will be delayed seems certain, and a scarcity felt in some lines. Axes, no doubt, will be the cause of much trouble in filling orders.

There is little or no complaint about prices, the trade accepting all advances as of necessity. The outlook for a brisk and steady trade is very good.

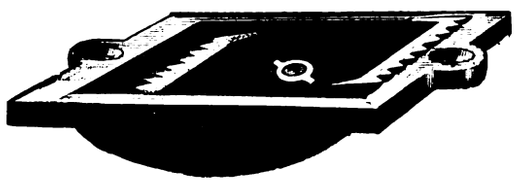
THE LOCKWOOD–TAYLOR HARDWARE CO.

THE COLUMBUS TRADE.

We are having very hot and dry weather in this part of the country, but most of the corn is far enough advanced to not be seriously affected. The corn crop is going to be a record breaker. There is corn on the hills and corn on the bottom and corn everywhere.

Trade is very brisk for August, and with some of our force on their vacations those at home are kept on the jump. We cannot help thinking that some manufacturers are not playing fair with their customers. When an order cannot be filled within eight or ten months on account of not being able to get raw material, and factories running right along full time, and in some instances ten hours a day, we know that old contracts are being held up. There is no doubt but what they are getting material or they would be obliged to shut down the factories; but when they continue to run from day to day they are making goods and someone gets them, and it is dollars to doughnuts that it is the fellow who is paying the high prices. We had a letter last week from a large manufacturer saying that if we would accept half of our contract they would go on the market and buy iron at the present price and make up the stock and ship in a few days. The American Steel & Wire Co. are getting slow with their orders. Especially is this true on wire and nails. It would seem that they could keep up on orders now as the demand for fencing wire has dropped off very materially. Prices remain firm and some very sharp advances have taken place since our last report. Rope has gone up with a bound and the indications are for still higher prices.

THE SMITH BROS. HARDWARE CO.



THE DAVENPORT TRADE.

The American Steel & Wire Co., are to be complimented upon some at least of their methods. They do have a fixed priced for their wares. They charge more for small shipments than for shipments in carloads or in other words they get pay for carting their goods to the station, and they also make their terms net cash. We presume they get pay for handling small lots to the station for the reason that it costs them money to have the goods hauled, and they have a fixed price so as to be fair to all of their patrons and make their terms net cash because they are compelled to pay net cash for material and labor. Why should a jobber not follow their example? Is it necessary or fair to

have flexible prices on staple goods? Do the jobbers not have to pay for carrying goods from warehouses to station? and do they not have to pay net cash for nails, barb wire, etc., etc.

If good crops and fair prices make prosperous times, this locality has reason to anticipate a satisfactory trade the coming autumn. Of course there will be some draw backs to contend with as usual. The races are now on. The political campaign will soon be open. The vacation is not over, and the country fairs will soon be occupying more or less attention of business men.

Prices are firm, trade fair and collections satisfactory.

SICKELS, PRESTON & NUTTING CO.

THE OMAHA TRADE.

The volume of summer trade still continues in excess of any previous experience. Of course a large amount of this may be due to early orders, which are being shipped out, yet, at the same time, the regular volume of business is far in excess of any previous record. We are no exception to the rule, in the fact that we have great difficulty in procuring supplies, and yet we are satisfied, in spite of the seeming scarcity, that should conditions arise which would satisfy manufacturers and jobbers that the top had been reached and a decline was unavoidable, the seeming scarcity now prevailing would be turned into a surplus that would surprise the most sanguine expectations.

Collections are excellent, and the assurance of a corn crop in this State aggregating three million bushels leaves little doubt as to the Fall business, which we anticipate will tax the ability of the jobbers to take care of.

RECTOR & WILHELMY CO.

Origin of the Lead Pencil.

The lead pencil, the most common of all writing implements, is a product of the seventeenth century. It is but natural to suppose that the lead pencil contains the ingredient of its name—lead. But not so. In the mineralogical sense there is not a particle of lead in its composition. The term "lead pencil" is a misnomer, and yet it continues to pass under so misleading a name. The origin of the misnomer is this: The lead pencil originated with the discovery of the graphite mines at Barrowdale, England, in 1664, during the reign of Queen Elizabeth. At that time there were already other minerals known, galenite in particular, possessing the same black, lustrous color and the peculiarity of streak that also characterized the new substance, graphite. Graphite, so strongly resembling galena (bleiglanz), was given the name of blei (lead), and to distinguish it from the lead already found it was called Wasserblei (molybdena). To make the matter even more confusing the makers of lead pencils called themselves Bleiweissschneider (white-lead cutters).

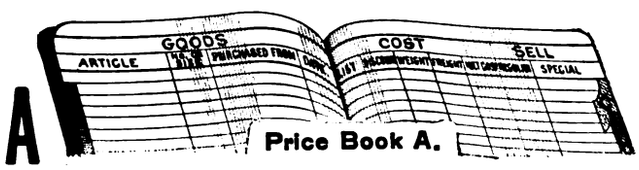
The early mode of lead pencil manufacture was most simple. Graphite, as yielded from the mines, was treated much like wood. It was sawed into thin sheets, then cut into strips, and these strips again cut into smaller strips, until they were reduced to pieces small and strong enough to serve as pencils. These pencil strips were provided with a wooden covering as a protection.

The first pencils created much excitement. The graphite mines of England were considered of inestimable value and were protected by law. The treasury of the mines was not inexhaustible, and the valuable material was extravagantly wasted for want of proper working methods. First, in the digging there was much loss, for many of the pieces were too small for cutting. Second, the manner of cutting the graphite was so crude that fully half of the material was lost. Economy was urgent and suggested means of utilizing the waste and delay to again sharpen it. First, the wood had to be cut away and the graphite heated over a light to soften it—after which it was drawn into a point with the fingers. In 1795 a Frenchman, Conte, chanced upon the idea of using pulverized graphite and binding clay. That his plan was eminently successful is apparent in the excellence of our pencils of to-day.

The tools used in upholstering furniture are neither costly nor numerous. One of the most necessary is a gimping hammer, which differs from the ordinary hammer in having a long narrow head; it is used for knocking in the small gimp pins which secure the gimps and laces used in finishing. An assortment of needles is also required, and should include a 9-inch double-pointed mattress needle for stitching up edges and buttoning, a curved spring-needle for stitching the springs to the webbing and undercovers, and a carpet needle. Other tools that will be necessary are a couple of fine awls for leather work; a regulator, formed with a strong, flat curved blade, somewhat similar to a large packing needle, set in a wooden handle and used for pushing up the hair or flocks to the edges in stitching up; a pair of web pinchers; a lever web-strainer; a rule and tape measure; a pair of large scissors; a few strong chisels; and a sharp knife.—*Work.*

A correspondent of the *Scientific American* states that in 1898 the Bureau of Engraving and Printing issued 2,500,000,000 of the common red two-cent stamps. These, he says, would go almost twice around the earth. He further assists our comprehension of this enormous number by continuing: "Stacked one upon another, they would pile up 150 miles beyond our atmosphere, equal in weight to two of our big locomotives, and would make a blanket to keep the frost off the city of Washington. If these stamps worked in relays, each taking the letter as far as allowed by the postal regulations, the letter would be carried beyond the most remote star, and, at the fastest speed at the disposal of the postal authorities, would occupy millions of times the age of the earth in transit."

The first news sheet at all answering to our modern newspaper was issued by order of the Venetian Government about 1536. At first they were simply written out, and exhibited to public inspection on payment of a small coin called a "gazetta," whence the modern term "gazette." Afterward the demand made it necessary to print them. The first English newspaper of which we have positive evidence was the *Weekly News*, published by Nathaniel Butler, in 1622. The English *Mercurie* of 1583 is a forgery. It was really printed about the middle of the eighteenth century.—*Boston (Mass.) Traveller.*



One hundred and nine thousand locomotives are at present running in various countries.

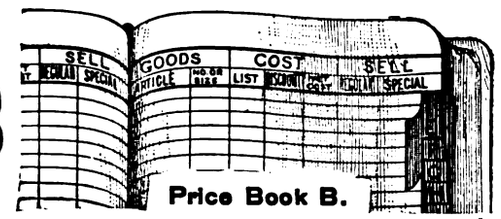
HARDWARE PRICE BOOKS.

Arranged by R. R. WILLIAMS, Hardware Editor of The Iron Age.

These Price Books are made in a variety of sizes and styles adapted to pocket, store or desk use, and are specially arranged to meet the requirements of the Hardware and Metal trades. They are printed on paper of superior quality and bound in grain seal leather.

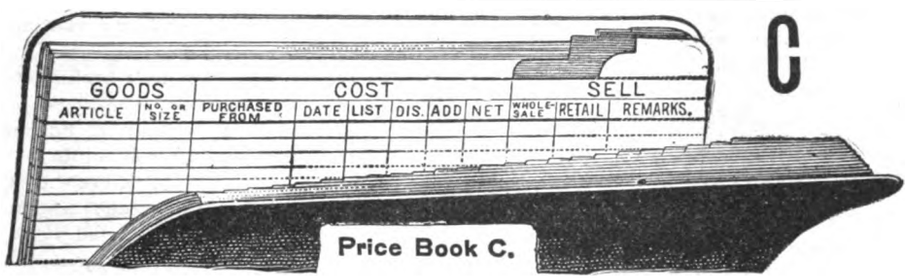


Price Book A.

Columns are provided for the name and number or size of goods, for noting from whom purchased, date of quotation or purchase, list and discount, and for entering freight expenses. Under the heading of selling prices, the regular and any special price or remarks in regard to the goods are given place. ***Size of page, 4 x 7 inches.***

FOUR EDITIONS:

A, 200 pages, - - $1.00 **A 2**, 400 pages, - - $1.50
A F, 200 pages with flap, 1.25 **A F 2**, 400 pages with flap, 1.75



Price Book B.

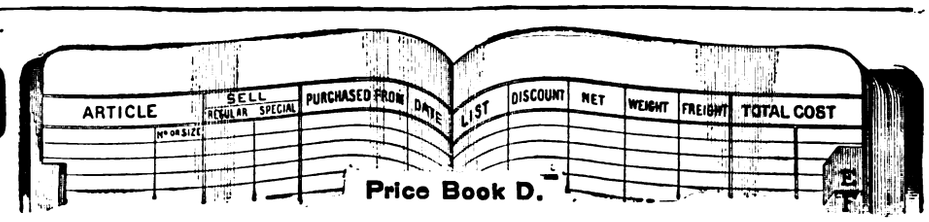
In this book each page is complete in itself, and the record of prices does not, as in Book A, run across two pages. Thus it accommodates a larger range of goods with much less detail in the record. By the use of familiar abbreviations is sufficiently large for the convenient and concise record of prices. ***Page, 4 x 7 inches.***

FOUR EDITIONS:

B, 200 pages, - - $1.00 **B 2**, 400 pages, - - $1.50
B F, 200 pages with flap, 1.25 **B F 2**, 400 pages with flap, 1.75

Price Book C.

The headings in Book C run across the top, in a line parallel with the hinge. The details of weight and freight contained in Book A are omitted, and a single column headed "Add" given for the insertion of freight or other expenses. Under the selling prices space is left for the wholesale price, the retail price, and for remarks. ***Page, 4½ x 7¾ inches.***



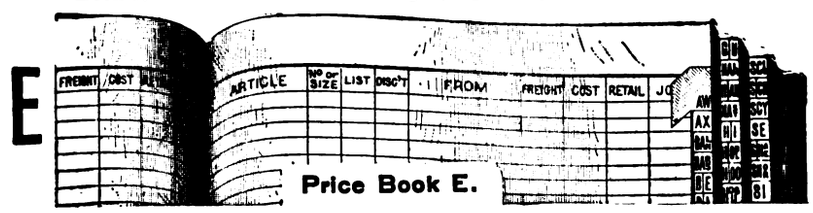
FOUR EDITIONS:

C, 200 pages, - - - $1.00
C F, 200 pages with flap, - 1.25
C 2, 400 pages, - - - 1.50
C F 2, 400 pages with flap, - 1.75

Suitable for desk and store use, and for salesmen on the road. A number of pages at the back of the book are arranged for memoranda. ***Page, 5¼ x 8 inches.***

FOUR EDITIONS:

D, 200 pages, - - - $2.00
D F, 200 pages with flap, - 2 50
D 2, 400 pages, - - - 3.00
D F 2, 400 pages with flap, 3.50



Price Book D.

MULTIPLE INDEX PRICE BOOKS.

A special feature of these books is the index, which is arranged with special reference to the classification of Hardware Goods, each index character giving the first two or three letters of the names of Hardware articles. There is an index character to every page, enabling immediate reference to any of the contents of the book. The ease and convenience with which the books can be used is indicated in the following examples, taken from Book F:

For Augers, turn to AU For Chisels, turn to CHI For Iron, turn to IRO
" Parers, Apple " PAP " Cutlery, " CUT " Irons, " IR'S

Both E and F are made of Heavy Ledger Paper and strongly bound in grain seal leather.

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Carson City, Mich. — Wright & Cady, Hardware dealers, new firm, have commenced business.

Cleveland, Ohio.—The T. G. Monat Co., has been incorporated by T. G. Monat, T. W. Hill, C. J. Deex, L. Monat, and H. C. Hill; to conduct steamfitting, heating and general contracting business. Capital stock, $10,000.

Charleston, Ill.—The Van Meter Hardware Co. is the name of a new firm.

Eaton Rapids, Mich.—Minnie & Bromeling, Hardware dealers, will occupy new store, which is now being erected by the Eaton Rapids Building Co.

Elizabeth, N. J.—John M. Clark, No. 85 Broad Street.

Hawick, Minn.— Enkema & Orlebeke, Hardware, sporting goods, etc., new firm, commenced business.

Jasper, Minn.—A. P. Smith has purchased a stock of Hardware at Fairmount, Minn., where he will soon engage in business.

Juneau, Alaska. — Parker & McConnell have engaged in the Hardware business.

Kalso, B. C.—A. B. Morris has associated himself in the Hardware business with A. J. Dill.

Laurium, Mich. — Faucett Bros. have leased the ground floor of their new building to a Hardware firm.

Montpelier, Vt.—The Brighton Store Co. has been incorporated by S. H. Vallee, M. B. Ladd, E. F. Hobson, S. D. Hobson, L. Ladd, G. C. Vallee; Hardware and general merchandise business. Capital stock, $10,000.

Pompeii, Mich.—Campbell & Willoughby have engaged in business.

Sherry, Wis.—The Jones Hardware Co. have opened a new store.

Changes and Improvements.

Alpena, Mich.—Ash, Eller & Co., Hardware dealers, business sold to H. E. Reynolds, who will remove it to his Chisholm Street store.

Altoona, Pa.—The Goodfellows-Melvin Co., Hardware dealers, have dissolved partnership, J. A. B. Melvin retiring. The business will be continued the same as heretofore by W. H. Goodfellow and Frank H. Goodfellow under the firm name of Goodfellow & Son.

Alvin, Tex.—McCabe & Anderson, Hardware, etc., have dissolved. Mr. McCabe being succeeded by J. W. Anderson, a son of the junior member, S. D. Anderson. The names of the new firm will be S. D. Anderson & Son, and they will continue in the same line of business.

Beardsley, Minn.—C. A. Prevy, Hardware, sporting goods, etc., succeeded by Wright Bros.

Birmingham, Ala.—The new store of the Mayberry-Watson Co. is approaching completion, and its capaciousness and adaptability to the Hardware business are far beyond any other building in the city.

Brighton, Ia.—S. M. Brice has closed out his Hardware business at this point.

Craig, Neb.—J. C. Smith succeeds George W. Green.

Dieterich, Ill.—Mrs. John Probst succeeds John Probst.

Eau Gallie, Fla.—Albert Bennett has removed to Daytona, having sold out his Hardware business at this place.

Firth, Neb.—D. J. Kallemeyn has discontinued business.

Geneva, N. Y.—Dorchester & Rose, Hardware, sporting goods, etc., have purchased the Franklin house property, and will remodel same, with a view to occupying it with their business.

Greenview, Ill.—Tripp Bros. have succeeded Jas. Tripp & Son.

Guthrie, Ky.—John Choat, the Hardware dealer, has sold his stock and good-will to his son, Hunter Choat, and Leon Hamill. The firm will be Choat & Hamill.

Hallstead, N. Y. — Joseph Rogers has completed the purchase of the James E. Davis Hardware store on Main Street.

Hammond, N. Y.—Henry Taylor will remove his stock of Hardware from this village to Sandy Creek, about the 1st of August, where he will reopen his business.

Kenyon, Minn.—A. Rennebohm, dealer in Hardware and implements, has sold his Hardware stock.

La Belle, Mo.—W. T. Wilson has bought an interest in Skirvin Bros.' large stock of groceries and Hardware. The firm is now Skirvin & Wilson, and is a strong and substantial one.

Lacota, Mich.—M. L. Decker has moved into new quarters.

Linden, Ind.—J. W. McCallum, has sold out.

Lineville, Ia.—L. Alcorn has succeeded the Smith Hardware Co.

Marietta, I. T.—Geo. P. Bates, dealer in Hardware and implements, has sold his stock of implements to Joseph Edwards.

Menominee, Wis.—The Northern Hardware & Supply Co. secure new quarters.

Milford, Ill. — O. P. Goodland & John Hallocks succeed Pawley & Pawley.

Morley, Mich.—Chas. Hawley has succeeded B. Williams & Co.

Nekoosa, Wis.—Eli Taylor & Son succeed Charles G. Oberley.

Oberlin, Kan.—H. H. Dilworth succeeds Moser Bros.

Oxford, Neb.—Ground has been broken for a large two-story brick block, 80x80 feet. It will be finished in modern style and when completed will be occupied by Nielsen & Mackpoang, Hardware dealers.

Pomona, Cal.—C. E. Freeman, Hardware, sporting goods, etc., succeeded by C. G. George.

Ramsey, Ill.—C. O. Rucker has sold his Hardware store.

Reading, Pa.—Bard, Reber & Co., wholesale and retail Hardware; firm is now Bard, Schlott & Co.

Riverside, Cal.—Fesler & Co. have succeeded Fesler & Davidson.

Rosebud, Tex.—The Tarver-Henslee Co. are moving their Hardware and implement stock into their new and elegant quarters.

South Boston, Va.—E. M. Penick has sold his interest in the Hardware business of R. A. Penick & Son to R. A. & W. L. Penick. The style of firm will remain unchanged.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, over the country are requested to contribute to this page News of new factories or companies, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Etc.

Buffalo, N. Y.—The Reid Portable Oven Co. has been incorporated by Elizabeth J. Reid, W. A. Coatsworth, and E.A. Harries: manufacturing ovens, heaters, etc. Capital stock, $2000.

Camden, N. J.—The Roberts Mfg. Co.has been incorporated by Charles Roberts, James J. Mulconroy, and Ernest Armstrong; manufacture filters, plumbers' supplies, etc. Capital stock, $25,000.

Chattanooga, Tenn. — The Ornamental Iron & Wire Co. has been incorporated by J. A. Patten, F. G. Staffer, P. Manker, G. W. Patten, J. E. Annis; manufacturing and selling iron, steel and wire and other materials. Capital stock, $10,000.

Dover, Del.—The Globe Steel Radiator Co. has been incorporated by C. E. Stafford, T. F. Barding, and G. A. Hamilton; manufacturing iron and steel radiation pipes, etc. Capital stock, $1.000,000.

Kansas City, Mo.—The Edward Booker Safe Co. has been incorporated by E. Booker, D. W. Bilderback, T. O. Jennings and R. R. Rollins; manufacturing fire and burglar proof safes and locks. Capital stock, $2500.

Middletown, Conn.—The new industry started in the factory once used by the Stiles & Parker Co., but which has for some time past been owned by the Doebler Mfg. Co., will be known as the Doebler Mfg. Co., and will be operated by this management in the manufacture of Hardware specialties, including pulleys and steel shelves. The president of the concern, C. Frank Doebler, stated that at the beginning about thirty men would be employed, but after the additions had been made, which are now in the process of construction, that would enable them to remove here the business of the Pratt-Weir Chuck Co., of Plainville, which they have recently purchased, nearly 100 hands will be given employment at the start. The Doebler Co. have their office at No. 116 Nassau Street, New York.

Nashville, Tenn.—The Harding Mfg.Co., manufacturers of agricultural implements, etc., capital stock, $75,000, will be consolidated with the company which has been organized to manufacture automobiles. Capital stock, $500,000.

New Brunswick, N. J. — The National Water Tube Boiler Co.has been incorporated by Charles A. Schenck, Louis Wolfson, Charles Howell, Chas. W. Harvey, and others, to manufacture water tube steam boilers. Capital stock, $100,000.

Pittsburg, Pa. — The Pittsburg Casting Machine Co. has been incorporated by J. Kennedy, E. W. Heyl, W. J. Patterson, C. Arthur, and W. W. Burns; manufacturing iron and steel. Catital stock, $3000.

Providence, R.I.—The International Burglar Proof Sash Balance & Lock Co.has been incorporated by B. M. Lovell, A. B. Harmon, and G. E.Barnard; manufacturing and dealing in sash balances,etc. Capital stock, $100,000.

St. Louis, Mo.—The John Baumann Safe & Hardware Co. has been incorporated by Kate Baumann, J. Baumann, H. C. Hunter, G. R. Baumann, all of St. Louis; for the purpose of manufacturing trunks and iron safes, etc. Capital stock, $10.000.

Changes and Improvements.

Averyville, Ill.—The new buildings for the Kingman plow factory are nearing completion. The new industry will employ when in full blast 500 men.

Buffalo, N. Y.—The McKinnon Dash & Hardware Co. have applied to the Secretary of State for the voluntary dissolution of the firm. The McKinnen Dash & Hardware Co. are located at Black Rock.

Georgetown, Conn.—The Gilbert & Bennett Mfg. Co., makers of wire netting and other wire goods, increased capital stock from $300,000 to $500,000. Edwin Gilbert has been elected president and treasurer; David H. Miller, vice-president and secretary, and Samuel J. Miller, superintendent. The wages of all employees in both Eastern and Western factories have been increased ten per cent.

Kalamazoo, Mich.—The Star Brass Works have increased their capital stock from $10,000 to $20,000.

Lansing, Mich.—The Acker Land Roller Co., manufacturers of agricultural implements, with ball bearing wheels, will locate at this place. Their present location is Argentine, Genesee County.

Madisonville, Ky.—R. M. Slaton will increase the capacity of his disc harrow and cultivator factory.

Mingo Junction, W. Va.—The National Iron & Steel Co. recently contracted for an electrical plant to be installed in their steel mills. This equipment is completed, and consists of two 150-kilowatt generators directly connected to two engines of 225 horsepower each, and supply current of 250 volts. The electricity supplies light to the mills and offices,and also operates nine large traveling cranes, capable of lifting from ten to thirty tons each.

Moline, Ill.—The Moline Plow Co. now have possession of the old Nelson livery stables and grounds and will proceed at once to extend their warehouse building over it. The plans are made and as soon as it is practicable,work will be commenced on it. This means a large addition to the storage room of the company. Ultimately, as the company grows, a building of four or six stories will be necessary on this place. The Moline Plow Co. are spreading over a lot of ground, and are keeping a big force of men busy all the year round.

New Decatur, Ala.—The Decatur Axe Handle Factory,are adding new machinery, which will increase the capacity of the plant to 3000 handles per day.

Quincy, Ill.—A. C. Bickhaus is making extensive improvements to his Gem City File Works on Broadway. These include an addition west of the works covering an area of 83x33 feet. The front will be two stories in height and the rear one story, but so arranged that it may be made uniform with the front at comparatively small expense, The front half of the addition will be used as an office and storeroom and in the rear will be the tempering room and the trip-hammers. The building now occupied by these departments will be torn down and there will be made a twelve-foot driveway between the old and new buildings.

Quincy, Ill.—The excelsior Stove Co.have closed a contract for the building of an addition to their foundry, at a cost of $32.000.

Recent Embarrassments.

Sandusky, O.—C. Schoepfle has been appointed receiver of the Sandusky Machine & Agricultural Works.

Recent Fires.

Cincinnati, O.—The casting plant at the Addyston pipe and steel foundry has been completely gutted by fire and everything except the standing cranes and the walls of the buildings destroyed. Several freight cars which were standing on the siding were also consumed. The loss is estimated at $500,000.

Kansas City, Mo.—Fire in the building of the Midland Varnish Co., No. 18 West Nineteenth Street, did about $40 damage to the building and stock. The fire was caused by the overheating of a pot of boiling varnish.

Philadelphia, Pa.—William Shendinger's file works, No. 6740 Tacony Street, have been damaged to the extent of $1000 by fire of unknown origin.

Miscellaneous.

Columbus, O.—From all the large tool works and machine factories in Ohio, Indiania,and Illinois many carloads of finished machinery are being shipped East, and the factories in the Eastern States are shipping their products West. The Baltimore and Ohio and Pennsylvania are handling hundreds of carloads of machinery weekly,and, in addition to the machines, hundreds of carloads of sewer pipe and boiler flues are being forwarded to various points.

Gadsden, Ala.—A handle factory is in successful operation at Hillian's store in Marshall County,and 800 handles are turned out daily.

Lynchburg, Va.—At a directors meeting of the Lynchburg Plow Co., the following officers were elected for the ensuing year: president and general manager, J. R. McWane; vice-president, V. P. Travis; secretary and treasurer, H. M. Davis; executive committee, M. J. Drummond, H. E. McWane, and J. R. McWane. It was determined to double the capital stock of the company, making it $80,000, and the board instructed the management to proceed at once with the contemplated improvements, which will double the capacity of the works.

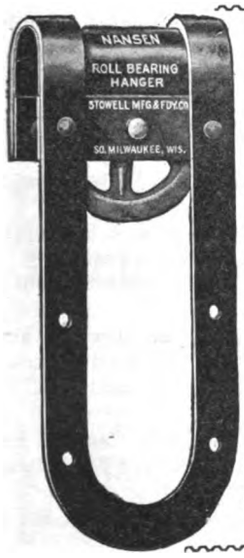
Sargent's Easy Spring Locks.

Sargent's Easy Spring enables the Latch Bolt to work very freely so that the door does not have to be slammed nor stand ajar, but latches gently as it is closed. This is accomplished by using a good stiff spiral spring, with a long leverage for the Latch Bolt, and a direct pull for the Knob, thus producing the desirable combination of



EASY ON THE LATCH BOLT.

FIRM ON THE KNOB.

The Spring cannot rub on the case, and it is impossible for it to bow or to get out of position. Working in a direct line, and so short a distance, without friction, gives great durability— no springs to be replaced, nothing to get out of order.

Hardware dealers should supply the demand for these Locks.

SALESMAN, well acquainted with Hardware, brass and silverware manufacturers throughout the Eastern and Western States, having traveled for a number of years, is desirous of changing his present position; is capable of handling any product used by above manufacturers. Address BOX 93, care HARDWARE, No. 143 Chambers Street, N. Y. 8

RELIABLE, intelligent and energetic man, who has intimate knowledge of both the flat and hollow-ware trade, and can bring a first-class recommendation from one of the strongest silver-plate factories of the country, would like to correspond with somebody who has use for a man of this experience, or will accept position in connection with some other business, where reliability, honesty and thorough work are required. Address BOX 95, care of HARDWARE, No. 143 Chambers Street, New York. 9

BOOK-KEEPER and expert accountant, familiar with office work in all its detail, desires a position. First-class references obtainable. Address BALANCE SHEET, care HARDWARE, No. 143 Chambers Street, New York. 41

YOUNG MAN, with six years experience in Hardware and electrical business, desires position as salesman or buyer. Located in New York. Will travel. Address, J. P. H., care HARDWARE, No. 143 Chambers Street, New York. 33

POSITION with foundry, smelting company or metal concern, as buyer and salesman of scrap metals of all kinds. Practical foundryman and smelter; thoroughly posted on all kinds of metals, alloys and composition. Acquainted with the trade in this city and vicinity. Good references as to honesty and character. Must have outside work and will work at very moderate salary. Address D. E. H., care HARDWARE, No. 143 Chambers Street, New York. 28

BY A PRACTICAL metal pattern maker and designer on ornamental work; an expert on complicated cored work; have had a wide experience in designing and making blanking, stamping and combination dies, jigs and small tools. High executive ability and tact in handling men in all of the above branches. Address "DESIGNER," care of G. S. BLACK, Globe Model & Pattern Works, Indianapolis, Ind. 5

YOUNG MAN (22) of good address desires position as salesman. Five years all around experience in largest wholesale Hardware house. Am thoroughly conversant with the business, also able to estimate. Address Box 94, care HARDWARE, No. 143 Chambers Street, New York. 6

Side Line Wanted.

SALESMAN calling on the jobbing Hardware trade through the West and Northwest would like good staple side line on commission. Best of references. Address "B," care HARDWARE, No. 143 Chambers Street, New York. 46

MANUFACTURERS' traveling agent with established trade in Indiana, Michigan, Ohio, Kentucky, and West Virginia, to jobbing and large retail trade, is desirous of adding an A1 line on salary or commission. Address ESTABLISHED, care HARDWARE, No. 143 Chambers Street, New York. 40

AN experienced Hardwareman now connected with large jobbing house, desires to secure a number of lines from manufacturers, for Western States. Finest references. Address, R. W., care HARDWARE, No. 143 Chambers Street, New York. 31

SALESMAN of long experience in the Southern States and calling on Hardware and housefurnishing trade, wishes side line of plated ware, cheap spoons and table cutlery; also Hardware specialties. Address, SPECIALTIES, HARDWARE, care No. 143 Chambers Street, New York. 32

SALESMAN, visiting Hardware and house-furnishing stores, wishes side lines. Small samples. Box 97, care HARDWARE, No. 143 Chambers Street, New York. 20

Side Line Offered.

SALESMAN to sell a superior article in spirit levels. Address LEVEL, care HARDWARE, No. 143 Chambers Street, New York. 39

TRAVELING salesman, in New England and Middle States, to carry a side line of beautiful goods on commission for manufacturer of highest standing. One who is acquainted with saws and kindred lines. Must be of highest character and have best connections. Address "COMMERCIAL," care HARDWARE, No. 143 Chambers Street, New York. 21

A Business Opportunity.

A GOOD opportunity for small investments, about $5000 of 7 per cent. preferred stock in small corporation doing a profitable business; shares $100 each. Business closely connected with iron and steel interests. Full particulars and references. Address, IRON & STEEL, care HARDWARE, No. 143 Chambers Street, New York. 42

Attention, Salesmen!

SALESMEN on uncovered ground can add hose, tires and full rubber line. Free samples. Cash commissions. Protected ground. One salesman earned $3900 in 1898. MINERALIZED RUBBER CO., New York. 2

Hardware Business For Sale.

WISHING to retire from business, I offer my Hardware business, or a controlling interest in it, for sale. Situated in one of the best cities in the South; this is a rare opportunity to step into an established and paying trade with nice stock and store and cheap rent. For particulars address "C," care HARDWARE, No. 143 Chambers Street, New York. 45

COMPLETE up-to-date Hardware stock and fixtures, inventorying $4500, in a thriving town of 3000 inhabitants. Best location. Tinning business in connection, and fine opening for a plumber. Good chance for an active man. For sale cheap. For particulars apply to R. W. WHINFIELD, Burlington, Wis. 23

Agency Wanted.

MANUFACTURERS' AGENT, with well located store in machinery district in New York, would like to hear from manufacturers wanting a reliable representative; have an established trade and years of experience. Address GEO. W. CHURCH, No. 183 Greenwich Street, New York. 3

Foreign Agency Wanted.

A GENTLEMAN with large experience and with good connection in all the principal towns in Newfoundland, is prepared to undertake additional agency in Hardware trade; good testimonials and references from firms represented. Address GEO. B. PARSONS, P. O. Box 331, St. Johns, Newfoundland. 10

Agency Offered.

AGENTS wanted to handle Burr's Cushion Stroke Adjuster, greatest wind-mill attachment ever invented. Quick seller, and liberal commission. BURR-FESLER CO., Batavia, Ill. a

WE would like to hear immediately from a few live Hardwaremen who would like to be sole representatives in their towns, of a concern that is in the market for business, and have a line made for "men now on earth"—a modern line THAT CAN BE SOLD to your customers. Address "BOX 88," care HARDWARE, No. 143 Chambers Street, New York. 4

WANTED agents to handle a patented, labor saving device of universal sale; investigation solicited by men who desire quick returns from a legitimate, profitable business. Address (C) BURR MFG. CO., Cleveland, O., 823 Society for Savings. a

PROPER Clothes Line Reel; simple, strong and durable; needed at every home. A money maker for agents. BURR-FESLER CO., Batavia, Ill. a

Attention, Manufacturers!

SALES MANAGER. An opportunity is presented to any large manufacturer in Hardware business to obtain the services of a competent sales manager, who has just completed his twenty-fifth year with his late employers who are now declining business. Has unexceptional ability in any line of work connected with the distribution of a large product. Address, H. O. P., P. O. Box 618, New York. 38

Store To Let.

CORNER STORE in new building in the upper part of Bayonne, N. J. This is a good stand for a crockery and household furnishings store. Moderate rent. For particulars inquire P. O. BOX 195, Hoboken, N. J. 29

ROOFING SLATE.

GENERAL RULE FOR THE COMPUTATION OF SLATE.

From the length of the slate take three inches, or as many as the third covers the first; divide the remainder by 2, and multiply the quotient by the width of the slate, and the product will be the number of square inches in a single slate. Divide the number of square inches thus procured by 144, the number of square inches in a square foot, and the quotient will be the number of feet and inches required. A square of slate is what will cover 100 feet square, when properly laid upon the roof.

TABLE OF SIZES AND NUMBER OF SLATES IN ONE SQUARE.

Size in Inches.	No. of Slate in a Square.	Size in Inches.	No. of Slate in a Square.	Size in Inches	No. of Slate in a Square.	Size in Inches.	No. of Slate in a Square.
6x12	533	9x14	291	10x18	192	11x22	137
7x12	457	10x14	261	11x18	174	12x22	126
8x12	400	12x14	218	12x18	160	14x22	108
9x12	355	8x16	277	14x18	137	12x24	114
10x12	320	9x16	246	10x20	169	14x24	98
12x12	276	10x16	221	11x20	154	16x24	86
7x14	474	12x16	185	12x20	141	14x26	89
8x14	3.7	9x18	213	14x20	121	16x26	78

The weight of a square of Slate is estimated in a general way (varying according to the thickness of the different makes) at from 600 to 700 lbs. per square.

A *square* of Slate is 100 superficial feet.

Gauge is distance between the courses of the slates.

Lap is distance which each slate overlaps the slate lengthwise next but one below it, and it varies from 2 to 4 inches. The standard is assumed to be 3 inches.

Margin is width of course exposed or distance between tails of slate.

Pitch of a slate roof should not be less than 1 in height to 4 in breadth.

Length of a slate is taken from nail-hole to tail.
Thickness of slates ranges from ⅛ to $\frac{5}{16}$ inch.

WEIGHT PER SQUARE FOOT.

Thickness.....	⅛	$\frac{3}{16}$	¼	⅜	½	⅝	¾	1
Weight.....	1.81	2.71	3.62	5.43	7.25	9.06	10.87	14.5 lbs.

Weight per cubic foot, 174 pounds.

It requires, on account of laps, an average of nearly 2½ *square feet* of slate to make one of slating.

Digitized by Google

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished th dealer upon request, by the manufacturer quoted.

Catalogue on Application.

MADE OF THE FINEST Cold Rolled Steel and Brass. . . .

NEW YORK STAMPING CO.,

North Eleventh and Berry Streets,

Brooklyn, New York, U. S. A.

"Pennsylvania" Fruit Picker

This Cut almost speaks for itself—the device being so much like the human hand, shows at once the utility of the article.

AS A FRUIT PICKER IT HAS NO SUPERIOR.

It is made of Heavy Galvanized Wire, and Easily Adjusted to a Pole. It has been sold for several years, and the demand (as it is becoming known) is steadily increasing. The difficulty of detaching fruit and securing it unbruised is apparent to everyone so engaged. This overcomes the difficulty, and saves the finest fruit, which commands the highest prices. It will gather Apples, Peaches, Pears, Etc.

THE LOW PRICE AT WHICH IT IS SOLD

brings it within the reach of those who have but little fruit to gather as well as those who have large quantities.

Price per dozen, $3.50. *Liberal discount to the trade.*

WHY IS C. E. JENNINGS' NEW AUGER BIT No. 1½

THE BEST BIT FOR WOOD BORING IN THE WORLD?

Because: There are good bits made for **hard wood.** The L'Hommedieu Ship Bit is an excellent tool for this purpose, but it is not designed for fine cabinet work or soft wood. There are good Bits for Soft Wood, but fail when used in **hard wood** We have combined **two principles in one,** and think we have solved the problem of putting a bit on the market that is suitable for all around use. Prices furnished the Trade on application.

Do You Sell Wheels?

PARRY makes Buggy wheels. PARRY makes none but the best grades of Buggy wheels. PARRY uses nothing but genuine second growth Indiana White Hickory, thoroughly dried. PARRY wheels are easy to sell because they are good wheels, well advertised. You should get PARRY'S prices.

PARRY - BUGGIES - INDIANAPOLIS.

Columbian 1000-Shot Air Rifle.

Patented Oct. 24, 1893.

CHAMPION MODEL.

This Air Rifle possesses advantages over all the Air Rifles now on the market. The materials used in its construction are the best. The appearance and workmanship is far ahead of any other Air Rifle made. It has an adjustable sight it shoots stronger and more accurate, less liable than any other to get out of order, all parts are interchangeable. We think we have the right to claim this as the "Champion" of all Air Rifles. List, per doz., Enameled, $30.00; Full Nickel, $42.00.

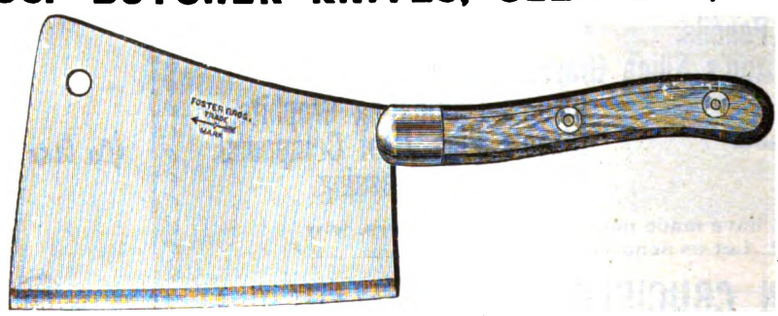
CHATILLON SPRING SCALES.

OUR attention having been called to the fact that inferior makes of Spring Scales are being sold to butchers as "Chattillon" Scales, we deem it due to the trade and to ourselves, in order to protect the merits of our Spring Scales, so well and favorably known for more than sixty years, to inform you that every Spring Scale manufactured by us



has our name as makers plainly on the dial, thus:

John Chatillon & Sons. Makers. New York. U.S.A.

and any scale without this name on the dial is NOT A GENUINE CHATILLON SCALE.

FOSTER BROS.' BUTCHER KNIVES, CLEAVERS, STEELS, ETC.

HARDWARE

"The man without a country." W. W. astor.

It seems to an ordinary observer that the thing which is the most hazy in the Dreyfus court martial, is the status of Esterhazy.

The Kilbourne & Jacobs Mfg. Co., of Columbus, Ohio, have made a good beginning in the shipment of their useful specialties to Japan.

There are some people who hate like everything to carry an umbrella, unless it's *somebody else's*, or to spend a dollar unless it is one they have recently "borrowed."

Many a man goes through life wanting the earth, who if he died tomorrow would puzzle his folks to know where he could obtain enough of it to make a successful "plant."

I remember an old traveler who centralized his wisdom when he said, "One undiscriminating bookkeeper could close up more accounts in one month, than two drummers could open in six."

The salesman who scatters his special terms too freely, deserves but little encouragement; he's too previous. It would be better to remember that umbrellas are the most serviceable when it rains.

Mr. George H. Harper formerly with the Matthai-Ingram branch of the National Enameling and Stamping Co., will be the general manager of the sales department of Clendenin Bros., Baltimore, after August 31st.

Taking into consideration Mr. Astor's expressed desire to "wash his hands clean of everything American," it would seem to an unprejudiced observer, as though the final syllable in his cognomen was a superfluity.

Now when Grand Jury authority has decided that carbolic acid may be safely used to demonstrate the acrimonious state of mind of a jealous dame, even though the victim should die under it; why wouldn't "Diabolic" be a more appropriate front name for it.

J. B. Nellegar, president of the Wells & Nellegar Co., Chicago, Ill., returned quite recently from a tour in Europe lasting two months, during which he visited many parts of England, and the Continent. He reports having found abundant evidences of great prosperity.

Neal & Brinker, No. 168 Church Street, New York, have been appointed Eastern selling agents of the Best hack saw and power saw blades also the Culley saw and butcher saw blades. These goods are manufactured by the saw department of the Fitchburg File Works, Fitchburg, Mass.

From an enquiry addressed to Acting Mayor Guggenheimer, it is noted that American sausage links have become as popular in Germany as golf links are here; these pork products of ours it is believed will soon "hog" the German markets, and this is by no means the *wurst* thing that could happen to us.

It is to be hoped that the fifty-sixth Congress will favor the growing sentiment which has been agitated for a number of years, that of having a department of commerce with a head of ability. As the very life of the nation is dependent upon its commercial condition, it would seem as though interests of so much importance should have a direct cabinet representative.

J C. McCarty & Co., No. 10 Warren Street, New York, have been appointed agents of the Bay State Forge, Cambridgeport, Boston, Mass., manufacturing a complete line of toe calks, blunt, half sharp and sharp, long, medium and extra long, in all sizes from No. 0 to 7. J. C. McCarty & Co. will carry an assortment of these goods in their warehouse stock for trade convenience.

W. C. Heller & Co., recently shipped by steamer *Messaba*, 5655 steel shelf boxes to England; the shipment including also five complete cabinets. A shipment to Hull, England, will follow next week. While these shelf boxes have only been introduced to the foreign markets a little over a year, the manufacturers find the demand to be increasing immensely, coming from all parts of the world.

President George H. Sargent of the Hardware Club started on his homeward trip across the briny deep on the 6th inst. He will be a passenger on the maiden voyage from Liverpool of the White Star steamer *Oceanic*. The steamer will have on board including a crew of 420, close upon 2000 people, 375 of whom will be first cabin passengers. So the distinguished Hardware presentative will not be lonesome.

Mr. J. E. Buck, who has been prominently identified with the trade press of St. Louis for eight years, the last two years of which time he edited *Stoves and Hardware Reporter*, has severed his connection with that publication to accept a more lucrative position in Philadelphia, where he becomes a member of the editorial staff of the *Implement Age*. From 1896 to 1898 he was secretary of the Implement and Vehicle Board of Trade.

In connection with the G. A. R. Encampment held last week, the following invitation, in two colors, on very handsome stationery, with a spread eagle design, was mailed to their friends: "The Supplee Hardware Company realizing that many of their friends will visit Philadelphia during the G. A. R. Encampment, September 4th to 9th, 1899, inclusive, invite you to make their offices your headquarters during your sojourn in the city."

The Union Metallic Cartridge Co, Bridgeport, Conn., are distributing a large edition of the "Game Laws of the United States and Canada," which is a compilation of the gunning laws, with special reference to seasons, and other provisions and restrictions in force in the various States and Territories of the United States and the Provinces of Canada. As this edition includes the legislation of 1899, it is an unusually desirable volume to write for.

Some of the thinking men of Germany believe it would be of great economic advantage to that country if the agricultural class would increase its cultivation of grain and other products and not buy so much from this and other countries, making the tariff high enough so as to protect the German farmer. As Germany's import of food articles in 1897 amounted to 250,000,000, it is supposed they will go without a meal a day for national reasons, so as to change the adverse trade balances which have existed for a long time.

HARDWARE

VOL. XIX. SEPTEMBER 10, 1899. NO. 11

HARDWARE is a Review of the American Hardware Market, specially devoted to the Retail Trade. Published the 10th and 25th of each month, by the HARDWARE PUBLISHING CO., No. 143 CHAMBERS ST., NEW YORK.

Subscription, $1.00 per year. Subscription, Foreign, $1.50 per year.

L. E. MITCHELL, - - President.
E. N. ROOT, - - - - Treasurer.
W. C. BRUNDAGE, - - Business Manager.
HENRY HOPKINS, - - Editor.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

The same old story is told all over the country by every dealer enterprising enough to be in the forefront of our progressive business. The entire trade is in the full tide of the wave of prosperity. Demand for almost everything of a seasonable character indicates a phenomenal season for sales, while the supply of goods upon orders that have been booked for months is in some cases appallingly inadequate. Even the most methodical buyers who anticipate their wants by entering orders a long way ahead of a specified delivery, suffer with the rest. Many of the old orders given at low prices in the early Spring for staple requirements, because they were ordered from manufacturers too improvident to purchase material for their date of completion, are as yet in unfilled serenity. The filling of the orders would be at a positive loss through no fault of the buyer, but entirely owing to the speculative propensities of the manufacturers, who in the Spring, could not coax themselves to believe that the prevailing advance in quotations would last longer than a month or so.

How many firms are there, blest with fair stocks made slightly excessive by early deliveries on orders, that disposed of their line of staples to Spring trade at prices showing a good profit on actual cost, but which cannot to-day be bought within a large percentage of those quotations. Yet this will ever be. The anxiety to make a sale, the satisfied feeling of a fair profit largely in excess of previous percentages, a knowledge that stocks are somewhat heavier than usual, the probability of tempting a new customer—all these motives and many more usually accompany business done on a rising market.

It will not be plain sailing on the ocean of traffic during this season. Raw material is in too many cases simply unobtainable, and anything but prompt deliveries even in fragmentary quantities will be the feature of the relations existing between the manufacturer and the jobber.

The tone of the market is strengthened materially by the sustained demand, even under the maintenance of quotations deemed unnecessarily high, but not prohibitory; goods composed largely of material in which labor enters but little, showing the greater percentage of increase in price. A few conservative manufacturers doing a successful and profitable business in their well-known specialties, have made few if any changes, preferring a diminished profit to radical advances in established retail prices long maintained.

Jobbers are more inclined this season to take the full profit permitted by the filling of old orders; the disposition so noticeable in the Spring of throwing away advantages secured by wise buying being less noticeable. The retail demand continues excellent although the full advance on present prices is not always obtained in making sales to a critical consumer.

Terms on Hardware.

In June, of this year, the American Steel & Wire Co. announced that beginning with July 1st, their terms on their product would be changed to thirty days net, with no discount whatever for prepayment.

This announcement certainly came as a surprise to the trade, and was strenuously opposed by many of the leading jobbers without avail. It is now regarded as one of the "Signs of the Times" and has undoubtedly come to stay.

This company found, what many have not realized, that in giving the jobber and retailer two per cent. discount on their purchases when paid for in ten days, they were giving them a discount equal to the rate of fifteen per cent. per year. They rightly concluded that this had ceased to be sound business policy, and unjustifiable when they could borrow all the money they might need to carry the accounts at less than six per cent.

The time is rapidly approaching when the discount for cash on all descriptions of Hardware will be either lessened for the same reason, or done away with entirely.

When the terms of sixty days, with two per cent. off for cash in ten days were adopted, it was done for the express purpose of encouraging slow-paying customers to settle more promptly, and but a very small percentage of those in the business, that were sought to be benefited, took advantage of it. As the country became more prosperous, and money less scarce, a larger number of dealers were enabled to take advantage of the discount for cash and the greater then became the burden to the manufacturer and jobber, because they were giving their customers, in a number of instances, two and one half times what it would cost them to borrow the money and carry the accounts to maturity. This manufacturing company has simply taken the initiative in a custom which is destined soon to become quite general in the trade, because these are the days when the close buyer haggles over a cent and in larger transactions, over even the fraction of a cent.

Those who adopt these terms are placing themselves in a stronger position, one where they can give the purchaser every advantage possible in the way of price, and as the public become more familiar with the benefits to be derived from this course of action the more will they regard the terms with favor.

Industrial Sunshine.

With magnificent crops on every hand, turning wealth into the coffers of the agricultural consumer, who has already tasted the fruits of prosperity in the plentitude of nature's bounty. He is now engaged in scheming how to expand his output by increasing his natural facilities. The laborer and skilled artisan in almost every industry are straining to the utmost to double the

Digitized by Google

amount of employment formerly required, with increasing pay in each successive pay-roll as an incentive to increased exertion; they too have needs to supply and wants to dwell upon, better houses to live in, and handsomer equipment of the same to make glad the hearts of the local dealers, who are only too willing to entertain their increasing importance as purchasers. Savings banks all over the happy land show increasing hoards, the proverbial laying aside for a rainy day, augmenting in an encouraging ratio the number of the frugal among our citizens, until the time may possibly arrive when the stigma of improvidence will be placed in the background as a national characteristic.

No one can predict the increasing prestige which may but a few years hence, make us the grandest industrial nation on the face of the globe. Excelling in every line of creative industry in which the established precedents of centuries of employment—blazoned in the annals of nations—shall fail to become even the object lessons, which industrial excellence should always command, except in a country where mechanical skill surpasses in prominence and excellence the standards of achievement which have formed epochs in long ages of progressive development.

It is sad to see a tendency in some quarters towards industrial unrest with which professional agitators afflict the work-blest laboring classes. Because employment is plentiful on every hand with good pay, they feel as though they can risk weeks of idleness to accomplish some form of coercion towards a harassed employer, which a few years ago would have been regarded high treason against the benevolent manufacturer, who frequently at that time ran his factory at an inadequate profit, only to keep his workmen together, his wheels at work and the fires of his forges lighted. Gratitude toward the dispenser of employment, the provider of the field of labor, the glad patron of the pay-roll, is not a distinguishing characteristic among the restless workmen of these indulgent times. It does not need any Cleveland strikes, Brooklyn disturbances, or industrial anarchy in many other places, to realize that when the working forces see a chance to show how dictatorial they can become they hesitate but a little to prove their power, and selfish and unnecessary demands jeopardize the prosperity so gladly welcomed a few months previous.

Exports to Our Provinces.

Exports from the United States to Cuba, Porto Rico, Hawaii, and the Philippines were, according to a statement just prepared by the Treasury Bureau of Statistics, larger in the fiscal year just ended than in any preceding year in the history of our commerce with those islands. Even the reciprocity years, 1892, 1893 and 1894, in which the exports from the United States to Cuba and Porto Rico were greatly increased, do not show as large a grand total as does 1899 with all of the disadvantages of war conditions which prevailed in Cuba, Porto Rico and the Philippines during a part of the year. To Cuba, the total export for the year does not reach the large figures of the two full fiscal years, 1893 and 1894, in which the reciprocity treaty with Spain was in operation, and to Porto Rico the total export of 1899 was slightly less than that of 1892, during three-fourths of which the reciprocity treaty was in operation, or 1894, in all of which it operated. To Porto Rico the total exports of the fiscal year 1899 are nearly 25 per cent. in excess of the average annual export during the preceding decade; to Cuba they are nearly 50 per cent. greater than the average during the preceding decade; to Hawaii, they are more than twice as much, and to the Philippines more than three times as much as the average annual exports during the preceding decade. These figures, it is proper to add, do not include the exportations to the islands in question by the Government either for use of its troops or in aid of the temporarily destitute.

While the total imports into the United States from these islands is not as large as in earlier years of the decade, this is due solely to the fact that they did not have the supplies for exportation, this being especially true of Cuba whose sugar plantations and works were so largely destroyed during the war with Spain. That our imports from these islands are rapidly increasing, however, is shown by the fact that those from Cuba in the year 1899 were 66 per cent. greater than in 1898; those from Porto Rico, nearly 50 per cent. greater than those of the fiscal year 1898, and those from the Philippines nearly 20 per cent. in excess of those of last year, while those from Hawaii show a slight gain over last year and an increase of 30 per cent. over the fiscal year 1897.

The New England Hardware Dealers' Association.

The next regular monthly meeting of the New England Hardware Dealers' Association will be held at the United States Hotel, Boston, on the evening of the 13th inst. "Local Associations" and "Hardware Prices and Price Lists" are the subjects which have been selected for the discussion, usually encouraged at these gatherings. Among the speakers who are announced to participate are the following: G. E. Russell, president, and H. L. Russell, secretary, of the Springfield Hardware Social Club, Springfield, Mass.; A. H. Decatur, of Baldwin, Robbins & Co., Boston, and several others. There is every reason to believe a full attendance of members will be one of the features of the occasion, and that subjects of such vital interest will be handled in an interesting and entertaining manner.

Patents and Trade Marks in Cuba and the Philippines.

An official circular has recently been issued by the War Department at Washington, stating that in the new territories of the Islands of Cuba, Porto Rico, and the Philippines, now subject to Military Government by the forces of the United States, owners of patents, including design patents which have been issued or which may hereafter be issued, and owners of trade-marks, prints, and labels, duly registered in the United States Patent Office under the laws of the United States, shall receive the protection accorded them in the United States; and an infringement of the rights secured by lawful issue of a patent or by registration of a trade-mark, print, or label shall subject the person or party guilty of such infringement to the liabilities created and imposed by the laws of the United States; provided, that a duly certified copy of the patent of the certificate of registration of the trade-mark, print, or label, shall be filed in the office of the Governor-General of the island wherein such protection is desired; and, provided, further, that the rights of property in patents and trade-marks secured in the islands of Cuba, Porto Rico, the Philippines, and other ceded territory, to persons under the Spanish laws, shall be respected in said territory, the same as if such laws were in full force and effect.

THE GARLAND MAGAZINE, Trade Edition. This is a publication of the Michigan Stove Co., Detroit. Very handsomely gotten up, quarto in shape and 9 x 12 inches in size, printed on first-class coated paper, and filled with superb half-tone illustrations of their newest styles of Oak stoves for the 1899 trade. Every illustrated page is a work of art.

One shipment of 50 cases of oil stones was recently made to Southampton, Eng., by the Pike Mfg. Co.

Recent Trade Publications.

THE UNION HARDWARE CO, Torrington, Conn., for whom Tower & Lyon, No. 95 Chambers Street, New York, are direct representatives, are early in the field with their ice-skate catalogue for 1899. This catalogue, which is a pamphlet of 40 pages, illustrates a number of popular lines of skates of considerable interest to the trade handling these seasonable specialties. These are accompanied by full descriptions, and the catalogue is of a size that merits wide distribution. Among the styles shown are a number that are supplementary to the usual and regular line. One style is all clamp, with flanged blade and a screw fastening, is evidently intended for hard work, and is made in seven sizes. The heel clamps are on the side, and there is a raised back piece that keeps the heel from the natural tendency of working backward. Both clamps are operated by key, which is made under an 1899 patent. An interchangeable and extra outside clamp is furnished with each skate, in order that it may be fitted to any shape and centre on the popular one-sided or bull-dog shoes. The runners are welded hard and thoroughly tempered, and are full-polished and nickel-plated. These skates are all fully warranted. This same style of skate is made in the hockey pattern, and is used by the leading hockey teams in Canada and the United States, and other prominent players, the all-clamp hockey skate being similar to the one described, with the exception that in many cases it is regarded as desirable to screw them permanently to the shoe sole. A regular hockey skate is also made, having a plain blade, and arranged to be screwed to the bottom of shoe, both styles being made of the best material, with warranted runners and strong braces. The Union Hardware Co. make a long line of ladies' skates in all the various styles patronized by lady skaters, from some of their well-known regular patterns, which they have had for many seasons, to which they have added others that are up to date, all clamp, flanged blades, with strong, substantial fastenings, that do away with straps, buckles, etc. This catalogue should be in the hands of all dealers handling skates, in order to keep abreast of everything that is growing popular in this particular line.

C. E. JENNINGS CO., No. 101 Reade Street, New York, have recently issued an entirely new catalogue of mechanics' tools and Hardware specialties, which are shown in great variety. The catalogue is a bound volume of 160 pages, printed on excellent paper, in size about 8 x 11, bound in stiff covers, and handsomely illustrated throughout, with good descriptions of all the goods represented on its pages. In it are shown an unusually fine assortment of boring tools of every description: Socket firmer and framing chisels, tanged firmer, paring and turning chisels, tanged firmer and turning gouges, drawing knives, with regular adjustable and folding handles. Included in the assortment of boring tools are car bits, bell hangers', dowel, expansive, gimlet and machine bits, and boring machine, carpenters' nut, millwright, rafting and ship augers. In addition to which they manufacture a large line of saws of every description, including hand and panel, compass, back and butcher saws, buck and hack saws. The Griffin metal band saw No. 1 is fully illustrated and described, and also the Griffin power hack saw. Altogether it is a catalogue that every Hardwareman should add to his library at his earliest opportunity, if not already in possession of the same.

LUTHER BOARDMAN & SON, East Haddam, Conn. Pamphlet catalogue of 32 pages, covering their line of silver-plated tableware, this being catalogue "C," superseding catalogue "B," and having a revised special net price list. All the various patterns of flat tableware are here illustrated, and description and prices are given on first quality nickel silverware without plate; also on 18 per cent. metal goods for silver plating, and a line of first quality britannia spoons, with which the name of "Boardman" has been for several decades fully identified.

W. H. HORSTMANN CO., Fifth and Cherry Streets, Philadelphia. Pamphlet catalogue of special flags, burgees and streamers made from bunting and dyed by the Horstmann "20th Century" Process. This catalogue is printed on good paper, and with handsome illustrations. The Horstmann dyeing process is one by which every color is dyed, and is indelible. It will neither run nor wash out. No rain can hurt it. You can soak the bunting in water and the colors will remain bright and fresh. The result of this is that any design whatever can be dyed by this method, upon any shaped flag possible to construct, and in any colors that are considered necessary. A design dyed by this method does not add one ounce to the weight of the flag, nor does it make the bunting rough or stiff. You can rub your hand over it, and be unable to detect the slightest difference between the dyed parts and the undyed ones. This is a line of goods that is special entirely with this company. In our recent issue we gave notice of their catalogue of regular flags, in which are shown the flags of forty nations, and regular bunting flags made in the customary manner.

JOS. DIXON CRUCIBLE CO., Jersey City, N. J. Pamphlet catalogue of 62 pages, illustrating their entire line of graphite productions, with a very handsome and attractive cover in canvas, on which artistic work of color illustration on the outside, both back and front, is worthy of notice, being extremely fine and showing a great deal of taste. Its contents are illustrated, showing the graphite lubricants of the company in large variety, including pipe joint compound, silica graphite paint, graphited oil, cycle chain graphites of several varieties, and a number of others are shown and described. Their line of black lead crucibles is illustrated in all the special shapes and styles, and the tools and appliances necessary to be used in connection therewith; also a line of brazing crucibles of new patterns, for which they also make an antiflux brazing graphite, Dixon's stove polish, belt dressing and German black lead. Included in the contents are a full line of Dixon's American graphite pencils, from the finer grades of office pencils, running through a full and complete assortment of everything in that line, with all the necessary appliances to fit them for proper use.

STOLLBERG & CLAPP CO., Toledo, Ohio. Fall catalogue 1899, No. 1, which is quarto in size, of 72 pages, printed on good paper, finely illustrated, and showing a full and complete line of goods to stimulate the orders of their many customers, all of which are suitable for the season, including a large line of cutlery, a number of new styles of locks, and other builders' Hardware, silver-plated ware, knives and forks, cistern pumps, slaw cutters, meat choppers, lamps and lanterns, stove boards and oil heaters, etc. It is a very large and interesting line, and no doubt very acceptable to those to whom it is sent.

M. M. BUCK MFG. CO., St. Louis Mo. Twenty-four page pamphlet of railway and machinists' supplies, of which this concern are large manufacturers, they having recently purchased all the machinery, tools, dies, patents, etc., from the Rau Mfg Co., of Chicago, Ill. Included in the line of goods shown in this catalogue are a number of specialties marketed under the name of "Perfection," including oil can sets, engineers' oilers, detachable spout oilers, filler and benzine cans and hand oilers. They also make a line of standard tinware for railway service, which is illustrated in outline and shown in one eighth actual size. Included in the assortment are galvanized waste cans, linemen's torches, the Superior oil filter, and the "Dibble" sight feed lubricators.

HARDWARE TOPICS BY THE WAY.

The Cleveland municipality has resolved to place waste baskets in the streets to receive the sweepings and gutter dodgers of the merchants. This is a timely institution, no doubt, and might be modeled after by more pretentious communities. It will also open a new field for the wire basket industry, or any other industry able to furnish a suitable metallic receptacle. It goes without saying that the vagrant street waifs have thus found a new night quarters, and the "nosey" rag peddler might be kept thus out of our back yards.

President Everett, the Cleveland railway strike "hero-victim," has been titled, Railway Czar of America. There seems to be little sympathy, however, between him and the Czar of all Russia; for, the latter has not as yet submitted plans for the bomb-proof railway cars of which he holds the czarish patents.

Metal statisticians have figured out during their galloping vacations that the present top notch demand for iron products will at least hold out another year. Poor consolation for the Bryan revivalists! The voters had better leave well enough alone!

Cleveland may have lost part and parcel of her pristine greatness, but to be an evolutionary monarch of modern greatness probably recompenses for the deflection. She is now actively engaged in automobiling the seamless tube and correlative industries.

"A really modern clothes line, goat-proof, storm-proof, and after a long service yet adaptable for a lynching bee, is the clothes line we sell," is the ad. perpetrated by an Alabama dealer. Considering the territory, he ought to practically control the market.

The American merchant loves to show goods. That explains the "looker" clientele.

From an ad.: "We sell easy cork pullers all the year round, especially in hot weather."

Street railway strikes are an impetus to the automobile industry not to be reckoned with offhandedly. Ask the cycle and carriage trades for information.

Let's burn incense instead of gunpowder in 1900.

A Western Hardware dealer has engaged a graduate of a technical college to instruct interested visitors in the practical adaptation of acetylene gas. Incidentally, he sells any number of acetylene bicycle lamps and other articles adapted to its use.

A carriage Hardware manufacturer recently returned from Europe says the introduction of pulp parts manufactured in this country after improved patents will only be a matter of a few years. Carriage timber is getting scarce and high-priced, and is therefore incompatible with the ridiculous prices now quoted on finished stock. He, himself, seems inclined to promote such an enterprise, basing the future of the horse carriage building simply upon the prices at which supplies may be obtained. This question is the more serious under the advancing scale of metal prices.

A foreigner describes the American Signal sash lock as the height of evolution. Well, we have flown to other heights, but condescend to chronicle this alien acclaim.

The way to annexing Berea to Cleveland will be paved with grindstones, if the present plans of the Cleveland Stone Co. are carried out.

Cleveland's Hardware market is big without advertising the fact. But biggerness being the universal slogan, the agency of advertising is not to be trifled with. New things must be known to become of value; old things must be refreshed to save them from the junk heaps of oblivion. It's the same with a business reputation. Fame is shortlived at best, and it should therefore be exploited to its fullest extent while it lasts. 'Tis true merit proclaims itself, but printer's ink proclaims merit.

It's rare when a man faces all he claims in this world of commercial mendacity. I know of one who does, William M. Newton, the stove lining man. If his claims do not come true, you may have the satisfaction of punching various holes in his portrait on the bag. Whatever he has the face to say he will back up, even if he has to get his own "back up" to do it.

The building activity has experienced a temporary check through the inadequacy of the supply market and the resultant high prices upon structural iron, which is the "trust" of modern building material. And, by the way, the present prices of lumber are also to be reckoned with. If it costs fifty per cent. more to erect a building now than it did a year or two ago, lumber shares equitably in that increase. Don't blame it all on the "iron and steel monopolists."

You wouldn't take the time to compute that a Western dealer makes ten per cent. of his annual profits by specializing transom lifters and correlative devices, yet such is the fact. The public generally demands the best in this line. Like the stove pipe, it's a critical article to manipulate, and perfection is therefore the desideratum.

An Ohio dealer gives a cake of soap with every article of polish he sells requiring the use of the hand, and furnishes a dozen sheet rolls of toilet paper with the "artistic and practical" toilet paper device he sells in conjunction.

A butchers' barbecue attended by practically the whole town, had the usual meat-dressing contest. A Hardware dealer, specializing butchers' tools, furnished all the paraphrenalia for use at these contests, and incidentally advertised the fact upon the tent canvas and besides furnished enough printed waxed paper to wrap up all the sandwiches dished out. The decision of the contest was embodied in his next-day newspaper announcement in a clever commercial way. Thus: first prize was won by Joseph Metzger, using a Bradley cleaver; Disston butcher saw, Foster steak knife purchased from etc., etc.

Cleveland, O., Aug., 1899. JOHN B. RINDFLEISCH.

Cast iron was known to Holland in the thirteenth century, and stoves were cast at Elass in 1400. But tradition has it, which an ancient Roman writer records, that the temple of the "Great Mother," at Sparta, is said to have been built by Theodorus, who first discovered the art of casting and making statues in iron. As with the metal itself, so its discovery in the form of cast iron was an accident which occurred at one of the early works in the Rhine Provinces, where a part of the "running" one day was found to be of different texture, and it was a problem for some time what to do with the strange stuff.—*Ex.*

HARDWARE costs only One Dollar a year.

What Other Nations Think of Our Growing Exports.

That the growing popularity of American manufactures in all parts of the world is recognized by the manufacturing and mercantile communities of other nations is shown by a series of statements just published in the Monthly Summary of Commerce and Finance issued by the Treasury Bureau of Statistics. This series of statements, which is to be followed by others of a similar character from month to month will indicate to our manufacturers and exporters what the people of other parts of the world are thinking and saying about their products. While the general growth of our export trade has been phenomenal, the feature which has naturally attracted most attention is the growth in exportation of manufactures and their popularity in markets formerly held by other nations. The exports of manufactures from the United States are now averaging a million dollars a day. In the 212 days from January 1st to July 31st the exports of manufactures were $211,975,904, or practically $1,000,000 a day, while in the corresponding period of 1895 the exports of manufactures were $110,389,940, or practically a half million dollars a day. That this phenomenal growth by which our exports of manufactures have practically doubled in four years should have attracted attention is not surprising, and it is both interesting and instructive to know what is being said about it by those interested in similar lines in other parts of the world.

The following are extracts from the statements published in the Monthly Summary of Commerce and Finance just issued:

From the *Mark Lane Express:* "The importation into England of foreign agricultural machinery, principally from America, and intended for transhipment is constantly increasing. During the past few months the steamers of the Wilson line have landed in Hull unusually large quantities of agricultural machinery and implements. Practically the whole of it is sent abroad, large quantities being for Russia, which a few years ago was supplied almost wholly with the English made article."

From a Smyrna correspondent of the *British Trade Journal*: "Among the nations now struggling for supremacy in our markets we must number the Americans, who have thrown themselves heart and soul into the battle, and it appears to me that in a very short time they will prove most formidable antagonists."

From the Belgian Vice-Consul at Bangkok: "The bicycle is met with in every street of the capital. Europeans are not the only patrons of cycling; the Siamese have acquired a taste for it, and the Chinese, in spite of their costume, which renders bicycle riding difficult, have even followed their example. Most of the bicycles now met with in Siam are of the American, English, or German origin. One American bicycle sells at 280 ticals, the tical equaling 30 cents; another firm imports American cycles, which sell at 240 ticals. German machines imported are found too heavy for Siam, and dealers have been asked to import machines which could compete with American cycles."

From the British Consul at Mariupol, Russia: "There is still a large market in Russia for machinery, machine tools, leather belting, wire ropes, shovels, coke forks, mining and other tools. I prevailed upon some of the local dealers to pass some trial orders for tools from England, but they informed me that English prices were too high, and that they could have bought the same articles from Germany or the United States more cheaply. I am at a loss to account for the American competition, when one takes into consideration the heavy cost of transport, and especially when it must be admitted that the goods are said to be in no way inferior to those of British manufacture."

From the *London Mechanical World*: "Undoubtedly we are indebted to American designers for many practical notions, particularly in milling and grinding machinery, but in general it may be said that the conservatism which dominates our business methods has much to do with the apparently indifferent showing made by our machine tool makers in comparison with American manufacturers. In England we rarely meet with a catalogue of machine tools which gives such detailed particulars as will enable the construction of the machine to be made out, and a probable estimate of its capabilities obtained. On the other hand, the American machine builder takes the prospective purchaser into his confidence, giving information which would almost enable any builder to make the machine who was so disposed. English builders object to this policy which they consider as 'giving too much away,' but facts are against them if the success of American tool makers is conclusive evidence on the matter."

From the *London Engineer*: "We see no reason why statements favorable to American engines should be made if they are not true. We have the best interests of the locomotive builders of this country at heart, and we should wholly fail in our duty if we said pleasant things and maintained that the typical English locomotive must be the best for Austria or South America or China or Africa, just because it is the best for the railways of the United Kingdom. Americans more fully understand what is needed for railway service in a new and cheap country than we do, and we ought not to be too proud to learn from them."

From the *British South African Export Gazette:* "Among the thirty-three classes of American goods enumerated as being exported to Africa in March, twenty show an increase and eleven a decrease. The increases include cycles, builders' Hardware, sewing machines, scientific instruments, clocks and watches, cotton manufactures, leather manufactures, canned beef, pickled beef, hams, pork, sugar, molasses, mineral and vegetable oils, manufactured tobacco, books and seeds. The figures are full of import for all classes of British manufacturers, showing as they do that American competition has to be met in all departments of trade. The energy which our trans-Atlantic cousins put into all their new departures is earnest of a sufficiently active exploitation in the near future, which can only be met with renewed care and energy on the part of English firms."

From the *Canadian Manufacturer:* "It is the opinion of many Canadian importers of such goods from the United States as come into competition with those from Great Britain that the discrimination of 25 per cent. in favor of British goods has only a trifling effect upon the volume of imports from the United States. Canadian consumers of the leading articles made of iron or steel, and of other metallic goods show a decided preference for those made in the United States and will not take British goods even if the preferential duty causes them to be proportionately lower in price."

Merchant & Co., Inc., of Philadelphia, New York and Chicago, have just prepared and are now sending out for the first time, one of the most complete and attractive circulars on the subject of solders that has ever come to our attention. It gives very full and explicit information about their various well known grades, and will be sent upon request addressed to any one of their offices. This company has been so long and favorably known as large and high class manufacturers of solders of every grade that it is almost needless to comment upon their product in this line. One thing is certain—that parties buying from Merchant & Co., Inc., are absolutely sure that goods are as represented and are first class in every respect.

It is calculated that the shareholders of the United Kingdom outnumber the railway employes by about 40,000.

MR. SUPPLEE IN ENGLAND.

All Hardwaremen will be interested in learning of the kindly reception accorded one of the foremost men in the trade in this country by a number of gentlemen representing the varied Hardware interests of England.

William W. Supplee's many personal friends, especially the members of the National Hardware Association and the many readers of *Hardware*, who have been numbered for many years among the customers of the Supplee Hardware Co., of Philadelphia and its predecessors, will be greatly pleased that the gentleman, whose estimable traits of character have caused them to admire and associate themselves with him in so many popular movements for the benefit of the industry, received such a hearty welcome at the hands of those who had kept so thoroughly in touch with his achievements and successes.

Mr. Supplee left his home about the middle of July on a combined business and pleasure trip to Europe, which was expected to extend over about sixty days. He reached London Wednesday, July 26th, and before twenty-four hours had passed was waited upon by gentlemen representing the National Hardware Association of England, who were desirous that he meet at luncheon as many of the officers and members of the Association as could be called together by the Friday following.

Mr. James Rogers, President of the English National Hardware Association, officiated as chairman, and at the conclusion of the luncheon, in proposing the health of the Queen, coupled with her honored name the President of the United States, and in an eloquent and feeling manner referred to the harmonious and fraternal relations existing between the two great nations represented by those whose health they proposed to drink. Nations, which in showing great progress in commercial relations on every hand, were becoming more firmly united in all the elements of successful achievement, and working together with a complete and cordial understanding, assuring a continuous prosperity, which, distinguishing both countries, would undoubtedly increase and not diminish.

Mr. Joseph Hood, ex-president of the National Hardware Association, then proposed the toast "Our Guest."

The gentlemen present were, he said, glad to welcome and to wish "God speed" to one representing that great American nation over the water, and they were especially glad to welcome Mr. Supplee, because he was indelibly connected with the trade by which they lived, and also because he was, in a sense, that day representing a kindred association across the water.

They gave Mr. Supplee on his own account, and on account of the association he was representing, the National Hardware Association of the United States, a hearty welcome.

Mr. Hood said in his early days he spent many years with a firm whose name was a household word in the United States, as it was in the Midlands; he remembered the enormous trade that they used to do with the United States. Since then there had been considerable changes in the business relations between the two countries, and he felt that Mr. Supplee would rejoice with them that, notwithstanding these changes, America stood higher to-day than it did thirty years ago, and England was never more prosperous, the relations between the two countries never more cordial. He complimented Mr. Supplee on representing an Association that aimed at the raising of the standard of business methods and business morals.

Mr. Supplee, who was warmly received, said, in part:

Mr. Chairman and Gentlemen: I thank you for this mark of kindness to a stranger visiting your country. This gracious act of courtesy is but one of the many signs of the underlying bond of friendship which exists between the two sections of the Anglo-Saxon race separated by the broad Atlantic. And I desire to say to the gentlemen present that my countrymen will always remember with profound admiration the advanced and exalted position taken by England during our recent quick and decisive war with Spain, when we as a nation were called upon to sacrifice the lives of our own brave men in order to rescue a people from poverty, starvation, want, and perpetual bondage, fully realizing that their future guidance (until they could stand alone) would require time, care and expenditure of millions of money.

Electricity, steam, telegraph and telephone have shortened time and connected distances, and we find our daily

W. W. SUPPLEE.

morning papers upon our breakfast table containing the news from every section of our own country, extending to our newly acquired colonies, spanning the broad Atlantic to Great Britain, containing news from India and the Transvaal of the preceding day, with the same degree of regularity as of the occurrences around the corner in our own city; and gentlemen, I further thank you in behalf of the members of the National Hardware Association of the United States, with which my name has so long been connected. And at this point permit me to say that the officers of our Association were gratified upon the receipt of a letter from your Hon. Secretary, Thomas F. G. Coates, under date of October 21, 1897, stating that an association similar to our own was started in Great Britain in July of that year. I now desire to emphasize what our secretary, Mr. T. James Fernley, has already written, that we extend our congratulations and wish you all possible success in your laudable undertaking.

"The natural question for you, gentlemen, to ask would be, What has our Association accomplished? My answer is, in the short space of time, far more than the most sanguine mind could have anticipated. We have realised the fact that we could 'build better than we knew;' we have

Digitized by Google

created reforms in trade, stifled obnoxious jealousies, and improved the standard of business methods and mercantile trading; and manufacturers have commended us upon the reasonable, intelligent, and conservative course pursued, and have as a rule accepted our suggestions with proper consideration and respect. We feel, as our manufacturers now feel, that the interests of the merchant and manufacturer are mutual. But I will say to you, gentlemen, what I have upon many occasions stated to our members, that, without the full co-operation, loyalty, and cordial support of our members, we could not have reached the position we now sustain in trade circles. The victories at the Battle of Waterloo, where all Napoleon's former reputation was annihilated, and the Battle of San Juan which ended our war in Cuba, were not achieved solely through the generals and officers in command, but by the aid of the brave and unflinching men in the ranks.

"The text of the constitution and by-laws of that Association reads: 'The object of this Association shall be the promotion of more friendly business relations, and mutual confidence and good-will with each other and with manufacturers.' The broad principles we advocate are equity, justice, and liberality; we concede and recognize the fact that each firm reserves the right to conduct its own business, and we advocate and strongly urge one point at which all jobbers and manufacturers can safely and judiciously aim, namely, 'a high standard of business methods.' When that point has been reached, we believe that the greater number of evils will already have been corrected.

"At the first meeting called to organize the Association, about one hundred persons were present; names of about twenty-four firms, however, were enrolled in the list of membership. This number was quickly doubled, and soon quadrupled, and could easily be extended beyond our present number, but the aim of our Association is:—Eligibility to membership shall consist in the purchasing and distributing ability, with corresponding capital employed, by each firm, rather than a desire for numerical strength only.

"We have members from almost every State and large city in the country, covering a vast area, and containing a population of about seventy-five million of people. We estimate that with our now about two hundred members the capital invested may reach sixty-five million dollars with an employed capital, however, of not less than one hundred million, and with an estimated average yearly sales of from two hundred and fifty to three hundred million dollars. These members have in their employ probably not less than three thousand salesmen, who in their traveling capacity in effecting sales, each passing over an average say of twelve thousand miles a year, would bring the grand total of thirty-six million miles travelled yearly by the combined salesmen.

"What manufacturing industry could not safely entrust the distribution of their product to the combined efforts of those who employ this amount of capital and give employment to this number of salesmen.

"For some years prior to the formation of our Association, and extending over some two years after its organization, trade conditions throughout the country were in a most unfortunate and deplorable state of uncertainty commensurate with capital invested, and time, energy, and strength contributed. The manufacturers tacitly adopted differentials in prices with the consumer; the retail merchant and the wholesale trader were not regarded with that degree of respect to which the heavy purchasing power of the latter entitled them, and on the part of the wholesale trader the untrodden paths of friendship were tangled with a wild overgrowth of both local and sectional jealousies, suspicion, ill-advised, and perhaps vindictive competition. Persons doing business in one city were not acquainted with competitors in either distant or adjacent cities, neithe did confidence in each other exist between competitors in the same city.

"Lack of strength had paralysed many individual efforts to correct abuses which had penetrated into trade circles, and efforts of this nature were largely abandoned, when a few representative men conceived the idea that friendship could be consistently and harmoniously combined with business, and thus many of the vexations and difficulties incidental to trade could be very much modified."

Mr. Supplee's remarks were listened to with great interest, and he was frequently greeted with spontaneous applause.

Subsequently Mr. Supplee was requested to supplement his remarks in a brief interview and was asked at what time he could be seen. With his characteristic energy he said;

"At 8:30 to-morrow morning."

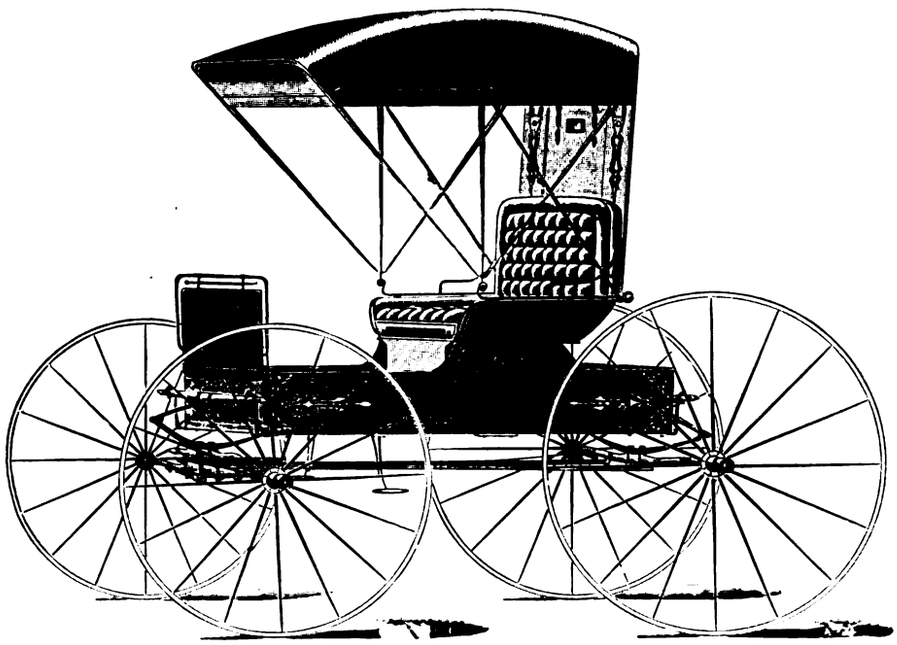
It is said of him that he accomplished during the short time, not quite a week which he spent in London, an amount of business that astonished our English friends who are apt to take things more quietly and with more deliberation.

Subsequently Mr. Supplee was asked if his association encouraged the formation of associations among retailers, and immediately replied in a decided affirmative. They believed, he exp'ained, that any movement which will bring about a greater measure of harmony in the Hardware trade is deserving of success, and is sure of hearty support from the association.

Mr. Supplee was asked, what from his observation, was the most radical difference between trade in America and in England. "The openness of American manufacturers," he said, "and their willingness to show their business methods and processes of manufacture even to their competitors is in strong contrast to the figurative wall which Englishmen build around their establishments. We believe in reciprocity—that we get as well as give—and are always on the alert to take as well as convey information. The effect on the whole is good, as it encourages a higher standard of excellence all around, and it has done much to make Americans able to meet European makers in the world's market."

The attention of Mr. Supplee was then drawn to the opinions recently expressed by members of the trade at association meetings regarding the advisability of publishing trade prices and discounts. He was asked to give the experience of the trade in America, and to say if the matter had ever been discussed to his knowledge in the National or any other association. He began his reply by alluding to the invariable practice in American trade papers of quoting discounts and net prices, and confirmed the statements of a correspondent regarding the greater publicity given to matters of this nature in America. He mentioned that about two years ago he attended a meeting of the Southern Hardware Association at Fortress Monroe. The "Advisability of Publishing Trade Discounts" was one of the subjects down for discussion, and Mr. Supplee from his position as president of a kindred association, was asked to lead. This he did, and although he was unable to recall the speech he made on this occasion, he indicated its purport. His opinions he summarrised:

"If you eliminate prices from trade papers, where is their value? Trade prices and discounts, if accurate and plentiful, are the most valuable information a trade paper can contain." The speakers who followed Mr. Supplee agreed with the views he had expressed, and what opened under the guise of a discussion closed as a unanimous expression of opinion.



Altogether Mr. Supplee has reason to feel highly gratified at the kind reception he met with from our British confreres. Wherever he went he found the cordial grasp of a friendly hand, and the sincere expressions of good will from fraternal hearts. He represented our country and the Hardware industry with dignity and intelligence, for few men so alive to all that adds to the integrity and probity of a business of such world-wide importance, could have enjoyed so good an opportunity in a way to explain his broad-minded views and prove how thoroughly conversant an American Hardware merchant must necessarily be to feel in complete touch with modern industrial achievement and commercial success.

NEW GOODS AND SPECIALTIES.

The Ideal Buggy.

The accompanying cut illustrates a buggy recently placed on the market by the Union Carriage Co., St. Louis,

Mo. The buggy is described by the makers as having marbleized panels and riser, handsomely ornamented, constructed with long distance axles, full bolted wheels, full length steel body loops, steel toe rails, steps and rub irons, full length velvet carpet with toe and side carpets; silver dash rail, high panel spring back and spring cushion, trimmed in No. 1 machine buffed leather, or heavy all wool cloth or whipcord. The back stays are stitched with silk with a cord on each side. The quarters are referred to as being dust proof, and handsomely corded with 22 ounce rubber roof, and back curtain, and leather quarters; or full leather top at an extra price. It is claimed that the self-lubricating axles with which the running gear is equipped will run over 1000 miles without requiring reoiling. The buggy is made with bodies of the following sizes: No. 110, 23x54; No. 111, 20x54 and No. 112, 18x54 inches. The company also manufacture an extensive line of pleasure vehicles for the trade.

North Bros. Ratchet Screw Drivers.

The North Bros. Mfg. Co., Philadelphia, Pa., are introducing to the Hardware trade, the ratchet Screw Drivers, which are shown in the accompanying illustrations, the first of which, Fig. 1, is known as the "Yankee" No. 15, which as a ratchet screw driver is a modification of their No. 10, which has been one of their popular specialties. It is made to meet the demand for a light blade screw driver for small screws to be used in electric work, or light cabinet making. It will be noticed that it has on its blade a knurled washer, and by means of this the blade can be turned by the finger and thumb. This facility permits the hand holding the handle to press steadily against the screw and prevent the screw from wobbling, while the same time, the thumb and finger can turn and ratchet the blade until the screw is well started in its place, when it can be driven home by the hand upon the handle. In taking out a screw it is started by turning the blade by the handle until loose, and then run out by thumb and finger operating the knurled washer, in this way, the work is very easily and rapidly accomplished. To ratchet, the slide is pushed up or down the handle and placed midway in the slot, so as to make the blade fixed and rigid. This screw driver is made in several sizes, two, three, four, and five inches, but all of the same diameter of blade, 7 32 inch, with one sized handle to all the different lengths. They are packed one half dozen in a strong paper box, and the manufacturers refer to the materials and workmanship as being of superior quality in every detail, as every tool is guaranteed. The Yankee Ratchet Screw Driver No. 20 which is shown herewith, Fig. 2, is a spiral ratchet tool, a modification in this instance of the company's No 30. It is designed to push or ratchet screws into place, but not to take them out in that way. It is so arranged that it can be used as a rigid driver by simply moving the shifter to the opposite

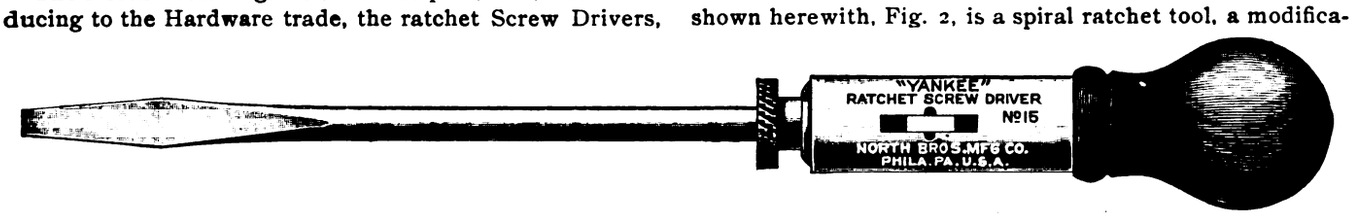

FIG. 1.

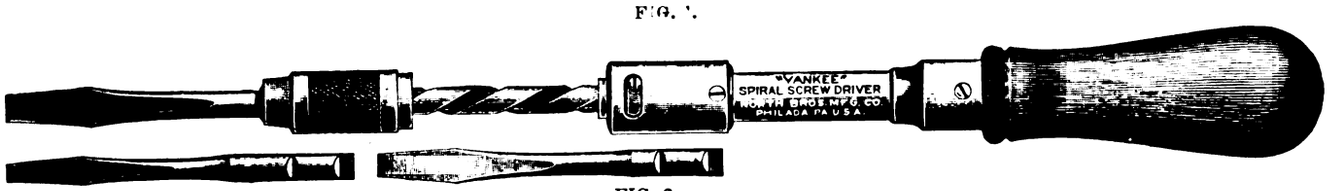

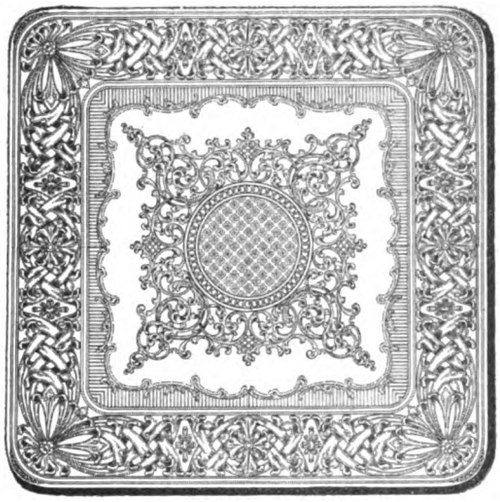

FIG. 2.

Digitized by Google

side of the slot. It is explained that the construction of the ratchet and pawl, permits of a very compact arrangement, which makes the tool convenient in size, light in weight, yet sufficiently strong in the vital parts. The manufacturers claim that neither pawl nor ratchet can bend, break or get out of order; and also that the friction in the ratchet mechanism in the forward movement is so slight as to be hardly felt, while the backward movement is quite noiseless.

Antique Coppered Stove Boards.

The Wabash Screen Door Co., Rhinelander, Wis., are placing upon the market a line of ornamental stove boards,

the artistic excellence of which is fairly shown in the accompanying illustration. This particular cut shows their Antique Coppered Stove Board, which is made in both wood and paper lined, either square in shape or oblong, in all the regular sizes. We referred to their catalogue in one of our recent issues, which shows their entire line, including as it does wood and paper lined crystalized boards, which are also made by this company. The manufacturers state that their business has been most satisfactory since the inauguration of this important line, and their orders for the coming season's trade have surpassed their anticipations.

The Ehle Folding Lunch Box.

F. G. O. Ehle & Co., Buffalo, N. Y., whose nestable dinner pail was illustrated among the new goods in a recent issue, have also brought out a new form of lunch box, that will undoubtedly find a very large circle of buyers, who will esteem it the most desirable article of the kind that has been brought to their attention of late. The accompanying cuts show the box in two positions, one open to its fullest extent, Fig. 1, and the other, Fig. 2, folded after

FIG. 1.

the contents have been extracted. The great trouble about the use of ordinary lunch boxes, is the inconvenience of carrying them home after the contents have been duly disposed of. It is a very gratifying thing to start out with a box well filled with an enjoyable lunch, but when at the end of the day it is desirable to return home, the exertion of carrying the empty box is considered quite inconvenient, for without the folding facility indicated in the cut, the box would be of the same size at night as in the morning. To overcome this difficulty, F. G. O. Ehle & Co. have devised this very novel and effectual style of lunch box. It consists of a top and bottom made of japanned metal fastened together by brown canvas. The closed box measures 7½x4½ inches, and is only one-half inch thick, so that it can be readily put in the pocket. By pulling it out, which is accomplished similar to an accordion, and opening the lid which is held by a simple catch, the box will expand to a depth of four and three-quarter inches, and is easily carried by means of a woven handle that is firmly fastened at the top by metal clips. One of the ingenious features of the box is the method by which it is held open by means of

FIG. 2.

two wire braces, that swing down close to the ends, and keep the sides taut, which has the stiffness of a tin box when in an open position. These braces are swung back when the box is empty and it collapses into the size noted above. These lunch boxes are placed before the trade to retail at twenty-five cents each, and at this price samples will be sent to those who are interested in such goods.

Ocean Churn.

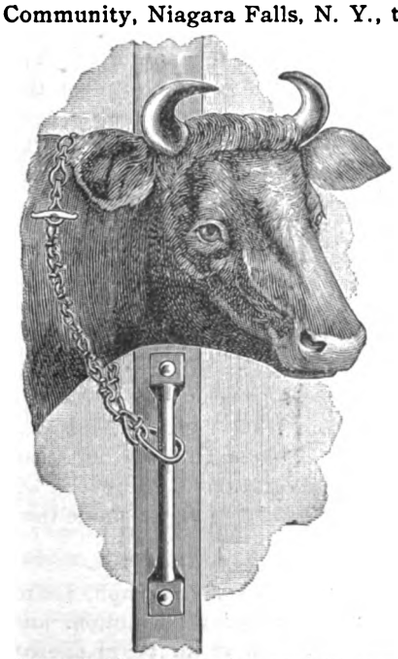
Among the many specialties manufactured by the Illinois Cutlery Co., Decatur, Ill., the Ocean Churn, here illustrated, is one of the most recent and popular. It is made of IXXX tin and is 7x24 inches in its dimensions. It is possessed of a dasher which is constructed of tough wood and intended to be worked on the principle of the propeller of a steamship, by readily revolving to the left on the downward stroke, and instantly reversing to the right on the upward stroke. The manufacturers refer to the necessity that exists for the free mixture of air in order to insure good churning, and this it is claimed is the principle on which this device works, which assures the rendering of perfect aeration in every respect. In its use it is unnecessary to raise the dasher higher than the surface of the cream, as the benefit of centrifugal as well as horizontal motions are received and no splashing occurs.

Another good feature is that it can be readily cleaned by churning a pail full of warm water when through with the regular churning. Each churn is marketed in a separate crate, and the weight of the whole when crated is only nine pounds.

The Sanitary Still.

The Cuprigraph Co., No. 95 N. Green Street, Chicago, Ill. are successfully meeting a demand for furnishing pure water by marketing through the Hardware trade the Sani-

Digitized by Google



tary Still, with which their name has been identified for a long time. The accompanying cut illustrates this popular article. This device is for the purpose of furnishing families with pure water. It is now a recognized fact that distilled water is the only pure water. The public are becoming awakened to the necessity of such an article as a result of the vigorous campaign which the manufacturers of the

Sanitary Still have been carrying on the past two years. They have spent thousands of dollars in advertising in all the high class periodicals, and as a result of such expenditure, the Stills have been sold direct to consumers in all parts of the world. The purpose of this is not so much to give a detailed account of the Still and its benefits, as to call the attention of the Hardware trade to the fact that there is such an article and a demand for it exists wherever its undoubted merits are known. This still was the only one adopted by the United States government in equipping the Hospital Corps of the Philippine expedition, and it has been largely used by them in hospitals, Indian agencies, and camps. Sanitariums and hospitals all over the country use them largely. To the enterprising dealer who will communicate with the Cuprigraph Co., they will make a liberal proposition and furnish him the names of all inquirers from his vicinity, which method has always resulted in immediate sales. It is now handled by some of the largest dealers in the country, the names of whom will be sent upon application to the manufacturers. Attention is called to the advertisement of the company which will be found on page 39.

Cow Tie and Stall Fixtures.

Among the many important specialties manufactured by the Oneida Community, Niagara Falls, N. Y., the Cow Tie

and Stall Fixtures indicated in the accompanying illustration, has met with an exceedingly noted popularity. This article was first made in Canada, when they began manufacturing in that territory several years ago, and was called the Dominion Pattern, but having become exceedingly popular, they added them to the line of specialties which they make for sale in "the States." One of the special features of the Tie and Stall Fixture is graphically shown in the illustration. While it will be noticed the chain is exceedingly short, which prevents all danger of entanglement to the animal's foot, the form of the fixture is such that it allows great freedom to the head. Another advantage enjoyed by this Tie is that on account on the short chain necessary, it can be made much cheaper than the ordinary patterns. This specialty is made of a tough quality of steel, which makes it very strong. As it has a circular cross section it is exceedingly rigid, and not likely to become bent, as is often the case with numerous similar devices, in which rigidity is not always attempted. The Tie is made in both "American" and "Niagara" chain, making it popular in all sections, and the device is referred to as very simple, quite convenient, and easily attached for the purposes intended.

F. W. Gesswein Co.'s New Catalogue.

F. W. Gesswein Co., No. 39 John Street, New York, has just issued one of the most complete catalogues of its size, and for the especial line which it covers, that we have seen in some time. It is intended to embrace in its important contents full lines of jewelers' and engravers' machinery and the necessary supplies, fine grades of tools and appliances suitable for all kinds of workers in the finer grades of metals and shop machinery.

The volume is an attractively bound one with a trade mark on cover "Worth Looking Into," printed on excellent paper and handsomely illustrated throughout; consisting of 504 pages, 8x10½ inches in size. The pages of the catalogue are devoted to lines of specialties for many of which they are agents, which includes wire and bristle brushes, buffs for use on silver and jewelry, brass and silver work of any and every description and including polishing machinery and materials for polishing purposes. They illustrate Ruby crystal, a new grinding wheel which is especially favored by dentists, emery wheels and emery wheel machinery, India oil stones, die sinkers' and engravers' tools and mechanical devices in large variety. The contents of the catalogue have been arranged as nearly as possible in alphabetical order so that after becoming familiar with the goods shown, a reference to its pages will be found extremely convenient. The company are sole agents in the United States and Canada for the fine Swiss files made by Antoine Glardon & Cie's, to the illustration of which over 30 pages of the catalogue are devoted, being shown in a graphic manner so that special lines of work can obtain the most suitable files for their purpose. They are also agents for L. Hugonoit Tissot's fine tools, which are largely illustrated. Numerous tables of information are given which will be found very useful by those having occasion to refer to them.

For more general distribution they have reproduced this catalogue in a smaller size, 4x7, in which the pages are photo-engraved in fac simile, and the binding is flexible. The one favored by a copy of either catalogue will certainly find it "Worth Looking Into."

In our Hardwaremen's Exchange will be found an advertisement for salesmen to sell mechanical rubber goods, from which good results should be anticipated, if replied to.

Among the birds the swan lives to be the oldest, in extreme cases reaching 300 years; the falcon has been known to live 162 years.

Not one drop of intoxicating liquor is allowed to be sold at any of the military camps of Canada.

Advertisers' Corner.

An original form of advertisement comes from Russia, where a shopkeeper posted up the following announcement: "The reason why I have hitherto been able to sell my goods so much cheaper than anybody else is that I am a bachelor, and do not need to make a profit for the maintenance of my wife and children. It is now my duty to inform the public that this advantage will shortly be withdrawn from them, as I am about to be married. They will, therefore, do well to make their purchases at once at the old rate." The result was there was such a run on the shop that in the course of a few days this shopkeeper had made enough money to pay the expenses of his wedding on a very lavish scale.—*Exchange.*

A page in a magazine costs three hundred dollars, but it seems that advertisers are willing to fill the pages with pretty pictures under the delusion that they are publishing an advertisement. One-half of the people who see the pictures never notice the name of the article advertised, much less the name of the man who "blew in" his cash for the space. An advertisement that does not sell goods is a mighty poor advertisement, and if it does not at least create a favorable impression for the article it is worse still. —*Printers Ink.*

If you have something which no one else makes or something just a little better than anyone else makes, advertise it. The natural instinct of nine out of ten men is to sell all they can as quietly as they can and never place an advertisement of the article for fear some other fellow will immediately commence to make it. On the face of it sound, this becomes, when analyzed, poor reasoning. Others will, sooner or later, hear of your success and become competitors anyway, and if you have advertised and closely associated your name with the article you will have a tighter grip on the trade, and one which your would-be competitor will find it hard to unloose.—*The Wheel.*

I would advise every business man to keep a copy of each advertisement he puts out, whether it be in the papers, as a circular, as a printed letter, or as a card. A man who does this will have practically a history of his business, and he can turn over his scrap book and see that some of his successes of two, three or four years previous will be just as seasonable and just as valuable this season. It will give him some ideas for future advertising, for he can be looking at his September ads of 1898, 1897, and 1896, and thereby take time by the forelock in getting ready for his September business this year.—*Boot and Shoe Recorder.*

A unique idea in placing before the public summer-outing shirts has been adopted by the window dresser of Browning, King & Co. A Madras cloth outing shirt, frozen in a large 300 pound cake of ice, has been placed in the window and labeled "Coolest Shirt in Town."—*Brooklyn (N. Y.) Standard-Union.*

Business writing is neither an art nor a science. It is just plain common sense coupled with natural or acquired ability to write with simplicity and force. The writer of business literature must be a practical man. He must have a knowledge of the common sense laws that govern successful business. He must be able to grasp quickly the "talking points" of the article to be advertised. And, above all, he must have the knack of telling his story in few and simple words—yet with a forcefulness that carries conviction.—*William S. Power.*

The largest advertising sign in the world is said to be on the hillside of an islet off the Grand Canary, northwest of Africa. It is several hundred feet above the level of the sea, and contains the words "Grand Canary Engineering Company," in letters fifteen feet wide and thirty feet high, each bar of the letters being three feet three inches broad. The sign is 750 feet long.—*Profitable Advertising, Boston, Mass.*

The good advertising specialist or writer should occupy the same position as a confidential clerk. He should be informed of the inside things that it is necessary for him to know. Combining the knowledge of the business that the manager has with his knowledge of advertising results in something of benefit to the store,—*Trade Register.*

The Man in the Corner.

In exploiting the merits of a new Coin Box which is being placed upon the market by The Corbin Cabinet Lock Co., Mr. J. B. Comstock, whose philosophical reflections as "The Man in the Corner," takes the entire Hardware trade into his confidence, has this to say:

"In so far as the Coin Box teaches saving, it is indeed a blessing, for if there ever was a lesson needed by the denisens of this glorious land of unrestraint, it is that of economy. The Lazaruses of the old world grow fat upon our broken meats and form from our largess flourishing bank accounts. The national crime of the times is the reckless expenditure in the administration of public and private affairs and the wanton waste at private hands of the natural wealth of the country. It is out of the spirit engendered by this condition and the lack of method attending it that the alternate inflations and depressions in business are born, and until we learn as a nation to save in times of plenty that we may have comfort in days of famine, we shall starve between feasts like the untutored savage, and play Grasshopper to the old world's Ant."

Nothing more artistically tasteful can be imagined in the shape of circular announcements than those emanating from the publicity department of the Corbin Cabinet Lock Co., New Britain, Conn., now under the charge of Mr. Comstock. He issues monthly what is called "Our Monthly Letter," and the entire trade await its arrival with pleasure born of a desire to reap philosophical, original reflections with a commercial application, having reference to the products of the company in whose literary work he has the guiding hand.

The "Bruce" meteorite, weighing four tons, and composed of pure iron, is on its way to this country. Its destination is the Natural History Museum at South Kensington, to which institution it has been presented by Mr. Bruce, its owner. This unique specimen was purchased from a farmer in Murrangeorg, South Australia, on whose land it must have fallen, for the sum of £2. The Victorian Government offered £1000 for it, but even this tempting offer did not induce Mr. Bruce to deviate from his intention of sending it "over the seas" to the mother country, where it will find a resting place among the metallic treasures of the nation.—*Hardwareman, England.*

In 1854 the *New World*, of the People's Line, made a record for the run between New York and Albany which has never been equaled, the time being six hours and twenty minutes. The *Adirondack* recently made the trip in six hours and forty-four minutes. The first Hudson River steamer, Fulton's *Clermont*, required thirty-two hours to make the run from New York to Albany in 1807. In 1817 the *Chancellor Livingston* made the run in eighteen hours. In 1837 the *Rochester* made a record of ten hours and one minute. In 1860 the *Drew* made the trip in six hours and fifty minutes.—*Ex.*

Puerto Rico has 470 miles of telegraph, 138 miles of railway—with 170 miles under construction, and 100 telephone stations, with 200 more to be in operation shortly —*Exchange.*

THE SMOKELESS POWDER AGE.

The subject of smokeless powder is one in which more or less interest will always be manifested, not only by sportsmen but by the world at large, for it realizes that this explosive is coming to play a great part in modern warfare. But it is the sportsman alone who has watched the development of each new nitro, who has tested them all as they came out and has pronounced them good or bad as the result of his experiments seemed to justify.

There are men in this country who when going shooting are satisfied to accept shells loaded with any powder that may be offered them without even inquiring what powder that may be, but they are few and far between. For the average gunner insists on not only knowing what powder he is to shoot but also on learning all points in connection with the manufacture thereof that are within his reach. Indeed to many sportsmen fully one-half of the pleasure of an outing lies in the preparation therefor—the loading and testing of shells, the overhauling of the gun and the arranging of the hunting clothes!

Unfortunately for those who are interested in powder and who would delve into the details of its composition there is no source where they can gain the information which they seek. For in these days the manufacturers of nitro compounds guard their formulas as they would the location of a hidden treasure. This generally for fear that their non-patentable methods would be appropriated by competitors if divulged.

The ingredients of black powder were never a secret; all knew that this explosive was a mechanical composition of saltpetre, sulphur and charcoal, but with smokeless powders beyond the fact that they were chemical compositions of explosive acids, the shooting public has always been kept in the dark. But, regardless of this secrecy it is safe to say that in no branch of industry has there been so rapid an advance as in the manufacture of smokeless powder. A few years ago it was unheard of; now it is used to the almost entire exclusion of the black powder which for hundreds of years was the only propelling force known to gunners. The wonder is that black powder should have reigned supreme so long, especially in the face of modern inventive genius, but it was a faithful servant at all times and its faults were overlooked.

The explosive strength of certain acids when blended together is not of modern discovery and yet it was not until just about fifty years ago that these were utilized in the making of gun cotton. This was nothing more or less than the steeping of ordinary cotton in a mixture of sulphuric and nitric acids. The result was a substance which unconfined burned freely, without an ash and without an explosion, but which, when confined, exerted a force that was beyond all control. In fact it was too violent to be of much use except for blasting purposes and all efforts to fire it in cannon or small arms invariably resulted disastrously. Afterwards came the discovery of nitro glycerine, in which ordinary glycerine was made the basis for the incorporation of acids, and afterward a long series of attempts at the manufacture of nitro-powder with one or both of the foregoing explosives as the component parts thereof. It was to tame these two giant forces and to render them available for use in gunnery that the efforts of chemists as well as practical powder makers were bent. And it is as to the method of accomplishing this that the manufacturers of to-day maintain the greatest secrecy. They have acquired their formulas after years of costly experiments, and they intend to keep them.

Speaking generally, smokeless powders consist of acids that have been rendered available by means of an absorbent. As a rule sulphuric and nitric acids are used though sometimes picric acid is employed. These acids are incorporated in cotton wool, in wood fibre or pulp, in corncob pith, or in any similar material susceptible of a high nitration and which at the same time will form no obstacle to a complete combustion. The product of this process is gun cotton and this is the prime factor in all nitro powders. With this gun cotton nitro glycerine is used in some grades of powder while in others it is not.

After the nitration, as the steeping of the cotton in the acids is called, it is washed and rewashed and then finally boiled in water to remove all surplus acids. After having been carefully dried the cotton is ground under edge rollers until it resembles the finest lint which is then in turn completely dissolved in a chemical preparation. It is at this stage that the secret ingredients are added, the object thereof being to retard the burning of the gun cotton or as has now become, collodion, and to gain some control over its explosive powers.

Then comes the drying of the mixture or rather the evaporation of the dissolving chemicals, leaving behind a heavy paste or gluish substance, and the granulation. The most modern system employed in this work and which many other makers are trying to imitate by reason of the extreme uniformity it gives is that of the Laflin & Rand Powder Co., of New York, whose smokeless powder mills are located at Pompton, N. J.

The process employed by this company consists in placing this rapidly drying mass of explosive glue under hydraulic pressure and forcing it out through tiny dies in long thin strings which are cut into exact sizes or grains and then allowed to dry. By this method every grain is of the same size and contains the same amount of explosive strength which is an impossibility under the ordinary system of granulation employed by many makers.

Then come the tests; first, chemical, as to the purity of the compound, and then practical, as to the bursting power and the velocity imparted to the shot or bullet. The bursting strain is ascertained by means of a pressure gun which shows the force exerted at the breech as well as at any point between the breech and the muzzle and all powder placed on the market must first have conformed to the requirements laid down for it in that direction. The velocity is taken by means of a chronograph, an electrical device whereby two electric circuits are broken by the charge from the gun and the time of its passage between the two points accurately recorded down to the one one-hundred thousandth part of a second. Not only is it possible to tell the exact rate at which the charge travels after leaving the gun but its velocity can also be taken at three separate places inside the gun barrel. The powder is then stored away in the magazines or packed in cans for the market.

This is the system as followed by the Laflin & Rand Powder Co. with regard to the tests, which are of the most stringent nature and it may be added that if any lot of powder fai s in the smallest degree to comply with the rigid requirements, it is at once condemned and destroyed. This company has been engaged in the manufacture of smokeless powder but a short time, but ever since it ac-

Digitized by Google

quired control of the plant of the old American Powder Co., it has followed the set rule of never allowing an ounce of powder to leave the factory until it had been proved perfect. To this no doubt is due the immense popularity which this powder now enjoys.

But to return to the development of smokeless powder. The first nitro that was ever placed in the hands of sportsmen was the Schultz powder manufactured in Hampshire, England, and first placed on the market in 1868. Although this powder was then highly commended by a number of English sportsmen who carried out a series of tests, it was exceedingly imperfect and had so many faults that it was not brought to the general attention of sportsmen until perhaps fifteen years later. It was perhaps not more than twenty years ago that Schultz powder and several other varieties then being made were placed on the American market, were tried by many sportsmen and condemned. For many reasons these early trials could not have been glowing successes; the powder was exceedingly crude, and even dangerous, while there were no guns, shells or primers adapted for its use. Many accidents occurred from an improper loading of these powders, but the general result of these early experiments was a failure to get a high enough velocity out of the powder to render its use desirable.

From the very first there was a fight against smokeless powder by the devotees of the old black powder, and these opponents of progress were heartily seconded by certain manufacturers, who not being in a position to take up the manufacture of the new powder themselves, naturally objected to their business rivals doing so. A few of the manufacturers, however, realized that it would be but a short time before the nitro compounds would supersede the black powders, and anxious to be the first to offer sportsmen a thoroughly reliable article, bent all of their energies toward perfecting it. The result has been that there are now a dozen or more different varieties of smokeless powder being manufactured and which are being used in fully four-fifths of all the guns in the country.

Passing over all the various stages of the manufacture of smokeless powder and the objections that were raised to each new brand as it was brought out, it may be said that when all else had seemingly been perfected, there was still one point wherein the makers failed utterly to attain that which they sought. This was to secure a powder which was not affected by climatic changes, and which, regardless of heat or cold, dryness or dampness, would always give the same velocity and breech pressure. For this class of explosive has always been peculiarly susceptible to climatic changes and was likely under certain conditions to develop a weakness or strength which rendered it entirely unfit for use.

In a sporting powder this losing of strength proved particularly noticeable along the coast and in the marshes. Wild fowl hunters would start on a trip with several hundred shells, which at the time of loading seemed perfect, only to discover to their chagrin, a few days later, that they had been so affected by the damp atmosphere, that their ballistic properties had vanished and their powers of doing harm to ducks or geese disappeared. Many an outing has been ruined through this failure of ammunition to do what was required of it, and for this reason gunners have not been slow to condemn the powders that were heretofore offered them. To turn out therefore a powder that was free from these defects has been the goal toward which all manufacturers struggled.

This end has at last been attained by the Laflin & Rand Powder Co., the process of the manufacture of whose powder was given in the general description of smokeless powder composition. This company has brought out a nitro powder which experiments have demonstrated to be absolutely waterproof. Severe tests of soaking it in water for months, then drying and firing it, have failed to show a perceptible loss in velocity. This same claim has been made by other powder makers, but while their products could be burned after soaking and drying, their ballistic properties were entirely destroyed, several of them failing to even drive the shot from the muzzle of the gun. This at least has been the result of a series of experiments carried on with a view to finding a nitro powder that was not affected by dampness, and it justifies the statement that the Laflin & Rand smokeless is all that its makers claim for it. However, this is a point that anyone can demonstrate for himself. It needs no chronograph, no pressure gun; simply an ordinary shot gun, some empty shells and samples of the various smokeless powders. The experiment is interesting and well worthy of the trouble if it prevents the spoiling of an outing with ammunition that has deteriorated in strength.

Smokeless powders have revolutionized the art of gunnery and now that the last fault in their make up has been overcome it is likely that they alone will be used in the future, and that in a few years, black powder will exist in memory only.

Mr. Allerton and the Old Salt.

"A high Government official" has been talking about the trust mania. "This craze for consolidation of industrials reminds me," he said, "of Sam Allerton and his yacht."

The story runs something like this:

Mr. Allerton built for himself a fine country house on the shores of Lake Geneva, Wis. It was as fine as anybody's home in that locality. When he had the house about finished some one told him he would have to have a yacht, not one of the modern steam yachts such as you see down East, but a sailing boat. He ordered one made and was up at the lake when it reached there. He was very proud of his yacht, and although he had never been on one before, concluded that he would like to take a sail right away. In his younger days he had gone fishing a time or two in a canoe, and in that way had learned the rudiments of steering a boat, so he concluded to take the helm. Looking over the group of loungers that had gathered about he shouted out the inquiry:

"Who among you has been to sea?"

"I has, sah," said a tall, rawboned colored man, stepping forward.

"You'll do for one," said Mr. Allerton; "now, who else has been to sea?"

Nobody answering, he turned to the colored man and ordered him to jump aboard, saying: "We two will be enough; we can handle her."

The sails were set, the boat released from its moorings and a start was made. The wind was directly off shore and blowing brisk. Mr. Allerton enjoyed the sensation hugely and congratulated himself on the investment he had made. He was sailing directly before the wind, and he boomed ahead in splendid style. By and by they approached the opposite shore, and, after making several frantic efforts to change the course of the boat, Mr. Allerton called out to the colored man "who had been to sea":

"Here, you! How are we going to turn this blamed thing around? I can't do anything with her."

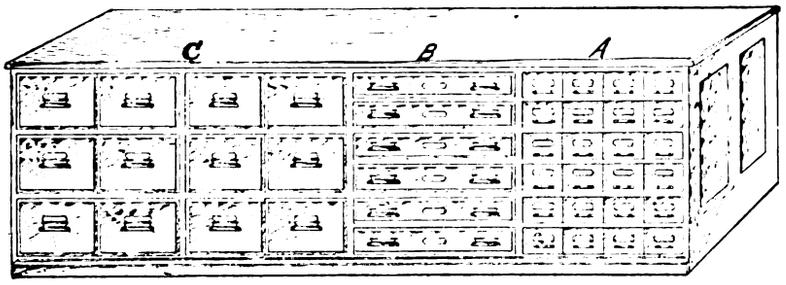
"'Deed, mister, I don't know what to do. I don't know nothing 'bout them there sails."

The two men pulled and hauled and perspired, but to no effect, and the yacht went on the rocks with a smash. As Mr. Allerton waded ashore he turned angrily to the colored man, who dragged himself drippingly after him, and said:

"I thought you told me you had been to sea?"

"I was, sah; eight years."

"What the deuce did you do to sea?"



"I was a cook, sah."—*Chicago Evening Post.*

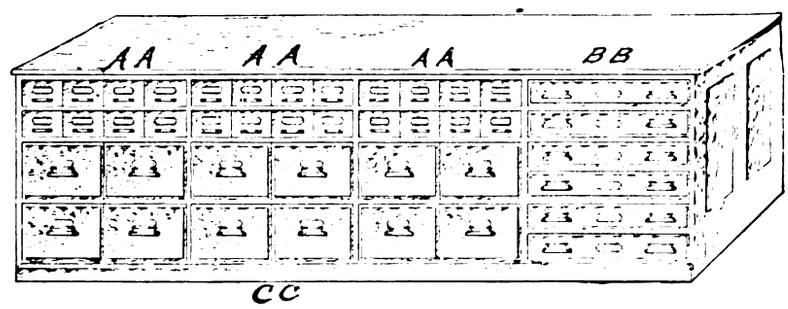
Warren's Interchangeable Drawer Bases.

The J. D. Warren Mfg. Co., in the Masonic Temple, Chicago, have just brought out a most important improvement in their patent Hardware shelving by an improved form of construction of bases, so that they are nearly as practical and valuable as the cabinets above—at least they form that combination of construction that makes them almost inseparable. They are, compared with the common base, claimed to be as great an improvement as the electric light is over the ordinary candle.

The spaces in the bases hereafter will be so constructed that the drawers will be "interchangeable" from one base to another, or one space to another, thus enabling the merchant to transfer any size drawer (excepting one) to any place along the base he desires. Through this principle of transferring the drawers in the bases, as well as the cabinets above, goods of any kind can be transferred to any other location of the store, and assembled in whatever form the merchant may desire, and at any location he may wish.



The study of the J. D. Warren Mfg. Co. has been to assemble goods in as compact a space as possible, at the same time having a distinct separate place for each article, and in carefully studying this they find the bases beneath the cabinets figure as a most important part and make valuable a space that has heretofore been usually ignored. They feel that the space between the floor and the shelving is one of the most valuable locations for convenience of keeping goods and rapid waiting on customers.

The bases are so made with the cabinets above that all goods of one class are assembled, so that in waiting on a customer it can be done in a short space of time, thereby saving hundreds of steps to the merchant and many to the customer (that occur when stock is placed so that both have to walk from one portion of the store to another several times during a purchase.) For instance, take builders' Hardware. They seek to have all the patterns of fasteners, pulls, locks, etc., well displayed in the cabinet with the glass front drawers. Then beneath this cabinet is a base finished with drawers with various movable partitions, giving a space for the storage of heavy fixtures, such as parlor sliding door hangers, sash cord, blind hinges, etc. These drawers serve the purpose of carrying goods that could not well be put in the drawers with the glass fronts, as many of them are naturally too heavy, and then again, proper partitions could not be arranged in the upper cabinets.

Through the form of construction of their new base, any size drawer, from four inches wide up to twenty-four inches can be transferred to any base. The smaller drawers are arranged in a sub-cabinet, as shown in cut "A."

Another very important feature of these improved bases is that for goods that may be too numerous to conveniently handle in the glass front drawers, the merchant can have one glass front drawer sampled with the goods, showing various patterns, but the stock and various lengths can be conveniently carried immediately under this glass front drawer in the base. For instance, files, chisels, etc. By the display of a line in one drawer the customer's attention is called to that line.

In the base immediately under it, which has ample depth from front to back, it enables the merchant to place each size of chisel or file in a drawer by itself, so that it is quickly found, and the stock is always kept separated, and requiring but little thought or study by the most inexperienced merchant or clerk to know where each article and size is. By this the merchant has the advantage of the sample displayed and the heavy, bulky stock stored where he is relieved from lifting the weight of the heavy drawers, and can easily reach the stock by drawing out the correct one in the base. This feature they carry throughout their shelving—it being equally important and valuable in each line.

The American Trade Index of Manufacturers which was issued last December by the National Association of Manufacturers of Philadelphia, received a wide distribution in various quarters of the globe, and it is to be duplicated this fall by a Spanish edition, it having been translated into that language, and is now on the press, with the expectation of being ready for distribution within about two weeks. It will be a volume of nearly 500 pages, and it is the intention of the Association to distribute 5000 copies without any charge whatever, to the best merchants in the Spanish-speaking countries. They are encouraged to do this, as on a number of occasions, visitors from South America and Europe have come to their offices with a copy of the English edition under their arm, and they feel confident that this is one of the most effective plans for bringing the names and business of American manufacturers prominently before the attention of foreign buyers. It certainly would be a rare thing for a book of such importance to be thrown away by any one who had received a copy, it being very desirable to keep for permanent reference. While this is not claimed to be a complete directory of American manufacturers, as it embraces only the members of this particular association, it gives an evidence of what might be done on a larger and broader scale, embracing a greater number of the industries of the country, and is deserving of a wide distribution.

HARDWARE'S "Prices Current" are reliable.

Digitized by Google

REVIEW OF THE MARKETS.

Hardware: Fall business starts in with a good, healthy impetus. Less anxiety is given to changing prices, which are all on the up grade, than to the seller's ability to deliver the goods he is so fully prepared to enter orders for. Factories have done the best they could to utilize the summer months, usually dull enough, to the heaping up of some surplus products, and the partial filling of unfilled orders, which some of them wish had never been taken. Increasing facilities are progressing on every hand, and the prospects are, barring the difficulty in obtaining raw material, that all orders will be within reach before the early buyer for Spring requirements begins his hustling for 1900.

Wire Nails: The American Steel & Wire Co. announced on Sept. 1st a new advance in the price of wire nails of 15 cents a keg. This had begun to be anticipated by the trade, to stimulate sales, and they would have been disappointed if it had failed to arrive. It does not seem to affect the traffic adversely, the demand being exceedingly good. Present quotations may be stated as follows, f.o.b. Pittsburg, 30 days net.

To jobbers in carload lots	$2 65
To " in less than carload lots	2.67½
To retailers in carload lots	2 80
To " in less than carload lots	2.90

New York prices are represented by the following, the demand, as usual at this season of the year, being a satisfactory one:

To retailers, carload lots on dock	$2.75
" less than carloads on dock	$3.00 to 3.10
Small lots from store	$3.10 to 3 15

Cut Nails: Since the publication of our previous issue, the Eastern cut nail manufacturers have made an advance in the price of these staple goods of 25 cents a keg. This was under date of August 29th. The demand, however, continues good, the relative difference between the prices of wire and cut nails keeping the demand uniform by comparison. Difficulty in obtaining material has made deliveries less prompt than is customary so early in the season. We quote as follows, f. o. b. Pittsburg, 30 days net, freight being added to make a net price delivered at destination:

To jobbers in carload lots	$2 40
To " in less than carload lots	2.45
To retailers in carload lots	2 50
To " in less than carload lots	2.65

New York business is in fair volume under the prices named as follows:

Carload lots on dock	$2 55
Small lots from store	$2.75

Barb Wire: An advance was ordered on September 1 by the American Steel & Wire Co. of 50 cents per 100 pounds in the price of painted barb wire, and 15 cents per 100 pounds advance in addition in the price of galvanized barb wire. This was evidently done to discourage the sales of painted wire by making the differential in price too small to be considered much of a saving, and the use of painted wire is expected to fall off. The present quotations may therefore be quoted as follows, f. o. b. Pittsburg, 30 days net:

To jobbers in carload lots, Painted	$3.10
" " Galvanized	3.25
" in less than carload lots, Painted	3.12½
" " " " Galvanized	3.27½
To retailers in carload lots, Painted	3.25
" " Galvanized	3.40
" in less than carload lots, Painted	3 35
" " " " Galvanized	3.50

Smooth Wire: On the date when the other advances in wire products were made, smooth wire was advanced 15 cents per 100 pounds on base price, with no change in the extras for galvanizing, which remain as they have been for several months. Quotations are as follows, f. o. b. Pittsburg, 30 days net:

To jobbers in carload lots	$2.50
" in less than carload lots	2.52½
To retailers in carload lots	2.65
" in less than carload lots	2.75

The charge for galvanizing is 50 cents on sizes from 6 to 14 inclusive; on Nos. 15 and 16 it is 85 cents and on Nos. 17 and 18 is $1.10.

Steel Oilers: Noera Mfg. Co., Waterbury, Conn. John H. Graham & Co. No. 113 Chambers Street, selling agents, announce the following changes in prices of their goods, spring bottom, copper plated steel oilers, 70 and 10 per cent discount. Railroad and engineers, 60 and 5 per cent.

Standard Tree Pruners were advanced on September first to 75 and 10 per cent. discount.

Hammers, Hatchets, Etc.: Fayette R. Plumb, Inc, Philadelphia, Pa., under date of August 16. has issued a new revised discount sheet, in which a number of advances are noted over the one published in our issue of August 10th. Some changes are more worthy of note, but many of them are from 2½ to 7½ per cent. advance on prices then quoted.

McKinney Mfg. Co., Allegheny, Pa., John H. Graham & Co, No. 113 Chambers Street, New York, selling agents, announce the following revised discounts on bright steel butts and strap and T hinges.

Terms net cash thirty days, payable in Boston or New York funds.

Linseed Oil: Under date of Aug. 29, 1899, the Dean Linseed Oil Co. quote as follows:

In lots of less than 5 barrels ..... 45 cents per gallon.
In lots of 5 barrels or more ..... 44 cents per gallon.

The five-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw. Calcutta oil, 60 cents per gallon. Above prices are subject to change without notice.

THE BOSTON TRADE.

August business closes with evidence of an increased Fall trade and conditions were never more favorable for a continuation of a heavy demand in all lines of Hardware for the balance of the year.

One would naturally expect the great rise in values would check buying, but the demand seems to be fully as large and the continual advances seem to stimulate rather than lessen sales. As one of our customers said to us a few days ago when we told him that builders' Hardware had advanced twenty per cent., "It makes no difference if it has gone up 100 per cent. we must have the goods."

There is still much delay in obtaining prompt shipments from manufacturers and all seem to be willing to accept cancellations when their customers find they are able to procure the goods elsewhere.

The recent advances in wire and cut nails were not unexpected and the trade seem to be willing to pay the advance. In such lines, however, it is evident they are buying only from hand to mouth and quantities are not larger than their immediate wants require. FRYE, PHIPPS & CO.

THE PHILADELPHIA TRADE.

Advances have become the order of the day in such a general way they are no longer regarded as strange or exciting—in fact the trade have acquired a habit of expecting advances and are not surprised when they come, as they are still doing with great regularity. Almost every day brings reports of fresh advances, which seem to be extending to all lines of goods, including many articles hitherto exempt.

Fancy goods are feeling the effect of increased cost, and within the last few days advances have been announced on plated ware, plated knives and forks, high-priced tools and other goods which were supposed to be so far removed from raw material cost as scarcely to be subject to new conditions.

From manufacturers, however, from all sides come increasing complaints of the scarcity of material, and these complaints are more pointed and general than at any time in the past, and manufacturers seem further from catching up on their orders than for some time past.

Many manufacturers are being compelled to make contracts for material for 1900, not only to protect themselves against still higher cost of raw material, but to insure delivery when wanted in time for Spring trade. Under these conditions there is no temptation to cut prices, and the market is very firm in consequence.

It is pleasant to note that the retail dealers generally express themselves as pleased with the situation, and gratified at the prospect before them of making additional money by reason of the increased value of their stocks. It is to be hoped that many dealers who have been working on small capital, and with limited means, will thus make sufficient profit to be lifted out of their cramped condition, so that, hereafter, they will have a larger capital at their command.

Collections are already showing some improvement, and it is our belief this improvement will develop as the year lengthens. Certainly, there is every reason to expect a good Fall trade. Never, perhaps, were laborers so generally and profitably employed, and the vast amount of money being spent in this way must inevitably be felt in the channels of trade. BIDDLE HARDWARE CO.

THE BALTIMORE TRADE.

Having in the past two months been a sad witness of the last struggles in two memorable lives and feeling the pangs occasioned by the loss of a devoted mother and that of a good friend and counsellor, in the person of a father-in-law, the writer has had neither inclination nor time to devote to sending his usual trade letters.

The stern realities of life is not more forcibly impressed than when those we love are taken from us and it is with difficulty we find consolation in the wisdom of Providence.

Returning to-day from a short business trip in Virginia, and being in the section recently quarantined owing to the presence of yellow fever, I found a complete revival of trade and ready response to the call for Hardware orders.

Our business generally is in splendid shape, confidence in the market is stimulating purchases and the retailers are laying in their usual Fall supplies.

Collections are correspondingly good, which is a most pleasant evidence of a healthy condition of trade. A few of our farmers are on the lookout for some modern philanthropist, embracing the qualities of financeering and promoting, who will take them under his wing and double the price of cerials, etc.

The recent advance in both cut and wire nails was a little startling, particularly respecting cut nails, we, therefore, can but infer that five cent advances are now off and that in the future we can expect deeds of greater valor.

H. WEBB & SONS.

THE PITTSBURG TRADE.

The Fall trade is now in full swing and is very active. There is every reason why it should be in the district surrounding Pittsburg, for each and every industry hereabout is pushed to its capacity, with work for every man who wants it, at good wages.

Hardware prices continue to advance, and having pig iron as a basis of cost, with good reason. The extraordinary and world-wide demand for iron and steel and their products continues unabated. Of course there will come a time when the top will be reached and a halt called but it does not yet seem to be in sight. Strap and T hinges, cut and wire nails are among the recent advances, while there are daily notices of less important items.

The two bituminous coal combines have been successfully started, one taking all the railroad mines in the Pittsburg district and called the Pittsburg Coal Co., the other taking all mines on the river and known as the Monongahela Coal Co. Undoubtedly great economies can be made in their management by good organization and capable heads, but for the time being the necessary changes will entail individual hardship in many places.

A day's business was given up lately to welcome the Tenth Pennsylvania Volunteers returning from their valiant service in the Philippines. They richly deserved the grand

Digitized by Google

reception our people gave them. President McKinley's speech on the occasion received wide attention.

LOGAN-GREGG HARDWARE CO.

THE CLEVELAND TRADE.

The dull summer months of years past were missing this year, and instead the summer gave us months about as active as the busiest of some other years.

Fall business is on with a rush and with September 1st, Saturday afternoon closing and Labor Day in rapid succession, we are nearly driven to extremes. The hay fever season is at its height and robs us of our leader, and you of your regular correspondent, who has banished business cares for the present and is taking a much needed rest together with considerable enjoyment in the wilds of Canada.

Prices continue to advance with no prospect of a reaction in sight. The foolish jobbers and dealers, who did not believe that prices could possibly stay up long enough to let them dispose of the goods they had bought, without cutting the market prices, are no doubt many of them in bad shape now. Their plan of conducting business: wherever you see an order, grab it; much like the Irishman at Donnybrook fair, wherever you see a head, hit it, has proved disastrous for once. Most of them would be glad to buy back some of the goods they were so anxious to sell, and at higher prices than they obtained. In many lines it is difficult to get goods promptly, even at the highest prices, and those who have reserved a supply for the immediate and pressing wants of their customers will serve both them and themselves best.

Many advances, and notably those on wire and nails are promptly adopted now with scarcely an exception. Trade is very good and collections satisfactory.

THE LOCKWOOD-TAYLOR HARDWARE CO.

THE INDIANAPOLIS TRADE.

It is through many difficulties that we are able to fill our orders sold earlier, and which are now being demanded, for corn knives, apple parers, lanterns, cross cut saws, and axes.

It has surprised us how the trade, so far as quality is concerned, has changed within the past twelve months. A year ago, the cheapest lantern we could buy, and the lowest priced axe in stock, were in the greatest demand. Now everybody wants the highest priced lantern on the market, and when shown samples of the best and latest axe to be had, they remark: "That is what I want," and when you talk to them about cheap axes, they say: "I guess I carried over all I will sell of them."

Last season we sold very few apple parers, but the year before the dealer wanted something cheap, regardless of quality. We naturally tried to supply the demand, but are now closing out what we had left at a ridiculously low price, expecting the price to move them, while the demand for the 78 Reading, which we had difficulty in moving two years ago, because of the price, are now selling faster than we can get them.

In spite of there being no peaches this year in this section, and not a superabundance of tomatoes, we have had a very large trade in tin fruit cans, cleaning up our stock in good shape. VAN CAMP HARDWARE & IRON CO.

THE COLUMBUS TRADE.

The dry weather continues and everything is suffering from the effects of it. A few local showers the past two days but no general rain. Corn is being cut and a great deal of it will not be as well filled as it would have been had we had rain a few weeks ago; but still there will be an immense crop.

Trade is good and the only trouble now is to get goods. Prices are not very uniform among jobbers, as some seem to think they will be able to replace stock for less than they are selling it for. We know of several instances where jobbers sold goods for less than they could be bought for, and they went the round of jobbers trying to get them to help them out, saying they had oversold and asking if we could not help them by selling them so much at a price so they would not lose. These jobbers who have been doing these smart things are finding out that instead of being able to buy goods at reduced prices, can't get them at any price without waiting their turn with the manufacturers, and their turn may come in two weeks or two months, as manufacturers seem to be unable to keep up with orders. Jobbers are having considerable annoyance on account of not being able to get goods which were to be delivered September first. Axes, cross-cut saws, stove boards, coal hods, stove pipe and elbows are slow in coming in. It is very gratifying to have orders come as freely as they have for several months, but very unsatisfactory to not be able to fill them complete, and the trouble is not with the jobber but with the manufacturer. We know that orders

AT THE TRAPS

Laflin & Rand Smokeless Powder will give a better pattern with the same velocity than any other powder made. Further than this you can always depend on its being just the same; hot or cold, wet or dry and in any climate. We guarantee this and invite tests. If you shoot a revolver or rifle you will be interested in our latest output, SPORTING RIFLE SMOKELESS. Write for information.

LAFLIN & RAND POWDER CO.,
NEW YORK.

Digitized by Google

placed with manufacturers six and eight months ago are still unfilled and in some instances where a number of sizes of an article are ordered we will get one or two sizes only and the other sizes to come later, and usually the sizes needed mostly are the ones you do not receive. While this is the best year the Hardware trade has experienced for a long time, it is the hardest in the amount of work. There is no rest for the Hardwareman this year—but it is long hours and hard work. We hope balance sheets will show up results that will repay all Hardwaremen for the extra hours they put in. THE SMITH BROS. HARDWARE CO.

THE SAGINAW TRADE.

The weather is extremely hot, and the country is very dry and needs rain. Notwithstanding, trade keeps up and the lumbermen in Michigan, Wisconsin and Minnesota are preparing to go into the lumber woods heavier than usual, on account of the recent advance in lumber.

MORLEY BROTHERS.

THE DAVENPORT TRADE.

There has been too much time given to the social and entertainment part of life here of late to have many spare moments for writing trade reports. A successful and largely attended street fair at the Moline end of the Tri-city; three circuses within a week, a State Fair at Des Moines and everything closed yesterday for Labor Day, to say nothing of the side attractions including the Cherry Sisters who have been with us for two weeks. Our Electric Street Car Company report fifty-five thousand fares received in one day. The Street Car Company are building a line to the shops of the Government Arsenal. Work on the new railroad between Davenport and Clinton is progressing, and we are promised that trains will be running to Clinton by Thanksgiving Day.

There is an unprecedented demand for all grades of lumber taxing our enormous saw mills to their greatest capacity, and this is especially true of lumber used in manufacturing packing boxes; one factory has taken this season over two million feet fresh from the saw mills. No greater evidence could be given of the increasing sale of general merchandise as well as of shelf Hardware. Prices of Hardware are still climbing skyward, and the invariable reason given for their continued advances are scarcity of raw material. Manufacturers who make iron and steel for a living evidently will not perish for hunger this year, while the twisters of rope, crushers of flax and corroders of white lead may also hope for at least three meals a day.

The political orator is going about through the land and the sound of his voice can be heard in every town and hamlet thereof. The demand does not seem to be so much for a change in the policy that has given such great prosperity, as it is for the political offices. So far like raw material, the supply is unequal to the demand.

Crops were never better, money plenty, interest rates low, trade good and collections satisfactory.

SICKELS, PRESTON & NUTTING CO.

THE ST. PAUL TRADE.

The record for eight months of the year 1899 is now made up, and eventful and exciting months they have been to those who have had anything to do with the iron and steel markets. The like has never before been experienced in the history of the Hardware business. Those of us who were in business in 1879 will recall the boom of that year, which approaches nearer to the present condition than anything that has occurred within the experience of the writer. Can we profit by the knowledge gained by this experience? Well, perhaps we can to some extent, but we know that in this life we never twice meet with the same events, or conditions surrounding them. If this were not so, we would only have to study the history of the past to know how to shape our daily affairs.

We remember that the boom of '79 was of short duration.

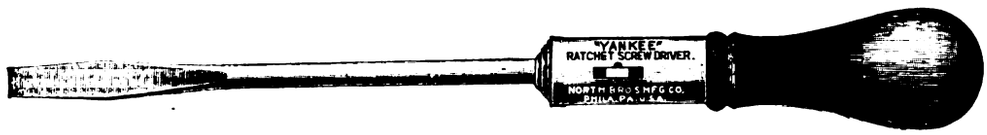
The Glidden Varnish Co., Cleveland, Ohio, U. S. A.

Advances were very sharp and rapid, and, the end coming suddenly, the declines were equally sharp. A good many staple goods were bought by jobbers and others at the top of the market, and before they could be unloaded, the price had dropped to as low a point as the lowest before the boom began.

The question to consider now is this: Does the present situation warrant the large advances that have recently been made, or, are they unnatural and unhealthy, being caused by so-called "Trusts," and, therefore, liable to collapse at any time? We know that before the present advances were made, the prices ruling were abnormally low, and with all expenses reduced to the lowest possible limit, labor included, manufacturers were complaining that they could not always get the money back that they had put into their goods. We recognize that such a condition could not continue long without disastrous results to all business interests, and therefore it was perfectly legitimate to expect a change, especially as the agricultural interests of the country were in so prosperous a condition. Therefore, it would seem that these advances were inevitable—Trusts or no Trusts.

Now, is any one class of people getting an undue share of these advances, or are the benefits pretty evenly distributed? From general reports, it appears that the condition of all classes is greatly improved over that of a year ago. There is plenty of work for all who want to work, and at greatly increased wages. Money is plenty and cheap. General prosperity reigns. The thought of the country governs the country. "The wish is father to the thought." Do we wish for a change? Prices are not unreasonably high. A good proportion of the advance is given to labor, which advance immediately goes into circulation, thus making the prosperity that we are having.



As far as we are concerned, we enjoy the present situation vastly more than we did that of a year ago, and we hope no change will occur unless it is for greater prosperity. Reports come from our farmers that help is scarce, and that $2 50 per day and more, including board, is readily paid for harvest hands. Crops are generally good; prices for farm products improving. Every indication points to a large Fall business. So mote it be.

C. W. HACKETT HARDWARE CO.

THE MINNEAPOLIS TRADE.

It is about the same story, everybody is busy, conditions generally very favorable. We think as a rule dealers are getting the advances as they are made. Still every little while we know of deals being closed apparently without regard to present cost of goods, and in some instances at less figures than they can be replaced for. During the month of August we had considerable rain; that is especially true in some sections of the Northwest. The up-to-date farmers who were attending strictly to their business

stacked their wheat, but a great many shiftless ones left the wheat in the shock waiting for the thresher to come along, which they hoped would come before there was much damage. Their crop is in very bad shape. We learn of one section where it is estimated fully one-half of the crop that has been gathered in good condition has been ruined through shiftlessness. Probably only a small portion of the total amount has been affected, but it seems too bad when a crop is practically ready for the market to have any portion of it spoiled in this way. It is generally understood that while the crop is large, it is not as large as it was estimated along in July. In view of the fact, however, that the farmers generally were in excellent financial condition, there will be money enough come out of this crop to keep the Northwest in as prosperous condition, thus assuring good business for the next year to come.

Building operations are quite extensive in the city and surrounding country. While occasionally we hear of some one who has given up the idea on account of increased cost of material, labor, etc., we believe the fact that the people generally are prosperous and business good, enough others are enabled to build, that it more than offsets, and we cannot see any prospect of a decline in values of building material for the next year to come. The saw mills are all very busy in spite of the advance of three or four dollars per thousand on lumber. There is a decided scarcity of some grades. There are indications of a little better feeling in real estate circles, and increase in values and sales is something to be desired. W. K. MORISON & Co.

THE OMAHA TRADE.

There is little or no change in the prevailing conditions during the past week. Trade has still held its own and the prospects are that the present activity will continue and the scarcity of goods and the difficulty in procuring supplies apparently grows worse instead of improving.

Occasional complaint has been made during the past week of dry weather and extreme heat affecting the corn crop, but there is no possibility of any serious damage and under the most unfavorable circumstances, the yield will be the largest in the history of the State, though, of course, there will always be some people who feel hurt because it is not more.

Trade and collections are alike good.

RECTOR & WILHELMY Co.

THE PORTLAND TRADE.

Business continues good and prices are maintained better than we had anticipated. There is little, if any, cutting, as the jobbers realize that when they next replenish their stocks it will be at higher prices than those now ruling.

The weather conditions are favorable for the farmers, and the crops are looking finely. The manufacturers who are dependent on water power are complaining of the long continued low state of the rivers, as there has been very little rain this season, barely enough to keep the crops growing, but it is getting so near the time that we may expect Fall rains, that we do not apprehend much inconvenience from this source.

Collections are good, and the retailers seem to be enjoying a better trade than is common at this season. From the present outlook, we cannot see any reason why we should not have a good Fall business.

The high price of lumber will stimulate the lumbermen to increased output, and the prospect is good that they will get high prices another season.

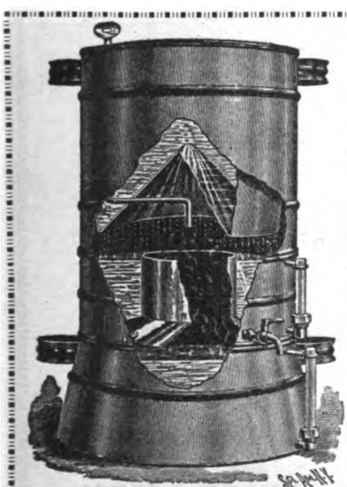
ness, I took a vacation trip down to Boston, via Providence, R. I., thence to the British provinces.

Much has been written of

"Boston, the beautiful city,
Where all is rare, ancient or new,
With its parks, its gardens, its palaces,
Presenting a wonderful view."

This indeed is true. Boston's superb public gardens and restful Common never looked more cheerful. Tremont Street, which a few years since was closely netted with overhead wires, is at present clear as the sky at noon-day, the magnificent subway enabling the city to dispense with all overhead wires and surface cars on this street. The varied natural scenery of Boston's beautiful harbor, the gilded dome of the statehouse, scores of spires and well-known landmarks sank slowly into the horizon as we comfortably located on the *Grand Duchess* (the most elegant steamer of the East) passed Castle Island, Fort Warren, Fort Independence, and soon lost sight of the busy cities of Lynn, Revere Beach, Swampscott, Deer Island, Winthrop and the fashionable Nahant, on the east, and Pemberton and Nantasket (the "Manhattan Beach" of Boston) on the right. The stately vessel gracefully making her way down the channel, the fleet of pleasure yachts and fishing sloops were beautiful to behold. As the broad Atlantic unrolls majestically before you, its tempered breezes bring the roses of health to the faded cheeks.



We left Boston at 6 P. M., due at Halifax, N.S., at 5 P.M. the following day. Before reaching her destination, however, the ship was hemmed in by a dense fog and had to lay to until the next morning. Upon entering the harbor, a shadowy glimpse of the city of Halifax is sighted, and upon nearing the city, a flag is noticed which is invariably hoisted upon the citadel, situated on the hill overlooking the city. Many war vessels were to be seen in the harbor, and the beautiful city of Dartmouth on the right. In visiting Halifax, and calling on the Hardware trade, they were all very jubilant, and expressed much satisfaction in the achievement ef success shown in the unprecedented sales they had made in 1899. A carriage ride through the splendid park of 350 acres and the lovely public gardens, gave evidence of much pleasure to all the party. St. Paul's Church was called to the attention of the writer as being the oldest building in the city, having been commenced in 1749. We were also shown through the Citadel, and the barracks within its walls are capable of accommodating a large number of troops; over the entrance gates were two mortars which were captured from the French at Louisburg, Cape Breton. Returning by the way of Amherst, N. B., to Boston, we completed a pleasant sojourn long to be remembered.

GEORGE B. MAIN.

The addition to the foundry at F. E. Myers & Bro.'s shop, Ashland, O., is completed and presents a fine appearance. It possesses all the up-to-date conveniences to be had in the most modern foundries, and is one of the largest in this part of the State. The foundry is now 120 feet wide by 260 feet long and will accommodate a force of 125 men. In the core making room, the oven is a decided improvement over the old style ovens used for drying cores. It is about thirty feet long and stands in the center of the room and has two tiers of doors all round opening into it. The benches for core makers are round the oven. This idea is one designed by P. A. Myers and is the latest improved style.

The W. & E. T. Fitch Co., of New Haven, Conn., are shipping saddlery and coach springs to England. William E. Peck & Co., of this city, having secured orders for these special lines.

The oldest German coal mines were first worked in 1195. They are near Worms. England did not begin to mine its coal until the fourteenth century.

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Covington, Tenn.—A charter has been granted to the Tennessee Hardware Co., of Tipton County, with $5000 capital. The incorporators are J. L. Richardson, J. T. Eddins, W. A. Owens, C. E. McFadden, W. C. Beck, W. V. McFadden and W. V. Bringle.

Eldorado, Ark. — The J. H. Garrison Hardware Co.

Glenville, Ohio.—The Englehart-Fulton Co. has been incorporated by G. H. Englehart, H. I Fulton, L. A. Craig, J. C. Cone, and T. K. Dessette; to manufacture and deal in general Hardware, builders' supplies, etc. Capital stock, $10,000.

Hughesville, Pa.—J. J. Maloney & Sons has opened a general Hardware store in the building formerly occupied by Reed Bros., on Main Street. They will run in connection with the store a plumbing and tinware establishment in the rear of the building.

Huntington, W.Va.—The Emmons-Hawkins Hardware Co.has been incorporated by C. D. Emmons, J.L. Hawkins, E.V. Carter, D. W. Emmons, and A. S. Emmons; to do a wholesale and retail Hardware business.

Montreal, Can.—F. Mouillie & Co. locksmiths, new firm, recently commenced business.

Montreal, Can.—The Pallascio Hardware Co. has been incorporated, with M. Lavoie as president.

Changes and Improvements.

Armada, Mich.—E. P. Cudworth, Hardware, has removed his stock to the old Latham store, where he will do business until his new store is completed.

Bismarck, Pa.—S. F. Keller, who has been in the stove and tinware business here for the past nine years, has moved his business to the west end of Annville.

Argentine, Mo.—The stock of Hardware formerly owned by J.E.Wiscoskie, has been sold by Assignee G.W.Gully to Myer Hurla for $2930. Mr. Hurla will open the store for business and will operate it for a time at least.

Caneadea, N. Y.—B. D. White has sold his Hardware business to Charles Lucas, of Castile.

Carson City, Mich.—The Carson City Implement Co. has closed up its business here and removed to Crystal.

Centralia, Ill.—The Centralia Iron & Nail works has dissolved.

Chester, Pa.—Albert Smith, who for years has been conducting a Hardware store on Third Street, below Flower, has moved to Third Street near Wilson, where he will conduct the store in conjunction with the plumbing and stove store of his son.

Corpus Christi, Tex.—H. D. C. Gussett, wholesale Hardware business has been purchased by John U. Bluntzer and Randolph Robertson. The new firm will assume charge on September first.

Cylinder, Ia.—Wells & Hughes have succeeded C. Mosness.

Denison, Tex.—Owen McCarthy, Hardware, sporting goods, etc., business purchased by Hartzog & King, who will continue same.

Eldorado, Ark.—A. A. Norris and James Mellor are tearing away the old frame storehouse of Mr. Mellor and on its site they will erect a large brick building to be used as the Hardware store of the A. A. Norris Hardware Co.

Emden, Ill.—Fred. Zimmer has purchased the Hardware and implement business of H. J. Faulken & Co.

Galatin, Tenn.—M. A. Enwig & Co. have purchased the J. Wile lot, and will immediately commence the erection of a large two-story Hardware and implement store, at a cost of about $5000.

Grafton, W. Va.—The consolidation of Long & Bro. and H. J. Mugler into one under the name of J. F. Leachman & Co. places two of our well established Hardware stores into one.

Hutchinson, Kans.—J. N. Shanahan has bought H. Devier's interest in the firm of Geo. McKinstry & Co.

Jackson, Mich.—Keeley & Crowley, boiler plant, sold at auction, and purchased by John Crowley.

Jeffersonville, Ind.—Carr & Lindley, the Hardware merchants, have leased the Oglesby-Fry building at the corner of Spring and Maple Streets, and will occupy the lower floor. The upstairs will be rented for offices.

Kent, Ohio.—A. C. Smith, retail Hardware, sporting goods, etc., business purchased by the Kent Hardware Co.

Litchfield, Ill.—E. M. Austin has purchased the Hardware stock of Woolley & Simmons, who will retire from business.

Little Rock, Ark.—The Fones Bros. Hardware Co. are putting a new and handsome front to their business house.

Macedonia, Ia.—Lane & Son have succeeded Lane & McCready.

Parkersburg, W. Va.—The W. H. Smith Hardware Co. have opened their several large warerooms on Jackson Alley, for retail trade. As soon as the firm can settle with the insurance companies it is understood that a large and handsome modern business block will be erected at once, on the site of their store which was destroyed by fire a few weeks ago.

Port Huron, Mich.—Sturmer Bros. are building an addition to their Hardware store.

Quakertown, Pa.—The new stove works is ready to begin operations.

Miami, Fla.—Hon. J. W. Watson is erecting a new two-story brick block which he will stock as a Hardware store when completed.

Reading, Pa.—Extensive improvements have been made to the Hardware store of Bard, Reber & Co., Eighth and Penn Streets, which have given the firm better accommodations in handling their large trade. An elevator has been put in and the third floor, formerly occupied by the Knights of Friendship, has been fitted up for storage room purposes. A handsome new front has also been added, greatly improving the appearance of the building.

Reading, Pa.—Hertzog & Heilman, Hardware dealers, Sixth and Bingaman Streets, are erecting a 25-foot addition to the Bingaman Street end of their store. It will be three stories high.

Rock Island, Ill.—The Rock Island Plow Co. are making extensive changes in their equipment.

Saybrook, Ill.—The firm of Lott & Spradling, Hardware dealers, has dissolved, Mr. Spradling retiring. The business will be conducted by Mr. Lott, who will increase the stock.

Sunbury, Pa.—William H. Heim has purchased the Hardware store which has been conducted under the name of Heim's Sons, and will personally operate it.

Business Embarrassments.

San Francisco, Call.—Bastian den Besten, a Hardware merchant, has filed a petition in bankruptcy in the United States District Court. His liabilities are $2,296.05; assets, $1,278.81.

Burglaries in Hardware Stores.

Battle Creek, Mich.—V. C. Wattles, $50.

Columbus, Ohio.—Fred. Miller, $100.

Latrobe, Pa.—Edward Houck, revolvers.

Muskegon, Mich.—Karet & Dekker, small loss.

Thedford, Ont.—W. N. Ironsides, bicycle.

Fires in Hardware Stores.

Anacostia, Md. — The Hardware warehouse of J. Frank Campbell has been destroyed by fire.

Cass Lake, Minn.—John Meining & Co., Hardware merchants, recently damaged by fire.

Greenville, Tex.—F. E. Alexander, tin shop and cornice works, damaged by fire.

La Grange, Ill.—John Blaser's Hardware store has been destroyed by fire.

Minto, N. Dak.—Chas. White's Hardware store has been damaged by fire.

Montreal, Can.—J. H. Gardner & Bros., plumbing, damaged by fire.

Montreal, Can.— May Bros., Hardware merchant, damaged by fire.

New Canton, Ill. — Koeler's Hardware store has been destroyed by fire.

San Antonio, Tex.—The Heusinger Hardware Co., slightly damaged by fire. The fire was the work of an incendiary.

Vicksburg, Miss.—The Lee Richardson Hardware Co.'s big warehouse was recently destroyed by fire.

Victor, Colo.—The Morrell Hardware Co., recently damaged by fire at a loss of $25,000.

Victor, Colo.—The Tompkins Hardware Co., damaged by fire recently, at a loss of $25,000.

The Blount Door Check

is described in a monthly bulletin of good things issued by a prominent hardware firm as follows:

"In the light of much knowing of many such devices, we deliberately here and now state, that the Blount Door Check is the *only perfect one* at present correcting man's tendency to leave the door ajar. 'Tis practically all in one piece, is simple, positive in action, wont get out of order—in short, it is "far and away" the best door doctor extant."

On request we furnish to the Hardware Trade attractive folders descriptive of the device and bearing the name and address of the Dealer. The name of this Company does not appear upon them.

Jersey City, N. J.—The Randolph Clowes Co. has been incorporated by George H. Clowes, Samuel P. Williams, Lyman E. Warren, and Edward C. Bates; manufacture brass, copper, etc.—Capital stock, $900,000.

Jersey City, N. J.—The Heat Controlling Radiator Co. has been incorporated by Peter Whitney, David M. Bressler, Carlton J. Barnes; to manufacture radiators. Capital stock, $250,000.

Lebanon, Pa.—The Lebanon Foundry Co. has been incorporated by A. W. Ehrgood, J. H. Mease, A. Hess, C. B. Woomer, and N. Boughter; manufacturing iron and steel. Capital stock, $20,000.

New York, N. Y.—The Peerless Mfg. Co. has been incorporated under the laws of Delaware; to do a Hardware business Capital stock, $300,000.

New York, N. Y.—The Niles-Bement-Pond Co. was incorporated recently with a capital stock of $8,000,000.

Pittsburg, Pa. — The Sterret Thomas Foundry Co. has been incorporated by W. B. Sterrett, D. J. Thomas, C. Bauer, E. A. Spencer, and H. B. Spiker; manufacturing iron and steel. Capital stock, $60,000.

Richmond, Va. — The Phillips-Rodgers Co. has been incorporated by James A. Rodgers president and general manager; W. A. Phillips, secretary and treasurer; to do plumbing gas fitting, etc. Capital stock, $5000.

Rochester, Pa.—The Olive Stove Works has been incorporated by H. C. Fry, J. J. Hoffman, W. Moulds, J. W. Dowell, S. G. Woods, and J. M. Eakin; manufacturing iron and steel. Catital stock, $17,600.

St. Louis, Mo.—The Hollran-Dieckmann Refrigerator & Fixture Co. has been incorporated by G. H. Hollran, Louis Dieckmann and William C. Aulepp, Jr. Capital stock, $18,000.

Trenton, N. J. — The Penn Foundry & Mfg. Co. has been incorporated by W. Gordon Miller, Wm. J. Walsh, and Edwin E. Marshall; to manufacture water heaters, etc. Capital stock, $100,000.

Changes and Improvements.

Athol, Mass. — An important business change has just taken place at the L. S. Starrett shop. Mr. Starrett has sold his interest in the cutter department to its superintendent, Francis J. Gay, of Athol, and E. T. Ward, of Boston. He does this to make room for his increasing tool business, which is crowding the shop, and compelling certain departments to run nights a part of the time. The new concern will be known as the Gay & Ward Mfg. Co. and it will greatly increase the business heretofore done. It is expected that a factory will be leased or built in town. Mr. Gay has been for five years an important factor at the Starrett establishment, and his partner is the United States representative of the Seebohm & Dieaksthal steel works of Germany, located at No. 23 Purchase Street, in Boston. About twenty-five men will be employed.

Bellaire, Ohio.—The National Enameling & Stamping Co. have broken ground for the erection of a one-story frame building which is to be used in connection with their plant.

Big Stone Gap, Tenn.—The large iron furnace which was the property of Louisville parties, has been sold to New York capitalists, who will have it put in proper repair immediately, with a view to having it blast this fall.

Decatur, Ill.—The old Metropolis Pipe foundry which has been bought by Louisville, Ky., and Belleville, Ill., capitalists, will be run as a stove foundry.

Dighton, Mass.—The frame for the new building of the Dighton Stove Lining Co. has been made up in Maine and will arrive this week. The ground floor of the building is to be covered with concrete. This has already been laid and the underpinning is in place. The frame is to be raised this week. The new structure is to occupy the site of the old one. It will cover more ground, though less space will be put into upper stories. The old building had a second story for a considerable part of its length, and a rather small third story. The new building will be 210 feet long and 120 feet wide at its widest part.

Shelby, Ohio.—The Shelby Steel Tube Co. propose to make their Toledo factory the largest and most complete of their plants. Work has already been begun on two large buildings, one of frame and corrugated iron 60x132 feet, and the other of iron and steel 80x192 feet. Hereafter the local concern will pierce its billets and roll them, process which has heretofore been done at the Shelby plant.

Miscellaneous.

Lorain, Ohio.—The stockholders of the Thew Shovel Works have held a meeting and elected the following gentlemen as directors: F. A. Smythe, W. A. Donaldson, R. Thew, H. H. Johnson, and E. M. Pierce. The directors have held a meeting in Cleveland and elected the following officers: President and manager, F. A. Smythe; vice-president and superintendent, R. Thew; secretary and treasurer, W. A. Donaldson. The contract has already been awarded for the erection of the building for the main works. The building will be of structural iron and brick. It is hoped by the directors that the building will be up, the machinery in place and the first steam shovel turned out before the first of November and possibly sooner. Preparatory work to construction of the building at the southeast corner on Tenth Avenue and the C. L. & W. R. R. has already been begun.

Walden, N. Y.—The Walden Knife Co. have received between five and six thousand dozen of knives from a California firm to be put in good order, the building having been destroyed by fire, which caused the knives to be damaged by fire and water.

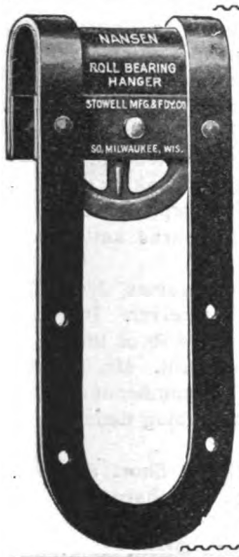
Physical and Accounting Examinations.

In addition to accounting examinations, the charter of The Audit Company of New York authorizes it to examine and report upon the physical condition and economy of operation among others of Electric Railway, Illuminating and other Companies. It also appraises the values of manufacturing and other plants.

Physical and accounting examinations combined afford a correct basis for corporation financing and for valuation of corporate securities or partnership interests.

Sargent's Easy Spring Locks.

Sargent's Easy Spring enables the Latch Bolt to work very freely so that the door does not have to be slammed nor stand ajar, but latches gently as it is closed. This is accomplished by using a good stiff spiral spring, with a long leverage for the Latch Bolt, and a direct pull for the Knob, thus producing the desirable combination of



EASY ON THE LATCH BOLT.

FIRM ON THE KNOB.

The Spring cannot rub on the case, and it is impossible for it to bow or to get out of position. Working in a direct line, and so hort a distance, without friction, gives great durability— no springs to be replaced, nothing to get out of order.

Hardware dealers should supply the demand for these Locks.

BICYCLE AND SPORTING GOODS RECORD.

Bicycle manufacturers and dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Companies, Agencies, Etc.

Camden, N. J.—The Metropolitan Automobile Bazaar has been incorporated by Charles H. Burr, Jr., William J. Eldell, and Frank R. Hansell; for the manufacture of automobiles, etc. Capital stock, $250.000.

Carson City, Mich.—Wright & Cady, retail Hardware, sporting goods, etc., have recently commenced business.

Chester, Pa.—The South Chester Tube Co. has been incorporated by W. S. McManes, L. A. Tucker, J. M. Bell, J. A. Hock, and J. M. Callaghan; manufacturing iron and steel. Capital stock, $1 000,000.

Chicago, Ill.—The Mackie-Michle Co. has been incorporated by C. Mackie, J. Michle, Jr., and R. Michle; mannufacturing tubular and other metal goods. Capital stock, $50,000.

Chicago, Ill.—The National Hub Co. has been incorporated by D. C. Smith, F. L. Moore, and C. E. Antram; manufacturing metal goods. Capital stock, $5000.

Coldwater, Mich. — Shuger Bros. have commenced the manufacture of automobiles which will weigh but 500 pounds each.

Detroit, Mich.—The Multiple Speed Gear Co. has been incorporated by J. Houlehan, J. B. Franz, E. H. Van Hoesen, W. M. Godfrey, and C. Worth, to manufacture and sell multiple speed gears, etc. Capital stock, $50,000.

Elkader, Iowa.—A. C. Reinck has opened a bicycle store.

Harrisburg, Pa.—The South Chester Tube Mill has been incorporated. The plant is well under way in the matter of construction. The company is the outgrowth of the absorption of the Chester Pipe & Tubing Co. by the American Tube Trust. The plant contains a tract of land 1000x1500 feet, faced on one side by the Delaware river and on the other by the Reading railway.

Lisbon Falls, Me.—R. S. Whitney, jewelry, bicycles, etc., will shortly build an automobile. He has built a number of bicycles and similar machines, and is confident that he can produce an excellent horseless carriage.

Long Beach, Cal.—Else & Brown, Hardware, sporting goods, etc., have opened new store.

Milwaukee, Wis.—E. H. Stretssguth, E. F. Mertz, and P. G. Lewis have incorporated a company for the manufacrure of ice bicycles. Capital stock, $80,000.

Missoula, Mont.—M. R. C. Smith, sporting goods, Hardware, etc., has opened new store.

Montreal, Can.—A big syndicate has just bought out the bicycle interest of the Massey-Harris Co., H. A. Lozier & Co., Toronto Junction; Good Bicycle Co., and Welland-Vale Co. Senator Cox, Lyman M. Jones, W. E. H. Massey, Warner T. Soper, and E. R. Thomas were the purchasers. The terms were cash. The new company has applied for charter, with capital of $6,000,000. The Dominion Government will be asked for special charter.

Newark, N. J.—The P. Lowentraut Mfg. Co. has been incorporated by Peter Lowentraut, John Guttman, Jr., Edward J. Schmidt, manufacturing ice skates, etc. Capital stock, $200,000.

Pittsfield, Mass.—L. L. Atwood, bicycles, etc., Bank Row, leased business to W. J. Duvall, who conducts a bicycle repairing establishment in West Street. He will conduct both places of business.

Portland, Me.—Attentic Automobile Mfg. Co. has been incorporated by H. Adams, W. Adams, W. F. Marsh, L. J. Wilber, E. H. Reynolds, A. R. Marsh, and O. C. Bird; dealing in self-propelled vehicles. Capital stock, $500,000.

Portland, Me.—Boston Tape & Rubber Co. has been incorporated with Chas. J. Nichols, clerk; Edward H Lounsbury, president, and Harry V. Dimmick, treasurer. Edward H. Lounsbury and Harry V. Dimmick, directors. Capital stock, $10,000.

Rockford, Ill.— The National Specialty Mfg. Co. has been incorporated by Charles F. Sperry, A. E. Fisher, and A. M. Picken; to manufacture hyrdo-carbon lamps, Hardware specialties, etc. Capital stock, $2500.

San Francisco, Cal.—The California Cycle Co. has been incorporated by Simon Green, Wm. Levy, B. M. Gunzburger, J. O'Malley, and Mercedes Lichtenstein. Capital stock, $5000.

Springfield, Mo.—A company is being organized in this city, with a capital of $50,000, for the purpose of manufacturing automobiles. It is intended to purchase the patented portions of the machine and have them put together and the balance manufactured in this city. By this procedure it is claimed a saving of at least one third can be made.

Steen, Minn.—J. H. Zenker & Son, sporting goods, Hardware, etc., have commenced business.

Utica, N. Y.—Divine Bros. Co. has been incorporated by B. H. Divine, W. H. Divine, and B. C. Divine; manufacturing, polishing, and buffing wheels. Capital stock, $20,000.

Changes and Improvements.

Allston, Mass.—The Parkway Cycle Co., Cambridge Street, closed.

Fort Wayne, Ind.—Mr. Koehlinger, bicycles, Hardware, etc., has admitted E. Baur as partner. The style of the firm will be Koehlinger & Baur.

Foxboro, Mass.—Turner Brothers, Hardware sporting goods, etc., have moved into new and larger quarters.

Kenosha, Wis.—A deal has been made in this city whereby the Charles H. Sieg Mfg. Co. practically passes into the hands of Fred Morgan, of the firm of Morgan & Wright, of Chicago.

Kensington, Ill.—The Chicago Drop Forge & Foundry Co., have just completed some improvements to plant.

Luverne, Minn.—Barkee & Krook, Hardware, sporting goods, etc., stock purchased by C. H. Puckett, of Rock Rapids.

Mason City, Iowa.—Cassidy Bros., bicycle dealers, have been succeeded by Cassidy Bros. & Healy.

Moody, Tex.—McCauley & Clay, Hardware, sporting goods, etc., succeeded by A. R. Clay & Co.

New Haven, Conn. — The Marlin Fire Arms Co. have recently commenced work on a new boiler house and storehouse.

Norristown, Pa.—J. H. Brandt & Bro., dealers in bicycles, etc., have dissolved partnership, and will continue in the same business separately.

Portland, Ore.—The Fred. T. Merrill Cycle Co. are to try the experiment of making bicycles, and will commence immediately after the close of the bicycle trade, in November.

Reading, Pa.—Bard, Reber & Co., wholesale and retail Hardware, sporting goods, etc., succeeded by Bard, Schlott & Co.

Roanoke, Va. — The Price Arms Co., Limited, has succeeded Butt, Price & Co.

Syracuse, N. Y.—That E. C. Stearns & Co., bicycle and Hardware specialties, will go into the manufacture of automobiles was decided by the success of an experimental machine tried recently. This additional industry will be begun just as soon as the company can make the proper arrangements in the way of machinery, etc. For the last four months, under the direction of James B. Spencer, general superintendent, workmen have been engaged in making an automobile, a model which incorporates the idea and features that the Stearns automobile will have.

Toledo, Ohio.—The Maumee Cycle Co. plant for sale by Terry, receiver. It is held at $7000, and the actual cost of the place was about $15,000 when built. Mr. Terry is endeavoring to interest a number of capitalists in the place, but nothing definite has been done.

Victoria, B. C.—Henry Short & Sons, dealers in sporting goods, Richard Short has retired from the firm.

Warsaw, Ind.—Desota Grant, bicycles, is selling out.

Washington, D. C.—J. D. Lasley, bicycles, etc., closing out business, and will devote his time to the sale of Hallwood cash registers.

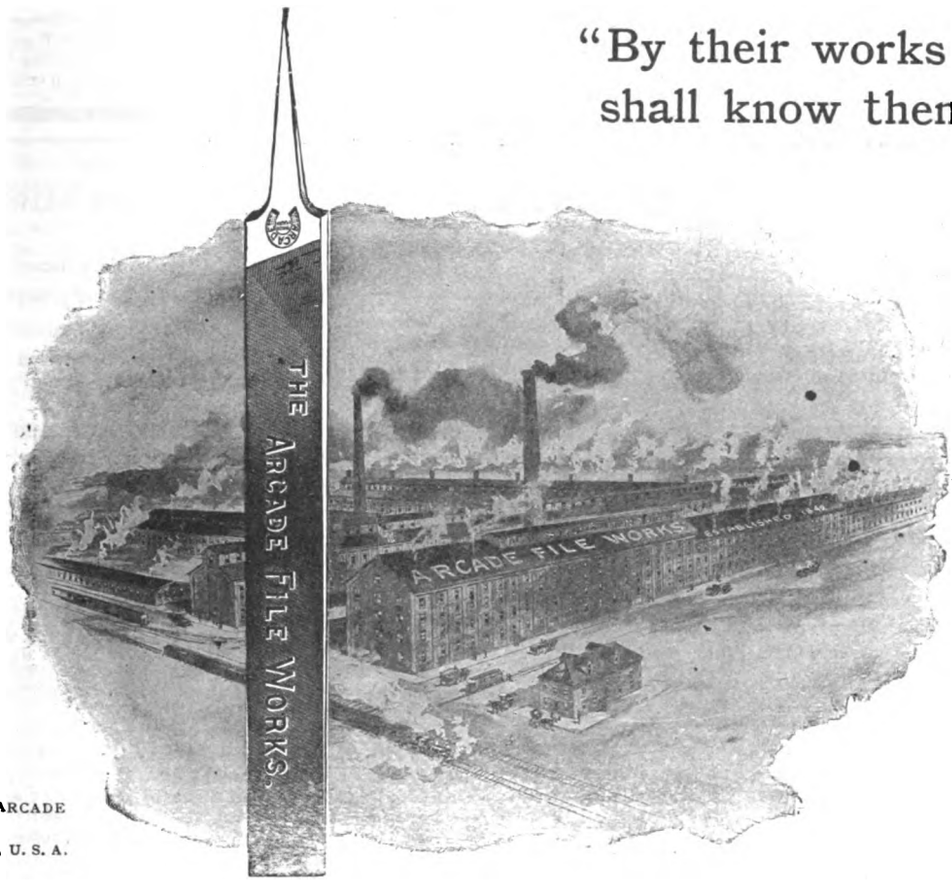
Washington, D. C.—The Orient Cycle Co., bicycles, etc., No. 727 14th Street, N. W., F. P. Libbey, manager, successors to W. D. Hadger & Co.

Recent Embarrassments.

Philadelphia, Pa.—Robert C. Stevens, bicycle dealer. has made an assignment.

Washington, D. C.—The New York Cycle Co., Isaac Katzen, manager, filed petition in voluntary bankruptcy. Liabilities are reported to be about $6500.

Recent Burglaries.



Mankato, Kans.—R. Hanna & Sons, Hardware, bicycles, etc., store burglarized and two bicycles stolen.

THE WORLD'S GREATEST FILE WORKS.

ESTABLISHED 1842.

"By their works ye shall know them."

PLANT OF THE ARCADE FILE WORKS AT ANDERSON, IND., U. S. A.

BACK of an Arcade File stands the most complete and modern file manufacturing establishment in the world, directed by master minds, originators of a distinctly improved product, sold entirely on its merits, the modern plant insuring best quality. Back of an Arcade File stands this guarantee, "that an Arcade File will cut faster and wear longer than any other file made," and as an "earnest" of this guarantee, the Arcade File Works will send to any responsible Hardware Jobber, Wholesaler or Retailer, one dozen Arcade Files, to become the property of the receiver or returned at our expense if the guarantee is not fully borne out in every particular.

There are new points worth knowing about Files, and the best information is condensed into a neat little pocket volume which we will send free to readers of "Hardware" while they last. Ask for "Practical Talks on File Work," and perhaps you would like to know about prices.

Water	Oxide of Hydrogen
White Precipitate	Ammoniated Mercury.
White Vitriol	Sulphate of Zinc.

To Obtain the Weight of Grindstones.

RULE: Square the diameter (in inches), multiply by thickness (in inches), then multiply by decimal .06363.

EXAMPLE: Find the weight of a stone 4 feet 6 inches diameter and 7 inches thick.

4 ft. 6 in.=54 inch; square of 54=2916; multiplied by 7=20412; multiplied by .06363=ANS., 1298.815 lbs., which is weight of stone. All Grindstones weighing *less* than 200 lbs. are sold at "cut-weight." This is the actual weight over the scales as they come from the lathe (less a fair amount for moisture), and is cut into each stone. All Grindstones weighing *over* 200 pounds are sold by measurement-weight only, rule for which is given.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished th dealer upon request, by the manufacturer quoted.

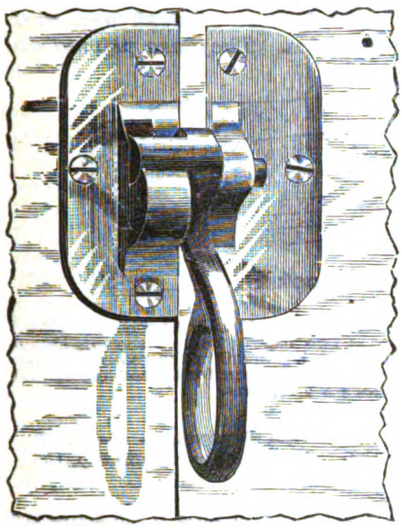
The Brownfield Buyer's System

Is a practical, economical and efficient method of preserving Catalogues, Price-Lists, Samples, and printed or written memoranda relative to your subjects of purchase or business in a convenient and accessible form for quick reference. It will interest you. Full particulars for the asking. Write to

THE FOLDING PAPER BOX CO., South Bend, Ind.

"A PROFITABLE MEDIUM TO ADVERTISERS."

Gilbert & Bennett Mfg. Co., Chicago and New York. [*Wire Goods*]: You have reason to be proud of HARDWARE's success both as a journal of interest and of usefulness to your readers, and as a profitable medium to the numerous advertisers. From the fact that our card has been steadily published in its columns from the first number, it must be concluded that we have found you a satisfactory medium.



"SHOULD MISS IT VERY MUCH."

Morley Bros., Saginaw, Mich. [*General Hardware*]: We receive HARDWARE every issue, and find it of such interest as to oblige us to look through its pages quite carefully, and note with considerable interest the items you publish. It is quite an aid to the writer in his branch of the business, and we wish to say, that we should miss your paper very much indeed, if we did not receive it. W. L. Sandford.

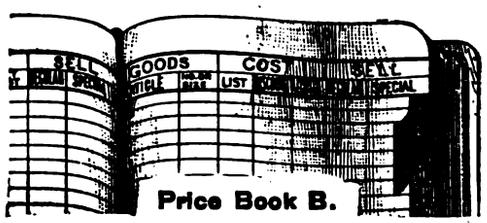
HARDWARE PRICE BOOKS.

Arranged by R. R. WILLIAMS, Hardware Editor of The Iron Age.

These Price Books are made in a variety of sizes and styles adapted to pocket, store or desk use, and are specially arranged to meet the requirements of the Hardware and Metal trades. They are printed on paper of superior quality and bound in grain seal leather.

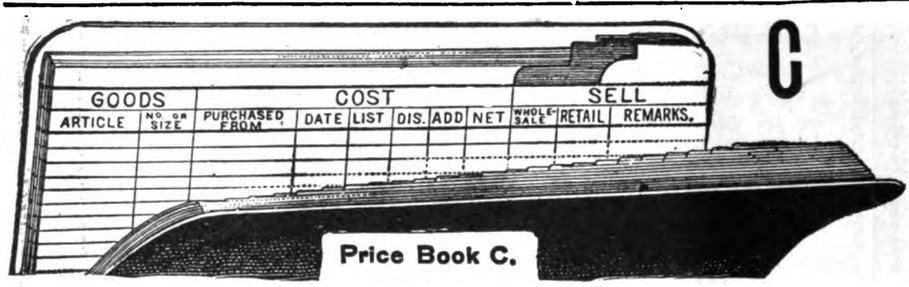


Price Book A.

Columns are provided for the name and number or size of goods, for noting from whom purchased, date of quotation or purchase, list and discount, and for entering freight expenses. Under the heading of selling prices, the regular and any special price or remarks in regard to the goods are given place. *Size of page, 4 x 7 inches.*

FOUR EDITIONS:

A, 200 pages,	$1.00	A 2, 400 pages,	$1.50
A F, 200 pages with flap,	1.25	A F 2, 400 pages with flap,	1.75



Price Book B.

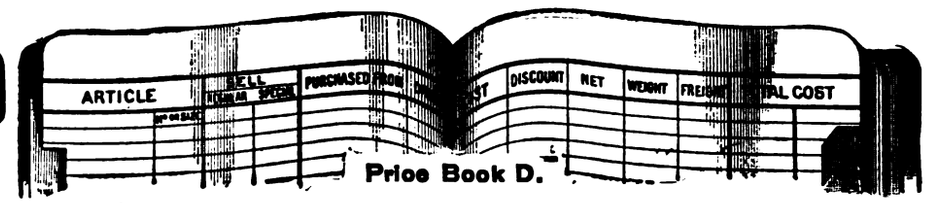
In this book each page is complete in itself, and the record of prices does not, as in Book A, run across two pages. Thus it accommodates a larger range of goods with much less detail in the record. By the use of familiar abbreviations is sufficiently large for the convenient and concise record of prices. *Page, 4 x 7 inches.*

FOUR EDITIONS:

B, 200 pages,	$1.00	B 2, 400 pages,	$1.50
B F, 200 pages with flap,	1.25	B F 2, 400 pages with flap,	1.75

Price Book C.

The headings in Book C run across the top, in a line parallel with the hinge. The details of weight and freight contained in Book A are omitted, and a single column headed "Add" given for the insertion of freight or other expenses. Under the selling prices space is left for the wholesale price, the retail price, and for remarks. *Page, 4½ x 7¾ inches.*



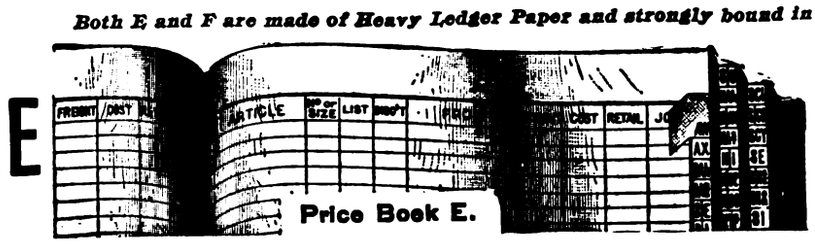
FOUR EDITIONS:

C, 200 pages,	$1.00
C F, 200 pages with flap,	1.25
C 2, 400 pages,	1.50
C F 2, 400 pages with flap,	1.75

Suitable for desk and store use, and for salesmen on the road. A number of pages at the back of the book are arranged for memoranda. *Page, 5¼ x 8 inches.*

FOUR EDITIONS:

D, 200 pages,	$2.00
D F, 200 pages with flap,	2.50
D 2, 400 pages,	3.00
D F 2, 400 pages with flap,	3.50



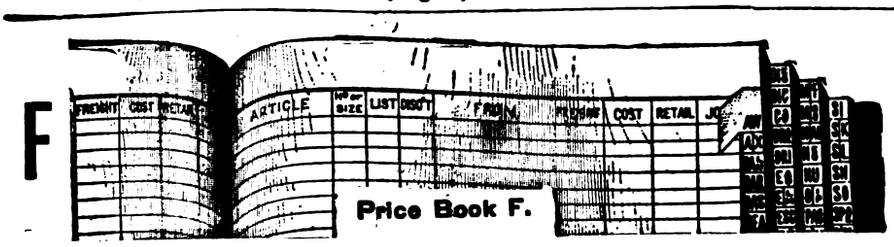
Price Book D.

MULTIPLE INDEX PRICE BOOKS.

A special feature of these books is the index, which is arranged with special reference to the classification of Hardware Goods, each index character giving the first two or three letters of the names of Hardware articles. There is an index character to every page, enabling immediate reference to any of the contents of the book. The ease and convenience with which the books can be used is indicated in the following examples, taken from Book F:

For Augers,	turn to AU	For Chisels,	turn to CHI	For Iron,	turn to IRO
" Parers, Apple	" PAP	" Cutlery,	" CUT	" Irons,	" IR'S

Both E and F are made of Heavy Ledger Paper and strongly bound in grain seal leather.



Price Book E.

AD GU SC
AN HA HAN SCR
AU HAN SCY
AW HAT SE
AX HI SHE

Fac Simile of Indexing.

Price Book E—350 pages, 7 x 10 inches, canvas tab indexing. Price, $5.00.

Price Book F.

AD DIE MF SI
AN DIP MO SK
AU DO NAI SL
AW DRE NE SN
AX DRI NU SO

Fac Simile of Indexing.

556 pages, 8¼ x 11 inches, black leather tab indexing with gilt lettering. Price, $7.50.

Note.—In Price Books E and F there is an Index Character to EVERY PAGE.

MADE OF THE FINEST Cold Rolled Steel and Brass. . . .

NEW YORK STAMPING CO.,

North Eleventh and Berry Streets,

Brooklyn, New York, U. S. A.

"Pennsylvania" Fruit Picker

This Cut almost speaks for itself—the device being so much like the human hand, shows at once the utility of the article.

AS A FRUIT PICKER IT HAS NO SUPERIOR.

It is made of Heavy Galvanized Wire, and Easily Adjusted to a Pole. It has been sold for several years, and the demand (as it is becoming known) is steadily increasing. The difficulty of detaching fruit and securing it unbruised is apparent to everyone so engaged. This overcomes the difficulty, and saves the finest fruit, which commands the highest prices. It will gather Apples, Peaches, Pears, Etc.

THE LOW PRICE AT WHICH IT IS SOLD

brings it within the reach of those who have but little fruit to gather as well as those who have large quantities.

Price per dozen, $3.50. *Liberal discount to the trade.*

WHY IS C. E. JENNINGS' NEW AUGER BIT No. 1½

THE BEST BIT FOR WOOD BORING IN THE WORLD?

Because: There are good bits made for **hard wood.** The L'Hommedieu Ship Bit is an excellent tool for this purpose, but it is not designed for fine cabinet work or soft wood. There are good Bits for Soft Wood, but fail when used in **hard wood** We have combined two **principles in one,** and think we have solved the problem of putting a bit on the market that is suitable for all around use. Prices furnished the Trade on application.

HARDWARE

The proper place to show the rising qualities of a man, is in the street car; that is where the sex will gladly admire his self-denial, even while they take his place.

The poet Markham may be all right about the "man with the hoe," in agricultural pursuits; but in the making of newspapers the "man with a Hoe" presses to the front with a circulation unknown to the early discoveries of Dr. Harvey.

Guatemala, it is understood, expresses a desire to be annexed to the United States. This is more revolutionary than usual. From the lively characteristics of Central American populations generally, we would probably find her a high ball hot tamala.

If the man who "didn't know it was loaded" and the fool janitor who lights a match as soon as he discovers the leak which fills the room with gas, would only achieve a "punishment that fits the crime," the world would know a *sub stratum* of justice worthy of a record.

A woman passenger when she enters a train has no preference as to a seat, until she secures one, and then—she wants to sit somewhere else. While a man, especially if he is a commuter, always has a preference and is unhappy if another man is enjoying the seat.

It's surprising what record crops the different sections of our fertile land may claim this year. That of cotton, will be unsurpassable; that of wheat, phenomenal; but for the silken tassel—the top notch of production, the whole country, beyond dispute, will "acknowledge the corn."

It is a matter of noteworthy significance that the exports of bicycles from the United States during the past two years, exceeded in value the total export of all kinds of agricultural implements; in fact, with the exception of iron and steel goods, bicycles head the list of manufactured articles.

Some men are incapable of small results; they do the most unexpected things in a large way, and our wonder is excited by the results. Such a man cannot even stop a cable car without apparently bursting a blood vessel or getting a clot of blood on the brain and exhibiting symptoms of heart failure.

The publishers of the *Cycle Age* have commenced issuing a publication devoted to the automobile under the name of the *Motor Age*. It is intended to fill that field acceptably, backed up by the necessary talent. It will be well illustrated, first class in every way, and be about half the present size of the *Cycle Age*.

The great fear possessed by most of the foreign countries to which we export our products, is that with the success we are achieving, the necessity will be forced upon them of becoming just such commercial hustlers as we are. There would then be no time for anything except work, and that contingency is far from being a welcome one.

The Sixth Annual Sportsmen's Show, given under the auspices of the National Sportsmen's Association, will open at Madison Square Garden, New York City, March 1, 1900, and continue for seventeen days. A number of new features and unique attractions are already being arranged and will be submitted to the public at an early date. The coming Sportsmen's Show will undoubtedly be the best that has yet been brought together, and will cover every branch of sport.

There was a time when Japan sent a tremor through the bicycle industry by an announcement that a bicycle of theirs at $12 would supplant our $100 variety. This was premature; we can get there ourselves to-day. We now intend getting square with the Orientals by making in Reading, Pa., Jinrickshas, in an old bicycle factory, which finds it a more profitable output than Wheels. They are made with wood bodies and with wheels constructed from steel tubing. The manufacturers expect to find a large sale for this odd vehicle, in other countries than Japan, having their eyes on South Africa, China and the Philippines.

William W. Supplee, recently returned from abroad, in the course of a very complimentary letter to HARDWARE relates the following: "During my visit to England an incident occurred while I was in Sheffield which may interest you. While on my way to call upon a firm with whom we do considerable business, and seated in a hansom nearing the establishment, I noticed a young man looking at me intently, and then he at once turned on his heel and returned in the direction from which he came, and I found he was at the gate at which I was to enter. He proved to be a son of the senior member of the firm, and soon after my arrival was introduced to me, when he stated he had recognized me sitting in the hansom from a picture which was published in your anniversary number of HARDWARE of April 10—all going to show how small the world is and how your journal reaches and is read by those on distant shores."

Andrew Corbin, of P. & F. Corbin, visited the Hardware Club recently, and while sitting at a table with Mr. Bishop enjoying a five-course luncheon, an old friend of his, a former "traveler," and whom he hadn't seen for fifteen years, made himself known to him. Mr. Corbin, recognizing him in a flash, wrestled with some twenty year old reminiscences and propounded the query: "Vat you peddles?" It was at least twenty years since he heard that story, and yet it was not relegated to the limbo of forgetfulness. It originated in this way: A well-known commercial traveler, struggling with a grip in each hand,—by no means a light burden,—had mounted the hill to Sing Sing village, and when arriving just east of Barlow & Sons' Hardware store, met a Jew peddler with a square black box adorning his breast on the way to the depot. Fancying the drummer with his grip was one of his perigrinating kith and kidney, a full beard adding to the illusion, the perapatetic vendor asked: "Vot you peddles?"

Catching the humor of his error the drummer replied solemnly "spectacles."

"Oh, ho!" said Isaac of York," you don't find some pizziness here, I vas all the day by dis place, ah ha; oh, ho!" How George Barlow's father laughed a few minutes later, when the circumstance was related to him. But what a memory Andrew Corbin has!

W. C. BRUNDAGE, - - Business Manager.
HENRY HOPKINS, - - Editor.

The Circulation of "Hardware" is Larger Than That of Any Other Paper in the United States Devoted to the Hardware Trade.

Editorial Trade Review.

Constantly increasing activity prevails on every hand. Dealers, remembering the sluggish character of trade previous to this year, wonder where all the business comes from. The markets in every direction show increasing strength; with raw material scarce, from pig iron to the products finisned for the use of the manufacturer. Deliveries uncertain and infrequent cause an anxiety under the pressure for goods, which the winter stock demands in large volume, owing to the length of the season and the scope and variety of stocks necessary for its successful issue. The jobbers are working hard to get supplies daily demanded by their retail customers, and while felicitating themselves on having booked orders earlier thanusual in any past season, are finding how difficult it is to fill their shelves in the face of so many obstacles. The retailers, scenting the battle from afar off, are clamoring for an early delivery on goods usually relegated to a period later by a month or two. It may be possible that another month may see things in a more progressive condition, in which case, peace and harmony may walk beside the hurry and bustle of a business acknowledged on every hand as unprecedented. There is no visible reason why prices not already stiffened should not follow the trend of the more ambitious markets, which are already up-to-date or even a month ahead. The disposition noticed at the outset of this advancing movement, to accept orders at prices based on cost of material not yet purchased by the manufacturer, is no longer a factor in the channels of production. Over zealous salesmen, backed by willing agents, have filled many order books with good orders, so unproductive of profit, that the manufacturer has been forced to even up his earnings by filling later orders complete, while the earlier ones still have the goods "coming to them." This, while an undesirable state of affairs, is invariably the case when speculation governs the increased quantity required over previous demands.

One of the most encouraging features sustaining the manufacturers from any fear of a slump in the immediate future, is the fact that the export outlet is being established with each passing month on a firmer basis than ever before. Advanced quotations on leading lines handled for the export trade have usually in the past shut off this large and desirable outlet for our wares; but our producers have learned wisdom from past experience and by moderately advancing their rates to foreign buyers, have kept the trade in line and still control many markets abroad. This favorable condition of affairs will be maintained as long as the present prosperous state of trade governs the productive capacity of foreign makers, to the extent of keeping them from being active competitors for the business.

State fairs in many States have made a rushing condition of affairs in the cities thus favored. The streets are filled with buyers interested in such exhibitions, and incited to attend by low fares and the chance of purchasing their Fall stocks while inspecting the latest line of samples. The visiting farmers find time for purchasing,—or at least making arrangements to do so—the additional farm machinery which good crops at good figures is apt to encourage.

Sporting goods, guns, and ammunition and kindred lines, are in better demand as the season advances, and local stocks are in better shape than ever to form an incentive to purchase

All over the country, reports show an increased desire to build on the part of the people; demands for better houses, more enjoyable surroundings, and hoped-for comforts, keep the trade in builders' Hardware in an active state from Moosehead Lake to the Golden Gate; the many advances which this line of goods have known since December last, having had anything but a deterring influence; for when a tenant is waiting to occupy the house when completed, the cost of the Hardware does not prohibit its purchase.

This will be the first season when the dealer has but little fear of his stock being too large at inventory taking, the season promising to be a long one, with a purchasing power making itself manifest in every field of buying.

The Opening of the National Export Exposition.

The opening of the National Export Exposition in Philadelphia on the 14th inst. marks an epoch in our industrial development which should make an American proud of his country and her mechanical resources.

The extended markets comprised within our own boundaries, as great as they undoubtedly are, no longer limit the industrial ambition of our hustling countrymen. Notwithstanding each succeeding year found our population increasing in demands that have strained to the utmost the facilities for manufacturing in existence less than a decade ago, we have met the demand by increasing products that now seek other ports to which a reorganized merchant marine carries our cargoes.

Never in the history of our manufactures have we been so well equipped for augmented exports, so thoroughly organized in the use of every economic advantage, that other nations look to us for profitable imports, based on quotations for the products of our skilled labor unobtainable elsewhere. Our manufacturers are to-day fully alive to the manifest advantage of having the whole world furnish a market. Already does the name of industrial America demand recognition from nations who but a few short years back were our most formidable competitors for the trade of the world.

We have too long been looked upon as an agricultural country, the granary of the world; where shortages in the crops of international significance could be readily supplied, in exchange for manufactures, for

Digitized by Google

the distribution of which no fostering government enabled us to compete. Now all is changed; our exports of manufactures exceed in value those of agricultural products or any other commodity. Our National Export Exposition in Philadelphia, and its accompanying International Congress of Foreign Merchants which commences October 10th, will so enlighten the commercialists of the world as to our great and unsurpassable resources of a mechanical character that no large enterprise of the future, no controlling movement governing the distribution of mechanical wealth can again take place in any part of the universe without the United States being asked to compete, and the decision will be withheld until we are heard from.

We have never had so grand an opportunity to show the world what our perfect factories are able to produce. We have never known a time of such overpowering prosperity which forms the background to this great and world-conquering energy. We stand as the acknowledged industrial leader in this procession of the world's greatest economists. Foreign countries will bring their most intelligent minds to participate in the congress, and offer homage at the shrine of industrial activity which is to-day our greatest boast. The projectors of the Exposition intend by this alone to show other industrial countries that we are worthy of this world-won homage.

No time was ever so propitious as the present to convince the older manufacturing nations that we are in everything that pertains to mechanics and commercial progression, worthy of their industrial emulation; and that we are skilled artists in those branches of industry in which Great Britain and Germany have for centuries led the way and claimed pre-eminence. The manufacturers and merchants who have given this Exposition their co-operation with a hearty approval of its objects, have reason to rejoice in this triumph of American progress in the commercial and mechanical arts that now dominate the world.

New York's Advantages For Young Men.

A very large number of young men are handicapped in business and social life by deficient education. For these there are excellent opportunities presented in the evening classes of the Young Men's Christian Association. Here they may get an education at the same time they are earning a living.

At the West Side Branch, No. 318 West Fifty-Seventh Street, New York, there are elementary and advanced commercial courses, and language and scientific subjects so arranged that a young man can take one or more studies at a time and devote to study as many or as few evenings as he desires. The opening exercises of these classes will be held at 8 P. M., Monday, October 2d., when Mr. J. Armour Galloway will sing, and Dr. M. Woolsey Stryker, president of Hamilton College, will make the address of the evening.

In addition to the classes there are reading and current topic clubs, literary society, a library of over 42,000 volumes and many other attractions for which a fee of five dollars per year is charged. A forty-page illustrated prospectus will be sent free to anyone addressing the secretary at No. 318 West Fifty-Seventh Street.

American Exhibits in China.

The National Manufacturers' Association has purchased in Shanghai, China, a building containing 40,000 square feet of floor room, and as soon as practicable a permanent exhibition will be established there. One hundred firms have asked for space, and all except two have signed contracts.

Among the big firms to be represented are the Carnegie Steel Company, the Baldwin Locomotive Works of Philadelphia and the Phœnix Bridge Company. Exhibits from the National Export Exhibition, which has opened in Philadelphia, will be sent to China after the close of the exhibition.

The Shanghai exhibition will be the beginning of a competition with England and Germany by this country for the China trade. It will be conducted on the plan of the commercial museums of Philadelphia.

Death of Oakes A Ames.

Oakes Angier Ames, president of the corporation of Oliver Ames & Sons, North Easton, Mass, died at that place September 19th from heart failure.

Oakes Angier Ames was the eldest son of Oliver Ames, who built the Pacific Railroad. He was born in North Easton, Mass., on April 15, 1829, and at his death was the president of the corporation of Oliver Ames & Sons, whose extensive shovel manufactory was established in a modest way early in the century.

Mr. Ames was educated in neighboring academies, and, in accordance with family tradition, entered the shovel works at the age of eighteen, and by actual practice learned the art of making shovels and other farming tools. In 1863 he became a partner, and in 1877 the president of the corporation. He was always devoted to local interests. In 1868 the firm built an expensive schoolhouse and gave it to the town. The Oakes Memorial Hall, in which the town library is housed, was built by Mr. Ames and his brother at the cost of $60,000, and given to the town in 1881. He never accepted a public office, though many were offered him. He was president of the North Easton Savings Bank, vice-president of the Easton National Bank; a director of the Lincoln National Bank of Boston and the Kingsley Iron Machine Co., and a trustee of the Taunton Lunatic Hospital.

His family consists of two sons, Hobart and Winthrop, and two daughters, Mrs. Richard H. Harte of Philadelphia, and Miss Katherine Ames.

New Members of the Hardware Club.

At a recent meeting of the board of governors of the Hardware Club, of New York, the following gentlemen were unanimously elected to membership in the Club:

Albert Frank, No. 71 Broadway.
Joshua A. Hatfield, No. 100 Broadway.
A. W. Stanley, No. 120 Liberty Street.
Warren C. Brundage, No 143 Chambers Street.
William W. Borman, No. 120 Liberty Street.
Charles H. Jones, No. 150 Nassau Street.
Louis A. Tranberg, No. 85 Cliff Street.
George E. Chatillon, No. 85 Cliff Street.
Adrian M. Knox, Tribune Building.
Walter H. Merrall, No. 130 Chambers Street.
Charles F. Brooker, Ansonia, Conn.

It is said that automobile vehicles are to be used by the Pittsburg Express Co. in connection with its trolley express cars. This company will do business on all the traction lines in the vicinity of Pittsburg. It expects to operate eleven baggage cars and a large number of automobile delivery wagons. The baggage cars will have six-foot sliding doors on either side. The baggage can be taken up at any point along the line.—*Scientific American.*

The sword of a naval officer is one of the most peaceful and useless tools on board of a ship. Orders cannot be given with it and it cannot reach the enemy that is being shelled.—*Exchange.*

Export Notes.

Cooper & McKee, of Brooklyn, will ship at once a large number of refrigerators to Havana.

The Whitman & Barnes Mfg. Co , of Akron, O., will ship a big lot of its specialties to Hamburg.

The Enterprise Mfg. Co., of Philadelphia, are about to consign some 200 cases of meat choppers to Paris.

The American Tool Works, of Cincinnati, recently exported six cases of machine tools to St. Petersburg.

The Sprague Electric Co., of this city, will shortly forward several cases of electrical machinery to London.

The Iron Clad Mfg. Co., of this city, is about to export its specialties to Alexandre Katanakis, of Smyrna, Turkey.

The American Tool Works, of Cincinnati, O., intend exporting several cases of machine tools to De Fries & Co., of Berlin.

The Iowa Farming Tool Co., of Fort Madison, Iowa, are shipping quantities of forks, hoes, rakes, etc., and the like to Honolulu.

The Oster Mfg. Co., of Cleveland, O., have recently exported forty-five cases containing adjustable die stocks to St. Petersburg.

F. E. Myers & Bro., of Ashland, O., are shipping pumps to Odessa. The orders are secured through the William C. Barker Co., of this city.

The National Cash Register Co., of Dayton, reports heavily increasing shipments of cash registers to European countries, especially to Germany.

The Ohio Machine Tool Co., of Kenton, O., have recently shipped several cases of tools to German ports. The order was placed through Markt & Co., Limited, of this city.

International Commercial Congress.

That the International Commercial Congress, which is to assemble in the auditorium of the National Export Exposition on October 10th, will be the greatest industrial congress ever held in the history of the world, is now beyond all doubt. It will be an important and spectacular event, and is believed will mark an epoch in the history of international trade.

More than forty of the prominent governments of the earth have named official envoys, and in addition there will be delegates from more than two hundred chambers of commerce and other trade bodies in all countries. It is expected that President McKinley will make the opening address, and that he will be followed by General Diaz, the President of Mexico.

The ceremonies of the opening are destined to be of a most beautiful and impressive character. Besides the notables from nearly every nation who will attend, the entire diplomatic corps at Washington are to be present in the full official regalia of their exalted positions. The governors of many States, members of the cabinet, congressmen, mayors of cities, and hundreds of other prominent personages are expected to be present.

The Light in a Bottle.

An old farmer who had been to New York, was describing to his friends the splendor of the hotel he stayed at. Everything was perfect," said he, "with the exception of one thing—they kept the light burning all night in my bedroom—a thing I ain't used to." "Well," said one of them, "why didn't you blow it out?" "Blow it out," said he farmer, "how could I? The blamed thing was inside bottle.—*Exchange.*

Our Rapid Industrial Advancement.

The rapid growth in exports of manufactures of iron and steel, and the simultaneous decrease in the importation of manufactures of iron and steel seem to have been coincidental with a similar growth in the production of pig iron in the United States. A statement just prepared by the Treasury Bureau of Statistics, places in parallel columns the figures showing the growth in the production of pig iron in the United States from 1880 to 1898 and the imports and exports of manufactures of iron and steel in the corresponding years. This shows that the production of pig iron in the United States has grown from 3,835,191 tons in 1880 to 11,773,934 tons in 1898, and Mr. J. Stephens Jeans, secretary of the British Iron Trade Association, estimates the pig iron production in 1899 at 14,000,000 tons. Meantime the export of manufactures of iron and steel has grown from $14,716,524 in the fiscal year 1880 to $93,715,951 in the fiscal year 1899, while the importation of manufactures of iron and steel has fallen from $71,266,699 in 1880 to $12,098,239 in 1899.

The table is as follows:

Year ending June 30—	Production of pig iron. Tons.	Iron and steel Imports. Dollars.	Domestic Exports. Dollars.
1880	3,835,191	71,266,699	14,716,524
1881	4,144 254	60,604,477	16,608,767
1882	4,623,323	67,976,897	20,748,806
1883	4,595,511	58 495,246	22,826,528
1884	4 097,869	40,147,053	21,909,881
1885	4,041,526	33,610,093	16,592,155
1886	5,683,329	37,534,078	15,745,569
1887	6,417,148	49.203,164	15,958,502
1888	6,489,738	48,992 757	17 763,034
1889	7,603,642	42 377,793	21,156,077
1890	9.202.703	41,679,501	25,542,208
1891	8,279,870	53,544,372	28,909,614
1892	9,157,000	28 928,103	28,800,930
1893	7,124,502	34,937,974	30,106,482
1894	6,657,388	20 925,769	29,220,264
1895	9,446,308	23,048 515	32.000,080
1896	8,623.127	25.338,103	41,160,877
1897	9,652,680	16,094,557	57,497,872
1898	11,773,934	12,626,431	70,406,885
1899	*14,000 000	12,098,239	93,715,951

*Estimated.

That the growth in the production of pig iron and in iron and steel manufactures generally, is likely to continue for the present seems to be the consensus of opinion both in the United States and elsewhere. The *Railway and Engineering Review* discussing the phenomenal increase in iron manufacturing in the United States, which shows an increase of thirty-three per cent. in the exportation of iron and steel during the past year, says that "the expansion of the iron and steel-making capacity and projection of new mills and furnaces announced in the trade journals generally, shows that the year 1900 will be one of phenomenal activity and expansion. There are no evidences that the demand is being overtaken by the supply. The fact is known that every furnace and mill owner has a bunch of promises to keep which will take months to fill." Secretary Jeans of the *British Iron Trade Journal* is also quoted as expressing the belief that the United States will in 1899 produce 14,000,000 tons of pig iron, as against 11,774,000 tons last year, and that she will produce nearly two-fifths of the pig iron of the world.

The following is Mr. Jeans' estimate of the pig iron production of the principal iron-making countries of the world for 1899, compared with 1898. It will be seen by this that the United States is now the largest producer of pig iron in the world, being about forty per cent. in excess of the United Kingdom:

Country.	1898 Tons.	1899 Tons.
United States	11,774,000	14,000,000
Germany	7,215,000	8,250,000
United Kingdom	8,700,000	9,500,000
France	2,534,000	2,700,000
Belgium	979,000	1,200,000
Sweden	520,000	550,000
Austria	888,000	950,000
Total	32,610,000	37,150,000

"I'm so dry, my teeth are on an edge," remarked the buzz-saw. "Well," chuckled the mechanic, "why don't yon take something off-hand?" "Don't care if I do," returned the buzz-saw, and then it took "three fingers."

HARDWARE TOPICS BY THE WAY.

By selling Parry wheels we parry all competition, is a late ad. bloom.

What of the rubber-tired roller skate! Will it assume the proportions of a national indoor sport this winter?

Handle any article which is a time-saver and money-maker. But be sure the claims are not fraudulent.

Reel up your fish line, and reel off your clothes line, is the autumnal warning to the useful husband, by the Burr-Fesler Co.

If prices advance, advance with them. Rather make the consumer pay for it rather than take it out of the earnings of the producers.

A German catalogue acknowledges that America produces the easiest, and yet the most practicable and durable wheelbarrows in the world.

A novel stove pattern came to my notice. It's in the form of a bust armor. That's bric a-brac and cast iron antiquity with modern usefulness!

Joseph Dixon came into the Hardware world, veni, vidi, dixi. A commercial Cæsar of his making will not fall an easy victim to a commercial whale.

The guerilla burglar and hold-up warfare now waging in Uncle Sam's domain, will probably distract the public's attention from the Philippines. Replenish your shooting stock.

A picturesque negro parades the streets of a Western town, with a huge razor in his hand and a strop tied to his cartridge belt. The belt bears the legend: "Shall I strap you?" And the negro looks it.

They now say aluminum will soon compete with the galvanized iron hoop and the hoop in general. Let the Germans evolve their artificial coal; we can beat them with aluminum if we only keep at it.

The carpet sweeper is gradually superseding the lawn mower and sprinkler. Too bad we have no automatic carpet sweeper! Our autocratic servants might then condescend to leave us without French leave.

Smokeless powder won't do any good in the Philippines as long as the Filipinos are out of range. And thus the artful dodger section of the Hispano-American war "clowns" the finale of the 19th century.

The motto, Tower of strength and Lyon of tenacity, has built up the great enterprise of Tower & Lyon, of New York. "Whosoever knows himself, and may fathom the destiny of his title aright, shall become a king among men."

Another dealer of material ideas has placed mechanical apple and fruit parers in his window, "which operate free of charge for all who will look or apply." Considering the magnitude of the fruit canning industry, this exhibit is certainly timely.

A specialist of enameled ware has "rigged up" a kitchen in his store, stocked with the product of the enameled tin, copper and metal ware industry up to date. You may imagine it's modern all round. And it draws housewives as sweets draw flies.

A specialist of Babbitt metals gives exhibitions of the stereolino-electrotype art in his window. His catalogue and printing matter are thus prepared by an expert. The public are interested in these evolutions and the man of ideas is benefiting by it.

New firm, new life, is but a quasi-American axiom. If it were old firm, new life, or better, new life, new firm, the malcontents would be fewer, and there would be fewer trusts and combinations; for, trust means essentially a combination of the shattered fortunes of decrepit individualism.

We are inseparably glued to four of the leading distributing markets in the country. We sandpapered our way in easy stages until we got there, and once there we flint-papered, garnetpapered, and emerypapered until we stayed there. Since there, we feel ourselves safe in our hair felting lining. This is the way Baeder, Adamson & Co. put it.

It's envious shylockism that makes the trouble now. The selfish greed of a few self-chosen rich who would rather swallow up all the earth than have their "inferiors" come forth in a new suit of clothes, is putting this calamitous phase upon our revitalized being. Spit out the scorners and go about your business. While you sow and harvest, they will die of dry rot.

Cleveland, by exhibiting such idiotic sentiments will only succeed in compassing her future. The country at large has already "got its fill" of the railway strike, hell and brimstone campaign. The best thing Cleveland can do is to think twice, and then "sleep over it," before she speaks. *Si tacuisses, philosophus mansisses*, is as true to-day as when Rome was life.

The modern line of household and kitchen utensils, is certainly not responsible for marriage being a failure. Such luxurious outfits, at poor man's prices, no European housewife enjoys. But it seems the more we aid woman in her household task, the more extortionate become her demands. "Effeminacy and degeneracy are bedfellows. Luxurious surroundings spoil the woman for the home." The Roman philosopher who spoke these words is a prophet to-day.

The Paris exposition in 1900 will be the collective testimonial of natural and artificial achievements during twenty centuries of life. Who is the child or fool to belittle such enterprise! Is the world to do penance in sackcloth and ashes simply because a lot of military degenerates have brought mother France to her knees! If General Miles and a number of confidants should be discovered in compromising situations with England or other military powers, would you blame the American people for it?

Drought and frost are the cries now. The American farmer, limited, is never satisfied. He would kick were his apple trees to bear golden nuggets. Yet, all these fake reports will avail nothing against the advance and full rehabilitation of prosperity. The farmer must simply be convinced against his will. Our missionaries, the commercial travelers, and advertisements, will have a comparatively easy task to open the eyes of the doubting Thomases to the opportunities sown broadcast by the bountiful harvest queen.

Door mats are at a discount. A Frenchman habilitated at Cleveland now uses the French flag as a door mat, and advises everyone to do likewise. He also calls all Frenchmen poltroons. The hysterical microbe exploded by this blatherskite has caused great havoc for Americans. This man is not only a traitor to his native country, but he has belittled America in the eyes of the sane world. A lamppost funeral would be his proper measure of justice whenever he sets his traitorous foot upon the innocent but blasphemed soil of France, the fountain spring of his own being.

Too busy to pay any but fleeting attention to the Chicago trust conference, is the slogan of our merchants and manufacturers, who have formed a trust of their perseverance and industrial acumen. Collectiveness of one's own resources based on individual pride is not a dead issue. No amount of argument will kill the trust of imperialistic parentage. Natural conditions only can evolve its downfall. The babel of advice and reproof now loading, now discharging its cannon mouth at Chicago, is only love and labor lost. The American corporate trust, founded upon the debris of demoralized individualism, internecine strife, cutthroatism, and last, but not least, laboricratic tyranny and resultant capitalistic retaliation will stand until labor, the foster father of these industrial, commercial, and financial empires within a republic, has come to equitable terms with capital—its own product and traitorous child. Deductively, the parent is as much to blame as the child, and probably more. The sins of the parents shall be visited upon their children, and in the present-day monopoly we have examples by the wholesale. Ergo, the trust is manifestly the outgrowth of the unnatural conditions thus fostered in contradistinction of the creative, or natural, conditions which decreed every American to be monarch of all he surveyed.

The hysterical demonstrations against the French republic anent the Dreyfus fiasco, by Americans are a lamentable commentary upon the morbid sentimentality of the era. We simply throw Monroe doctrine and constitutional injunctions to the wind, in order to give vent to our artificial passions and please a minority of hyperprejudicial people. State and religion are fundamentally dissolved in America. We must not recognize the Jew on account of his faith when democratic principles of international purport come to be considered. We are all Jews; the Bible teaches us so, but we are not all Christians. Therefore, the testamental Jew has lost his national individuality in the brotherhood of the nations peopling the earth. We must not prejudge nor ventilate our sympathies to the extent of becoming offensive. Let France work out her own destiny. We cannot stop the decrees of fate that destroyed the Roman and Grecian empires; neither can we prohibit fate from resurrecting those empires; for history to repeat itself has always been the policy of providence within the historic ken of man. America can only then become great and stable when she has learned to mind her own business. We are now passing through the primal evolutions of earthly achievements based upon the memories and precepts of the old world. Ours is the land of final redemption. Why then, should we attempt to reckon without our host? JOHN B. RINDFLEISCH.

Cleveland, O., Sept., 1899.

New England Hardware Dealers' Association.

The first of the Fall meetings of the above association was held at the United States Hotel, Boston, on the evening of September 13th. The gathering was largely attended, and the all-pervading spirit of good business and fair profits sheds a bright light on the faces surrounding the banquet board; pessimism and despondency certainly had no place there.

Dinner was served at 5.15 P. M., after the usual reception in the hotel parlors. Grace was said by Myron W. Tarbox, of the Boston & Lockport Block Co., and a pleasant hour and a half was spent discussing good food and good business. After coffee, President Parlin called the meeting to order, and in welcoming the members after the summer interval, alluded briefly to the improved conditions of trade prevailing since their last meeting. G. E. Russell, president of the Springfield Hardware Social Club, and H. L. Russell, secretary of the same, had been expected to address the meeting, but were compelled to write excusing themselves at the last moment, owing to a meeting of their own association; they however announced their intention of being present at some meeting in the near future, and asked that the Springfield Club be admitted as members of the New England Hardware Dealers Association.

The president also announced that the October meeting would be addressed by Prof. Cohoe, of Harvard University, on the Chemical Properties of Iron and Steel. The questions for discussion at present meeting were: "Price Books" and "Price Cards."

After the reading and approval of the minutes, a vote of thanks was passed to Chas. Clark Adams for his address at the last meeting.

Ex-president Loomis, of Providence, suggested that those members who had tried to form local associations in their own towns, be asked to report progress. Personally he found that the Providence association were forced to contend with more or less competition from the lumber dealers, who of course get the first chance at the carpenters and builders.

Mr. Tookey, of Chelsea, stated that an association had been formed in that city, and had resulted in getting much better prices; he found that they were well able to meet department store competition, and said he made a practice of cutting out the weekly advertisements of this class and keeping them for reference as to prices.

Mr. Barber, of Chandler & Barber, said a meeting had been held some time since to discuss the advisability of forming a local Boston association, but that no progress had been made.

Mr. Hunter, of the J. B. Hunter Co., said he was positive that such an association could be formed, and would prove very beneficial; he considered the present time most opportune for such action, as the market was very strong. Referring to the custom of retailers calling on manufacturers to figure on large contracts, he discouraged the idea, as he considered that the retailer who was incompetent to do this work did not deserve the business.

A. H. Decatur, of Baldwin, Robbins & Co., was next introduced, and spoke at some length on the importance of a good system of pricing and marking goods; he illustrated his ideas with samples of price books used by his firm, and explained the system which they had found most advantageous. Mr. Decatur has proved himself a many sided man in the Hardware business, having filled every responsible position from traveling salesman to business manager, and his varied experience well qualified him to speak on this subject. He pointed out the importance of a thorough system in bookkeeping, and quoted as an example one instance personally known to him, of a Hardwareman's success, which was due almost entirely to the fact that when the day's work was over, this man knew absolutely the amount of his sales, and his profits. His remarks were listened to with great attention, and at the close of the meeting the members exhibited an absorbing interest in the various styles of price books submitted for their inspection.

The business of the evening was enlivened very much by the musical program furnished by Messrs. Von Buskirk and Mansfield.

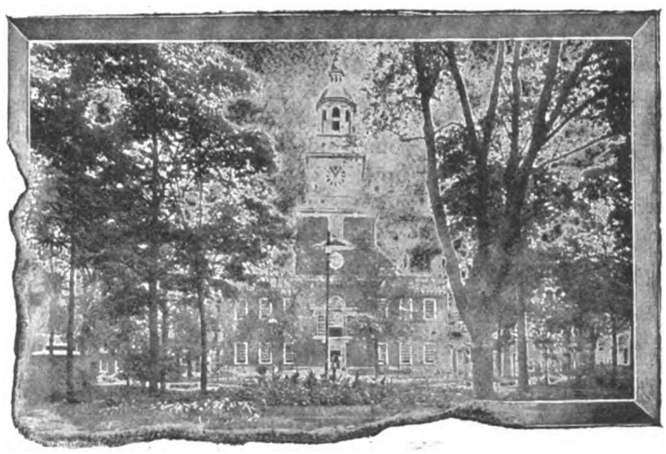
OPENING OF THE NATIONAL EXPORT EXPOSITION.

The opening of the National Export Exposition in Philadelphia on Thursday, September 14th, under the auspices of the Philadelphia Museum and the Franklin Institute, proved to be a notable and inspiring occasion. It is the first National Exposition of the manufacturers of the United States for the advancement of American manufacture and the extension of export trade.

The opening exercises were held in the magnificent auditorium which forms a part of the main building of the Exposition. This auditorium has a seating capacity of nearly 6000, but it was all too small for the accommodation of the enormous crowds which gathered to witness the opening ceremonies.



GROUP OVER MAIN ENTRANCE OF MAIN BUILDING, NATIONAL EXPORT EXPOSITION.

The main entrance of the building on South Street, leads to the main building of the Exposition through a wide and beautiful esplanade, with many green swards and a profusion of evergreen decoration on the landscape. The crowd passed through this grand avenue of approach, which is lined on either side by a succession of striking buildings of peculiar and fantastic architecture, in which the lighter amusements of the Exposition, the diversions, so to speak, of the show, are to be seen and enjoyed. These structures comprise a group of buildings in which are gathered the inhabitants of a Chinese village of 500 persons. Near this is to be seen an Oriental theatre, coffee house and smoking room, in front of which one will see the curious dancers and performers of the theatre gazing at the passing throngs, no doubt as funny a sight to them as they to the first day visitor to the Exposition. The busy preparations for the camps for the holding of Navajo and Moqui tribes of Mexican Indians were also visible from the esplanade, affording an interesting picture of aboriginal life.

The United States Marine Band of seventy-two pieces, in the full glory of their gorgeous gold and red, had the honor to do the first thing in connection with the opening of the Exposition. As leader Santelman appeared, stick in hand, he was received with vociferous applause, which was almost immediately drowned by the opening strains of the "Jubel Overture." The Marine Band's overture was followed by prayer, and then Professor Rosewig's mighty chorus of 600 trained singers burst into the patriotic melody of "America," in which the audience with difficulty refrained from joining. In the absence of President P. A. B. Widener, who is detained in the North, the first vice-president, Mr. W. W. Foulkrod, opened the Exposition in an address explaining its scope and referring to the expected importance of its results. He then formally, on behalf of the Exposition management, turned the enterprise over to the Governor of the State of Pennsylvania.

Vice-President Foulkrod's address was followed by a selection from the "Creation," "The Heavens are Telling," by Professor Rosewig's singers, which was followed by an address by Director-General W. P. Wilson, who gave an interesting account of the enterprise, its conception, its plans, its purposes and its possibilities, showing the immense advantages of such an exhibit to American trade and American exports, and explaining with much interesting detail what was expected to be accomplished and how it was to be done. Upon the conclusion of the Director-General's remarks, the Governor was introduced. He referred to the timeliness of such an exhibition, at a period when the American ideas of liberty and humanity, as well as of trade and commercial reciprocity were being carried into every clime and at a period when the American Government was holding sovereign sway in lands scattered all over the world. Although he was here to represent the Commonwealth and give its heartiest endorsement to the Exposition, the fact was dwelt upon that this

INDFPENDENCE HALL.

is not a sectional enterprise, not an exhibition of the city and for the city, or for the State merely, not of the North or of the South, nor of the East or the West of the country, but it represents in a peculiar way, the material trade and commercial interests of the whole country.

More music preceded the address by the Mayor of Philadelphia, Mr. Ashbridge, to whom the Governor transmitted the custody of the exposition, on behalf of the State and the management of the enterprise. The Mayor's speech was appropriately followed by a chorus, "Unfold Ye Portals," at the conclusion of which the orator of the occasion, Hon. W. P. Hepburn, chairman of the Commit-

Digitized by Google

tee of the Inter-State Commerce of the House of Representatives, was introduced. His address was a masterly presentation from the standpoint of a statesman who has had the opportunity and possesses the ability to intelligently study the subject of the influence of American commerce and American manufactures and the growth of American methods upon the current history of the world.

Archbishop Ryan, at the conclusion of a number by the United States Marine Band and the reception of a telegram from President McKinley, declaring the participation of the United States in the Exposition, dismissed the audience with a benediction. Simultaneously the machinery was set in motion by the President of the United States touching an electric button in the White House. The great throng assisted by the United States Marine Band, Professor Rosewig and the Grand organ, joined in the "Star Spangled Banner," after which the buildings and exhibits were inspected by the guests and by the crowds that participated in the opening exercises.

To convey a proper idea of the comprehensiveness of American manufactured goods, we present herewith a partial list of names of those in the various branches of the Hardware business and analogous lines, who have been allowed space in their respective classes.

HARDWARE, EDGE TOOLS, CUTLERY, ETC.

North Bros. Mfg. Co., Philadelphia, Pa., Mechanics' Tools and Household Hardware.

Joseph Dixon Crucible Co., Jersey City, N. J., Crucibles, Pencils, etc.

Reading Hardware Co., Reading, Pa., Builders' Hardware.

Chadborn & Coldwell Mfg. Co., Newburgh, N. Y., Lawn Mowers.

National Enameling & Stamping Co., New York, Tinned and Enameled Ware.

Van Wagoner & Williams Hardware Co., New York, hinges, Vises and Anvils.

Verona Tool Works, Pittsburg, Pa., Track, Mining and Lumber Tools.

Bullis Ball Gear Co., Rochester, N. Y., Ball Gears, Bicycles, Etc.

The Griswold Mfg. Co., Erie, Pa., Aluminum Ware.

Rochester Stamping Works, Rochester, N. Y., Nickel-Plated House Furnishing Goods.

Eagle Lock Co., Terryville, Conn., Locks and Hardware.

Landers, Frary & Clark, New Britain, Conn., Office Space.

Bevin Bros. Mfg. Co., East Hampton, Conn., Bells.

The Hasker & Mareuse Mfg. Co., Richmond, Va., Tin Boxes, Tags, etc.

Bommer Bros., No. 257-271 Classon Avenue, Brooklyn, N. Y., Spring Hinges.

Ruffner & Son, No. 3125 Bowman Street, Philadelphia, Pa., Machinery, Hardware, etc.

Frazer & Jones Co., Syracuse, N. Y., Juvenile Bicycles, Saddlery Hardware and Saddlery Leather Goods.

Covert Mfg. Co., West Troy, N. Y., Saddlery Hardware Specialties.

A. W. Straub & Co., Philadelphia, Pa., Grinding Mills.

The Ebel Co., Canton, Ohio, Saddlery Hardware.

Sheble & Klemm, Philadelphia, Pa., Hand, Farm and Garden Tools, Forks, Rakes, Hoes, etc.

Miller Lock Co., Philadelphia, Pa., Padlocks, Latch Locks, Keyless Locks, etc.

American Saw Co., Trenton, N. J., Saws, Wrenches and Forgings.

P. J. Conroy, Philadelphia, Pa., Locks, Hinges and Faucets, Refrigerator Fasteners, etc.

H. B. Underwood & Co., Philadelphia, Pa., Special Tools for Railway Repair Shops,

Coates Clipper Mfg. Co., Worcester, Mass., Clipping Machines.

Hall & Carpenter, Philadelphia, Pa., Fryers, Broilers, Egg Beaters and Specialties in Kitchen Utensils.

The Iowa Farming Tool Co., Fort Madison, Iowa, Forks, Hoes, Garden Rakes, etc.

Fisher & Norris, Trenton, N. J., Blacksmith and Machinist Tools.

Crescent Steel Co., Pittsburg, Pa., Tools and Articles made of Crescent Steel.

Heinisch's Sons Co., Newark, N. J., Shears, Scissors, Trimmers and Snips.

Wilkinson Shear Co., Reading Pa., Sheep, Grass, Horse, Hedge, Pruning, etc. Shears.

T. Rowland's Sons, Cheltenham, Pa., Shovels, Spades and Scoops.

Supplee Hardware Co., Philadelphia, Pa., Lawn Mowers.

John Pfeifer & Co., Ltd., Philadelphia, Pa., Spades, Shovels, Scoops.

Pullman Sash Balance Co., Rochester, N. Y., Hardware Specialties, etc.

McCaffrey File Co., Philadelphia, Pa., Files and Rasps.

J. E. Lonergan & Co., Philadelphia, Pa., Brass and Iron Finished Goods.

G. & H. Barnett Co., Philadelphia, Pa., Files.

Simonds Mfg. Co., Fitchburg, Mass., Saws and Machine Knives.

Job T. Pugh, Philadelphia, Pa., Auger Bits.

Enterprise Mfg. Co, Philadelphia, Pa., Meat Choppers, Sausage Stuffers, Coffee Mills, Raisin Seeders, Cherry Stoners, Sad Irons.

Knickerbocker Ice Co., Philadelphia, Pa., Nickel-Plated Ice Tools.

Russell & Erwin Mfg. Co., New York, N. Y., Builders' and Shelf Hardware and Tools.

John T. Bailey & Co., Philadelphia, Pa., Bags, Rope and Twine.

Thomas Devlin & Co., Philadelphia, Pa., Hardware—Awning, Ship, Saddlery, Carriage and Wagon; Malleable Castings, etc.

Star Lock Works, Philadelphia, Pa., Trunk Locks and Padlocks.

J. H. Sternbergh & Son, Reading, Pa., Bolts, Nuts, Rivets, Screws, Buckles, Washers, etc.

Samson Cordage Works, Boston, Mass., Cordage.

A. O. Norton, Boston, Mass., Lifting-Jacks for Railway Service.

Waterbury Tool Co., Waterbury, Conn., Tools for Railway and Ship-Builders' Shops, etc.

The American Wringer Co., New York, Clothes Wringers.

J. H. Williams & Co., Brooklyn, N. Y., Sample Boards of Standard and Special Forgings from Iron, Steel, Copper and Bronze; Engineers' Wrenches, Chain Pipe Wrenches and other Specialties.

Bryden Horseshoe Co., Catasauqua, Pa., Horseshoes and Horseshoe Nails.

Albert W. Meyer, New York, Compartment Cooler, etc.

The U. S. Bung Mfg. Co., Cincinnati, O., Bungs and Coopers' Tools.

P. & F. Corbin, New Britain, Conn., Hardware.

Edwards Sad Iron Co., Philadelphia, Self-Heating Gas Sad Irons.

Slatington-Bangor Slate Syndicate, Slatington, Pa., Various kinds of Slate.

American Bangor Slate Co., Bangor, Pa., Roofing Slate.

American Encaustic Tiling Co., Zanesville, O., Modern Tile Bath Room.

Wetherill & Co., Inc., Philadelphia, Pa., Paints and Kindred Lines.

The Thompson Wood Finishing Co., Philadelphia, Pa., Enamels, Wood Fillers, etc.

Harrison Bros. & Co., Inc., Philadelphia, Pa., Chemicals, Paints, Varnishes and White Leads.

The Bridgeport Wood Finishing Co., New Milford, Conn., Finished Hard Wood, Wood Filler, Paints, White Lead.

Digitized by Google

John Lucas & Co., Philadelphia, Pa., Dry Colors, Paints, Varnish, Glass.

A. & T. McKenna, Pittsburg, Pa., Brass Work.

W. F. Remppis & Co., Reading, Pa., Ornamental Iron Work.

American Tin Plate Co., Chicago, Ill., Tin Plate, Black Plate, etc.

The Snead & Co. Iron Works, Louisville, Ky., Book Stacks and Shelving for Libraries.

Merrit & Co., Philadelphia, Pa., Expanded Metal.

N. & G. Taylor Co., Philadelphia, Pa., American Tin Plate.

Hartman Mfg. Co., Ellwood City, Pa., Lawn, Cemetery and Farm Fence.

Merchant & Co., Inc., Philadelphia, Pa., Metal Tiles and Shingles, Star Ventilator, Copper Tubes.
Tin Plate, Babbitts Metal, Solder, etc.

Clinton Wire Cloth Co., Clinton, Mass., Wire Fencing, Wire Netting and Wire Cloth of all kinds; Wire Lath and Lyte Safety Stair Tread.

Utica Drop Forge & Tool Co., Utica, N. Y., Hardware, Nippers and Pliers, Nail Pullers, Tack Pullers, Wrenches, Specialties for Switchboard and Telephone Linemen and General Electric Work; Tile Cutters.

The R. M. Hollingshead Co., Camden, N. J., Specialties for the Harness, Hardware and Drug Trade; Liquid Polish.

Keystone Lock Works, Lancaster, Pa , Padlocks and Night Latches.

Old Dominion Iron & Nail Works Co., Richmond, Va., Nails, Horse Shoes, etc.

Stanley Rule & Level Co., New Britain, Conn., Carpenters' Tools.

Standard Mfg. Co., Pittsburg, Pa., Bathroom Equipment.

The Trenton Potteries Co., Trenton, N. J., Porcelain Bath Tubs and Closets, Bathroom Fixtures, Laundry Tubs, Drinking Fountains, etc.

Owen & Salter, Philadelphia, Pa., Bath Tub and Plumbers' Supplies.

He Was in Doubt.

An Australian lady cyclist who rides in rationals tells an amusing story at her own expense, says the *Wheel*, of England. A friend of hers, a well-known physician, employs a coachman, who, when about the house, assists the servants by attending the door. One day the doctor, on his return from his mid-day round, was informed that some one had called during his absence to see him, and when he went to the stables he said to his man, "They tell me, Patrick, that someone had called for me. Was it a lady or gentleman?" "Begorra, sir, you've got me!" was the reply. "The devil a one of me knows which it was! It talked a kind of tender like, and looked a sort of mild and quiet, but it wore as neat a pair of knee pants as ever a man could wish for."

♣

The Henri Nestle Company, manufacturers of Nestle's food, are establishing a large plant at Fulton, N. Y., for the production of their specialties in the United States. This firm has its headquarters in Vevay, Switzerland, and before establishing its plant in America, it has already constructed a similar plant in Sweden. The plant at Fulton, N. Y., will be fireproof, and of the most modern construction, using steel frame work for the floors and roofs, with brick side walls, the floors being constructed of concrete supported by steel beams. The Berlin Iron Bridge Company, of East Berlin, Conn., furnished and erected all the steel structural work connected with this building, under the supervision of Mr. H. J. White, consulting engineer for Henri Nestle.

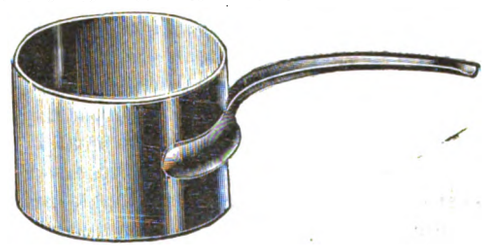
There are nearly 130,000,000 Mussulmen under the British flag.—*Exchange.*

National Hotel Ware.

The National Enameling & Stamping Co., No. 78 and 80 Beekman Street, New York, which is claimed to be the largest manufacturers in the world of enameled, tin, galvanized, brass and copper wares, has already in addition to its almost unlimited line, undertaken the manufacture of Heavy Hotel Ware, and is now making a complete line of these articles suitable for hotels and large restaurants.

This is a particular high-grade branch of the house-furnishing business which has heretofore been in the hands of a few manufacturers of special lines whose product this company believes leaves room for improvement in the superior quality required for hotel requirements. The National Enameling & Stamping Co. consequently propose to remedy this by furnishing an absolutely reliable and satisfactory line of these hotel wares, which will be offered the trade at a price entirely in accord with the market value of their more general line of enameled, tin and copper ware.

We present herewith the illustrations of several of the specialties referred to, with list prices on the same. They will undoubtedly make a valuable addition to their line of manufactures:



CHINESE STRAINER.—Extra Strong.

No.	60	70	75	80	90
Inches, Diameter	6	7	7½	8	9
Each	$4.00	$4.50	$5.25	$6.00	$7.00

SEAMLESS DEEP SAUCEPAN.

No.	235	240	245	248	250	255	265	275	285
Inches	5¼x4½	6x5⅛	7x5⅞	8⅜x6¼	9¾x6⅝	11¾x8	13¼x8⅞	14x9⅝	15x10½
Quarts	2	3	4½	6	8	13½	21	24	30
Each	$2 50	$3.00	$4.00	$5.00	$6.25	$7.75	$12.00	$15 00	$18.00

SEAMLESS DEEP SAUCE POT.—With Side Handle.

No.	635	640	645	648	650	655	665	675	685
Inches	5x4½	6x5⅛	7x5⅞	8⅜x6¼	9¾x6⅝	11¾x8	13¼x8⅞	14x9⅝	15x10½
Quarts	2	3	4½	6	8	13½	21	24	30
Each	$2 00	$2.25	$3.00	$3.75	$4 50	$5.50	$9 00	$12.00	$15.00

COVERED SEAMLESS SOUP STOCK POT. With Strainer and 1-inch Brass Faucet

No.	112	124	136
Gallons	3	6	9
Inches	10½x10¼	13x11¼	15x14
Each	$7.00	$10.00	$13.00

1 inch Brass Faucets, $1.50 each extra net.
Discounts quoted on application.

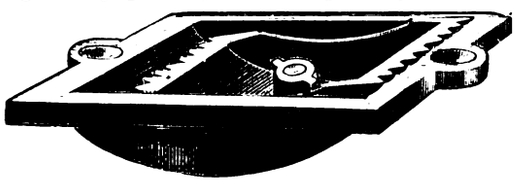
NEW GOODS AND SPECIALTIES.

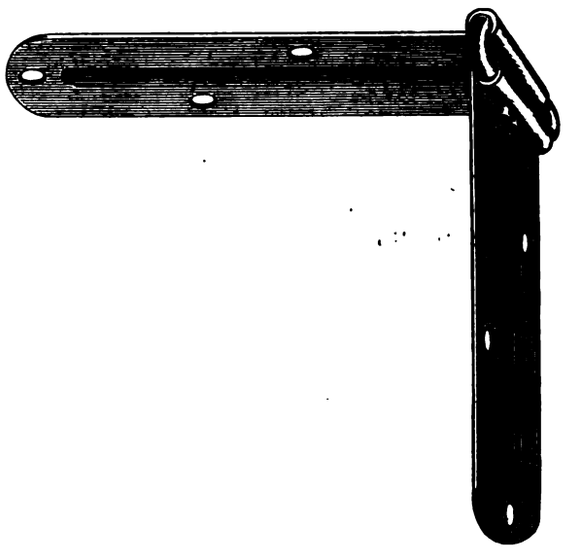
Cary's Patent Hinge and Hasp.



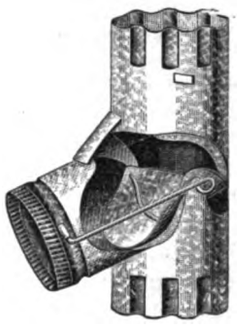
The Cary Mfg. Co., No. 19 Roosevelt Street, New York, among their numerous specialties, are placing upon the market a new hinge and hasp, designed especially for fruit crates, beer, milk, egg, cracker and other styles of boxes, which, in their construction, require a hinged cover. In

this patent loop-joint hinge one part of the loop is made rigid to one half of the hinge, thus making it exceedingly strong, very neat in appearance and an admirable hinge for the purposes mentioned. It has a patent fastening plate and catch, which go with the hasp, and are so carefully adjusted in their construction that the catch never gets loose from the plate, which, in some styles of hinges, is a disadvantage, which the best efforts of manufacturers have not always prevented. If so desired, the manufacturers can furnish the hasp and catch with a small hole through each, so that a wire can be inserted, and then sealed by the use of a lead seal. Although this new style of hinge and hasp was not introduced until quite late in the Spring, the manufacturers state that a large sale on the same among the crate manufacturers was inaugurated, and those who made proper trial of their increased utility have reported in the most favorable manner as to their suitability for the purposes for which they are designed. They are manufactured under patents applied for, both on the hinge and on the fastening catch, and are marketed at a reasonable price, which will be gladly furnished by the manufacturers on application.

The Crescent Bench Hook.



Reuben Ford, John Hancock Building, Boston, Mass., is renewing the popularity of his specialty, the Crescent



Bench Hook, which is conceded to be one of the handiest appliances of its kind for the use of carpenters, pattern makers and woodworkers generally now on the market. As will be seen in the illustration herewith, it is a simple, serviceable and well-constructed article. It can be readily kept sharp by the occasional use of a file, and if it becomes worn, impairing its utility, it can readily be reversed, renewing its advantages. They are nickeled, and packed one dozen in a box, properly labeled.

The Centennial Rain-Water Cut-Off.

The use of a rain-water cut-off on the conductor pipe has become quite general, for after the first water that comes

from a dusty roof in a shower has passed off, the adjustment of the cut-off turns the clean water into the cistern or tank. In the accompanying illustration is shown the Centennial Cut-Off made by Cooney & Geiger, Indianapo-

lis, Ind., adapted for use on corrugated conductor pipes, which they claim is the only single cut-off which can be used on pipe of this style and kind. It is suitable for use on either horizontal or vertical pipes, and is made to fit the 3, 4 and 5-inch sizes, of corrugated pipe.

The Eclipse Scraper.

Chandler & Farquhar, No. 36 Federal Street, Boston, Mass., are placing before the Hardware trade a very handy

little tool intended for the use of carpenters and woodworkers generally, in the shape of a handy and efficient scraper, which we illustrate herewith. It is a serviceable

Digitized by Google

tool, one that can be used in almost every place where one would have occasion to use such a special tool. It is claimed to be exceedingly effective on hardwood floors that are now so popular, as it is calculated to do more and better work, and prove much easier to do its work than many other scrapers on the market.

The Kruse Kross Klevis.

An adjustable plow clevis is being manufactured by the Kruse Kross Klevis Co., Higginsville, Mo., and distributed through the Hardware and implement trade. The accom-

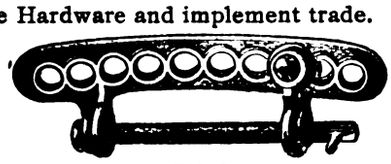


FIG. 1.

panying illustrations will convey a good idea of its usefulness by noticing the manner of its construction, Fig. 1, showing the Klevis complete, while in Fig. 2 the cut shows the several parts composing it. It is referred to as being made of the best quality of malleable iron, and its con-

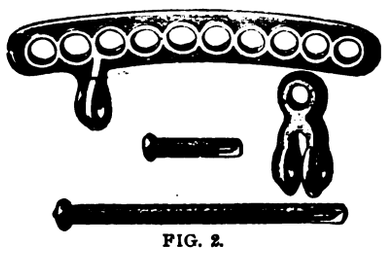

FIG. 2.

struction enables it to be fitted to any plow from 8 to 18 inches. Attention is called to the feature that it may be used to repair broken parts of the clevises made by others, and consequently parties handling the "Kruse Kross" need keep no other kind in stock.

Seavey's Mitre Box and Saw Guide.

Thomson Bros. & Co., Lowell, Mass., are manufacturing Seavey's Patent Mitre Box and Saw Guide, the valuable features of which are shown in the accompanying engravings. The device will do any work within the scope of the ordinary mitre box, and yet is so light and compact that it

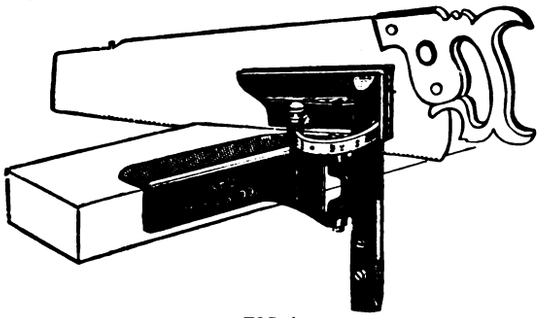

FIG. 1.

is considered equally as effective on bench, horse, building or stage. One important feature of the tool is noticed that in its use no special saw is required, any ordinary cross-cut saw will answer the purpose, while it may also

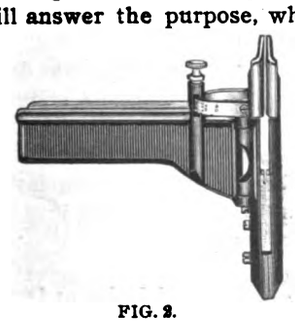

FIG. 2.

be used on material of any of the usual widths or thicknesses. This mitre-box can be applied to the stock to be sawed by placing it on the material and adjusting it in such a manner as will secure an exact cut at any predetermined angle. This useful implement is carefully made of iron and steel in one size only, is finished in japan and weighs two pounds. It is capable of being compactly folded so that it may be placed in a tool chest or traveling kit, and occupy but very little space, or, if necessary, it could be carried in one's pocket. All the parts are interchangeable. In the illustration given herewith, Fig. 1,

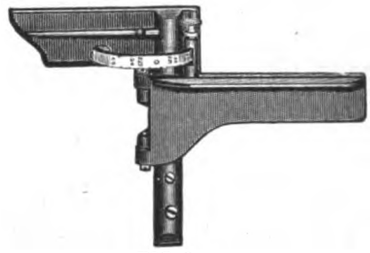

FIG. 3.

shows it in position on the wood to be sawed, and shows the method of adjusting the saw guide. Fig. 2 gives a front view, showing the space between the blades. It will be noticed that the standards are cut away so as to permit of the movement of the saw teeth in whatever way it may be in use, without interfering with any metallic part, there being a strip of wood inserted below, preventing all injury to the teeth. Fig. 3 is a back view, showing the inside of the box which is to be applied to the stock. In this view is also shown the arrangement of the notched segmental arm passing through a slot, and over a sharp angle, which engages the notch and insures easy and accurate adjustment.

Globe Banks.

The accompanying engraving Fig. 1, illustrates the Globe Bank, one of the specialties of the Grey Iron Casting Co., Mt. Joy, Pa., now being placed upon the market. The bank is

FIG. 1.—GLOBE BANK.

neatly made of cast iron throughout, and is constructed so it revolves. It is supplied in different colors, and to add to its attractive appearance the names of the continents and principal islands are well brought out in bronze. They are also introducing the Toy Range here shown—Fig. 2. This article also is made of cast iron, nicely nickel-plated,

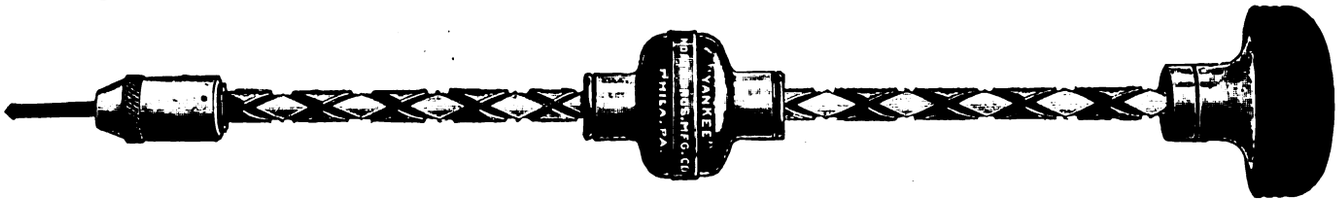

FIG. 2.—TOY RANGE.

with polished edges and neat ornamentation. It is 8¼ inches long, 4⅝ inches wide and 5 inches high. It is made quite complete, as each range is furnished with one length of pipe and with kitchen utensils. It comes packed one in a box, and three dozen in a case.

Yankee Reciprocating Drill No. 50.

The illustration herewith represents a reciprocating drill now being placed on the market by the North Bros. Mfg. Co., Philadelphia, Pa. The drill is designed for use in drilling steel, iron, brass and other metals, and will be

found equally as useful in all varieties of woods. Its mechanical construction is such that the drill runs continuously to the right, during the forward as well as backward movement of the driver, and consequently drills continuously. The pressure to feed the drill is obtained by pressure against the head of the tool, which is provided with ball-bearings which greatly reduce the usual friction. The improved chuck is referred to as being of new and special design, having three jaws, and is claimed to be very accurate and strong. No drill points are furnished with the tool in order that the operator may provide the necessary quality, style and size he finds best suited for the material to be drilled. The chuck is constructed to hold any drill with shanks 3-16 inch diameter or less. The movement or traverse of the driver is 8½ inches. The entire length of the tool without drill is 16 inches. Each tool is guaranteed by the makers, as the materials and workmanship throughout are claimed to be the best obtainable.

The Phenix Hanger and Fastener.

The Phenix Mfg. Co., Nos. 614-616 Hubbard Street, Milwaukee, Wis., are manufacturing a number of specialties under the name of Phenix, among which are the Phenix Window Screen and Awning, the Phenix Fastener, the Phenix Door and Window Screens and the Phenix Hanger for storm windows, and entire screens, illustrations of which we give in the course of this article. The one which we illustrate, Fig. 1, is called their No. 3, which is used for the hanging of storm sash and entire screens, and is fastened at the bottom of the sash. This fastener, Fig. 2, serves as a locking device only, drawing the sash up firmly to the window frame by the upright stiles. This fastener was originally brought out by the manufacturers to take the place of hooks and eyes, window plates, screws and the other various devices which were previously used to fasten storm sash and entire screens at the bottom from the inside, many of which then on the market were found not sufficiently perfect for the part they had to play. This

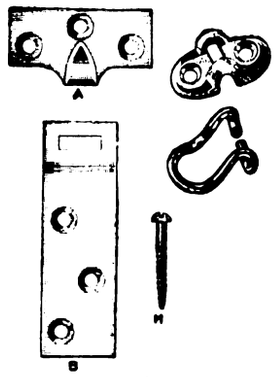

FIG. 1.

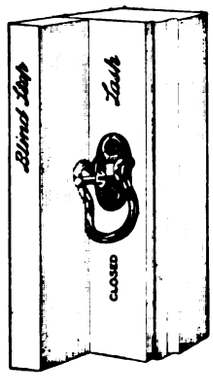

FIG. 2.

fastener has been deemed extremely simple and practical by such carpenters and sash and door men to whose attention it has been particularly drawn, as it is practically as cheap as the usual window plates and other appliances with which storm windows, etc., are fastened. In Fig. 3, an illustration is given showing how this fastener is used on basement windows, as a locking device from the inside for storm sash and screens. Too frequently the old door, button is used in the effort to fasten basement screens, and they are liable to be removed by some mischievous persons who thus make ready access to the cellar possible. The use of this fastener precludes all such work from the outside of the basement screens and storm sash, and consequently increases the feeling of security which their use should demonstrate. They are marketed by the manufacturers in single sets for use on either storm sash or window screens only; double sets for use on both storm sash or

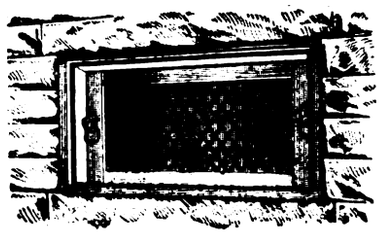

FIG. 3.

window screens, where both are used on the same window: and part sets for use on either storm sash or window screens after one or the other has already been supplied.

Sheet Steel Half Bushel Basket.

The Metallic Basket Co., Rochester, N. Y., are manufacturing an addition to their extensive line of galvanized sheet metal baskets in the form of a steel half-bushel basket, as here illustrated, which desirable article can be used as a pail, or makes an excellent stable bucket. Although made from sheet metal it is light, and on account of the flat bail quite convenient to handle. It is corrugated for strength, and nicely galvanized to prevent any corrosion. The manufacturers make note of the point that a

blow or fall that would destroy the common pail or ordinary basket will not injure this metallic basket. It is also particularly recommended by the makers for farm, dairy or garden purposes, and will doubtless become extremely popular.

Diamonds for cutting glass were not introduced till the reign of Elizabeth, at which period stained glass was declining; and before that era every piece of glass which went to form a window had to be cast in little clay molds and afterwards chipped with an iron instrument called a "grozing iron," so as to properly fit into its assigned place. —*China, Glass and Lamps.*

The Brooks Locomotive Works, at Dunkirk, N. Y., will shortly turn out the largest locomotive in the world for the Illinois Central Railroad. The monster locomotive will weigh 218,000 pounds and the draw-bar pull will be 520,000 pounds. It is a twelve-wheel freight, with cylinders of twenty-three-inch diameter and a three-inch stroke.—*Ex.*

RECENT TRADE PUBLICATIONS.

HARRISON BROS & CO., INC., Philadelphia. An extremely interesting pamphlet of 34 pages, entitled "The Painting of the House," written up in a manner that entitles it to be closely read, covering all the essential points and instructions necessary to paint a house properly, calling attention to the work of the painter, what is necessary to use in the way of paint, showing differences between paints and painters, the necessity of using first quality material throughout and the ways and means for putting it on properly in order to get the best results. Intermingled with this information will be found instructions as to which of the productions of this well known company would be the most desirable for the purpose. The booklet is gotten up in a very artistic manner, with etchings throughout the text on almost every page, is printed in black and red, with good readable type, and forms a pamphlet that any dealer would be proud to distribute in the interest of his handling such a popular line of paints.

WRIGHT & COLTON WIRE CLOTH CO., Worcester, Mass. Pamphlet catalogue of 116 pages, one of the most attractive in the line of wire goods that has come to our notice in some time. Printed on excellent paper, of good typographical appearance and fully illustrated throughout with everything necessary to understand regarding the goods manufactured by this company, which include all the various styles of wire used by the trade, from bundled wire to straightened and cut, broom, mattress, tag and florists' wire, heddle wire and stemming wire. Included in the line of manufactures of this company is everything desired by the trade in the way of wire products, including poultry netting, mining cloth, farm fencing in various general and attractive styles: double-pointed tacks, clinch staples, coal screens, foundry riddles, conductor strainers, braided wire picture cord and a large and attractive line of wire flowerpot stands and trainers, window guards and fancy office railings and similar appliances. This is a catalogue of too much importance to be neglected by the Hardware dealer, who should write at once for a copy to add to his library.

JOSEPH DIXON CRUCIBLE CO., Jersey City, N. J. A very handsomely gotten up pamphlet of 32 pages, under the title of "Making Records," copyrighted by the above company and printed on the De Vinne Press, referring in its contents to the productions of this well known company and giving testimonials regarding the usefulness, quality and utility of almost everything among their special products, for which they have a large sale. As the writer says on the first page: "This little book might properly be called an 'experience meeting.' It tells what has been said about Dixon's pure flake Ticonderoga graphite by locomotive engineers and others connected with the most important railroads of America." The method of constructing the contents of this volume is unique in a way, and it is done in an artistic manner that will impel perusal.

W. E. SNEDIKER, Jersey City, N. J.; Tower & Lyon, No. 95 Chambers Street, New York, sales agents. Pamphlet catalogue of 12 pages, in which are illustrated the quick-acting vises made under the Snediker patents, which include under the trade-mark of "XL" the quick adjusting, cam and toggle joint, rapid screw, quick adjusting screw and the other rapid adjusting vises made under these patents, both in the solid and swivel jaw. Included in the same catalogue will be found the Stephens' patent vises, stationary or swivel base; also stationary or flat base, swivel base only, jewellers' vises and jewellers' automatic or self-closing vises. A number of vise adjustments are also included in the assortment, jewellers' anvils and patent planer chucks. These various specialties are handled through the facilities afforded by Tower & Lyon, in whose sample room all the samples will be found.

THE NEW DEPARTURE BELL CO., Bristol, Conn.; John H. Graham & Co., No. 113 Chambers Street, New York, selling agents. Envelope catalogue of the New Departure rotary call bells. A very handsome and attractive line, covering a number of plain and fancy styles of call bells that give electric results without batteries.

VAN WAGONER & WILLIAMS HARDWARE CO, Cleveland, Ohio, and New York. Booklet of eight pages, very handsomely gotten up, exploiting the merits of the Cleveland joist and wall hanger manufactured by them. This is accompanied by a description of the article in question, describing the merits of the same in a manner easy to understand, and a price list is given therewith of all the various sizes made by the company, making it well worthy of the attention of those handling this class of goods.

THE ARCADE MFG. CO., Freeport, Ill. Pamphlet catalogue of 112 pages, in which are illustrated the numerous specialties made by this well known manufacturing company. It is printed on excellent paper, finely illustrated and very attractive in appearance. Included in its contents are the Warner screen-door checks and anti-friction parlor-door hangers, and, under the name of "Arcade," door bells, spring hinges, mop holders, lemon squeezers and a variety of other useful specialties. The catalogue also includes a large variety of ice picks and ice shaves, coffee mills, including several of the newest and most novel styles, stove trucks, pokers and lifters in large variety; cast hammers and shingling hatchets, mincing knives, nut cracks, towel rollers and a large variety of general Hardware specialties of similar character. It is a very useful catalogue, and one that will be appreciated by those who receive it.

THE SPRINGFIELD DROP FORGING CO, Springfield, Mass.; P. O. address, Brightwood, Mass. Small catalogue of 16 pages, covering a few of their lines of drop forgings, such as engineers' wrenches, box tool post wrenches, milling machine and bicycle spanner wrenches, chuck and double head set screw wrenches and bicycle wrenches. Included in the assortment are tool post forgings and rings, showing how thoroughly equipped they are for making any special shapes in steel forgings, illustrations of which are given in their catalogue. This concern also issues a small catalogue well illustrated, covering a line of bicycle drop forgings, including sprockets, crank hangers, saddle posts, steering heads, seat post clusters, fork crowns and bevel gear blanks, etc., etc. The company are large manufacturers of this class of goods, and invite correspondence from those interested, stating they will be pleased to submit samples and quote prices.

EDW. K. TRYON, JR, & CO., Nos. 10-12 North Sixth Street, Philadelphia. Fall catalogue of firearms and sporting goods of 112 pages, 9x11, and crowded with everything that would come under the above head—firearms of every description, from hammerless guns to breech-loading rifles, including revolvers of every description and the necessary

Digitized by Google

ammunition for the proper use of the same. All the sporting appliances that are necessary for the enjoyment of the hunter will be found within these pages. It forms an assortment of sporting goods that makes the catalogue an extremely valuable one for Hardware dealers to possess. Included with the assortment of goods above mentioned, we notice at the end of the catalogue a large number of keys and key blanks, cabinet blanks and steel and brass key blanks, without which no Hardware store considers its stock complete.

THE HARDWARE SUPPLY CO., No. 616 Pythian Temple, Grand Rapids, Mich. Pamphlet catalogue of 24 pages, covering a line of special appliances, such as Frost's patent door catches, for sideboard and other small doors; door catches of a similar device, Champion door catch new No. 70, suitable for bookcase, china closet, wardrobe or sideboard; spring latch for bookcase doors, adjustable steel toilet hinges, friction toilet hinge, toilet screws, desk lid supports and adjustable shelf supports. The assortment also includes Selleck's patent commode buttons and a line of wood-screw hole plugs and wood drawer knobs, etc., etc. Added to the above, this company also furnishes the "Triumph" carvers' and cabinetmakers' benches and adjustable steel screw clamp heads. This is a unique line of goods, and the catalogue is the first we have seen covering the special line in anything like as large a variety.

CHARLES H. BESLEY & CO., Nos. 10–12 North Canal Street, Chicago. Pamphlet catalogue, 8x4½ inches in size, evidently intended to be fitted to a machinist's pocket, in the 300 pages of which is embraced a large amount of information regarding tools of every description, for the sale of which this firm has long been a recognized authority. The contents embrace almost everything necessary in the way of small tools for the running of a machine shop of any description. Included in the assortment is everything necessary for a woodworker as well, and includes a number of lists of leading lines, and a discount sheet that is very complete, applying to every page in the book. The pamphlet has one of the most complete indexes to its contents that it is possible to make, by the aid of which a speedy reference is made to any part of the book. For those having occasion to purchase supplies of this description the book will be found invaluable.

THE NATIONAL CEMENT & RUBBER MFG. CO., Toledo, Ohio. Pamphlet catalogue of 36 pages, covering a large line of cement and rubber supplies used by those handling bicycles, under which will be found liquid tire cement, rubber cements of various kinds and descriptions, plugging solutions, general lubricants, stick graphite, lubricating and other oils, air drying and baking enamels and cleaning fluids. Included in the assortment covered by this catalogue will be found several machines made by them, among which are the high-pressure brazer, brazing forge, hot-air vulcanizer, gasoline torches and double-walled enameling ovens. This class of goods is not obtainable under ordinary facilities, which makes this catalogue one that every jobber should have in his collection, containing as it does information regarding certain lines not too largely manufactured.

THE NATIONAL SUPPLY CO., Baltimore, Md. Pamphlet catalogue of 24 pages, covering a line of furniture casters and light Hardware, which form the several specialties made by this company. Included in this line are found Philadelphia pattern casters, steel horn plate and bed casters of several varieties and a line of similar goods made under the name of the Fox socket casters. They also manufacture porcelain drawer and shutter knobs in large variety, and in addition are headquarters on a line of bolts of every description and rivets necessary for the furniture trade.

Advertisers' Corner.

Don't tell a four-inch story in a two-inch space.—*The Advisor.*

An advertisement in a Western paper reads: "Wanted —Small boy to deliver oysters that can ride a bicycle."

The most successful men have been those who worked with a definite end in view and were quick to absorb and apply the best ideas of recognized trade leaders, besides profiting by the mistakes of competitors.—*Hide and Leather.*

Big space is almost indispensable for introduction purposes, simply because the use of newspapers and magazines is growing at such a rate that in no other way can the unknown rise above the heads of the crowd.—*Advertising Success.*

"Advertising will not wrap up goods or make change," is the way a Chicago advertising man expresses it, commenting on the tendency of certain merchants to expect the newspaper space to carry the burden of the whole business.—*Printers' Ink.*

No printed matter intended to draw trade should ever be sent out without the address on it. Even circulars and booklets for local distribution ought to show the names of town and State, as well as the firm name, and then there will be no possible chance of a misunderstanding.—*Profitable Advertising.*

"I am looking for something real nice for a young man," said the young and pretty shopper. "Why don't you look in the mirror?" asked the gallant drug clerk, and she was so flustered that he managed to sell her four different things that she did not want before she knew what she was doing.—*Michigan Tradesman.*

The public has a great deal to remember and its memory is mighty short. It needs to be constantly reminded of your business. And the man who knew and bought of you yesterday may be dead to-morrow. Meanwhile a youngster who never heard of you is making his first purchase to-day. Don't depend on past prosperity.—*Ad Sense.*

A number of advertisers have discovered that many people who will not stop to listen to a "barker" or "lecturer" at a fair or exhibition, will stop to hear what a phonograph has to say, although it say nothing more interesting than a human praiser of the goods would. In the city the phonograph is pretty well known, but in the country it is still regarded as one of the seven wonders of the world.—*Printers' Ink.*

Advertising should be governed the same as an infant. It should be tenderly nurtured and watched while it is growing. Neither an advertisement nor an infant is profitable in the beginning. About the only satisfaction or comfort you can get in the early stage is the anticipation of what it will be when it is fully grown. Advertising and an infant can easily get into bad ways and bad company unless carefully watched.—*Boyce's Hustler.*

Few of the public have any idea of the sums paid by photographers for "sole selling rights." Dickens is credited with having been the first notability to exact a fee for the privilege of taking his portrait. A photographer kept bothering him for sittings and Dickens asked and obtained $250. On learning of Dickens' triumph Fanny Kemble refused to sit for less than $250, and then Ada Cavendish demanded and received $1500. Mary Anderson, toward the close of her career, used to receive $500 a sitting. Recently a firm of Parisian photographers arranged with Sarah Bernhardt for a series at $250 apiece.—*Phila. Times.*

REVIEW OF THE MARKETS.

Hardware: The market for Hardware is held in a very firm condition, the advances being more general and affecting some lines that have been held previously at conservative quotations. Inability to obtain full supply of the usual stocks needed at this season of the year, is commented upon in every direction, the jobbers being apprehensive of losing some trade from regular customers unless their supply of goods has early delivery. The trade generally are not throwing away profits under the circumstances, but are holding to market quotations, except in some few instances where radical advances make a happy medium, and present a satisfactory solution of a vexed question, as to whether the extreme advance should be charged in every case. Indications point to a revision of terms of sale, which at an early date will make those now in use superseded by "30 days," with no cash discount for prepayment.

Wire Nails: Since our previous issue, the American Steel & Wire Co. have advanced their prices fifteen cents per keg, and the trade since that time has been as good and in as great volume as though no such advance had taken place. It would seem as though two advances a month were rather too frequent for the trade, but so far the trade has not put itself on record as considering it a disadvantage. In fact, the belief is prevalent that this is not the end of it, and that in all probability slight advances will be a fortnightly feature throughout the season. Present quotations are as follows, f. o. b. Pittsburgh, terms 30 days net:

To jobbers in carload lots	$2.80
" in less than carload lots	2.82½
To retailers in carload lots	2.95
" in less than carload lots	3.05

New York prices are represented by the following quotations held firmly:

To retailers, carload lots on dock	$3.10
" less than carloads on dock	$3.25
Small lots from store	$3.25 to 3 40

Cut Nails: The cut nail market upheld by the Eastern manufacturers has made no change in price since our previous issue, although higher quotations are heard from the Western mills. The demand continues fairly good, but large transactions are not noticed, only moderate quantities being ordered. There seems to be less speculative feeling in the cut nail market than is noted in the wire nail market and this will undoubtedly continue throughout the season. The following quotations may be said to represent the market, and are f. o. b. Pittsburg, the freight being added to make a net price delivered at destination:

To jobbers in carload lots	$2 40
To " in less than carload lots	2.45
To retailers in carload lots	2 50
To " in less than carload lots	2.65

New York business continues in fair demand under the prices named as follows:

Carload lots on dock	$2 55
Small lots from store	$2.75

Barbed Wire: In accordance with the advance on other wire products, the American Steel & Wire Co. on September 11th, made a further advance in the price of both painted and galvanized barbed wire. The market for these goods is in a very healthy condition, the demand being a steady one, which would seem to justify the strength given it by advancing quotations. Now that the differential between painted and galvanized wire is but 15 cents per 100 pounds, the sales of galvanized wire have been largely increased. The following quotations represent the market, and are f.o.b, Pittsburg, net cash, thirty days:

To jobbers in carload lots, Painted	$3.25
" " Galvanized	3.40
" in less than carload lots, Painted	3.27½
" " " " " Galvanized	3.42½
To retailers in carload lots, Painted	3.40
" " Galvanized	3 55
" in less than carload lots, Painted	3.50
" " " " " Galvanized	3 65

Smooth Wire: A corresponding advance to that announced above in wire nails and barbed wire also affects the prices on smooth wire, the quotations being accordingly 15 cents per 100 pounds higher than noted in our previous issue, and may be stated as follows, f. o. b. Pittsburg, 30 days net cash:

To jobbers in carload lots	$2 65
To " in less than carload lots	2.67½
To retailers in carload lots	2 80
To " in less than carload lots	2.90

The charge for galvanizing is 50 cents on sizes from 6 to 14 inclusive; on Nos. 15 and 16 it is 85 cents and on Nos. 17 and 18 is $1.10.

Shovels and Spades: At a meeting held recently by the manufacturers of shovels and spades, the following prices were agreed upon as selling prices to the retail trade:

NO. 2 SHOVELS AND SPADES POLISHED.

	A Grade.	B Grade.	C Grade.	D Grade.
Solid Steel Pattern	$10.50	$9.60	$8.70	$8.10
Hollow Back "	10.20	9.30	8.40	7 80
Back Strap "	9.30	9.00	8.10	7.50

Black, 30 cents per dozen less than Polished.
Advance 30 cents per size for larger sizes.

Quite a number of the members were of the opinion that an advance at this time would not be wise, but they were overruled from the fact that constantly increasing cost of raw material would justify an advance at a date in the immediate future, and it was deemed advisable that it should take place thus early in the season. No doubt there are some heavy stocks held by jobbers by whom the above prices will be cut for a time, but the indications point to a further stiffening of costs which would render any such action on their part unwise, under the circumstances.

Steel and Iron Squares: Manufacturers of steel and iron squares have agreed upon a regular discount being made on their goods of 65 and 10 per cent. These goods have been held at much lower prices, and no doubt will be sold at prices that shade this quotation for some little time to come, as this is one of the lines usually made use of by the jobbers to name quotations that are lower than those made by the manufacturers.

Egg Beaters: We are in receipt of the following quotations from the Standard Co., Boston, which represent the present condition of the market:

No. 5	Steel Handle, Dover Egg Beater	$5 50 per gross.
" 10.	Cast " " " "	7 00 "
" 10.	Steel " " " "	7.00 "
" 15.	Extra Heavy Steel Handle	14.00 "
Rival		9.00 "

The Stanley Works, New Britain, Conn., and No. 79 Chambers Street, New York, announce under date of September 18th, the following changes in their discount sheet No. 5, these discounts relating to such goods as barrel, square, shutter and other bolts. These are catalogue printed discounts. The extra quantity discounts on these goods are still held as previously:

	Discount per cent.
Barrel Bolts, Nos 1078, 1078½, 1080, 1081, 1082, 1084 1086, 1324	60&10&7½
Square Bolts, Nos. 1088, 1090, 1092, 1094, 1098	60
" Bolt Staples, Nos. 1126, 1128, 1130, 1132	60
" Bolts, Galvanized, Nos. 1328, 1329, 1330	60&10
Shutter Bolts, Nos. 1110, 1112, 1113, 1325, 1326, 1327	40&10
" " " 1114, 1118	10
Bronzed Barrel Bolts, Nos. 402, 404, 406, 407, 408, 409	33⅓
Wrought Goods, Nos. 976, 978, 1314 972, 974, 980, 986, 1316, 982, 988, 1318 984, 990, 1320	80
Washers, No. 994	3 cents per pound.

Warm Air Registers and Ventilators: Prices on this seasonable line of manufactures, have been advanced by the makers under date of September 6th. The following discounts applying to the price list of February 1, 1899, represent the market:

	Discount per cent.
Black Japanned Registers, Ventilators, Faces and Borders	30
White " " " and Faces	25
Bronzed Finishes in Imitation of Gold, Silver, Copper or Bronze	30
Nickel Plated	30&10
Electro Plated in Brass, Bronze, Copper or Oxidized Silver	30&10
White Porcelain	20
Solid Brass and Bronze Metal	20
Pedestal Registers	20
Carved Ceiling Ventilators for Churches	25
Dampers	33⅓
Chandelier Ventilators	25
Summer Pieces	33⅓
Screens for Steam Pipes	40
Slate Border Frames	70
Soapstone Border Frames	30

As usual at this season of the year, business is named as being exceptionally good, notwithstanding the advanced quotations.

Slaw and Kraut Cutters: The Tucker & Dorsey Mfg. Co. have advanced prices on slaw cutters from 5 to 10 per cent. Kraut cutters about 10 per cent.

Digitized by Google

Metal Key Faucets: The price on the line of "Imperial" metal key faucets, for which John H. Graham & Co. are sole agents, will be advanced October 1st to 50 and 5 per cent. discount from list. The change is made necessary by the increased cost of material.

Bicycles for 1900: the Iver Johnson's Arms & Cycle Works, of Fitchburg, Mass., one of the leading concerns not gathered in by the trust, are already out with their announcement of 1900 prices. They state that their medium grade of wheels will list at $25 and their high grade at $35. Models with coaster brake will list at $40, and their cushion frame and chainless bicycles will be listed at $50 and $60 respectively.

Ausable Horse Nail Co. We have received from the Ausable Horse Nail Co. the following revised prices and discounts on their product: Ausable horse nails, 50 per cent. discount from list. Clinton horse nails, 30 and 5 per cent. discount, and American brand horse nails, all sizes, 5 to 10, 10½ cents per pound, net.

Smith & Hemenway Co. Smith & Hemenway Co., No. 296 Broadway, New York, have just issued a condensed catalogue and price-list. It is subject to a uniform discount of 40 and 5 per cent. It relates to the goods sold by them as successors to Smith & Patterson, Maltby, Henley & Co., Bindley Automatic Wrench Co. and L J. Anderberg; and as general representatives and New York office of Utica Drop Forge & Tool Co., their nippers, pliers, etc., have a prominent place in it.

Tire, Stove and Machine Bolts: These goods have been advanced by the Associated Manufacturers, and are now quoted at following base discounts:

Tire Bolts	Discount per cent.	60
Stove and Sink Bolts	" "	60&10
Machine Bolts	" "	50&10

Chisels and Drawing Knives: On September 8th the Ohio Tool Co. advanced prices on chisels and drawing knives to 70 and 10 and 2½ per cent., chisels with leather head handles to 70 and 10 per cent. discount from list.

Door Locks: The Slaymaker-Barry Co., Connellsville, Pa., have withdrawn old quotations on the line of door locks, and are now offering 4-inch upright rim locks at $1.25 a dozen, other styles in proportion. Mineral knobs 85 cents a dozen, and porcelain japanned knobs, $1 a dozen.

Ice Cream Freezers: The North Bros. Mfg. Co., Philadelphia, have advanced prices on their ice cream freezers between 10 and 15 per cent. over those ruling last season.

Rivets: At a meeting of the manufacturers of iron rivets held recently a further advance in the price on these goods was decided upon, the discount being fixed at 55 per cent.

Cordage: The following quotations may be said to represent the market at the present time:

Manila, 7-16 inch and larger	per pound,	13 to 13½	cents.
" ⅜ inch	"	13½ to 14	"
" ¼ and 5-16 inch	"	14 to 14½	"

" ¼ and 5-16 inch	"	11 to 11½	"
" Lath Yarn	"	9½ to 10	"

The price of jute rope is 6 cents.

Linseed Oil: The Dean Linseed Oil Co. quote as follows:

In lots of less than 5 barrels ..... 45 cents per gallon.
In lots of 5 barrel or more ..... 44 cents per gallon.

The five-barrel price only applies to deliveries of that quantity at one time. Boiled linseed oil, 2 cents per gallon higher than raw. Calcutta oil, 60 cents per gallon. Above prices are subject to change without notice.

THE BALTIMORE TRADE.

The orders now being received are of good size and quantities, embracing heavy Hardware, cutlery, guns, ammunition, etc., and have caused us to be so rushed for the past few weeks that we've hardly had time to breathe.

Under such conditions a fellow is obliviously ignorant of what is going on in the world, but in perusing the daily mail new advances are noted, withdrawal of prices continue and the natural query respecting the limit to high prices is unanswered. The great advance in structural iron has caused to be deferred the construction of at least one large building in this city, and from present prospects it will be many moons before same will be erected if dependent upon a heavy decline in the cost of material. The raw material in the hands of large capitalists seems to be a very difficult thing to manage and is evidently so beyond their control that they can only look on and report advances; but there will be a change—or an earthquake—some day.

We have been favored this month with two advances of 15 cents each by the American Steel & Wire Co. and look for another before October 1, so continue to buy largely as usual. Grass and grain scythes are reported to have advanced about 100 per cent., and the Shovel Association raised their list $1.00 per dozen this month. Many other goods have also changed since August, and it is highly essential to keep both eyes open and anticipate your wants or experience that awful feeling of being left out in the cold.

Collections are very good. H. W. WEBB & SONS.

THE BIRMINGHAM TRADE.

We are glad to report a continued good demand for Hardware in furnace and mining supplies, also for builders' Hardware and tools, indicating new developments. We also continue to receive withdrawal of prices and notices of advances. Some of the trade feel that the speculative period has passed and they are buying only for their regular stock and actual wants. Owing to the mills and factories being far behind with orders and very slow in making shipments, it makes it very difficult to keep up stock, as we do not know where to place an order and be able to say with any definiteness when we will receive the goods. This condition, however, makes it easier to sell where one has the stock in hand. Parties placing orders usually want the goods and want them at once, and the fortunate party who has the stock gets the order without a great discussion as to the price. We think it wise, however, to not take advantage of such an opportunity to ask more than usual, but be satisfied with an opportunity to please the customer.

We do not anticipate any decline in the near future so long as the mills will buy iron for future delivery at the advanced prices.

We anticipate that there will come a time when production will overtake consumption, as the nice profits that must be made on pig iron now will stimulate every effort to push production to the limit by building more furnaces, opening more mines, etc., but this will take much time.

MOORE & HANDLEY HARDWARE CO.

THE PITTSBURG TRADE.

There is no change to report in the activity of the jobbing Hardware business of Pittsburg. Indeed, night work is getting to be the rule rather than the exception to keep up with the orders. The cool weather last week gave an impetus to the demand for Fall goods, such as gas stoves, horse blankets, etc., but the trade for all classes of goods is active and especially so from manufacturing towns.

The president and secretary of the Hardware Jobbers' Association were in the city recently making preliminary arrangements for the convention to meet here in November. We hope to have a full attendance of all members and think there are enough matters of mutual interest to bring them.

Goods continue to advance, and as the iron market is so strong and shows every indication of holding firm for a year ahead, there is a good basis for the upward tendency of all goods made from it. The difficulty in getting orders for structural iron filled delays buildings in course of construction and in some cases no doubt advanced prices of all building material make intending builders defer action.

Digitized by Google

One of the matters jobbers will have to consider very soon is terms of sale. So many manufacturers have withdrawn the 2 per cent. cash discount that the jobber must either add this to his margin of profit or else adopt the same terms to his customers. The loss of this 2 per cent. means all the difference of selling at cost or a small profit when times are as they were two years ago. On an advancing market the jobber can stand it, but that condition will pass and then we must face the question.

LOGAN-GREGG HARDWARE CO.

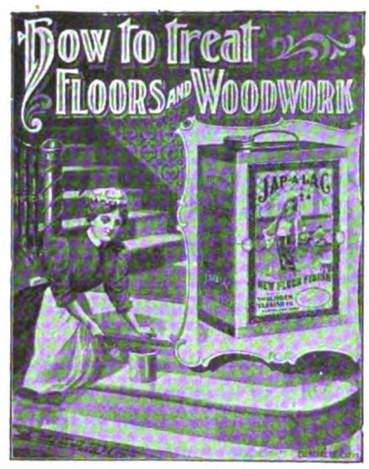
THE INDIANAFOLIS TRADE.

This is the week of the year when the Indiana merchants in all lines take the Capitol City by storm. The State Fair has not lost its prestige in Indiana, as in many States.

About this time of the year the dealer begins to realize that he needs certain lines of goods which he did not include in his early purchase and which he prefers to select from samples, and this brings him to town

Many Hardwaremen who deal in implements look forward to this week as the best time to get away from business and enjoy a little relaxation from care and to see what is to be seen outside their immediate locality, feeling that all the farmers who can leave their Fall work will be here, and those who cannot will not be wanting anything their clerks cannot attend to.

Last week we received our long-promised shipment of Ham's lanterns and distributed among our customers three carloads of this article, which is so indispensable among the farmers during the fall and winter. We went after the lantern business in this vicinity this year at a time when the dealer was in the humor to place his order for future delivery, and our sales greatly exceed those of former years.



Our annual gun catalogue is in the hands of the trade, and is attracting their attention and capturing their orders. Our sporting goods department, which has been rushed during the Spring and summer filling orders for bicycles and bicycle sundries, is now equally busy on gun and ammunition orders.

VAN CAMP HARDWARE & IRON CO.

THE COLUMBUS TRADE.

There is nothing new to report in the Hardware situation. Shortage of goods and advances are the two things we hear daily. There is no doubt that manufacturers in many lines are combining with the intention of getting rich in a year. In fact, we are told by a prominent manufacturer that he has been branded a fool because he would not go into a prospective combination. They said to him that one year was enough to make him rich, and after that the combine could go to the "bow wows!" He said he could not and would not consent to any such hold-up. Legitimate advances are all right, but highway robbery is wrong and will be remembered for years to come by those who have had to stand the imposition.

What can the scythe makers say to justify them in jumping the price on scythes $4.00 a dozen? Nothing—only that people must have scythes, and, as manufacturers are all together, you must pay the price. We have always believed in manufacturers making a reasonable profit, and when they are selling goods at prices that justify them in paying their workmen good wages, trade, as a rule, is healthy and steady, but the past has proven that manufacturers use but little judgment. They must either cut each other's throats and make no money or form combinations and rob the public. If manufacturers would only adopt the principles they set forth when they form an association, no one would object to them. They claim it is done to reduce expenses. That one salesman can represent several factories as well as one; and there is a great saving in office rent and help. This no doubt is true, but who is being benefited? Instead of giving the consumer the benefit of these savings, they put prices beyond all reason, and not only make big money on reduced expenses, but by charging unreasonable prices. Times are good, trade is good, money is more plentiful, and there is no reason why such conditions should not last for years; but nothing will check it quicker than inflated values. We cannot see any chance of a reaction for months to come, and we hope to see more conservatism shown by some of the associations that now control the market to avoid any disastrous setback. If some one can give a reason for the ups and downs in the volume of business and prescribe a remedy he would be a benefactor worthy of a monument. In our opinion fictitious values have more to do with it than any other one thing. Everyone knows of many boom towns that are to-day sad reminders of men's folly. Nothing but patented articles can remain long at fictitious prices. They are bound to get down to a legitimate basis of cost sooner or later. We do not want to be misunderstood. We are in favor of prices that will leave the investor a reasonable return for his investment. It matters not whether it is the manufacturer, jobber or retailer. Profitable prices are always an indication of good times. What we are opposed to are exorbitant prices simply because a combination of manufacturers can demand them. Better get rich by a conservative, honorable business career of several years than to make it all in one year. When we started this letter it was to be about an inch long, but we wandered, and trust you will pardon us for such a lengthy lecture. THE SMITH BROS. HARDWARE CO.

The Glidden Varnish Co., Cleveland, Ohio, U. S. A.

THE CHICAGO TRADE.

Previous to the first of July we supposed that there had been so many advances in our line of goods that we could give our salesmen a rest for some time before being obliged to communicate with them on the subject of higher prices. As a matter of fact, however, during the past two weeks we have been obliged to keep the wires warm and our stenographers quite busy with reference to many articles which we had expected would remain stationary. Whether the values of these articles are intrinsically either high or low, our minds have become settled down to take a philosophical view of the situation and accept of them for the time being, and from the way orders are coming in from the different routes covered by our traveling salesmen, we take for granted that our retail customers are accepting the situation as gracefully as possible, for the demand for a great many of our lines of goods seem to have no limit. It is almost impossible for us to secure axes, shovels, scoops, cross cut saws, wood saws and many other lines of goods. Among the late advances in prices of goods which we have to note are such articles as Mrs. Potts' sad irons, files, an advance of 50 cents per dozen on all shovels, spades, scoops and ditching tools, steel and iron squares, screw strap hinges, axes. A large advance on grass and grain scythes, common sad irons, well buckets, sisal rope,

Digitized by Google

wire brackets, traps and chains wrought butts, cut tacks, hollow ware, Maslin kettles, zinc and copper, poultry netting, etc., etc.

We are pleased to note that on other lines of goods as well as Hardware, the jobbers of Chicago seem to be having a good business with every indication that it will continue through the balance of the Fall trade.

WELLS & NELLEGAR CO.

THE DAVENPORT TRADE.

The regular quarterly meeting of the Iowa Hardware Jobbers' Association was held in Des Moines on the 13th inst.

The writer attended the Trust Conference held in Chicago on the 13th, 14th, 15th and 16th of this month, and was very much interested in the papers that were read, and hopes that the ultimate result of this conference will be some sort of regulative legislation with regard to the great incorporations. There were something like five hundred delegates present, but as far as we know this was the only Hardware house represented. Are the Hardware jobbers not interested in these important economic questions?

Whether it is restrictive production ordered by the various large manufacturing incorporations or some other causes unknown to us, we find it very difficult getting goods enough to supply the demand from our customers, and also observe an independence among the manufacturers from whom we buy that we never experienced before the days of combinations, pools and trusts. It is very much easier to sell goods than to buy them, or to get them delivered after they are bought just now,

It is reported that a prominent Iowa Hardware jobber has decided to go out of business. Well, we believe this is a good time to sell out, for goods are scarce and are in demand at high prices, and then you know it will be easy to start up again after the slump occurs. It may be a good business proposition to sell out now and begin again in the near future. It is worth considering any how, and if all Hardware jobbers should decide to adopt this policy, you might soon hear something drop,

SICKELS, PRESTON & NUTTING CO.

THE DENVER TRADE.

We are pleased to report only the most favorable and prosperous conditions prevailing, with no clouds in sight and every industry in Colorado is being more industriously and prosperously worked and developed than ever before. Crops are good, cattle bring high prices, mining pushed vigorously and smelters crowded to their fullest capacity. The result of all this on general trade is very gratifying. Our own trade is the largest for many years and our chief difficulty is to keep up stock to meet the demand. Denver jobbers in all lines report similar conditions The advanced cost of building doesn't seem to check it. On the contrary reports from the architects indicate the consideration of many new buildings, besides a large number now in course of construction. Population is certainly increasing and demand for new buildings is good. Small and medium sized houses are difficult to obtain, and there are fewer vacant ones than at any time for several years past. Advanced rents will naturally stimulate the building movement, and this, in turn, stiffens the prices of vacant lots, which are about the last item in the list to participate in the general rise in values. Investors begin to realize that this advance is inevitable, and a lively speculative realty market is one of the probable features of the near future. The century is closing with a boom. How far will it continue in the next? THE GEORGE TRITCH HARDWARE CO.

THE GRAPHITE TRADE.

The boom is still on, which means unlimited orders, with factories running four nights in the week in an endeavor to keep faith with customers who need the goods.

Raw material still shows a tendency to advance in value and prices have been materially advanced on manufactured articles. Crucibles are higher since August 1st and there has been a readjustment of prices on pencils, particularly the cheaper grades. Orders for imprint pencils are not accepted in less than twenty-five gross lots. Carpenters' pencils are higher, and some of the finer, choicer grades of prepared graphite have been marked up.

The demand continues with very little if any tendency to decrease orders, and the sales books show increased footings which could not have been imagined a year ago.

We have a very attractive exhibit at the Philadelphia Exposition, and visitors will be welcomed.

The new revised and rewritten catalogue of graphite productions is ready for any who will write for one, and we are proud of its appearance and completeness.

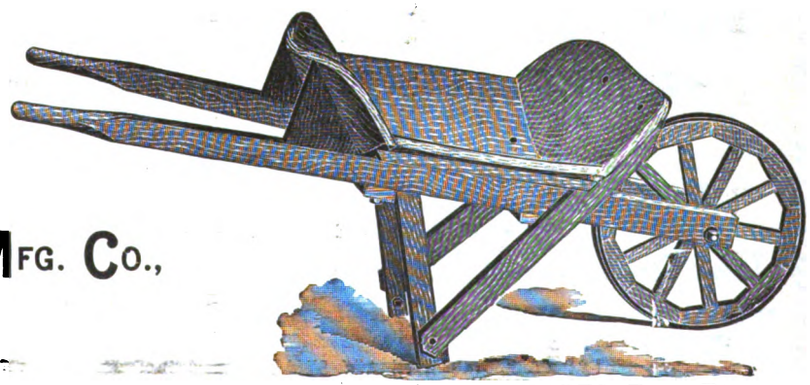
Shop Assistants.

It has, no doubt, been observed by many people, says a contemporary, that the difference in shop assistants is as conspicuous as a walking sign could well be, and as varied as the goods which they sell and try to sell; and while there is room for a number of distinct qualifications of ability, there is sufficient subject matter derived for a brief discussion, in condensing the numerous characteristics of this craft into three common classes, viz: The ordinary, the indifferent, and the practical.

The ordinary assistant is one who generally reports for duty at the last minute, and regards his position in the light of an automatic machine, or an everyday routine, without the slightest consideration for his employer. He chats with his next counter neighbor upon social topics, and feels "disgruntled" when a customer calls for his services before he gets through with his conversation; his capacity is medium, and his ambition may well be compared to a small stationary engine, which puffs in a perfunctory manner, but unable to get up sufficient steam for the execution of good work, and yet in his own lofty estimate of self accomplishments his mind becomes vague, obscured and puzzled, when he is overlooked in the line of promotion.

The indifferent assistant is as dry as a mummy, both in ideas and demonstrations, and often owes his place to mere chance. Cheerfulness and courtesy are to him or her unknown quantities. He executes his functions in the same manner as his looks and actions display, and gets rid of his customers as soon as possible. The goods done up by this assistant are generally crushed and crowded into a piece of wrapping paper—which is often too small—in a haphazard way, and the twine often opens before the goods reach their destination. It was only the other day I saw a lady in a tram car with a package of this description, and she made the remark to her companion that she would never go into —— and Co.'s shop again, because, after they sold you the goods, they did not seem to care how they wrapped them up, or how you got them home. This is the inevitable result of an indifferent assistant, whose carelessness often causes a depreciation of figures on the proper side of the ledger or balance sheet of his employer.

The practical assistant is wide awake. He takes a pride in his business; he is ever courteous, affable, willing and obliging; he takes a keen interest in his counter, as well as his employer; he is a close student of human nature, and seeks to please his customers; he studies the peculiar whims and fancies of his customers, and is a diplomat in any emergency. If his patience is tried by a cranky customer, he avoids friction by hiding his chagrin behind his good nature, and wins the plaudits of all with whom he comes in contact. This same practical assistant is a success to himself, as well as to his employer. He can command a good salary where others often fail. Merit and effort place his services at a premium. He often attains to a high position and responsibility, and frequently becomes member or head of a firm, and takes his place in the front rank as a successful business man.—*Hardwareman.*



Trade Methods in Latin-America.

In dealing with foreigners, and especially with those of Spanish origin or training, Americans might mend their manners to advantage. In this country little or no attention is paid to the exchange of courtesies in trade transactions. It is expected, when a man enters an office of business, that he state his case or proposition at once and that the answer will be brief and to the point; and when trade is conducted through correspondence the latter is made as short as possible and without any waste of words in courteous expressions.

The Latin-Americans do business in an entirely different way. They indulge in exchanges of courtesies and much preliminary palaver before they come to the point, and they are slow in closing a trade even after they have reached an agreement. Their business letters are wordy,

abounding in expressions of respect or high consideration and apparently so constructed as to put trade in the background.

The American salesman who enters the office of a Latin-American and abruptly states his business, either gets no direct response or one that gives him little encouragement; and if in business correspondence with Latin-Americans, particularly in answer to inquiries, our manufacturers and dealers follow the curt and brusque style prevalent here, they are likely to give offence or to make a disagreeable impression that may stop an order or nip a trade in the bud.

In this country "business before pleasure" is the rule, and ours would be the better way if, by putting business first and rapidly transacting it, we would take more rest or more time for pleasure; but too generally our business men rush one transaction through in order to get at the next, and so keep on until premature death gives them a rest. The Latin-Americans reverse this rule. They prefer rest and pleasure to business, and they are not disposed to let trade interfere with their social customs or be in the way of their enjoyments. In dealing with these people North Americans must take their peculiarities into consideration.—*Farm Implement News.*

A Convict's Ingenuity.

Not infrequently it happens that the inmates of prisons display a degree of ingenuity not always possessed by their more fortunate fellow men How dextrous prisoners are, even in the making of trifles, is well exemplified in some little bottles made by an inmate of the State's Prison at Windsor, Vt., who has built up a small trade in selling his products. The small price at which these bottles are sold is hardly proportionate to the time and labor spent in making them.

In these bottles have been inserted a number of objects of the size and structure which would apparently preclude their entrance through the bottle neck.

To carve over seventy-five pieces of wood, to put those pieces into a four-ounce medicine bottle, and to combine and fasten them together so that they shall assume the forms of utensils employed in everyday life, is assuredly a task which requires no little skill.

Within one of the two bottles in question a little carpenter's shop has been fitted up. Here may be seen a small shaving bench with its draw knife, a gayly colored chopping block with a hatchet half embedded in the wood, and an axe ornamented with glittering tinsel, propped against the bottle wall. Upon a saw buck in the upper half of the bottle a motley colored log, nearly severed by a cross cut saw, is mounted. At its inner end the bottle stopper is provided with two projecting arms held in sockets by means of elastic strips of rubber.

Within the second bottle a miniature well, with its windlass and bucket, is arranged; and upon the edge of the well there stands a wooden goblet. In each corner of the bottle a delicately whittled tree has been placed. From tree to tree runs a little chain formed of colored pieces of wood, the cutting of which was no doubt the work of days. The stopper of the bottle is provided with four projecting arms. The manner in which these arms are locked in place constitutes one of the most remarkable features of the work. To the inner ends of the arms strings have been attached and passed up through a central passage running longitudinally through the stopper. By pulling the strings the arms would naturally be forced against the stopper; after having been thus pulled into place, the arms were permanently held by gluing or cementing the strings to the stopper.

One naturally asks, How were all these numerous pieces inserted? The pieces of wood are all smaller than the neck of the bottle, and only the ingenious manner in which they have been combined and fastened together gives to each object its particularly large size. The separate pieces were first dipped in glue and then put in place by means of a long and slender pair of wire pliers.

These curious bottles are remarkable for the great patience required in fashioning each piece, and for the delicacy of touch and deftness necessary in placing the parts in their proper positions —*Scientific American.*

The largest advertisers in the world are patent medicine men. Some of them invest even as much as seventy-five per cent. of their yearly revenues in advertising. One of the largest apvertisers whose wares are advertised all over the globe is Beecham. In his advertising empire the sun never sets. His yearly appropriation for advertising is stated to be $1,250,000. He does not use large space, but large territory. His ad. can be seen in nearly all papers published in English-speaking countries. He is also advertising in Sweden and Norway, Denmark, France and Roumania. The largest general advertiser in the United States is the Centaur Company, with about $500,000 a year, Sarsaparilla-Hood with about the same amount, Dr. Pierce, of Buffalo, with about $300,000; Lydia Pinkham, about $250,000, Sarsaparilla-Ayer with $250,000, Brent Good (Carter's Little Liver Pills) about $200,000, Scott & Bowne with $250,000. There are about 250 advertisers using up a yearly appropriation of $100,000 to $150,000, among them the Sterling Remedy Co., Postum Cereal Co., Frank Stuart (Dyspepsia Tablets), California Fig Syrup, Warner's Safe Remedies, Pyle's Pearline, Cuticura, Pond's Extract Co., Sapolio. There are at least 500 advertisers spending from $25,000 to $50,000 a year to secure business from every part of the country.—*Mail Order Journal.*

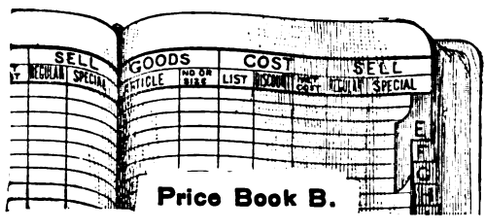
HARDWARE PRICE BOOKS.

Arranged by R. R. WILLIAMS, Hardware Editor of The Iron Age.

These Price Books are made in a variety of sizes and styles adapted to pocket, store or desk use, and are specially arranged to meet the requirements of the Hardware and Metal trades. They are printed on paper of superior quality and bound in grain seal leather.

A



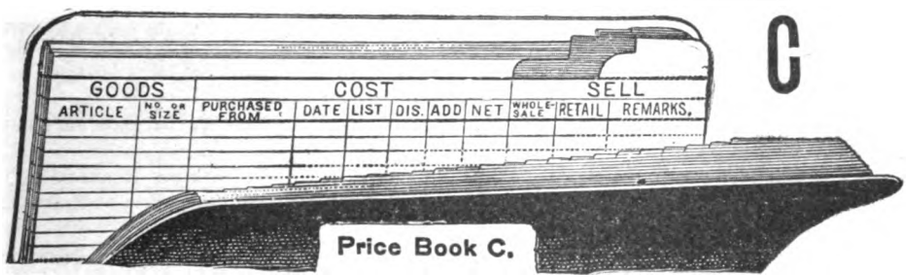
Price Book A.

Columns are provided for the name and number or size of goods, for noting from whom purchased, date of quotation or purchase, list and discount, and for entering freight expenses. Under the heading of selling prices, the regular and any special price or remarks in regard to the goods are given place. ***Size of page, 4 x 7 inches.***

FOUR EDITIONS:

A, 200 pages,	$1.00	**A 2**, 400 pages,	$1.50
A F, 200 pages with flap,	1.25	**A F 2**, 400 pages with flap,	1.75

B



Price Book B.

In this book each page is complete in itself, and the record of prices does not, as in Book A, run across two pages. Thus it accommodates a larger range of goods with much less detail in the record. By the use of familiar abbreviations is sufficiently large for the convenient and concise record of prices. ***Page, 4 x 7 inches.***

FOUR EDITIONS:

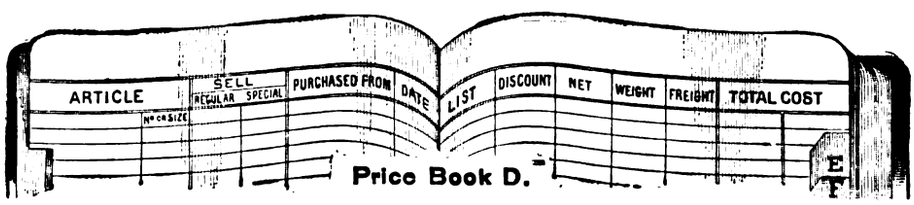
B, 200 pages,	$1.00	**B 2**, 400 pages,	$1.50
B F, 200 pages with flap,	1.25	**B F 2**, 400 pages with flap,	1.75

C

Price Book C.

The headings in Book C run across the top, in a line parallel with the hinge. The details of weight and freight contained in Book A are omitted, and a single column headed "Add" given for the insertion of freight or other expenses. Under the selling prices space is left for the wholesale price, the retail price, and for remarks. ***Page, 4½ x 7¾ inches.***

FOUR EDITIONS:



C, 200 pages,	$1.00
C F, 200 pages with flap,	1.25
C 2, 400 pages,	1.50
C F 2, 400 pages with flap,	1.75

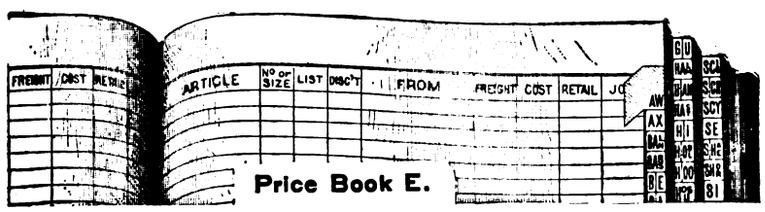
Suitable for desk and store use, and for salesmen on the road. A number of pages at the back of the book are arranged for memoranda. ***Page, 5¼ x 8 inches.***

FOUR EDITIONS:

D, 200 pages,	$2.00
D F, 200 pages with flap,	2.50
D 2, 400 pages,	3.00
D F 2, 400 pages with flap,	3.50

D

Price Book D.



MULTIPLE INDEX PRICE BOOKS.

A special feature of these books is the index, which is arranged with special reference to the classification of Hardware Goods, each index character giving the first two or three letters of the names of Hardware articles. There is an index character to every page, enabling immediate reference to any of the contents of the book. The ease and convenience with which the books can be used is indicated in the following examples, taken from Book F:

For Augers,	turn to	AU	For Chisels,	turn to	CHI U	For Iron,	turn to IRO
" Parers, Apple	"	PA P R	" Cutlery,	"	CUT	" Irons,	" IR'S

Both E and F are made of Heavy Ledger Paper and strongly bound in grain seal leather.

RETAIL TRADE RECORD.

Hardware dealers, the country over, are requested to contribute to this page. News of new stores, changes, improvements, etc., will be gladly received, and promptly published.

New Hardware Stores.

Bloomfield, Neb.—Homer Blanchard has gone into the Hardware business.

Clinton, Kan.—L. C. Hohr has opened a Hardware store.

Curtis, Neb.—Mr. Carstenson.

Denver, Col.—The Ford Hardware Co.; capital, $10,000; Hiram E. Ellingwood, Agnes L. Reifel and John F. McKelvey.

Kenyon, Minn.—Kenyon Hardware Co.

Meriden, Kan.—Becker Bros.

Mt. Jewett, Pa.—Brenholts & Co. is the name of a new Hardware firm.

Natchez, Miss.—The Baker & Powell Hardware Co.; capital stock, $75,000. Incorporators: A. L. Baker, Seaborn McDowell, W. H. Patterson, W. D. Mounger.

Neosho, Mo.—J. M. Boyd has opened a new Hardware store.

Nelsonville, O.—The Nelsonville Hardware Co. has been incorporated with a captal stock of $8000.

Paxton, Ill.—Geo. C. Gray.

Rochester, Minn.—Frank Cook.

Rutland, Ia.—F. S. McClure has gone into the Hardware business.

Sandy Creek, N. Y.—Taylor & Co.

Seattle, Wash.—The Union Hardware Co. has been incorporated by J. Campbell and W. Campbell. Capital stock, $25,000.

Smithfield Ill.—Reynolds Bros.

Warner, Wis.—D. H. Richards has gone into the Hardware business.

Webb City, Mo. — The Franz-Howell Hardware Co. has been incorporated by E. W. Franz, F. S Howell and G. A. Buder; Hardware. Capital stock, $18,000.

Changes and Improvements.

Algona Iowa.—J. J. Anderson & Co. succeed S. A. Garlock.

Alvin, Texas.—Anderson & Son succeed McCade & Anderson.

Ashtabula, O.—M. H. Turner and Homer P. Smith succeed V. D. Latimer.

Auburn, N.Y.—A change has taken place in the Hardware firm of D. A. Smith & Co., composed of D. A. Smith, Irving W. Smith and George C. Pearson. D. A. Smith withdraws from the firm and the business will be continued by the two remaining members under the name of D. A. Smith & Co.

Birmingham, Ala.—The Estes Hardware Co. succeeds the Estes Stove Co.

Boonville, N. Y.—Chauncey W. Colton, who has conducted a Hardware and furniture business in this village, has taken as a partner William S. Hall, who has been in his employ for the past year. The new firm name will be Colton & Hall.

Bristol, Va.—The contract has been let for a new business block on Main Street. This building will have a front of sixty-two feet and will run back one hundred and thirty-five feet. It will be three stories high and will be constructed in accordance with modern plans. The building will be occupied by J. M. Barker & Co., wholesale Hardware dealers.

Cherokee, Iowa.—John and Albert Gnam succeed J. L. Wetherill.

Dalton, Mass.—John Glennon has bought the E. Williams & Co. Hardware business in the Center block, and has taken possession. In connection with the present stock he will add a full line of mill supplies.

Decatur, Ill.—Charles M. Barnett is in full possession of the C. L. Griswold Hardware store, having bought that establishment on July first last. The invoicing of the stock has just been completed. Mr. Barnett will continue to conduct the business at the old stand.

Douglas, Mich.—L. W. McDonald has purchased the interest of his partner, Geo. H. Plummer.

Easton, Minn.—Feis & Bachtle succeed Migeles & Linder.

Edna, Texas.—Joseph Gerst has sold his stock of Hardware to N. N. McDonald.

Eveleth, Minn.—J. C. Poole's Hardware store is now located on the new site.

Farmland, Ind.—J. W. Diggs succeeds Harris & Diggs.

Greensboro, N. C.—The business of the Odell Hardware Co. has outgrown the present quarters of this firm, and they have rented the Doggett building next door, which will be enlarged and improved.

Greenview, Ill. — Tripp Bros. succeed James Tripp & Son.

Hastings, Minn. — Johnson & Ereiner have purchased the Hardware stock of the Hastings Hardware Co., possession to be given Oct. 20th.

Hixton, Wis. — C. A. Adams succeeds Winner.

Hubbard, Iowa.—Conrad Blom buys an interest with J. V. White.

Hudson, N. Y.—The well-known Hardware firm of J. C. Rogerson & Son has changed its name to J. C. Rogerson & Co., James McShane being taken into partnership with Cornelia M. Rogerson and James C. Rogerson.

Humboldt, Kan.—Broucher & Johnson succeed J. W. Holtschmidt.

Jolly, Iowa.—Mr. Pyle succeeds S. J. McKee.

Kent, Ill.—W. E. Ankerbrand has sold his Hardware and implement business to Frank Kleckner, who will take possession November 1st.

Knobnoster, Mo.—John Gillum succeeds W. H. Lee.

Latah, Wash.—W. H. Taylor succeeds J. M. Nelson.

Lebanon, Ind.—Elmer Brenton succeeds W. A. Bell in the Castle Hall Hardware Store.

Minneapolis, Minn.—Olsen & Petersen have purchased the A. Rennebohm Hardware and implement stock at Kenyon, Minn.

Mora, Mo.—D. Wahnken is erecting a new store.

Nacogdoches, Texas.— Lucas & Burke, Hardware implements, etc., have moved into larger headquarters.

New Castle, Ind.—Orvill O. Carpenter and Howard Henely succeed Monroe & Holloway.

Princeton, Ill.—Swan Linn succeeds Byron Swarthout.

Raleigh, N. C.—The firm of Irby & Young has been dissolved by mutual consent, B. Irby retiring from the business and being succeeded by W. J. Young. The firm will now be S. M. & W. J. Young.

Roxboro, N. C.—Long & Woody succeed Lukin & Long.

Scottsville, Ky.—S. J. Lovelace succeeds Lovelace & Boyd.

Sheridan, Ore. —J. H. Eakin succeeds Eakin & Lawrence.

Temperance, Mich.—Mr. Ward, of Ward & Ansted, has purchased Mr. Ansted's interest in the firm.

Thomasville, Ga.—W. L. Ball succeeds B. D. Fudge.

Van Buren, Ohio.—Nelson Heistand succeeds Alex. Mitchell in the firm of Rettig & Mitchell.

Waterville, Mich.—J. L. Kelly succeeds J. Pattenaude.

Wonewoc, Wis.—The N. C. Holmes Hardware Co. succeeds Holmes, Potter & Holmes

Fires in Hardware Stores.

Akron, Ind.—The Hardware stock of Samuel Wilholt has been destroyed by fire. Loss, $2000.

Centralia, Miss.—The Hardware store of Hayes & Garrick has been destroyed by fire.

Charles City, Iowa.—J. Wiloch's Hardware store has been destroyed by fire. Loss, $8000; insurance, $4000.

Farragut, Iowa.—A. Campbell's Hardware stock and store were recently destroyed by fire.

Laurium, Mich.—The Laurium Hardware Co., stock, etc., damaged by fire at a loss of $3000.

Serena, Ill.—Halladay's Hardware store has been destroyed by fire. Loss, $5000.

Reading, Mich.—The Hardware store of Hartwell & Doig has been destroyed by fire. Loss, $5000; partly insured.

Madison, Ohio.—The Toop Hardware Co.'s stock has been destroyed by fire.

Robard, Ky.—Eakin's Hardware store was recently destroyed by fire.

St. Johnsbury, Vt.—C. H. Gossl's Hardware store has been considerably damaged by fire and water. The flames were confined to the upper portion of the building, but the water soaked everything in the store proper. Property was insured.

Burglaries in Hardware Stores.

Essex Junction, Vt.—W. S. Teachout, cutlery.

Lynn, Mass.—Brockway & Smith, revolvers.

Rockwall, Texas.—J. R. Duma, $100.

South Boston, Va.—R. A. Penick & Son, $150.

HARDWARE MANUFACTURERS' RECORD.

Hardware manufacturers, over the country are requested to contribute to this page News of new factories or companies, changes, improvements, etc, will be gladly received, and promptly published.

New Companies, Etc.

Camden, N. J.—The Iron & Steel Foundry Supply Co. has been incorporated by Thomas F. Moffitt, R. D. Wells, M. L. Filley, A. E. C. Clothier, Joseph Clark and M. S. Moore; manufacture foundry supplies, etc. Capital stock, $1,500,000.

Camden, N. J.—The Horner Sanitary Sink Co. has been incorporated by S. E. Horner, C. E. Woodruff, Charles D. Carney, J. M. Fogelsanger and John H. Applegate; manufacture plumbing and sanitary fixtures. Captal stock, $125.000.

Carthage, Mo.—The Schuler-Tuttle Implement Co. has been incorporated by W. S. Schuler, J. C. Tuttle and S. O. Morrow. Capital stock, $5000.

Chicago, Ill.—The Marvin-Smith Co. has been incorporated by F. S. Smith, A. C. Smith and C. V. Barker; manufacturing and dealing in tools, machinery and implements. Capital stock, $75,000.

Chicago, Ill.—The Industrial Tube Co. has been incorporated by H. W. Murray, F. F. Oviatt and F. W. Wilson; manufacturing tubing and Hardware specialties. Capital stock, $20,000.

Gaffney, S. C.—The Cherokee Foundry & Machine Works has been organized with T. H. Littlejohn, president; L. Y. Randall, vice-president; L. D. Snead, secretary-treasurer, and L. Y. Randall, general manager. The company will secure location and erect all necessary buildings for its works, installing the most approved machinery.

Jersey City, N. J.—P. D. Randall & Co. has been incorporated by Peter Whitney, David M. Bressler and Louis G. Hart; manufacture bolt cutters. Capital stock, $10,000.

Jersey City, N. J.—The Gear Hydrant & Supply Co. has been incorporated by Edward B. Merrill, Oliver T. Hungerford, Theodore L. MacIntyre and Joseph Tucker; manufacture hydrants, valves, stopcocks, etc. Capital stock, $1,000,000.

Jersey City, N. J.—The American Brass Works have been incorporated by Peter Whitney, David M. Bressler and Louis G. Hart; manufacture brass, etc. Capital stock, $300,000.

Pittsburg, Pa.—The W. J. Carlin Co. has been incorporated by W. J. Carlin, P. J. Brennan, J. C. Richards, W. C. Scott and W. E. Kennedy; manufacturing iron and steel. Capital stock, $5000.

Pittsburg, Pa.—The Pittsburg Stove & Range Co. has been incorporated by W. W. Colville, C. P. Walker, A. Davis, G. W. Henderson and W. W. Ford; manufacturing iron and steel. Capital stock, $1,000.

Pontiac, Mich.—The Pontiac Axle Co. has been incorporated by R. D. Scott, E. M. Murphy, H. C. Hamilton, L. L. Dunlap, and A. Parker; manufacturing and sale of axles, springs etc. Capital stock, $50,000.

Sharon, Pa.—The Sharon Boiler Works has been incorporated by R. G. Morrison, P. L. Kimberly, E. A. Wheeler, W. W. Shilling and J. L. Fleming; manufacturing iron and steel. Capital stock, $50,000.

Trenton, N. J.—The Birdsboro Iron & Steel Co. has been incorporated by Charles A. Porter, Charles K. Crossan and William C. Martin; to manufacture iron and steel of all kinds. Capital stock, $3,000,000.

Wilmington, N. C.—The White Patent Axle & Hub Co. has been incorporated by Franklin P. White, John B. Mercer, B. F. Keith and Isaac Hogeland; for the manufacture of the White patent axles, etc. Capital stock, $14,000.

Changes and Improvements.

Carthage, Mo.—The Parrott Stove & Range Co. have moved their foundry and shop from their quarters at the corner of Main and Mound Streets to their new building just north of the woolen mills.

Centralia, Ill.—The Centralia Iron & Nail Works have certified to a dissolution.

Chattanooga, Tenn.—The Roane Iron Co. of Rockwood will erect a new iron furnace near Chattanooga.

Chicopee, Mass.—The J. Stevens Arms & Tool Co. are making excavations for a new wheel pit, which will be considerably larger and 12 feet deeper than the old one. The river bed at this point is composed of slate and it has been found necessary to use a steam drill. When completed the new pit will contain two wheels.

Fort Wayne, Ind.—A building permit has been issued to the Withington Handle Co. for a one-story brick factory building, in Taylor's sub-addition, for $5000.

Hartford, Conn.—A certificate of increase of capital of the Waterbury Tool Co. has been filed in the State Secretary's office. The increase is $2300.

Indianapolis, Ind.—The Home Stove Co. have moved their manufacturing establishment from Greenfield to this city. The new plant is at Kennedy Avenue and Sharp Street, and will be put in operation immediately. Two hundred men will be employed. The new molding room is 200x250 feet, and the finishing room 60x360 feet.

Morris, Ill.—The Coleman Hardware Co. have recently built a new addition to their foundry, 100x55 feet, and have also added to their machine shop an addition of 80x42 feet. As both of these buildings have been fully equipped with new, up-to-date machinery, they hope to be able to fill orders with a greater degree of promptness than ever, and are prepared to be favored accordingly.

New Haven, Conn.—The National Wire Mfg. Co., of Boston, is building at a cost of $12,000, an addition to the mill it recently purchased from the E. S. Wheeler Co. On October 1st the company will employ 300 hands, which is double its present force.

Pittsburg, Pa.—The A. T. Stewart Co. are erecting a plant at Carnegie for the manufacture of plows and pumps.

Pottstown, Pa.—Ellis & Lessig, nail factory and plate mill, has been extensively repaired and resumed operations.

Reading, Pa.—The Reading Iron Co. has begun a new iron building 120x160 feet, also another mill 40x68 feet.

Rockford, Ill.—The Rockford Screen Door Co. have certified to an increase in capital stock from $10,000 to $75,000.

Scranton, Pa.—Work has been begun on the superstructure of the Scranton Nut & Bolt Works. The masonry and brick work have been completed and the wood work will be pushed rapidly to completion.

Sharon, Pa.—The Continental Iron Co. has secured a lease on the Stewart Iron Co.'s muck bar mill and will put the plant in operation, giving 200 men employment.

Wheeling, W. Va.—The Laughlin Nail Co. will add a shovel plant to their mills. Part of the machinery to be used in the new department will be moved from Uniontown, Pa., to Wheeling.

Youngstown, Ohio.—Contractor Andrew Reed has been engaged to move some old buildings at the plant of the Ohio Steel Co. in order to make room for the shifting of tracks, so that two new blast furnaces may be erected by the company. This plant, which is destined to become one of the largest steel producing concerns in the world, has already finished one new furnace, and is just completing another. In addition to these, two more are reported as being planned, and the work is to start on them at once. This will make four furnaces erected on the grounds inside of a year.

Recent Fires.

Copemish, Mich.—Chapman & Sergeant's bolt factory destroyed by explosion, at a loss of about $5000.

Kansas City, Mo.—Fire has destroyed the Bales block, located at the northeast corner of Monroe and Twelfth Streets. The Herrick Refrigerator & Mfg. Co., which occupied the greater part of the building, was burned out, all its machinery, material and finished stock being destroyed. The Herrick Co.'s loss is estimated at $15,000, partially covered by insurance.

Louisville, Ky.—Bridgeford & Co., stove foundry, damaged by fire, at a loss of about $200,000; insured for about $100,000.

Miscellaneous.

Lynchburg, Va.—The Lynchburg Plow Co. have received, through their export agents in New York, an order for chilled plows to go to Melbourne, Australia. Though this order is quite a large one, their customers claim that it is small in comparison with what will follow.

Springfield, Mass.—One of the largest contracts of the season, for 125,000 emery wheels, has been placed in Chicago by the Clizbe Bros. Mfg. Co., of that city, manufacturers of the Star sickle and tool grinder, with the Hampden Corundum Wheel Co., of this city, on merit, they having had the contract for last season's supply.

Portland, Me.—The Atlantic Automobile Mfg. Co. incorporated for the purpose of dealing in self-propelled vehicles, with $500,000 capital stock, of which $60 are paid in. The officers are: President, Horatio Adams, of Kingston, Mass.; treasurer, Enos H. Reynolds, of Brockton, Mass.

San Francisco, Cal.—The California Cycle Co. has been incorporated by S. Green, W. Levy, B. M. Gunzberger, J. O. Malley and M. Lichenstein; manufacturing and dealing in bicycles, automobiles, etc. Capital stock, $5000.

San Francisco, Cal. — The California Wheelmen's Protective Union has been incorporated by C. M. Smith, L. D. Richards, C. J. George, A. C. Harper, C. E. Hall; to buy, sell, house and store wheels, etc., and to protect owners from loss of same by theft. Capital stock, $25,000.

San Francisco, Cal.—The Wilkins Automobile Co. has been incorporated by J. M. Wilkins, Art Wilkins, W. Neumann, Alfred Fuhrmann and Robert Jordan, to make and sell automobiles.

Seaford, Dela.—I. N. Williams, sporting goods, Hardware, etc., business purchased by W. S. Burton, who will continue same at old stand.

Springfield, Ill.—The Diamond Rubber Co., Akron, Ohio, with a capital stock of $500,000, has been licensed to do business in Illinois, with a capital of $15,000.

Sturgis, Mich.—Goff & Favorite, succeeded W. T. Favorite.

Trenton, N. J.—The United States Motor Vehicle Co. has been incorporated by Cornelius J. Field, Willard P. Reid and Frank Harvey Field. Capital stock, $1,000,000.

Vineland, N. J.—Bouten & Bateman are establishing an automobile manufactory.

Changes and Improvements.

Bristol, Conn.—Wm. L. Neubauer has sold out.

Detroit, Mich.—The Sprocket Chain Mfg. Co., dealers in refined malleable castings, have changed firm name to Buhl Malleable Co., same place.

Gilman City, Mo.—R. W. Lumpkins, Hardware, sporting goods, etc., stock purchased by G. M. Salsbury, who will conduct same.

Greenwich, N. Y.—Charles Weston has been succeeded by Cornelius Mealey.

Kimball, S. D.—The Ochsner Hardware Co., Hardware, sporting goods, etc., have moved into larger quarters.

Lisbon Falls, Me.—R. S. Whitney will add automobiles.

Malden, Mass. — W. E. Chambers has closed his store.

Marion, Ohio.—Chas. Kaufman has been succeeded by J. G. Blum.

Millville, N. J.—Harry McQuilkiln has purchased the shop at Second and Broad Streets, formerly owned by D. Hand.

Ottawa, Kan. — The Franklin County Hardware Co., Hardware, sporting goods, etc., have purchased business of the Topping Hardware Co., and will hereafter conduct same.

Palmer, Mass.—E. D. Tufts has relinquished the active management of his store and placed Frank Thayer in charge.

Piqua, Ohio.—The Piqua Handle & Bent Works, employing 170 men, will shortly move to Columbus, Ohio, because of the superior shipping facilities.

Springfield, Mass.—The Springfield Drop Forging Co. have put a new bicycle wrench on the market.

Toledo, Ohio.—The Maumee Cycle Co.; plant sold at Sheriff's sale, for $6750, to F. J. Cheney.

Recent Embarrassments.

Lowell, Mass.—Geo. H. Batchelder has assigned.

Rockford, Ill.—Rockford Cycle Co., involuntary petition in bankruptcy.

Washington, D.C.—The New York Cycle Co., Isaac Katzen, manager, filed petition in involuntary bankruptcy. Liabilities reported at about $6500.

Recent Fires.

Berea, Ohio.—S. Romp, destroyed; small insurance.

Beverly, Mass.—Aveney's bicycle store caught fire from an exploding lamp. Damage about $200.

Brockton, Mass.—Snow Bros. damaged by smoke and water.

Cedar Rapids, Iowa.—Norris & Loring; damage slight.

Cleveland, Ohio.—A disastrous fire broke out in the polishing room of the factory of the Hoffman Bicycle Co. Before the fire was gotten under way the damage to the interior, both by fire and water, was very great. Fortunately, not very much stock was on hand, and the machinery was the principal sufferer. In the stock, polishing, assembling and frame rooms the damage was very severe. It is estimated that the loss on the building will amount to about $6000, and on the stock and machinery to nearly $40,000. Of this about $37,000 is covered by insurance.

Lexington, Ill.—Hineman's bicycle establishment has been destroyed by fire.

Pekin, Ill.—Frank Albertson, severely damaged.

Portland, Ind.—The Albany Mfg. Co., seamless tube mill, has been destroyed by fire, at a loss of $40,000.

South Renovo, Pa.—The Harter Bicycle Co. destroyed. Partially insured.

Stoughton, Mass.—Chapman & Sons Co., slight blaze, loss small.

CARY'S PATENT
HINGE
AND
HASP

Designed Especially for
Fruit Crates, Milk, Egg, Cracker and other styles of Boxes, requiring a hinged cover.

CARY MFG. CO.,
19-21 Roosevelt St.,
NEW YORK.

SAMPLES BY MAIL.

IN our patent loop joint hinge, one part of the loop is made rigid to one-half of the hinge, making the strongest, neatest and best hinge for the purposes mentioned.

Our patent fastening plate and catch which go with the hasp are so perfect in their construction that the catch never gets loose from the plate, as is often the case with others on the market.

When desired, we furnish our hasp and catch with a small hole through each, so that a wire can be inserted and then sealed by use of a lead seal.

"OF VALUE TO ANY ONE WHO IS BUYING."

Brown & Wales, Boston, Mass. [*Iron, Steel, Heavy Hardware, etc*]: I have looked over carefully almost every edition of your journal I have received, and have been much pleased with the information I have found therein. Although our line of business is more in iron, steel and metals and wholesale heavy Hardware, still to a dealer who handles mostly shelf and heavy Hardware, your paper would be a valuable addition to his business and fill the wants of any dealer in the above line. A trade paper well conducted is certainly of great value to any one who is buying to sell goods in this line.

Wm. Quincy Wales.

"INCREASED IMPORTANCE TO THE TRADE."

Carlin & Fulton, Baltimore, Md. [*Wholesale Hardware*]: It is with great pleasure that I add a few words to the many compliments which you no doubt are frequently receiving testifying to the increasing importance of your Journal to the Hardware trade. Its advertising columns are of undoubted advantage to both inventors and manufacturers and of the greatest interest to the dealers throughout the country. Its trade reports, its discussions on varied topics and its editorials, are all well worth perusal by everyone in any way identified with the craft, and wishing you continued success, I remain,

George L. Irvin.

PRICES CURRENT.

The prices noted in this Prices Current are intended for the Hardware trade only, and for such quantities as are usually purchased by retail dealers. They are carefully revised and represent quotations at which purchases can be made. Very small quantities, and broken packages, frequently make higher prices necessary.

Subscribers are requested to notify us of any discrepancies, as we desire to make this department of our paper worthy of their constant attention.

The list prices, from which discounts are given, will always be furnished th dealer upon request, by the manufacturer quoted.

The Brownfield Buyer's System

Is a practical, economical and efficient method of preserving Catalogues, Price-Lists, Samples, and printed or written memoranda relative to your subjects of purchase or business in a convenient and accessible form for quick reference. It will interest you. Full particulars for the asking. Write to

THE FOLDING PAPER BOX CO., South Bend, Ind.

"A PROFITABLE MEDIUM TO ADVERTISERS."

Gilbert & Bennett Mfg. Co., Chicago and New York. [*Wire Goods*]: You have reason to be proud of HARDWARE's success both as a journal of interest and of usefulness to your readers, and as a profitable medium to the numerous advertisers. From the fact that our card has been steadily published in its columns from the first number, it must be concluded that we have found you a satisfactory medium.

"SHOULD MISS IT VERY MUCH."

Morley Bros., Saginaw, Mich. [*General Hardware*]: We receive HARDWARE every issue, and find it of such interest as to oblige us to look through its pages quite carefully, and note with considerable interest the items you publish. It is quite an aid to the writer in his branch of the business, and we wish to say, that we should miss your paper very much indeed, if we did not receive it. W. L. Sandford.
